## CASE IDENTIFIERS

**Serial Number** 85831237 **Application Filing Date** Jan. 24, 2013 **Registration Number** 4863522 **Register** Principal **Mark Type** Trademark **Publication Date** Jan. 07, 2014 **Notice of Allowance Date** Apr. 14, 2015

## MARK INFORMATION

**Standard Character Claim** No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the design features of the front of a cereal box package. The dotted outline of the packaging is intended to show the position of the mark and is not part of the mark. A banner design which has the words "GOLDEN FOODS" in white letters on a red background appears in the upper left corner. Three wavy lines in blue, white and yellow appear at the bottom of the banner design and underneath the words "GOLDEN FOODS". Below the banner, the wording "CORN" appears in black with white highlighting and gray outlining and underneath the wording "FLAKES" appears in red with white highlighting and gray outlining. Below this word appears a fanciful scarecrow character. The character appears in brown and light brown with green, white and black eyes, a red and light brown nose, a black, white and red mouth, a green hat with brown and light brown straws protruding from the hat, white and gray gloves, a red and white striped shirt, a red bandana, and is holding a silver, black and white spoon. The character is looking at a white bowl of cereal with strawberries. The strawberries appear in red with specks of white and have green stems. The cereal appears in yellow with white highlighting. The white bowl appears on a bed of green and light green leaves. In the lower right corner appears a design consisting of a purple and green banner with a yellow circle to the far left side of the design and between the purple and green banner. Behind the banner is a yellow and white atom design which has yellow, purple and green balls encircling the atom design. The color red appears in the background in the lower right corner. And all of the aforementioned are superimposed against a white background. **Color Drawing** Yes **Color Claimed** The color(s) red, white, blue, black, yellow, purple, green, light green, silver, brown, light brown, and gray is/are claimed as a feature of the mark. **Disclaimer** "CORN FLAKES," "FOODS" AND THE PICTORIAL REPRESENTATION OF A BOWL OF CEREAL WITH STRAWBERRIES

## GOODS AND SERVICES INFORMATION

**For** Electronic components, assemblies, sub-assemblies, namely, radio frequency transmitters, radio frequency receivers, radio frequency hardware in the nature of receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices, connectors, cable assemblies, chip sets, cables, battery holders, remote controls; software for use with radio frequency devices; firmware for use with radio frequency devices; radio frequency products in the nature of receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, and wireless sensors and devices, remote controls for use in OEM devices, remote keyless entry, industrial control, security, consumer wireless, sporting device, and recreational device applications; software used in association with wireless and remote control applications to operate and activate devices, securely communicate with and access and lock and unlock items, and to permit development of devices with remote capabilities; hardware used in association with wireless and remote control applications in the nature of receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices, connectors, cable assemblies, chip sets, cables, battery holders, remote controls; electronic components used in association with wireless and remote control applications in the nature of connectors, cable assemblies, chip sets, cables; electronic products used in association with wireless and remote control applications in the nature of receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules; network connectivity electronic products in the nature of access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; network connectivity software for establishing and connecting remote or separate access points, and devices individually and to computer networks; network connectivity components in the nature of access point establishment and extension devices and components, data communication devices and components, and OEM design and

incorporation components; encoder and decoder integrated circuits and microprocessors; encoder software; decoder software; computer software for wired and wireless communications; downloadable, integrated, and readable middleware for wired and wireless communications; firmware for wired and wireless communications; authentication software for authentication of digital signatures and device identifications; computer software for security protocol in wireless environments in the nature of information, identification, and data security and encryption; middleware for security protocol in wireless environments in the nature of information, identification, and data security and encryption; firmware for security protocol in wireless environments in the nature of information, identification, and data security and encryption; computer software for encryption in wireless environments; middleware for encryption in wireless environments; firmware for encryption in wireless environments; computer software for encoding in wireless environments; middleware for encoding in wireless environments; firmware for encoding in wireless environments; computer software for decoding in wireless environments; middleware for decoding in wireless environments; firmware for decoding in wireless environments; computer software for authentication of digital signatures and device identifications in wireless environments; middleware for authentication of digital signatures and device identifications in wireless environments; firmware for authentication of digital signatures and device identifications in wireless environments; computer network connectivity hardware in the nature of access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; computer network connectivity firmware for connecting access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; computer network connectivity software for connecting access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; software and middleware used to allow software applications to interface with remote devices; software and middleware used to allow connectivity for connecting access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; software and middleware used to allow memory storage; software and middleware used to allow device management; software and middleware used to allow device monitoring; software and middleware used to allow device tracking; software and middleware used to allow device auditing; computer software for security protocol aspects involving information, identification, and data security and encryption; computer software for use with encoders and decoders for wireless remote control applications; computer software for use with keyless entry and access control; computer software for use with door and gate openers; computer software for use with security systems; computer software for use with remote device control; computer software for use with car alarms and starters; computer software for use with home and industrial automations; computer software for use with remote status monitoring; computer software for use with keyless entry systems and access controls; keyless entry system and access software; keyless entry and access products in the nature of access control and alarm operation systems; computer software and electronic devices and components for use with door and gate openers; computer software and electronic devices and components for use with security systems, remote device control products; home and industrial automation electronic products in the nature of industrial automation controls, home access controls, and consumer device controls; home and industrial monitoring electronic products in the nature of alarm and monitoring systems for wireless sensors and devices; home and industrial remote status electronic products in the nature of alarm and monitoring systems for wireless sensors and devices; home and industrial remote control products for receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS

modules, and wireless sensors and devices; encryption software; hardware for consumer applications used in wired or wireless environments in the nature of receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, and wireless sensors and devices; software for consumer applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; firmware for consumer applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; hardware for medical applications used in wired or wireless environments for use with medical patient monitoring equipment and sensor devices, and for receiving, processing, and transmitting data; software for medical applications used in wired or wireless environments for use with medical patient monitoring equipment and sensor devices, and for receiving, processing, and transmitting data; firmware for medical applications used in wired or wireless environments for use with medical patient monitoring equipment and sensor devices, and for receiving, processing, and transmitting data; computer and electronic hardware for military applications used in wired or wireless environments; software for military applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; firmware for military applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; computer and electronic hardware for industrial applications used in wired or wireless environments; software for industrial applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; firmware for industrial applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; computer and electronic hardware for commercial applications used in wired or wireless environments; software for commercial applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; firmware for commercial applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; hardware software and firmware for network connectivity for establishing and connecting remote or separate access points, and devices individually and to computer networks, access point establishment, access point extension, data communication, and OEM design and incorporation of devices and components; hardware software and

firmware for remote monitoring of alarm devices and systems, keyless entry systems, industrial controls, wireless sensors and devices, medical patient equipment and sensor devices, electronic sensors, receivers, transmitters, transceivers, RF modules, and data modules; hardware software and firmware for alarm device and systems keyless entry, industrial controls, wireless sensor, remote control, medical patient equipment and sensor device, electronic sensor, receiver, transmitter, transceiver, RF module, and data module device management; hardware software and firmware for alarm devices and systems, keyless entry, industrial controls, wireless sensor, remote control, medical patient equipment and sensor device, electronic sensor, receiver, transmitter, transceiver, RF module, and data module device control; hardware software and firmware for machine to machine applications for control of a communication with alarm devices and systems, keyless entry systems, industrial controls, wireless sensors and devices, remote controls, medical patient equipment and sensor devices, electronic sensors, receivers, transmitters, transceivers, RF modules, and data modules; computer and electronic hardware and software and firmware for secure and unsecure communication of voice, audio, video, data and remote control of and with alarm devices and systems, keyless entry devices and systems, industrial controls, wireless sensors, remote controls, medical patient equipment and sensor devices, electronic sensors, receivers, transmitters, transceivers, RF modules, and data modules; completed electronic wireless products, namely, radio frequency transmitters, radio frequency receivers, radio frequency hardware in the nature of receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices, connectors, cable assemblies, chip sets, cables, battery holders, remote controls; software for use with radio frequency devices; firmware for use with radio frequency devices; radio frequency products in the nature of receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices, connectors, cable assemblies, remote controls for use in OEM devices, remote keyless entry, industrial control, security, consumer wireless, sporting device, and recreational device applications; software used in association with wireless and remote control applications to operate and activate devices, securely communicate with and access and lock and unlock items, and to permit development of devices with remote capabilities; hardware used in association with wireless and remote control applications in the nature of receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices; electronic components used in association with wireless and remote control applications in the nature of connectors, cable assemblies, chip sets, cables, electronic products used in association with wireless and remote control applications for use with receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices; network connectivity electronic products in the nature of access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; network connectivity software for connecting access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; network connectivity components in the nature of access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; encoder and decoder integrated circuits and microprocessors; encoder software, decoder software; computer software for wired and wireless communications; downloadable, integrated, and readable middleware for wired and wireless communications; firmware for wired and wireless communications; authentication software for authentication of digital signatures and device identifications; computer software for security protocol in wireless environments in the nature of information, identification, and data security and encryption; middleware for security protocol in wireless environments in the nature of

information, identification, and data security and encryption; firmware for security protocol in wireless environments in the nature of information, identification, and data security and encryption; computer software for encryption in wireless environments; middleware for encryption in wireless environments; firmware for encryption in wireless environments; computer software for encoding in wireless environments; middleware for encoding in wireless environments; firmware for encoding in wireless environments; computer software for decoding in wireless environments; middleware for decoding in wireless environments; firmware for decoding in wireless environments; computer software for authentication of digital signatures and device identifications in wireless environments; middleware for authentication of digital signatures and device identifications in wireless environments; firmware for authentication of digital signatures and device identifications in wireless environments; computer network connectivity hardware in the nature of access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; computer network connectivity firmware for connecting access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; computer network connectivity software for connecting access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; software and middleware used to allow software applications to interface with remote devices; software and middleware used to allow connectivity for connecting access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; software and middleware used to allow memory storage; software and middleware used to allow device management; software and middleware used to allow device monitoring; software and middleware used to allow device tracking; software and middleware used to allow device auditing; computer software for security protocol aspects for information, identification, and data security and encryption; computer software for use with encoders and decoders for wireless remote control applications; computer software for use with keyless entry and access control; computer software for use with door and gate openers; computer software for use with security systems; computer software for use with remote device control; computer software for use with car alarms and starters; computer software for use with home and industrial automations; computer software for use with remote status monitoring; computer software for use with keyless entry systems and access controls;, keyless entry system and access software; keyless entry and access products in the nature of access control and alarm systems; computer software for use with door and gate openers; computer software for use with security systems, remote device control products, automobile alarm and starter products and components; home and industrial automation electronic products in the nature of alarm and monitoring systems for wireless sensors and devices, remote status electronic products, receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, and wireless sensors and devices; home and industrial monitoring electronic products in the nature of alarm and monitoring systems, wireless sensors and devices, remote status electronic products, receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, and GPS modules; home and industrial remote status electronic products in the nature of alarm and monitoring systems, wireless sensors and devices, remote status electronic products, receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, and GPS modules; home and industrial remote control products for alarm and monitoring systems, wireless sensors and devices, remote status electronic products, receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, and GPS modules; encryption software, hardware for consumer applications

used in wired or wireless environments in the nature of transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices;software for consumer applications used in wired or wireless environments for information transfer, identification, data security, and encryption; firmware for consumer applications used in wired or wireless environments for information transfer, identification, data security, and encryption hardware for medical applications used in wired or wireless environments for use with medical patient monitoring equipment and sensor devices, and for receiving, processing, and transmitting data, medical patient monitoring equipment, for receiving, processing, transmitting and displaying data; software for medical applications used in wired or wireless environments for use with medical patient monitoring equipment, for receiving, processing, transmitting and displaying data, firmware for medical applications used in wired or wireless environments for use with medical patient monitoring equipment, for receiving, processing, transmitting and displaying data; computer and electronic hardware for military applications used in wired or wireless environments; software for military applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; firmware for military applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; computer and electronic hardware for industrial applications used in wired or wireless environments; software for industrial applications used in wired or wireless environments for information transfer, identification, data security, and encryption; firmware for industrial applications used in wired or wireless environments for information transfer, identification, data security, and encryption; computer and electronic hardware for commercial applications used in wired or wireless environments; software for commercial applications used in wired or wireless environments for information transfer, identification, data security, and encryption, firmware for commercial applications used in wired or wireless environments for information transfer, identification, data security, and encryption; hardware software and firmware for network connectivity for establishing and connecting remote or separate access points, and devices individually and to computer networks; hardware software and firmware for remote monitoring of alarm devices and systems, keyless entry systems, industrial controls, wireless sensors and devices, medical patient equipment and sensor devices, electronic sensors, receivers, transmitters, transceivers, RF modules, and data modules; hardware software and firmware for alarm device and systems keyless entry, industrial controls, wireless sensor, remote control, medical patient equipment and sensor device, electronic sensor, receiver, transmitter, transceiver, RF module, and data module device management; hardware software and firmware for alarm device and systems keyless entry, industrial controls, wireless sensor, remote control, medical patient equipment and sensor device, electronic sensor, receiver, transmitter, transceiver, RF module, and data module device control; hardware software and firmware for machine to machine applications, control, and communication with alarm devices and systems, keyless entry systems, industrial controls, wireless sensors and devices, remote controls, medical patient equipment and sensor devices, electronic sensors, receivers, transmitters, transceivers, RF modules, and data modules; computer and electronic hardware and software and firmware for secure and unsecure communication of voice, audio, video, data and remote control of and with alarm devices and systems, keyless entry devices and systems, industrial controls, wireless sensors, remote controls, medical patient equipment and sensor devices, electronic sensors, receivers, transmitters, transceivers, RF modules, and data modules;

wireless radio frequency modules; integrated circuits; hybrid and non-hybrid electronic modules RF, wireless, data handling, and GPS signal and information use for consumer, medical, military, industrial and commercial applications, for use in wired or wireless environments, network connectivity, remote monitoring, management, device control, and machine to machine applications, and for secure and unsecure communication of voice, audio, video, data and/or remote control; radio frequency remote control transmitters and receivers; computer and electronic hardware, software, and firmware for secure and unsecure communication in wired or wireless environments, network connectivity, remote monitoring, management, and machine to machine applications; electric and electronic connectors and antennas; electronic cable assemblies; completed electronic products designed for customization by OEMs for consumer, medical, military, industrial and commercial applications, namely, radio frequency hardware in the nature of transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices; software for use with radio frequency devices; firmware for use with radio frequency devices; radio frequency products in the nature of transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices, remote controls for use in OEM devices, remote keyless entry, industrial control, security, consumer wireless, sporting device, and recreational device applications; software used in association with wireless and remote control applications to operate and activate devices, securely communicate with and access and lock and unlock items, and to permit development of devices with remote capabilities; hardware used in association with wireless and remote control applications in the nature of transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices; electronic components used in association with wireless and remote control applications in the nature of connectors, cable assemblies, chip sets, cables; electronic products used in association with wireless and remote control applications in the nature of transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices;network connectivity electronic products in the nature of access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; network connectivity software for establishing and connecting remote or separate access points, and devices individually and to computer networks; network connectivity components in the nature of access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; encoder and decoder integrated circuits and microprocessors; encoder software; decoder software; computer software for wired and wireless communications; downloadable, integrated, and readable middleware for wired and wireless communications; firmware for wired and wireless communications; authentication software for authentication of digital signatures and device identifications; computer software for security protocol in wireless environments in the nature of information, identification, and data security and encryption; middleware for security protocol in wireless environments in the nature of information, identification, and data security and encryption; firmware for security protocol in wireless environments in the nature of information, identification, and data security and encryption; computer software for encryption in wireless environments; middleware for encryption in wireless environments; firmware for encryption in wireless environments; computer software for encoding in wireless environments; middleware for encoding in wireless environments; firmware for encoding in wireless environments; computer software for decoding in wireless environments; middleware for decoding in wireless environments; firmware for decoding in wireless environments; computer software for authentication of digital signatures and device identifications in wireless environments; middleware for authentication of

digital signatures and device identifications in wireless environments; firmware for authentication of digital signatures and device identifications in wireless environments;, computer network connectivity hardware in the nature of access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; computer network connectivity firmware for connecting access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; computer network connectivity software for connecting access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; software and middleware used to allow software applications to interface with remote devices; software and middleware used to allow connectivity for connecting access point establishment and extension devices and components, data communication devices and components, and OEM design and incorporation components; software and middleware used to allow memory storage; software and middleware used to allow device management; software and middleware used to allow device monitoring; software and middleware used to allow device tracking; software and middleware used to allow device auditing; computer software for security protocol aspects for information, identification, and data security and encryption; computer software for use with encoders and decoders for wireless remote control applications; computer software for use with keyless entry and access control; computer software for use with door and gate openers; computer software for use with security systems; computer software for use with remote device control; computer software for use with car alarms and starters; computer software for use with home and industrial automations; computer software for use with remote status monitoring; computer software for use with keyless entry systems and access controls; keyless entry system and access software; keyless entry and access products in the nature of access control and alarm monitoring systems; computer software and electronic components for use with door and gate openers; computer software and electronic components for use with security systems; remote device control products; ; home and industrial automation electronic products in the nature of industrial automation controls, home access controls, and consumer device controls; home and industrial monitoring electronic products in the nature of alarm and monitoring systems for wireless sensors and devices; home and industrial remote status electronic products in the nature of alarm and monitoring systems for wireless sensors and devices; home and industrial remote control products for receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, wireless sensors and devices; encryption software; hardware for consumer applications used in wired or wireless environments in the nature of receivers, transmitters, transceivers, antennas, RF modules, integrated circuits, data modules, GPS modules, and wireless sensors and devices; software for consumer applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; firmware for consumer applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; hardware for medical applications used in wired or wireless environments for use with medical patient monitoring equipment and sensor devices, and for receiving, processing, and transmitting data; software for medical applications used in wired or wireless environments for use with medical patient monitoring equipment and sensor devices, and for receiving, processing, and transmitting data; firmware for medical applications used in wired or wireless environments for use with medical patient monitoring equipment and

sensor devices, and for receiving, processing, and transmitting data; computer and electronic hardware for military applications used in wired or wireless environments; software for military applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; firmware for military applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; computer and electronic hardware for industrial applications used in wired or wireless environments; software for industrial applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; firmware for industrial applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; computer and electronic hardware for commercial applications used in wired or wireless environments; software for commercial applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; firmware for commercial applications used in wired or wireless environments for data and command communication, OEM device development design and incorporation, device operation and activation, secure access and lock and unlock activities, information, identification, and data security and encryption, access point establishment, and data communication; hardware software and firmware for network connectivity for establishing and connecting remote or separate access points, and devices individually and to computer networks, access point establishment, access point extension, data communication, and OEM design and incorporation of devices and components; hardware software and firmware for remote monitoring of alarm devices and systems, keyless entry systems, industrial controls, wireless sensors and devices, medical patient equipment and sensor devices, electronic sensors, receivers, transmitters, transceivers, RF modules, and data modules; hardware software and firmware for alarm device and systems keyless entry, industrial controls, wireless sensor, remote control, medical patient equipment and sensor device, electronic sensor, receiver, transmitter, transceiver, RF module, and data module device management, hardware software and firmware for alarm devices and systems, keyless entry, industrial controls, wireless sensor, remote control, medical patient equipment and sensor device, electronic sensor, receiver, transmitter, transceiver, RF module, and data module device control; hardware software and firmware for machine to machine applications for control of a communication with alarm devices and systems, keyless entry systems, industrial controls, wireless sensors and devices, remote controls, medical patient equipment and sensor devices, electronic sensors, receivers, transmitters, transceivers, RF modules, and data modules; computer and electronic hardware and software and firmware for secure and unsecure communication of voice, audio, video, data and remote control of and with alarm devices and systems, keyless entry devices and systems, industrial controls, wireless sensors, remote controls, medical patient equipment and sensor devices, electronic sensors,

receivers, transmitters, transceivers, RF modules, and data modules

**International Classes** 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus **First Use** Jul. 01, 2000 **In Commerce** Jul. 01, 2000
