GOODS AND SERVICES INFORMATION

For Boats, land vehicles; submarines; marine and submarine drones

International Classes 12 - Primary Classes **US Classes** 19, 21, 23, 31, 35, 44 **International Class Title** Vehicles

For Construction of vessels and underwater vehicles, namely, shipbuilding; installation, maintenance and repair of ship-borne hydraulic systems and marine gears mounted on sea-going vessels; Installation, maintenance and repair of marine systems consisting of marine navigation apparatus for naval vessels, in the nature of electronic apparatus for navigation and positioning, global positioning systems, computer hardware and automatic and electronic controllers intended to be used to automatically maintain the position and heading of seagoing vessels; installation, repair and maintenance of unmanned aircraft, namely, drones; computer maintenance services, namely maintenance of computer; installation, repair and maintenance of a telecommunication network, namely, maintenance and repair of telecommunication networking hardware apparatus and instruments

International Classes 37 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Construction and Repair

For On-board dynamic control equipment for naval platforms, namely, computer hardware and electronic controllers for digital process control for maintaining the automatic control of the position and heading of a marine vessel by using the propellers and propellants of the vessel; computer programs and software for the calculation of a mathematical model of a marine vessel in the field of hydrodynamics, fluid mechanics, automation and optimization, namely, computer software for integration of databases and simulation software for the steering and control of a marine vessel; automatic control systems for marine vessels, namely, dynamic positioning system hardware and software for vessel positioning and vessel management; dynamic positioning systems, comprising, GPS navigation devices including gyro sensors with GPS functions, proximity

indicators, motion sensors, distance sensors, and measuring sensors; motion stabilization systems for marine vessels, namely, computer hardware and software for axis stabilization for vessel navigation; automated seaborne recovery systems for manned and unmanned marine vessels comprising a positioning laser and a mechanical hooking apparatus; study and training simulator, namely, flight simulators and simulators for the steering and control of marine vessels; Instruments, indicators and monitors for measuring, detecting and monitoring, namely, power meters, pressure meters, accelerometer, radar apparatus, navigational buoy, portable data acquisition systems, comprised primarily of computer hardware, mobile phones for safety monitoring, and underwater monitoring sonar for target monitoring; broadband radios; remote control stations, namely, broadband wireless telecommunications base station equipment for cellular and fixed networking and communications applications; man-machine interfaces for software and computers, namely, peripheral component interface (PCI) hardware

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Broadband data transmission using radio relay acoustics or satellite channels; data transmission and reception via telecommunication, namely, wireless broadband communication services used to provide information on the position of a marine vessel and the extent and direction of environmental forces that affect the position of a marine vessel; technical advice and expertise in the field of telecommunications

International Classes 38 - Primary Classes **US Classes** 100, 101, 104 **International Class Title** Communication

For Design and development of on-board systems for the stabilization, monitoring and dynamic positioning of marine vessels, submarines and unmanned aircraft; design and development of operational computer hardware and software solutions and on-board systems for the dynamic control of air and sea platforms; design and development, updating and maintenance of software in the field of aerodynamics, hydrodynamics and multidisciplinary design optimization; computer programming in the field of hydrodynamics, and providing information related thereto via online searchable databases; telecommunication technology consulting in the field of onboard measurement, laws of control and digital simulation, docking and recovery of drones in the field of air, naval and underwater industry; research and development of new products for others in the fields of behavior of vessels and floating crafts; technical product testing services in the field of marine vessel, submarine and aircraft prototypes; computer system integration service; conducting of scientific feasibility studies in the field of naval engineering; research and development of software in the fields of naval architecture and engineering of unmanned vehicles; engineering services relating to robotics; technical design and development of new products in the field of telecommunication networks and telecommunication equipment; Technical product testing services in the field of marine vessel, submarine and aircraft prototypes featuring power-up and verification of the subassemblies of a telecommunication system in order to verify that the functions expected by the telecommunication chain are being fulfilled

For Printing machines; offset printing machines; web fed rotary printing machines; sheet fed rotary printing machines; silk screen printing machines; pad printing machines; flexographic printing machines; gravure printing machines; printing machines for use on sheet metal; printing machines for use on cans; printing machines for use on hollow bodies being containers; printing machines for corrugated cardboard; industrial inkjet printing machines and inking apparatus for printing machines; laser marking being engraving machines and apparatus in the nature of laser machines for printing; laser printing machines and inking apparatus for printing machines; industrial machinery, namely, electromechanical marking machines; painting machines; packing machines; paper coating machines, in particular working rotationally, for web-type and separate materials; digital printing and digital electromechanical marking machines for industrial use, based on electrophotography, magnetography, xerography, ink jet; exposure apparatus, being parts for of printing machines for use in contact printing or creating circuit and print templates; electric credit card imprinting and electromechanical marking machines for industrial use, in particular for the graphics sector, the packaging sector and data processing; labellers being machines, namely, automatic industrial labeling machines for applying labels to containers; engraving machines; machines and mechanical apparatus for the further processing of printed matter or printing materials or paper or plastics or metal or organic or inorganic materials, namely, printing machines, metal forming machines; material handling machines, namely, palletizers being pallet changing and pallet transfer machines; stacking machines; machines for handling sheets and plates of metal, namely, metal forming machines, printing machine for use on sheet metal; foodstuff distribution machines being packaging machines for food; machines and apparatus for the surface treatment of metals, namely, metal drawing machines, metal polishing machines; hot stamping machines and apparatus being automatic stamping machines; thermal transfer machines and apparatus being machines in the nature of heat transfer presses; rotary die-cutters machines for punching of printed matter or paper or plastics;

sheet metal punching machines for stamping printed matter or paper or plastics; electromechanical addressing and being marking machines for printed matter; machines and mechanical apparatus for the further processing of printed matter or printing materials or paper or plastics or metal or organic or inorganic materials, namely, machines for pneumatic transporting, cutting, punching, industrial paper folding, dust collecting for chemical processing, packaging, machines for sorting printed products and removing non-conforming materials, sheaf-binding, perforating being punching, power-operated stapling guns, tying being packaging, bookbinding for industrial purposes; accessories being machine parts, namely, parts for the aforesaid printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, laser marking being engraving machines and apparatus in the nature of laser machines for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of electromechanical marking machines, lacquering machines, packaging machines, paper coating machines, digital printing and digital electromechanical marking machines for industrial use, labelling machines being automatic industrial labeling machines for applying labels to containers, engraving machines, and machines and mechanical apparatus for the further processing of printed matter or printing materials or paper or plastics or metal or organic or inorganic materials, in particular printing mechanisms being plates, rollers, inking apparatus for printing blocks, damping units being spray damping machines, reel changers being parts of paper reeling machines, and industrial paper folding apparatus; machines and mechanical apparatus being machine-operated platforms for storing printed matter or printing materials or printing material reels or paper or paper reels during the printing process for use with printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, silk screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, industrial inkjet printing machines, in particular with one or more inkjets, single-colour and multi-colour industrial inkjet printing machines, laser marking being engraving machines and apparatus in the nature of laser machines for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of electromechanical marking machines, lacquering machines, packaging machines, paper coating machines, digital printing and digital electromechanical marking machines for industrial use, labelling machines being automatic industrial labeling machines for applying labels to containers, engraving machines, machines and mechanical apparatus for the graphics industry being printing machines, and machines and mechanical apparatus for the further processing of printed matter or printing materials or paper or plastics or metal or organic or inorganic materials in the nature of printing machines; conveyors being machines, belts for conveyors, conveying apparatus being machines for conveying printed matter or printing materials or printing material reels or paper or paper reels or plastics or plastics reels or metal or organic or inorganic materials for use with printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, silk screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, industrial inkjet printing machines, in particular with one or more inkjets, single-colour and multi-colour industrial inkjet printing machines, laser marking being engraving machines and apparatus in the nature of laser machines for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of

electromechanical marking machines, lacquering machines, packaging machines, paper coating machines, digital printing and digital electromechanical marking machines for industrial use, labelling machines being automatic industrial labeling machines for applying labels to containers, engraving machines, machines and mechanical apparatus for the graphics industry being printing machines, and machines and mechanical apparatus for the further processing of printed matter or printing materials or paper or plastics or metal or organic or inorganic materials in the nature of printing machines; machines and mechanical apparatus for the folding of printed matter or printing materials or paper, namely, industrial paper folding machines; machines and mechanical devices being polishing machines, bending machines, and punching machines for changing, and bending, and punching printing plates and flexographic printing plates; machines and mechanical apparatus being machine-operated platforms for the storing of printing plates during the printing process for printing machines; conveying machines, conveyor belts, and conveying apparatus being machines for conveying printing plates for use with printing machines; machines and mechanical apparatus being cleaning machines for cleaning rollers in inking apparatus, and damping units, and cylinders, and lacquering units, and inkjet print heads, and laser systems for use in printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, industrial inkjet printing machines, in particular with one or more inkjets, single-colour and multi-colour industrial inkjet printing machines, laser marking being engraving machines and apparatus in the nature of laser machines for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of electromechanical marking machines, lacquering machines, packaging machines, paper coating machines, digital printing and digital electromechanical marking machines for industrial use, labelling machines being automatic industrial labeling machines for applying labels to containers, engraving machines, machines and mechanical apparatus for the graphics industry being printing machines, and machines and mechanical apparatus for the further processing of printed matter or printing materials or paper or plastics or metal or organic or inorganic materials in the nature of printing machines; machines and mechanical apparatus for use in storing and adjusting printing rollers in inking apparatus, and damping units, and cylinders, and lacquering units, inkjet printing modules, and laser systems, in all of the aforementioned being parts of printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, silk screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, industrial inkjet printing machines, in particular with one or more inkjets, single-colour and multi-colour industrial inkjet printing machines, laser marking being engraving machines and apparatus in the nature of laser machines for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of electromechanical marking machines, lacquering machines, packaging machines, paper coating machines, digital printing and digital electromechanical marking machines for industrial use, labelling machines being automatic industrial labeling machines for applying labels to containers, engraving machines, machines and mechanical apparatus for the graphics industry being printing machines, and machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials in the nature of printing machines; machines and mechanical apparatus for adjustment, for use with inking apparatus, and damping units, and printer engine cylinders, and for lacquering units in printer engines, and in lacquering units, and for inkjet printing modules,

and laser systems, all of the aforementioned being parts of printing machines; machine parts, namely, parts for inking apparatus for printing machines, and industrial inkjet printing machine modules, and laser systems being laser printing machines, and cylinders for in tempering machines; machines and mechanical apparatus for adjusting cutting equipment and cutting cylinders being parts of printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, industrial inkjet printing machines, in particular with one or more inkjets, single colour and multi-colour industrial inkjet printing machines, laser marking being engraving machines and apparatus in the nature of laser machines for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of electromechanical marking machines, lacquering machines, packaging machines, paper coating machines, digital printing and digital electromechanical marking machines for industrial use, labelling machines being automatic industrial labeling machines for applying labels to containers, engraving machines, machines and mechanical apparatus for the graphics industry being printing machines, and machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials in the nature of printing machines; machines and mechanical apparatus for adjusting registers and register marks being parts of printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, industrial inkjet printing machines, in particular with one or more inkjets, single-colour and multi-colour industrial inkjet printing machines, laser marking being engraving machines and apparatus in the nature of laser machines for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of electromechanical marking machines, lacquering machines, packaging machines, paper coating machines, digital printing and digital electromechanical marking machines for industrial use, labelling machines being automatic industrial labeling machines for applying labels to containers, engraving machines, machines and mechanical apparatus for the graphics industry being printing machines, and machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials in the nature of printing machines; machines and mechanical apparatus for quality control being parts of printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, industrial inkjet printing machines, in particular with one or more inkjets, single-colour and multi-colour industrial inkjet printing machines, laser marking being engraving machines and apparatus in the nature of laser machines for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of electromechanical marking machines, lacquering machines, packaging machines, paper coating machines, digital printing and digital electromechanical marking machines for industrial use, labelling machines being automatic industrial labeling machines for applying labels to containers, engraving machines, machines and mechanical apparatus for the graphics industry being printing machines, and machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials in the nature of printing machines; machines and mechanical apparatus for adjusting web

tension settings being machine parts of printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, industrial inkjet printing machines, in particular with one or more inkjets, single-colour and multi-colour industrial inkjet printing machines, laser marking being engraving machines and apparatus in the nature of laser machines for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of electromechanical marking machines, lacquering machines, packaging machines, paper coating machines, digital printing and digital electromechanical marking machines for industrial use, labelling machines being automatic industrial labeling machines for applying labels to containers, engraving machines, machines and mechanical apparatus for the graphics industry being printing machines, and machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials in the nature of printing machines; filters being parts of printing machines; dust separators; air suction and waste material conveying machines for use in ventilation cleaning, dust removal and air separation of between machines and spaces equipped therewith; filters for cleaning cooling air, for engines; blowing engines being blowing machines for the compression, exhaustion and transport of gases; fibre separators being machines for separating target materials from mixtures of materials; air compressors and air ejectors being fans for machine engines; collecting machines comprised of machine tools for compacting, filling and pressing of waste being particles, dust and fibres separated from machines; air conveying devices, namely, air conditioning compressors; air power-operated blowers; blowing machines being power-operated blowers, blowers for motors and engines; air compressors; accessories being machine parts for the aforesaid printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, laser marking being engraving machines and apparatus in the nature of laser machines for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of electromechanical marking machines, lacquering machines, packaging machines, paper coating machines, digital printing and digital electromechanical marking machines for industrial use, labelling machines being automatic industrial labeling machines for applying labels to containers, engraving machines, and machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials in the nature of printing machines, material handling machines in the nature of palletizers being pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal being metal forming machines, printing machine for use on sheet metal, foodstuff distribution machines being packaging machines for food, machines and apparatus for the surface treatment of metals being metal forming machines, printing machine for use on sheet metal, hot stamping machines and apparatus being automatic stamping machines, thermal transfer machines and apparatus being machines in the nature of heat transfer presses; accessories being structural parts for the aforesaid filters being parts of printing machines, dust, separators, air suction and waste material conveying machines for use in ventilation cleaning, dust removal and air separation between machines and spaces equipped therewith, air filters for cleaning cooling air for engines, blowing machines being power operated blowers, blowers for motors and engines, air compressors and air ejectors being fans for machine engines, collecting machines comprised of machine tools for compacting, filling and pressing machine-

separated waste being particles, dust and fibres; electronic label printing machines for commercial use, namely, machines and mechanical apparatus for producing security labels, securities labels, banknote labels and structural components therefor; automatic industrial labeling machines for applying labels to containers, namely, machines and mechanical apparatus for applying security labels and structural components therefor; packaging machines, namely, machines and mechanical apparatus for packaging product security means, identification features, security features, security labels, securities, banknotes and structural components therefor; machines and mechanical apparatus for voice controls being structural parts of printing machines, offset printers, web fed rotary printing machines, sheet fed rotary printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies being containers, printing machines for corrugated cardboard, industrial inkjet printing machines and inking apparatus for printing machines, industrial inkjet printing machines, in particular with one or more inkjets, single-colour and multi-colour industrial inkjet printing machines, laser marking being engraving machines and apparatus in the nature of laser machine for printing, laser printing machines and inking apparatus for printing machines, industrial machinery in the nature of electromechanical marking machines, painting machines, packing machines, paper coating machines, in particular working rotationally, for web-type and separate materials, digital printing and digital electromechanical marking machines for industrial use based on electrophotography, magnetography, xerography, inkjet, exposure apparatus, being parts of printing machines for use in contact printing and creating circuit and print templates, electric credit card imprinting and electromechanical marking machines for industrial use, in particular for the graphics sector, the packaging sector and data processing, labellers being machines, namely, automatic industrial labeling machines for applying labels to containers, and engraving machines; structural parts for the aforesaid goods and accessories being structural parts for the aforesaid goods

For Installation, maintenance and repair of printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal, foodstuff distribution machines, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus and parts therefor; installation, maintenance and repair of installations, equipment, apparatus, filters, separators, exhausting and conveying devices for the ventilation cleaning, dust removal and air separation of machines and spaces equipped therewith, air filters, blowing machines and fibre separators, air compressors and air ejectors for machines, capture devices, machines, equipment and apparatus for compacting, filling and pressing machine- separated particles, dust and fibres; installation, maintenance and repair of air-conditioning, heating, refrigerating, aerating and ventilating, humidifying and dehumidifying installations and

apparatus, air treatment installations, air conveying devices, namely, fans, blowing machines and compressors, air heaters, air coolers, air filters, and nozzle chambers for humidifying; installation, maintenance and repair of drying ovens, drying apparatus, heat accumulators, heat exchangers and parts therefor, in particular active coatings with catalytic properties, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purifying installations, thermal energy accumulators, solar collectors, solar modules for heat generation, and regulating and safety accessories for gas apparatus; installation, maintenance and repair of machines for producing security labels, securities, banknotes; installation, maintenance and repair of machines for applying security labels; installation, maintenance and repair of machines for producing product security means, identification features, security features, security labels, securities, banknotes and components therefor; installation, maintenance and repair of pre- printing data processing equipment, parts or fittings for pre-printing data processing equipment, data processing equipment for data preparation in the nature of continuous data preparation, variable data printing in the nature of database printing, further processing of printed matter, production controls, parts and fittings for interfaces, and parts and fittings for data transfer for devices for transport and storage of printed matter and printing materials and printing material reels and paper and paper reels and plastics and plastics reels and metal and organic and inorganic materials for printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal, foodstuff distribution machines, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus; installation, maintenance and repair of electronic regulating apparatus, control apparatus, monitoring apparatus, quality control apparatus, production control apparatus, temperature monitoring apparatus and web tension controls, being structural parts and fittings for printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, namely, for transporting, cutting, punching, folding, collecting, tacking, packaging, compiling, sorting, binding, scanning, checking, perforating, gluing, stapling, tying, bundling, bookbinding; installation, maintenance and repair of electronic regulating apparatus, control apparatus, monitoring apparatus, quality control apparatus, production control apparatus, temperature monitoring apparatus, being structural parts and accessories for installations, equipment, apparatus, filters, separators, suction and conveying devices for the air-technology cleaning, dust removal and air separation of machines

and rooms equipped therewith, air filters, blowers and fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing particles, dust and fibres separated from machines; installation, maintenance and repair of electronic regulating apparatus, control apparatus, monitoring apparatus, quality control apparatus, production control apparatus, temperature monitoring apparatus, being structural parts and accessories for ventilation apparatus, air-conditioning, heating, refrigerating, aerating and ventilating, humidifying and dehumidifying installations and apparatus, air treatment installations, air delivery devices, in particular ventilators, blowing machines and compactors, air reheaters, air coolers, air filters, and nozzle chambers for humidifying; installation, maintenance and repair of electronic regulating apparatus, control apparatus, monitoring apparatus, quality control apparatus, production control apparatus, temperature monitoring apparatus, being structural parts and accessories for drying ovens, drying apparatus, heat accumulators, heat exchangers and parts therefor, in particular active coatings with catalytic properties, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purifying installations, thermal energy accumulators, solar collectors, solar modules for heat generation, and regulating and safety accessories for gas apparatus; installation, maintenance and repair of electronic regulating apparatus, control apparatus, monitoring apparatus, quality control apparatus, production control apparatus, temperature monitoring apparatus and web tension controls, being structural parts and accessories for machines for producing product security means, identification features, security features, security labels, securities, banknotes and components therefor; installation, maintenance and repair of electronic regulating apparatus, control apparatus, monitoring apparatus, quality control apparatus, production control apparatus, temperature monitoring apparatus and web tension controls, being structural parts and accessories for machines for applying product security means, identification features, security features, security labels and components therefor; installation, maintenance and repair of electronic regulating apparatus, control apparatus, monitoring apparatus, quality control apparatus, production control apparatus, temperature monitoring apparatus and web tension controls, being structural parts and accessories for machines for packaging product security means, identification features, security features, security labels, securities, banknotes and components therefor; installation, maintenance and repair of electronic regulating apparatus, control apparatus, monitoring apparatus, quality control apparatus, production control apparatus, temperature monitoring apparatus and web tension controls, being structural parts and accessories of and for product security means, identification features, security features, security labels, securities, banknotes and components therefor; installation, maintenance and repair of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment, for subassemblies and parts for printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal, foodstuff distribution machines, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus; installation, maintenance and repair of electric and

electronic measuring and testing apparatus and instruments for adjustment and preadjustment, for subassemblies and parts for installations, equipment, apparatus, filters, separators, exhausting and conveying devices for the ventilation cleaning, dust removal and air separation of machines and spaces equipped therewith, air filters, blowing machines and fibre separators, air compressors and air ejectors for machines, capture devices, machines, equipment and apparatus for compacting, filling and pressing machine separated particles, dust and fibres; installation, maintenance and repair of electric and electronic measuring and testing apparatus and instruments for adjustment and preadjustment, for subassemblies and parts for ventilation apparatus, air-conditioning, heating, refrigerating, aerating and ventilating, humidifying and dehumidifying installations and apparatus, air treatment installations, air delivery devices, in particular ventilators, blowing machines and compactors, air reheaters, air coolers, air filters, and nozzle chambers for humidifying; installation, maintenance and repair of electric and electronic measuring and testing apparatus and instruments for adjustment and preadjustment, for subassemblies and parts for drying ovens, drying apparatus, heat accumulators, heat exchangers and parts therefor, in particular active coatings with catalytic properties, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purifying installations, thermal energy accumulators, solar collectors, solar modules for heat generation, and regulating and safety accessories for gas apparatus; installation, maintenance and repair of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment, for subassemblies and parts for machines for producing product security means, identification features, security features, security labels, securities, banknotes and components therefor; installation, maintenance and repair of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment, for subassemblies and parts for machines for applying product security means, identification features, security features, security labels and components therefor; installation, maintenance and repair of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment, for subassemblies and parts for machines for packaging product security means, identification features, security features, security labels, securities, banknotes and components therefor; installation, maintenance and repair of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment, for subassemblies and parts of and for product security means, identification features, security features, security labels, securities, banknotes and components therefor; installation, maintenance and repair of remote control, remote operation, remote monitoring, control and regulating apparatus and equipment for ink levers, ink rollers, damping rollers, register adjusting devices, devices for storing and adjusting rollers in inking apparatus and damping units and cylinders, devices for cleaning rollers in inking apparatus, and damping units and cylinders, and inkjet print heads and laser systems, for cutting equipment and cutting cylinders, registers and register marks, web tension settings, being structural parts and fittings for printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials; installation, maintenance and repair of remote control, remote operation, remote monitoring, control and regulating apparatus and equipment for devices for the changing and transporting and storage of printing plates, for inking apparatus, and damping units and printer engine cylinders in printer engines, and for

devices for tempering, for inking apparatus, and damping units and cylinders in printer engines; installation, maintenance and repair of remote control, remote operation, remote monitoring, control and regulating apparatus and equipment for printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal, foodstuff distribution machines, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus; installation, maintenance and repair of remote control, remote operation, remote monitoring, control and regulating apparatus and equipment for installations, equipment, apparatus, filters, separators, suction and conveying devices for the cleaning, dust removal and air separation of machines and rooms equipped therewith, air filters, blowers and fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing particles, dust and fibres separated from machines; installation, maintenance and repair of remote control, remote operation, remote monitoring, control and regulating apparatus and equipment for ventilation apparatus, air conditioning, heating, refrigerating, aerating and ventilating, humidifying and dehumidifying installations and apparatus, air treatment installations, air delivery devices, in particular ventilators, blowing machines and compactors, air reheaters, air coolers, air filters, and nozzle chambers for humidifying; installation, maintenance and repair of remote control, remote operation, remote monitoring, control and regulating apparatus and equipment for drying ovens, drying apparatus, heat accumulators, heat exchangers and parts therefor, in particular active coatings with catalytic properties, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purifying installations, thermal energy accumulators, solar collectors, solar modules for heat generation, and regulating and safety accessories for gas apparatus; installation, maintenance and repair of remote control, remote operation, remote monitoring, control and regulating apparatus and equipment for machines for producing product security means, identification features, security features, security labels, securities, banknotes and components therefor; installation, maintenance and repair of remote control, remote operation, remote monitoring, control and regulating apparatus and equipment for machines for applying product security means, identification features, security features, security labels and components therefor; installation, maintenance and repair of remote control, remote operation, remote monitoring, control and regulating apparatus and equipment for machines for packaging product security means, identification features, security features, security labels, securities, banknotes and components therefor; installation, maintenance and repair of remote control, remote operation, remote monitoring, control and regulating apparatus and devices for product security means, authentication features, security features, security labels, securities, banknotes and components therefor; machinery installation, maintenance and repair and rebuilding of machines that have been worn or partially destroyed; commissioning of machines within the framework of installation, namely, machine installation; commissioning of machines in the context of maintenance, namely, machine maintenance; maintenance of machines, namely, cleaning of machines; cleaning of buildings; vehicle cleaning;

installation and maintenance of apparatus for the payment of goods, and services and bills, in particular for enabling customers to pay by themselves by payment means in the form of banknotes, and coins, and tokens of value, and cashless payment by debit, credit and loyalty cards being contactless cards, and contact cards and near field communication (NFC) apparatus, with return of change; installation and maintenance of money-dispensing apparatus; installation and maintenance of money-receiving apparatus; installation and maintenance of money-dispensing and money-receiving apparatus; installation and maintenance of vending machines; installation and maintenance of accessories for the aforesaid apparatus, in particular cash boxes for receiving payment means being, in particular, banknotes, and coins, and tokens of value; installation, maintenance and repair of voice control devices for printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, in particular with rotational operation for web-form and isolated materials, digital printing and marking machines on the basis of electrophotography, magnetography, xerography, inkjet, exposure apparatus, being parts of printing machines for contact printing or creating circuit and print templates, numbering, coding, imprinting and marking machines, in particular for the graphics sector, the packaging sector and the data processing sector, labelling machines, engraving machines

For Electronic checking in the nature of supervision, controlling, displaying and measuring apparatus, namely, computer-controlled sheet-feeding apparatus, plasma display panels, pressure measuring apparatus, and recorded consultancy software for creating searchable databases of information and data, recorded sales software for compiling product sales numbers, and recorded software for use in database management, use in electronic storage of data, all of the aforementioned for use in the field of printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labellers being machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, drying machines, drying ovens, pallet changing and pallet transfer machines, stacking machines, machines for handling sheets and plates of metal, food distribution machines, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus; electric and electronic measuring and testing apparatus and instruments, namely, computer-controlled sheet-feeding apparatus, plasma display panels, pressure measuring apparatus, for use in the field of adjustment and pre- adjustment for subassemblies and parts for printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing

machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus; recorded consultancy software for creating searchable databases of information and data and recorded sales software for compiling product sales numbers, all of the aforementioned in the field of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment, for subassemblies and parts for printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal, foodstuff distribution machines, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for remotely controlling, remotely operating, remotely monitoring, controlling and regulating ink slides, ink rollers, damping rollers, register adjustment devices in printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for remotely controlling, remotely operating, remotely monitoring, controlling and regulating devices for transporting and storing printed matter, and printing materials, and printing material reels, and paper, and paper reels, and plastics, and plastics reels, and metal, and organic and inorganic materials, all for use with printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or

more inkjets, single colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus; recorded consultancy software recorded sales software, and recorded software, all of the aforementioned for the remote control, remote operation, remote monitoring, control and regulating of devices for the changing, and transporting and storage of printing plates; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for remotely controlling, remotely operating, remotely monitoring, controlling and regulating devices for cleaning rollers in inking apparatus and damping units, and cylinders, and inkjet print heads and laser systems in printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for remotely controlling, remotely operating, remotely monitoring, controlling and regulating devices for storing and adjusting rollers in inking apparatus, and damping units, and cylinders, and inkjet print heads and laser systems in printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for the remote control, remote operation, remote monitoring, control and regulating of inking apparatus, and damping units, and printer engine cylinders in printer engines; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for the remote control, remote operation, remote monitoring, control and regulation of devices for tempering of inking apparatus damping units, and cylinders, and inkjet print heads and laser systems in printer engines; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for remotely controlling, remotely operating, remotely monitoring, controlling and regulating cutting equipment and cutting cylinders in printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing

machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for remotely controlling, remotely operating, remotely monitoring, controlling and regulating registers and register marks in printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for remote control, remote operation, remote monitoring, control and regulation for the purposes of quality control in printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for remotely controlling, remotely operating, remotely monitoring, controlling and regulating web tension settings in printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for pre-press data processing for the printing of printed matter, for the further processing of printed matter, for production control, production

planning; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for data processing for printing machines, for the printing of printed matter, for the further processing of printed matter, for production control, production planning; recorded consultancy software, recorded sales software, and recorded software, all of the aforementioned for interfaces and data transfer, for use with printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus and parts therefor; recorded software for remotely controlling, remotely operating, remotely monitoring, controlling and regulating devices for transporting and storing printed matter, and printing materials, and printed material reels, and paper, and paper reels, and plastics, and plastics reels, and metal, and organic and inorganic materials for printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus; recorded software for the transport, packaging and storage of remote controls, remote operators, remote monitoring apparatus, controllers and regulators for devices for the transport, packaging and storage of printed matter, and printing materials, and printed material reels, and paper, and paper reels, and plastics, and plastics reels, and metal, and organic and inorganic materials for printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, digital printing and marking machines, labelling machines, engraving machines, machines and mechanical apparatus for the graphics industry, machines and mechanical apparatus for the further processing of printed matter and printing materials and paper and plastics and metal and organic and inorganic materials,

drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates of metal, machines and apparatus for the surface treatment of metals, hot stamping machines and apparatus, thermal transfer machines and apparatus; electronic checking in the nature of supervision, control, display and measuring apparatus, namely, computer controlled sheet-feeding apparatus, plasma display panels, pressure measuring apparatus, and recorded consultancy software, recorded sales software, all of the aforementioned for voice control of printing machines, offset printing machines, rotary web printing machines, rotary sheet printing machines, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, printing machines for use on sheet metal, printing machines for use on cans, printing machines for use on hollow bodies, printing machines for corrugated cardboard, inkjet printing machines and apparatus, inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, laser marking machines and apparatus, laser printing machines and apparatus, marking machines, lacquering machines, packaging machines, coating machines, in particular with rotational operation for web- form and isolated materials, digital printing and marking machines on the basis of electrophotography, magnetography, xerography, inkjet, exposure apparatus, being parts of printing machines for contact printing and creating circuit and print templates, numbering, coding, imprinting, and marking machines, in particular for the graphics sector and the data processing sector, labelling machines, engraving machines; inkjet color document printers, in particular with one or more inkjets, single- colour or multi-colour inkjet printers; accessories for inkjet printers, in particular with one or more inkjets, single-colour or multi-colour inkjet printers, namely, unfilled toner cartridges; encoding apparatus in the nature of encoding machines, in particular for the graphics sector, the packaging sector and data processing; structural parts for the aforesaid goods

Priority Claimed Yes **Foreign Application Number** 56922/2017 **Foreign Application Filing Date** Sep. 13, 2017 **Foreign Registration Number** 726629 **Foreign Registration Date** Jan. 28, 2019 **Foreign Application/ Registration County** SWITZERLAND **Foreign Expiration Date** Sep. 13, 2027

GOODS AND SERVICES INFORMATION

For Coins, ingots and medals in precious metals or in their alloys, commemorative or not; jewelry, precious stones; horological and chronometric instruments, lapel pins

International Classes 14 - Primary Classes **US Classes** 2, 27, 28, 50 **International Class Title** Jewelry

For Insurance consultation; financial management; monetary exchange; real estate affairs, namely, real estate appraisal, real estate investment; credit card, debit card, charge card, bank card, pre-paid card, smart card, electronic cash card, and store account card authorization and transaction processing services; financing of sporting and cultural activities; rental of buildings and outbuildings designed for hosting business entertainment; asset based and private label financing services; financial analysis and consultation; financial administration of credit card accounts; credit card services, namely, extension of credit to others; financial asset management for others; insurance and re-insurance services, namely, underwriting services for all types of insurance; equity investment services; insurance underwriting services in the field of bonds; financial guarantee assurance underwriting services; personal loan financing; mortgage banking services; acquisition financing services; commercial financing services; commercial real estate agency services; mutual fund investment; private equity and debt investment; consultancy, advisory and information services relating to all the foregoing services; insurance brokerage services, credit agency services in the fields of consumer and commercial credit, real estate loan financing services and banking and financing services; computerized services in connection with financial and monetary operations relating to electronic commercial transactions, namely, electronic funds transfers, electronic debit and credit card transaction processing; banking, namely, bank card and store account card authorization and transaction processing services; financial clearing-house services; issuing of cheques and letters of credit; financial trust operations; bill payment services; electronic credit and debit transaction

processing; electronic funds transfer; smart card and electronic cash card payment, authorization, and transaction processing services; electronic cash disbursements services; cash replacement rendered by credit card and debit cards; electronic cash transactions; cheque verification; cheque cashing. deposit access and automated teller machine services; payment processing services, namely, credit card and debit card transaction processing services; providing financial information via a global computer network; financial sponsorship of musical concerts and festivals; information services in the tourist field, namely, providing financial information in regard to financial matters for the assistance of tourists; providing information related to commodity trading; financial sponsorship of sporting activities

International Classes 36 - Primary Classes **US Classes** 100, 101, 102 **International Class Title** Insurance and Financial

For Land vehicles; apparatus for locomotion by land, air or water, namely, cars, buses, coaches, light lorries and trucks, vans, motor homes, motorbikes, mopeds, motor scooters, push scooters, boats, ships, airplanes, helicopters, locomotives, railway cars; tires for vehicles; electric motors and diesel engines for land vehicles; bicycles, bicycle tires and tubes, automatic guided vehicles, electric power assisted bicycles

International Classes 12 - Primary Classes **US Classes** 19, 21, 23, 31, 35, 44 **International Class Title** Vehicles

For Meat, fish, poultry and game, not live; meat extracts; preserved, dried and cooked fruits and vegetables; jellies, jams, compotes; eggs, milk and milk products, namely, cheese and yogurt; edible oils and fats

International Classes 29 - Primary Classes **US Classes** 46 **International Class Title** Meats and Processed Foods

For Organizing international community sporting events, television show production in the field of sporting entertainment; organization of international community sporting events; organization of sporting competitions, namely, aquatics, archery, athletics, badminton, baseball/softball, basketball, boxing, canoe/kayak, cycling, equestrian, fencing, football, golf, gymnastics, handball, hockey, judo, karate, modern pentathlon, rowing, rugby, sailing, shooting, skateboarding, sport climbing, surfing, table tennis, tae kwon do, tennis, triathlon, volleyball, weightlifting, and wrestling competitions; management of sporting facilities, namely, providing sports facilities; rental of audio and video equipment; production of motion picture films; production of video tapes and audio sounds recordings; rental of films and video tapes and sounds recordings; entertainment in the nature of television news shows; entertainment services in the nature of creation, development and production of television programming; entertainment services in the nature of an ongoing reality based television program; entertainment in the nature of ongoing television programs in the field of sport; rental of interactive education and entertainment videotapes in the field of sports; production of radio and television programs featuring coverage of sports and sporting events; radio and television program and video tape production services; production of animated motion picture films; production of animated television programs; seat booking services for shows and sporting events; timing of sports events; providing of games over the Internet, namely, on-line computer games; electronic games services provided by means of the Internet, namely, providing on-line computer games; providing on-line electronic publications, namely, publication of electronic magazines and newspapers; publication of electronic books, reviews, journals, magazines, texts other than publicity texts; on-line publication of electronic books, reviews, journals, magazines, texts other than publicity texts; providing non-downloadable digital music on the Internet via a global computer network; providing non-downloadable digital music by means of MP3 Internet web sites on a global computer network; providing sport records and statistical information in connection with sports and sporting events; leasing of recorded sound and images, namely, audio, video and photographic archives relating to sport competitions and related events, audio production services; providing information in the field of

sports, namely, providing sporting results; providing information related to sporting events provided on-line from a computer database or from the Internet; music publishing and production services; providing non-downloadable digital music, namely, music from the opening and closing ceremonies of international sporting events, via the Internet; providing statistical information in relation to sports results and audience ratings for sports competitions; booking of seats for shows and cinema presentations; film production; production of television and radio shows; providing golf facilities; health club services, namely, providing instruction and equipment in the field of physical exercise; movie studios; news reporters services; providing on-line non-downloadable publications, in the nature of books, magazines, reviews in the field of sports; provision of educational material, namely, development and dissemination of educational materials in the area of financial literacy

International Classes 41 - Primary Classes **US Classes** 100, 101, 107 **International Class Title** Education and Entertainment

For Bleaching preparations and other detergent substances for laundry use, namely, laundry bleach, laundry blueing, laundry detergent, laundry pre-soak, laundry sizing, laundry soap, laundry starch for laundry use; general purpose cleaning, polishing, scouring and abrasive preparations; non-medicated soaps; perfumery, essential oils, cosmetics, hair lotions; dentifrices; cleaning preparations containing chemicals and chemical compositions for use in cleaning steel, aluminum, galvanized and mixed metal surfaces for general industrial use in the manufacture of metal products; cleaning agents containing chemicals and chemical compositions for use in industry to remove contaminants from industrial process systems; paint strippers containing chemicals and chemical compositions to remove paint from equipment surfaces in paint spray booth operations

International Classes 3 - Primary Classes **US Classes** 1, 4, 6, 50, 51, 52 **International Class Title** Cosmetics and Cleaning Preparations

For Chemicals for use in industry and science, namely, chemical additives for use in the pharmaceutical industry and the food industry; unprocessed artificial resins for use in manufacturing plastics, unprocessed plastics; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; adhesives used in industry for the binding of books, for the manufacture of surgical bandages, and adhesives used in construction; unprocessed synthetic resins; thermoplastic and thermosetting unprocessed synthetic resins organic molding compositions, for general use in the industrial arts; chemical intermediates; organosilicone compounds, namely, polysiloxanes and silanes in the form of unprocessed artificial resins, pastes, fluids, elastomers, vulcanizing preparations and accelerators; antifoaming agents; chemical catalysts for paints; chemicals for developing and fixing x-ray films and other chemicals associated with the development of said films; phosphors; chemical substances for use as nuclear fissionable material; fuel for nuclear reactors; adhesive substances used in industry; polycrystalline alumina ceramic, for general use in the industry; soldering fluxes and preparations; thermoplastic and thermosetting adhesives; chemicals, biochemicals and reagents for use in industry, science and research for non-medical purposes; chemical preparations, test kits and reagents for analysis or diagnosis used for scientific purposes, namely, chemical preparations for cell separation and culture, nucleic acid purification, nucleotides, fluorescent nucleotides, oligonucleotides, peptides, proteins, amino acids, organic molecules, and markers for DNA/RNA synthesis; substances for scientific or medical research use, namely, reagents for luminescence, reagents for gene expression quantification, reagents for use with the polymerase chain reaction process, reagents for use with the rolling circle amplification process, reagents for DNA cloning and vectors, modifying and restriction enzymes, reagents for labeling, sequencing and fragment analysis of nucleic acids, proteins and custom synthesis, reagents for recombinant protein expression purification; chromatography chemicals; substances for scientific or medical research use, namely, reagents for

electrophoresis, bioinformatics, spectrophotometry and fluorometry; radiochemicals for scientific research use; substances for scientific or medical research use, namely, reagents for scintillating proximity assays, high through put screening assays for drug development, reagents for high resolution laser fluorescence confocal microscopy; specialty chemicals for use in industry, science and research; gases and gas mixtures for industrial, research and scientific purposes; chemical preparations and additives for use in the manufacture of pharmaceutical products, and diagnostic preparations and substances; chemical test reagents, saline solution and reagent-coated paper all for scientific and laboratory use; fissionable chemical elements for scientific research use; radioactive elements and isotopes for industrial, scientific and research purposes; radioactive sources and standards for use in radiographic techniques; radioactive sources for use in non-destructive testing, purification and sterilizing techniques; radionuclides for scientific research use; chemicals and chemical compositions for use in the treatment of water systems, waste water treatment systems, cooling water systems, boiler water and steam generating systems, boiler condensate systems, fluid separation systems, water clarification and dewatering in aqueous systems, conditioning systems, gas cleaning systems, industrial process systems, fuels and fuel processing systems, hydrocarbon and gas processing systems, oil and gas processing and petrochemical systems, pulp and papermaking systems, metal and plastic coating systems, metal processing systems; chemical products, namely, chemical gasoline additives, distillate chemical and detergent fuel additives and performance additives for fuels used in turbine engines; bags of chemically-treated water-absorbing granular materials for placement into fuel tanks; test kit consisting of reagents used for determining the presence of algae and active organic organisms in diesel fuel; bacteria cultures and nutrients for waste water and sludge treatment; polymeric chemicals used to disperse particulate matter in steam generating equipment; chemicals and chemical compositions as antifoulants and demulsifiers in coke-making and by-product operations of iron and steel industries; chemicals, catalysts, and unworked plastics for use as filtering material, acid gas eliminating filters, and zinc oxide whisker crystals filters; unprocessed plastics, none of the above covering photographic, cinematographic or optical goods; etching fluids for dissolving unwanted materials, namely, metals, semiconductor material and glass

International Classes 1 - Primary Classes **US Classes** 1, 5, 6, 10, 26, 46 **International Class Title** Chemicals

For Dissemination of advertising matter via all media, namely, in the form of thematic messages centered on human values; promotion of products and services of third parties through sponsoring arrangements and license agreements relating to international sports' events; business management; business administration; providing office functions; promoting the goods and services of others by means of contractual agreements, namely, arranging for sponsors to affiliate their goods and services with an awards program, a sports competition and sporting activities and licensing agreements relating to international sports' events to enable partners to gain additional notoriety and/or image derived from those of cultural and sporting events, in particular international sporting events; promoting the goods and services of others by means of image transfer, namely, making the partners' products and services benefit from the notoriety and attractiveness of sporting events and competitions; rental of advertising space of all kinds and on all carriers, digital or not; business management services, namely, administration of competitions for the participation of national teams to an international athletic competition, and promoting the support to said teams with the public and the concerned circles by means of promotional campaigns in the media; inventory control services; consultation in the field of inventory control services; business acquisition integration services; direct marketing advertising for others featuring database marketing; consultation in the field of direct marketing advertising for others featuring database marketing; business reorganization consulting services; truck and automobile fleet management services, namely, voyage reporting and invoicing via a global computer network; consultation in the field of truck and automobile fleet

management services; business administration consulting services; operation and management of power plants of others; consultation in the field of operation and management of power plants, business services, namely, the administration of repair and services contracts, supply chain management and consulting services in the areas of chemical product and service sourcing and procurement, product inventory and supply management and cost; consulting, marketing, cost and pricing analysis relating to electrochemical liquid purification units for use in the industrial sector; administrative, commercial and technical computerized file management; data entry and data processing services; consultancy in computerized database and file management; the bringing together, for the benefit of others, of a variety of goods and services, enabling customers to conveniently view and purchase those goods and services from an Internet web site particularly specializing in the marketing of the sale of goods and services of others; business information, commercial information agencies, rental of photocopying machines; promoting the sale of goods and services of others by means of advertisements, promotional contests, discounts and incentives in the nature of sweepstakes, rebates, reward points, and value added offers generated in connection with the use of payment cards; the provision of documentation, namely, direct mail advertising, dissemination of advertising matter, distribution of samples, document reproduction; advertising regarding commercial sales promotion of goods and services at the retail level; providing consumer product information regarding purchase of goods and services on-line via the Internet and other computer networks; advertising services, namely, advertising for transport, travel, hotels, lodging, food and meals, sports, entertainment and sightseeing, for tourist agencies services; consultation in the field of data processing, in particular, in regard to financial transactions; maintenance of computerized databases; computerised file management, namely, digital file management comprising a portfolio of images and video sequences intended for use under license in traditional advertising and in the promotion of behavior, namely, moral advertising; retail and wholesale store services, online store services, and online ordering services featuring tires, sports goods, bicycles and parts and fittings for bicycles; retail and wholesale store services, online store services, and online ordering services featuring pharmaceutical, veterinary and sanitary preparations and medical supplies; providing television home shopping and internet shopping services in the field of general consumer merchandise; procurement services, namely, purchasing jewellery, horological instruments, clothing, fashion accessories, bags, and memorabilia for others; retail and wholesale store services, online store services, and online ordering services featuring jewellery, horological instruments, fashion accessories, bags, and memorabilia

International Classes 35 - Primary Classes **US Classes** 100, 101, 102 **International Class Title** Advertising and Business

For Cash registers, calculating machines, data processing equipment and computers; fire-extinguishing apparatus; protective helmets for sports; glasses, sunglasses, sports glasses, namely, sports goggles for use in skiing, racquetball, swimming; computer software for individual and multi-player network games and interactive evolutive scenario games; fuel distribution equipment, namely, metered fuel pumps, electrical fuel level gauges, control valves for regulating the flow of gases and fuel lines; automated fuel station management systems, comprised of computer operating software, metered fuel pumps, rate control panels, fuel lines and dispensing nozzles for fueling land and marine vehicles and marine vehicles and aircraft; gas meters; automated railway track switch machines; Global Position System (GPS) based tracking and monitoring systems for the railroad and transit industries; electrical devices and electrical power distribution products, namely, capacitors, circuit breakers, circuit breaker load centers, circuit closers, circuit interrupters, commutators, contactors, current rectifiers, current limiters, electric contacts, electric collectors, electric conductors, electric connectors, electric controllers, electric inductors, electric power supplies, electricity distribution boards and boxes, electricity distribution consoles, electricity switchboards and

switchboxes; computer software for troubleshooting and maintaining programmable controllers, for analyzing blood vessels including cardiac vessels which also provides calculation functions with respect to blood vessels, for use with medical patient monitoring equipment, for receiving, processing, transmitting and displaying data, for use in developing personalized asset allocation programs, for use on-line to enable office equipment dealers to submit applications, manage portfolios and communicate with the company, for use in accessing mortgage and insurance information, for collecting data involving vital medical signs, for use with electrical power systems analyses and instructional manual sold as a unit therewith, for use by employees for financial institutions for determining financial investments for clients and in processing the sale of the identified investments, for obtaining information on the flood-hazard status of real property, for the development of graphical user interfaces and data visualization, for use to calculate mortgage payments, for regulating and managing vehicle fleet maintenance services, for use in connection with accessing and utilizing commercial computer services, for use by customers to obtain lease portfolio information, for a radiology information system for use by radiologists and radiology department in the database management of employee and patient information, for patient monitoring and archival purposes, installed on and used in connection with PCs and medical monitoring equipment, for graphical user interface, for use in sending encrypted and compressed data over paging carrier systems, for providing access to websites where buyers and sellers can conduct business electronically, and for underground navigation, namely, for navigation of down hole probe assembly for oil drilling and drilling assemblies for routing underground utilities; electrical goods, electrical power generation and distribution products and electrical voltage and overvoltage surge products, namely, arresters, busways, capacitors, lighting contactors, controllers and input/output devices in the nature of keyboards and monitors, fuses, lighting controllers, switch boxes, LEDs, namely, light emitting diodes, voltage regulators for electric power, voltage surge protectors, voltage surge suppressors, voltmeters, electrical circuit boards, relays and timers, solenoids and limit switches, full-voltage manual starters, reduced voltage starters, electrical switches and disconnects, circuit board terminal blocks and pumping panels, circuit breakers and disconnects, transformers, electrical lighting and power circuit boards, electrical wires, cables, cords, and conductors, electrical wiring, lightning arresters, electricity meters, power meters, grounding resistors, humidity and temperature sensors; building and wood sensors, specifically sound wave and vibration sensors; industrial calibration sensors, specifically, proximity sensors; push buttons, motor control centers comprised primarily of physical groupings of combination starters in one assembly; electrical resistance heating wires and electrical controllers therefor and voltage regulators; software and software programs for data collection, data management and data analysis for use in industrial, research, and medical use; apparatus for electrophoresis not for medical use; chromatography columns and pumps; apparatus for bioinformatics systems, namely, computer hardware and software for processing biological information; apparatus for scintillation, namely, scintillation counter to measure beta-emitting nuclides; imaging apparatus for radioactive and luminescent emissions, namely, cameras and scanners; synthesis and purification integrated systems, namely, chromatography columns, cartridges, fraction collectors, mixers, monitors, pumps, recorders and analysis software; apparatus for microarrays, namely, probes, slides, buffers, bacterial controls, racks and trays; laser based optical apparatus for digital imaging not for medical use; laboratory articles, namely, microarray slides; laboratory glassware, vials and microvials and microtiter plates; computer software for hospital operating room management; computer software for critical care information management; industrial process control software; computer software programs and program manuals sold as a unit for use in factory management; graphical user interface based computer programs for controlling machines in industrial automation applications; software for creating graphics displays and editing dynamic data interfaces for real time graphics applications for industrial and business applications; communications software for connecting computer network users; industrial process software for plastic injection molding; software for control, monitoring, simulation,
