GOODS AND SERVICES INFORMATION

For Unmanned aerial airborne instruments, namely, drones and drone systems, for remotely capturing digital images of buildings, surrounding properties, and/or geological surfaces and storing the same on information servers for remote access and review by others over an information network

International Classes 12 - Primary Classes **US Classes** 19, 21, 23, 31, 35, 44 **International Class Title** Vehicles **First Use** Mar. 19, 2021 **In Commerce** Jul. 05, 2023

For Scientific instruments for measuring rain and snow accumulations on building rooftops at specific locations; Scientific instruments mountable on building rooftops or on civil structure surfaces for measuring conditions at specific locations including temperature, atmospheric pressure, vibration, water and snow depth, and windspeed and wind direction; electronic instruments and systems comprised of computer hardware, sensors and gauges for receiving and processing information, signals and other forms of intelligence from various sensors and/or networks supplying information, for the purposes of modeling, predicting analyzing and/or forecasting conditions and trends in environmental, geological and/or structural conditions at GPS specified regions or locations; electronic communication and networking systems, devices and apparatus configured for collecting digital information, signals and other forms of intelligence using sensors, and transmitting to remote information servers for storage, processing and generation of responses

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus **First Use** Mar. 19, 2021 **In Commerce** Jul. 05, 2023

For Platform as a service (PaaS) featuring computer software applications and cloud-based systems for GPS tracking and remote monitoring of building and civil structures and systems, collecting information, signals and other forms of intelligence from these buildings and civil structures, and reporting on building rooftop conditions, and maintenance requirements including clearing of drains, snow removal, and documentation weather conditions on specific GPS-tracked rooftop surfaces; Platform as a service (PaaS) featuring computer software applications and cloud-based systems for GPS tracking and remote

monitoring of building and civil structures and systems, collecting information, signals and other forms of intelligence from these buildings and civil structures, and reporting on building conditions, including rooftop conditions, and maintenance requirements including clearing of drains, snow removal, and documentation of weather conditions on specific GPStracked rooftop surfaces; Platform as a service (PaaS) featuring computer software applications and cloud based systems for measuring, monitoring and reporting on rain and snow accumulations on building rooftops at specific locations; Platform as a service (PaaS) featuring computer software applications and cloud-based systems for measuring conditions at specific locations including temperature, atmospheric pressure, vibration, water and snow depth, and windspeed and wind direction; Platform as a service (PaaS) featuring computer software applications and cloud-based systems for displaying and marking-up digital images of buildings, surrounding properties, and/or geological surfaces captured by unmanned aerial airborne instruments, including drone systems, and stored on information servers for remote access and review by others over an information network; Platform as a service (PaaS) featuring computer software applications and cloud-based systems for displaying information and other forms of intelligence collected from various information sensors and/or networks supplying information, for modeling, predicting, analyzing and/or forecasting conditions and trends in environmental, geological and/or structural conditions at a GPS-specified region or location; Platform as a service (PaaS) featuring computer software applications and cloud-based systems for delivering property management services to others using GPS-tracking and cloud-based information monitoring, intelligence collection and reporting systems, namely, for remote monitoring of building and civil structures and systems, collecting information, signals and other forms of intelligence from these buildings and civil structures, and reporting on building conditions, including rooftop conditions, and maintenance requirements including clearing of drains, snow removal, and documentation weather conditions on specific GPS-tracked rooftop surfaces
