Organization: FaQopin LLC

Redacted Comment

According to the patent office I cannot patent or even apply for a patent for my energy invention which is very very close to perpetual energy you just can't see it and it is very very simple how can you sit there and say I have to build a prototype so everybody could see it and copy it like the Chinese who will copy it immediately and then bootleg it on the market and it's under sell me and I'll never be able to sell it because they're going to underbid me because you can't protect me or my invention for America I have no idea what the heck you guys are doing you say you want unlimited energy and I have an invention I believe will work I know it'll work it's just simple math please make it to where you can actually submit an application for a patent for perpetual energy without a prototype my name is Franklin Rogers CEO of faqopin.LLC phone number 216-280-0555
