International Registration 1199648 **International Registration Date** Jun. 27, 2013

GOODS AND SERVICES INFORMATION

For Drive trains for vehicles and parts therefore; electric motors and parts thereof for land vehicles; hybrid drives and hybrid motors for vehicles; clutches and shifting clutches for land vehicles; devices for power transmission, namely, vehicle power train mechanism comprised of clutch, transmission, drive shaft and differential; internal combustion engines for land vehicles; internal combustion engines for experimental purposes with and without exhaust turbochargers, having exhaust gas recirculation and having storage of combustion gas for land vehicles; shifting clutches for land vehicles

International Classes 12 - Primary Classes **US Classes** 19, 21, 23, 31, 35, 44 **International Class Title** Vehicles

For Drive trains and parts therefore other than for land vehicles; internal combustion engines other than for land vehicles; internal combustion engines other than for land vehicles for experimental purposes with and without exhaust turbochargers, having exhaust gas recirculation and having storage of combustion gas; electric motors and parts thereof other than for land vehicles; hybrid drives for motors and hybrid motors other than for land vehicles; clutches and apparatus for power transmission other than for land vehicles; compressors, namely, electric compressors, air compressors for machines; pressure regulators being parts of machines; flow rate regulators being part of machines

International Classes 7 - Primary Classes **US Classes** 13, 19, 21, 23, 31, 34, 35 **International Class Title** Machinery

For Organization and performance of further training courses and classes for company personnel and guest engineers in the field of drive chain development and the development of drive chain components, in the field of engine design, research, and development, and in the field of measurement technology, all above-mentioned courses include shows of cinema and video films, as well as computer animations demonstrations; combustion photography and high-speed photography in combustion chambers

International Classes 41 - Primary Classes **US Classes** 100, 101, 107 **International Class Title** Education and Entertainment

For Maintenance of drive chains of vehicles and parts thereof; maintenance of internal combustion engines and vehicles; maintenance of electronic measuring, testing and monitoring devices and of electronic measuring, testing and monitoring apparatus and instruments

International Classes 37 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Construction and Repair

For Fuel cells, batteries and accumulators for vehicles; computer programs, software and control programs for the operation and testing of internal combustion engines, for the study of exhaust gas emissions, their occurrence and reduction, and for strains, stresses, oscillations, noise generation, noise propagation, and noise emission; computer programs and data media with stored software for external flow of moving parts and bodies, in particular of land, air, and sea vehicles; computer programs and data media with stored software for the study of flow processes and combustion processes and fuel-mixture generation and charging processes and fuel-mixture laminating processes within an engine, for flows in enclosed spaces, in particular air conditioning; computer programs and data media with stored software for the simulation of thermodynamic processes, flows, temperature and pressure curves, the temperature distribution in solid bodies, in particular in components of internal combustion engines and their assemblies, of combustion and detonation procedures; computer programs and data media with stored software for the evaluation and development of engines, gear drive, transmission topologies, vehicles and operational strategies; computer programs and data media with stored software for the qualitative and quantitative assessment of the exhaust of engines and vehicles; computer programs for the assistance of the test engineer during the performance of the calibration of engines and vehicles; computer programs and data media with stored software for diagnostic and monitoring apparatus and instruments for vehicle batteries and fuel cells; computer programs and data media with stored software for the assessment and development of electric motors and hybrid drives; diagnostic and monitoring apparatus and instruments for vehicle batteries, for externally and internally driven internal combustion engines; electric actuators; sensors, measuring probes and apparatus for measuring, probing and monitoring the concentration of electrolytes, the hydrogen ion concentration, the oxygen partial pressure, the carbon dioxide partial pressure; fiber optical sensors and instruments for simultaneous measurement of various parameters in the nature of oxygen partial pressure, carbon dioxide partial pressure, hydrogen ion concentration, concentration of electrolytes; electrochemical electrodes; micro electrodes; micro-optical and micro-electrochemical sensors with evaluation electronics, not for medical use, namely, for industrial research and testing, in particular for exhaust analysis; microwave interferometers; microwave sensors; optical sensors; reference electrodes; capillary electrodes; electrode testing devices, not for medical use, namely, for industrial research and testing; calibrating apparatus and instruments for calibrating optical, microwave, micro-optical and micro-electrochemical, and fiber optical sensors and measuring devices; devices for measuring the composition of

exhaust, of pressure vibrations in liquids, of structure-borne noise and airborne noise; measuring and evaluation apparatus and instruments for the evaluation and analysis of drivability of vehicles; measuring and evaluation apparatus and instruments for the thermo-dynamical evaluation of combustion engines; measuring apparatus and instruments for determination of the resonance behavior of piezoelectric pressure sensors; piezoelectric resonators; piezoelectric and electro-acoustic components, namely, piezoelectric pressure sensors, piezoelectric resonators, piezoelectric switches for use in test stands and vehicles; measuring apparatus, measuring instruments and evaluation units for studying flow phenomena in liquids and gases; electro-optical measuring apparatus and instruments, velocity measuring apparatus and instruments, torsional vibration measuring apparatus and instruments and laser-optical measuring instruments for studying flow phenomena in liquids and gases; acceleration sensors; pressure sensors; flow rate sensors; electric charge amplifiers in the nature of power amplifiers; apparatus for testing liquids in the nature of electronic liquid level measuring devices; velocity regulators; high-pressure sensors; cadence calculators, namely, frequency meters; capacitive distance measuring apparatus and instruments for top dead center of piston engines; capacitive and inductive measuring electrical transducers; force encoder; position encoder; angle marker generators in the nature of laser-beam emitting device which projects angles; densitometers for use in industrial material testing; temperature measuring devices not for medical use; test beds, test machines, test device, testing apparatus and testing instruments for development of engines, components of vehicles, namely, drive trains and gear systems, alternative fuels and lubes and for the testing of air plane components; partially and completely automatic engine test stands; force measurement gauges and equipment, namely, power brakes for test stands; monitoring apparatus and instruments for the operating state of internal combustion engines, namely, testing equipment for testing emissions, pressure, temperature, fuel consumption and engine speed; monitoring apparatus and instruments for the controlling of combustion engines, instruments and devices for determining the concentration of a material contained in a substance, namely, concentration meters; static and dynamic calibration facilities for high-pressure sensors, namely, calibration sensors; precision measuring devices for determining internal diameters on pipes

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Vehicle development, engineer work, expert work and evaluations in the field of development, testing and analysis of engines and transmissions; design and development of methods, processing and software for calibration of engines and of land, air, and sea vehicles; research and development of new products for others in the nature of machines and apparatus, test stands, dynamic test stands, simulation test stands, cold test stands, manufacturing test stands, testing devices, measuring devices, and experimental equipment for machines and work machines; scientific analysis and study in the field of the influence of engine components and of exhaust treatment components; scientific analysis and study of data status of electronic control units (ECU); scientific analysis and study of the influence of the environmental effect and various fuels and lubricating oils on the resulting particle emissions and gaseous emissions in general; scientific analysis and study of the influence of fuels and lubricating oils on exhaust emissions and on the abrasive and corrosive wear of engine components and resulting particle emissions; scientific analysis and study of oil consumption based on the metallic components of particle emissions; development of internal combustion engines, experimental engines and parts thereof; product development in the nature of component development for internal combustion engines and other types of machines; development of low-emission combustion methods and lean-fuel engines and exhaust treatment systems and systems

operated by them; development of gear drives and transmission topologies; development of fuel supply devices for engines for liquid, solid, and gaseous fuels and for injection motors for standard fuels and alternative fuels; development of drive assemblies and drive strategies, of fuel systems for engines for liquid, solid, and gaseous fuels and for injection motors for standard fuels and alternative fuels; development in the field of noise reduction in engines and transmissions and overall systems; development of hybrid motors, hybrid drives and electro motors of vehicles and parts thereof; development of fuel cells, batteries and accumulators, creation and development of computer programs, software and control programs for the operating and testing of internal combustion engines and, for study of exhaust gas emissions, their generation and reduction, and for stresses, strains, vibrations, noise generation, noise propagation and noise radiation; development of computer programs for flow phenomena and combustion processes inside the engine, and for processes of mixture-formation and charging processes and/or processes of mixture-layering; development of computer programs for external flows around moving parts and bodies, especially land, air, and water vehicles, for flows in enclosed spaces, especially air conditioning; development of computer programs for testing and calibration of combustion engines; development of computer programs for the study of exhaust gas emissions, their occurrence and reduction, development of computer programs for simulation of thermodynamic processes, flows, temperature and pressure curves of temperature distribution in solid bodies, particularly in components of internal combustion engines and their assemblies, of combustion and detonation processes; development of computer programs for the operation and testing of hybrid motors, hybrid drives and electric motors of vehicles; development of computer programs for the operation and testing of fuel cells, batteries and accumulators; development of macro software programs for computer-aided design and computer-aided manufacturing, and computer programs for databank applications; research in the field of engine construction and measurement technology and engine testing and measurement technology testing, engine calibration, component testing and test bed automation, vehicle automation and HiL-automation; technical consultation services in the field of component selection for combustion engines, exhaust treatment systems and gear drives; transient measurement evaluations of exhaust gas and particle emission; chemical and spectroscopic analysis of exhaust gases and particle emissions; rental of data processing systems and of computer, simulation, and control and macro software programs for development and research, for computer-aided design and computer-aided manufacturing, for databank applications, and for the operation and testing of internal combustion engines

CASE IDENTIFIERS

Serial Number 85874310 **Application Filing Date** Mar. 12, 2013 **Register** Principal **Mark Type** Service Mark Trademark **Publication Date** Jan. 06, 2015

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 2 - AN ILLUSTRATION DRAWING WITHOUT ANY WORDS(S)/ LETTER(S) **Description of the Mark** The mark consists of the following: a motion mark, five frames of which are shown in the drawing and which runs for approximately 8 seconds which depicts a simulated three-dimensional sphere that is formed of numerous moving arcs, in green, blue, purple, pink and yellow, that appear and disappear as they move in the shape of a sphere. Rings appear, expand, then shrink and disappear, in repeating cycles first in the colors green and yellow, and then in the colors blue, purple and pink, on top of the arc formation in clusters throughout the sphere. At the approximate 6.5 second mark a pulsating green burst of light appears and disappears three times in the center of the sphere. Simultaneously the smooth arcs that make up the sphere become momentarily jagged before smoothing out again as they continue to move in a spherical path. Numerous solid smaller circles in green and yellow and then in blue appear, expand, then shrink and disappear. The image then fades away. The color black represents background and is not part of the mark. **Color Drawing** Yes **Color Claimed** The color(s) green, blue, purple, pink and yellow is/are claimed as a feature of the mark.

GOODS AND SERVICES INFORMATION

For Educational services, namely, conducting conferences, exhibitions, symposiums, presentations, technical demonstrations and training seminars, all in the field of information technology and computer products and services **International Classes** 41 - Primary Classes **US Classes** 100, 101, 107 **International Class Title** Education and Entertainment

For Business management and consultancy; business information services; business management consulting services and business management and consulting services relating to maximizing the business aspects of others in connection with the use of computer systems that integrate Natural Language Processing (NLP), Computational Linguistics (CL), Machine Learning (ML), and Information Retrieval (IR), including text analysis, pattern recognition and image analysis and which are capable of understanding general human queries and formulating responses; business development services; data

processing services and cloud-based business services, namely, business consultation services via cloud computing networks; arranging and conducting trade show exhibitions in the fields of computers, computer services, and information technology; arranging and conducting trade show exhibitions in the field of electronic business transactions via a global computer network; arranging and conducting trade show exhibitions in the field of computers that integrate Natural Language Processing (NLP), Computational Linguistics (CL), Machine Learning (ML), and Information Retrieval (IR), including text analysis, pattern recognition and image analysis and which are capable of understanding general human queries and formulating responses

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the word "Aqua" in darker blue letters, under the "u" in "Aqua", there appears the word "Guard" in lighter blue lettering, under the "A" in "Aqua", there are two uneven lines, one line is darker blue to match the color of the word "Aqua" and the lower line is in lighter blue color to match the color of the word "Guard", under the word "Guard" there are the words "POOL SYSTEMS" in black lettering. **Color Drawing** Yes **Color Claimed** The color(s) blue and black is/are claimed as a feature of the mark. **Disclaimer** "POOL SYSTEMS"

GOODS AND SERVICES INFORMATION

For (Based on Use in Commerce) Electric Pumps and electric water pumps, parts and fittings therefor for use in swimming pools, spas, hot tubs, whirlpools, and other recreational bodies of water; automatic swimming pool cleaners; underwater swimming pool cleaning machines for cleaning the surface of a swimming pool; suction outlets for removing water from swimming pools, spas, hot tubs, whirlpools, and other recreational bodies of water; hydraulic valve actuators; pneumatic valve actuators

International Classes 7 - Primary Classes **US Classes** 13, 19, 21, 23, 31, 34, 35 **International Class Title** Machinery **First Use** Jan. 16, 2013 **In Commerce** Jan. 16, 2013

For (Based on Use in Commerce) Filters and parts and fittings therefor, heaters and parts and fittings therefor, salt and chlorine generators and parts and fittings therefor, lights and valves and parts and fittings therefor, all for use in swimming pools, spas, hot tubs, whirlpools, and other recreational bodies of water

International Classes 11 - Primary Classes **US Classes** 13, 21, 23, 31, 34 **International Class Title** Environmental Control Apparatus **First Use** Jan. 16, 2013 **In Commerce** Jan. 16, 2013

For (Based on Intent to Use) Electronic controls for use in swimming pools, spas, hot tubs, whirlpools, and other recreational bodies of water; automated water chemistry controllers, namely, electronic controller apparatus for monitoring water chemistry and controlling addition of chemicals to water for swimming pools, spas, hot tubs, and whirlpools; remote control units, namely, wireless controls accessible via global and local computer networks, for controlling water management and treatment systems consisting of timers, chlorinators, heaters, pumps, and actuators of swimming pools, spas, hot tubs, whirlpools, water features and other recreational bodies of water; multi-purpose controllers for swimming pools, spas, hot tubs, whirlpools, water features, and other recreational bodies of water for automatically controlling water chlorination, filter pump timing, temperatures, actuators, and water management and treatment systems; electronic control panel with digital displays for the complete monitoring and automation of filtration, purification, and solar heating systems of swimming pools, spas, hot tubs, whirlpools, and other recreational bodies of water; electronic controllers for solar heating system for swimming pools and spas, namely, solar powered electronic controllers for controlling the temperature of swimming pools and spas; automatic timers for controlling operation of filters for swimming pools and spas; remote control units, namely, wireless and wired controls for controlling components of swimming pools, spas, hot tubs, whirlpools, water features, and other recreational bodies of water; Electric valve actuators; electronic control systems comprised of an electrolytic chlorine generator and multi-purpose controller for controlling the operation, sanitization and maintenance of swimming pools, spas and other recreational bodies of water

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

GOODS AND SERVICES INFORMATION

For Installation services of telecommunication equipment, road, toll and fee electronic systems and installations and for telecommunications equipment, in particular of telephones, mobile radios, mobile telephones, data and computer network systems, electronic toll and fee systems; repair services for telecommunication equipment, and roadway electronic toll and fee systems and installation parts; installation and maintenance of optical, electric and electronic apparatus and devices, telecommunications equipment and computer systems; telecommunications installations, in particular of telephones, mobile radios, mobile telephones, data and computer network systems and electronic toll and fee systems and installation parts

International Classes 37 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Construction and Repair

For Apparatus and instruments for the distribution, transformation, accumulation, regulation or control of electric current; apparatus and instruments for the supply of electrical current, namely, automotive batteries, electric control panels; Scientific, nautical, photographic, cinematographic, optical, measuring, signalling, checking, life saving and teaching apparatus and instruments, surveying apparatus and instruments, cinematographic apparatus and instruments, namely, compasses and directional compasses, navigational instruments, namely, global positioning systems and satellite-aided navigation systems, scales, cameras, photographic cameras, cinematographic cameras, measuring tapes, speedometers,

revolution counters and tachometers, emergency flares, vehicle warning lamps; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electrical conductors, electric current switches, electric transformers, electric accumulators, voltage regulators, electrical controlling devices, electrical circuit breakers, electricity adaptors and conduits; apparatus for recording, transmission and reproduction of sound or images; blank magnetic data carriers and pre-recorded magnetic data carriers in the field of road toll and fee systems, blank recording discs and pre-recorded recording discs in the field of road toll and fee systems; Auto-calculating machines, data-processing equipment and computers; computer memories, modems, interfaces; blank data carriers, in particular optical or magnetic data carriers and pre-recorded data carriers, in particular optical or magnetic data carriers in the field of road toll and fee systems; intercommunication apparatus, telecommunications apparatus and telecommunications peripheral apparatus, namely, apparatus for transmission of communication, inter-train and intra-train communication systems comprised of analogue and digital radios, electronic dispatch radios, equipment for testing the quality of service of communication systems in the nature of communication link testers for testing communication links, GSM-Railway voice and data communication units, mobile communication stations, mobile communication terminals, multimedia main trunk switches and transmitters, radio emergency call bridges, radio interface units, software for generating position registrations of all kinds of vehicles, based on satellite navigation systems or digital wireless positioning systems, to fix and calculate tolls and fees in all kinds of circulation ways, namely, highways, roads, railways and private and separated areas, for use in database management, use as a spread sheet, use in data collections, for word processing all in the fields of tolls and fees management and exploitation, services cards management, discount cards management, purchases management, biometrics, electronic management of documents, management of vehicle registration, expense sheets management, customer relations management, maps and photographic libraries management, business management, energy counting, remote displaying and video surveillance supervision; software packages consisting of software and downloadable middleware and mobile applications for application integration, for generating position registrations of all kinds of vehicles, based on satellite navigation systems or digital wireless positioning systems, to fix and calculate tolls and fees in all kinds of circulation ways, namely, highways, roads, railways, bridges, tunnels, car parks, and private and separated areas, for use in database management, use as a spread sheet, use in data collections, for word processing all in the fields of tolls and fees management and exploitation, services cards management, discount cards management, purchases management, biometrics, electronic management of documents, management of vehicle registration, expense sheets management, customer relations management, maps and photographic libraries management, business management, energy counting, remote displaying and video surveillance supervision; software products, namely, mobile communication software framework for embedded commercial products for generating position registrations of all kinds of vehicles, based on satellite navigation systems or digital wireless positioning systems, to fix and calculate tolls and fees in all kinds of circulation ways, namely, highways, roads, bridges, tunnels, car parks, railways and private and separated areas, for use in database management, use as a spread sheet, use in data collections, for word processing all in the fields of tolls and fees management and exploitation, services cards management, discount cards management, purchases management, biometrics, electronic management of documents, management of vehicle registration, expense sheets management, customer relations management, maps and photographic libraries management, business management, energy counting, remote displaying and video surveillance supervision; encoded smart cards containing programming used for identifying objects and data communication, electronic circuit boards, electronic identification cards; telecommunications control

equipment for testing the quality of service of communication systems in the nature of communication link testers for testing communication links, apparatus for storage, conversion, processing and transmission of data, information and signals, namely, software for use in storing and transmitting data relating to tracking vehicles and calculating traffic through tolls infractures; optical reading apparatus and instruments for encoded data; digital multimedia servers; scientific and technical software used to determine position for tracking and navigation and for optical character recognition; vehicle registration and classification sensors, vehicle registration and classification detectors; access identification systems comprised of microwave radio frequency identification computers for identifying objects, integrated electronic hardware and applications, radio transmitters, readers, receivers, transceivers, transponders and antennas and cards, namely, electronic chip cards, integrated circuit cards, smart cards, magnetic cards and microchip cards for identifying objects and data communication with transponders, emitters, receivers, antennas, central processing units and communication units; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity; electronic telecommunications equipment and installation parts, in particular for telephones, mobile radios, mobile telephones, and data and computer networks, namely, navigation apparatus for vehicles in the nature of electronic on-board units and on-board unit computers for communication with electronic road charging systems, electronical on-board apparatuses mobile readers and on-board computer mobile readers, on-board computer programming stations, power supplies, scanners, self-triggered vehicle registration devices with vehicle detection capability, smart cameras, transaction and transceiver controllers, vehicle detection namely, electronic controllers, electronic sensor interface boards, and electronic sensors for use in detecting vehicle location, video-based license plate registration devices for use in detecting vehicle location, vehicle registration camera sensors and controllers, and parts of the foregoing for operating in vehicles and for communicating with electronic road toll, parking and public fees installations and systems, namely, housings for electronic sensors and controllers, electronic barriers, OCR cameras, antennas and beacons; mechanisms for coin-operated apparatus, in particular, coin-operated gates at toll plazas, parking meters and multifunctional electronic fee payment terminals and automated teller machines for checking accounts; cash registers; terrestrial position-locating and navigation apparatus, namely, navigation apparatus for vehicles in the nature of on-board computers, navigation apparatus for vehicles in the nature of on-board computers and satellite supported position-locating and navigation apparatus, namely, navigation apparatus for vehicles in the nature of on-board computers; navigation apparatus for vehicles in the nature of on-board computers; electronic traffic telematics and traffic control systems comprised of actuated and pretimed traffic signal controllers; electronically controlled access barriers; electronic video systems comprised of digital video recorders, digital video players, associated electric cables and connectors, hardware, operating software, display, input and control keys for video and audio editing; transceivers, transponders, electronic identification apparatus in the nature of microwave radio frequency identification computers for identifying objects, integrated electronic hardware and software applications, radio transmitters, readers, receivers, transceivers, transponders and antennas and electronic chip cards, integrated circuit cards, smart cards, magnetic cards and microchip cards for identifying objects and enabling data communication with transponders, emitters, receivers, antennas, central processing units and communication units and encoded smart cards for object identification and data documentation with transponders, transmitters, receivers, aerials, central processor units and communications units; electronic toll and fee goods and installation parts, specifically, systems comprised of 3D video vehicle detection and classifying devices, access transceivers for use with digital, wireless or dedicated short range

communication (DSRC) channels, camera systems for automatic traffic analysis, chip card readers, digital, wireless or DSRC transponders, digital, wireless or DSRC transceivers, externally triggered vehicle registration systems, laser vehicle detection and classification modules, microwave digital, wireless or DSRC systems and transceivers, electric on-board units and on-board units computers for use in vehicles for communication with electronic road charging systems, electronical on-board apparatuses mobile readers and on-board computer mobile readers, on-board computer` programming stations, power supplies, scanners, self-triggered vehicle registration devices with vehicle detection capability, smart cameras, transaction and transceiver controllers, vehicle detection equipment, namely, electronic controllers, electronic sensor interface boards, electronic sensors for use in detecting vehicle location, video-based license plate registration devices for use in detecting vehicle location, vehicle registration camera sensors and controllers, and parts of the foregoing, namely, housings for electronic sensors and controllers, antennas and beacons; electronic communication and charging apparatus for on-board vehicle operation units for communication with electronic toll and fee systems and installations; combinations of the aforementioned goods may be sold together as units

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For transportation information; rental of garages; rental of warehouses; vehicle towing; professional transportation consultancy relating to transport and traffic on road and motorway networks, management of vehicular traffic flow through advanced communications network and technology, specifically, management of traffic flow through electronic toll booths

International Classes 39 - Primary Classes **US Classes** 100, 105 **International Class Title** Transportation and Storage

For Design and development of computer systems; engineering relating to applications on large and medium-sized computer systems, software engineering, computer management and information technology management systems in the field of road toll and fee systems, computer and information technology assistance with operating and supervising computer networks in the field of road toll and fee systems; consultancy and technical advice in the field of computing; development of communications systems for air traffic control, network engineering; design and implementation of hardware and software in the fields of telecommunications and computer analysis, programming and operation, and interconnected information systems, namely, the Internet, extranets, intranets; and installation and maintenance of computer programs

International Classes 42 - Primary Classes **US Classes** 100, 101 **International Class Title** Scientific and computer services

CASE IDENTIFIERS

Serial Number 86012933 **Application Filing Date** Jul. 17, 2013 **Register** Principal **Mark Type** Service Mark Trademark **Publication Date** Jan. 06, 2015

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the stylized letters "HC" in white. Next to the letters is a stylized "7" configured out of 7 hexagons in the colors blue, indigo, violet, red, orange, yellow and green. Around the terms are 7 hexagons. One in blue, indigo, violet, red, orange, yellow and green. On each hexagon is a design in a lighter shade of the base hexagon color, namely, the blue one features a helix, the indigo one features a flame, the violet one features a shield, the red one features an ambulance, the orange one features a man with four arrows, the yellow features a scale and the green one features a man with his arms extended out. Black is not claimed as a color and is merely the background shade to highlight the coloring of "HC" being white no matter the background. **Color Drawing** Yes **Color Claimed** The color(s) red, orange, yellow, green, blue, indigo, violet, and white is/are claimed as a feature of the mark.

CASE IDENTIFIERS

Serial Number 86022756 **Application Filing Date** Jul. 29, 2013 **Register** Principal **Mark Type** Trademark **Publication Date** Jan. 06, 2015

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the wording "HOOPS BABY!" above a design of a woman's head. The wording "HOOPS BABY!" is in purple except for the two letter "O"s in the term "HOOPS". The letters "O" are in an interlocking design with the first letter "O" in yellow and the second letter "O" in red and both with white highlighting. The design is comprised of women's head with pink skin and pink lips outlined in black. The women's hair is fuchsia and outlined in black with one wisp of white hair across the eye hidden on the left part of her face. The woman is also wearing a yellow and gold hoop earring outlined in black on the right part of her face. The negative space within the letters in the wording and the space between the women's face and the earring are clear and color is not claimed in these areas of the mark. **Color Drawing** Yes **Color Claimed** The color(s) fuchsia, purple, yellow, gold, pink, black, red, and white is/are claimed as a feature of the mark.
