For Electro-optical instruments and components for optical testing, measurement, and evaluation, namely, photomultipliers, photomultiplier tubes, electron multipliers, phototubes, MCP (Micro-channel plates), and I.I. (Image intensifiers); Xray apparatus not for medical purposes, namely, scintillator panels; Photomultiplier tubes; Photodiodes; Photodiode arrays; Photodiodes, namely, APD (Avalanche photodiodes); Semi-conductor modules; Semi-conductor elements; Flame sensors; Ultraviolet sensors; Light intensity sensors; Spectrometers; Photometers; Thickness monitors, namely, optical thickness monitors consisting of light source and photodetectors; Wafer thickness monitors; thin film thickness monitors; FPD thickness monitors; thickness monitors for layers coated by ware, thin film and FPD; Scientific instruments, namely, Immunochromato-Readers; Fluorescence lifetime measuring apparatus, namely, scientific instruments in the nature of electronic analyzers for measuring the lifetime of fluorescent sources; Measurement devices for weak light emission, namely, scientific instruments in the nature of electronic analyzers for measuring weak light emissions; Measuring and testing machines and instruments using excitation light, namely, electronic analyzers for measuring and testing reflective properties of various surfaces using excitation light; Machines and instruments for measuring and testing light emission and fluorescence; Biochemical measuring machines and instruments and other measuring machines and

instruments for optical screening of samples using fluorescent reagents, namely, laboratory equipment in the nature of electronic analyzers for measuring dimensional and chemical characteristics of laboratory samples using fluorescent reagents; Drug screening system for laboratory use principally comprised of a light source, sensor, image processor and computer display; Biochemical measuring machines and instruments and other measuring machines and instruments for optical screening of samples using fluorescent reagents in the nature of drug screening system for laboratory use principally comprised of a light source, sensor, image processor and computer display; Laboratory apparatus and instruments for bioanalysis, namely, drug screening system for laboratory use principally comprised of a light source, sensor, image processor and computer display; Electronic analyzers for measuring the yield of photoluminescent materials, namely, Absolute PL (photoluminescence) quantum yield measuring apparatus and Absolute PL (photoluminescence) yield measuring apparatus; Light beam measurement devices, namely, Laser beam profiler using for measurements of beam size, ellipticity, slope, position, center of mass coordinate, space beam distribution, beam spread angle, relative beam strength and beam stability of laser beam and pulsed light; Measurement devices for characteristic evaluation of fibers and elements, namely, Ultrashort pulsed light source used for measurement of fiber and light receiving module; Semiconductor failure analysis inspection apparatus, namely, inspection machines and computer hardware for use in optical inspections; Near infrared spectroscope for measuring cerebral oxygenation; Laboratory equipment, namely spectroscopes and oxygen monitors and sensors for environmental and laboratory use; Particle counters, namely, photon counters; Photo detection elements, namely, photomultiplier tubes, phototubes, I.I. (image intensifiers); Photosensors, namely, light sensors; Infrared detection elements, namely, Output elements for converting infrared in the light-receiving surface to electrical signal, Infrared Sensitive Photodiodes, Infrared sensitive Image sensor, Infrared sensitive photoconduct elements, and Infrared sensitive photovoltaic element; Light source devices for laboratory apparatus and instruments; Light source devices for optical machines and apparatus; Light source devices for photographic machines and apparatus; Light source devices for semiconductor inspection apparatus, namely, light source devices composed of lamps, LED, LD etc.; Light source devices for measuring machines and instruments; Laser diodes; Laboratory apparatus, namely, ultraviolet (UV) irradiation apparatus in the nature of UV light boxes for performing chemical analysis; Lasers, not for medical purposes; Image sensors, namely, devices that convert visual images to electric signals using semiconductor circuits and Electron Tube; Digital cameras; CCD cameras; CMOS cameras; TDI cameras; Video cameras for measurement; Digital cameras for microscopes; High sensitivity cameras; High resolution video cameras; High-speed photography video cameras; Streak cameras for optical measurements; Infrared cameras; Ultraviolet cameras; Line sensor cameras, TDI cameras for nondestructive inspection apparatus using X-rays; Industrial cameras; Radiation detection elements, namely, radiation detectors; X-ray apparatus not for medical purposes, namely, Xray generators, X-ray cameras, X-ray optical elements, nondestructive inspection apparatus using X-rays, baggage inspection apparatus using X-rays, and X-ray detectors not for medical purposes; Devices for converting medical images such as moving and still images output from medical apparatus and instruments into digital data, namely, computer hardware; High-speed digital slide scanners for investigation, development, education and research; Optical and micro-optical elements, namely, optical device comprised of a bundle of micron-sized optical fibers; Lasers not for medical purposes, namely, quantum cascade lasers; Light receiving elements, namely, Light modulation photo IC; Optical modulators, namely Phase modulators; Spectroscopes; Optical microscopes; Signal processors; Signal converters, namely, digital-to-analog signal converters; Liquid chromatographic apparatus, namely, liquid chromatography apparatus for laboratory use; Laboratory apparatus and instruments for drug development,

namely, Drug screening system for laboratory use principally comprised of a light source, sensor, image processor and computer display; Laboratory apparatus and instruments for cell analysis and intercellular analysis for drug development testing and the finding and developing of new drugs, namely, imaging apparatus and instruments for use in the study of proteins and peptides in drug development; Photoelectron sensors; Photoelectric switches; Distance sensors; Proximity sensors; Color sensors; Paper detection sensors; Position sensors; Position detection elements, namely, position sensitive detectors to detect position data of incident spot light; Optical encoders; Angle sensors; Vibration sensors; Illuminance sensors; Sensors for measuring solar radiation; Electric sensors, namely, distortion detection sensors, heat sensors, and moving body sensors for surveillance cameras; Spectrophotometers; Radiation thermometers; Temperature detectors in the nature of temperature sensors; Moisture meters; Saccharimeters, namely, scientific instruments for measuring the strength of sugar solutions; Colorimeters; Laboratory equipment and supplies, namely, thermometers in the nature of color thermometers; Analysis machines and apparatus, namely, scientific instrumentation for measuring water quality; Gas testing instruments; Scientific apparatus, namely, mass spectrometers; Air analysis apparatus; Light wavelength analysis measurement machines and instruments, namely, scientific instruments in the nature of electronic analyzers for measuring and testing light wavelength; Devices for measuring current, voltage, power and wavelength for characteristic evaluation of light emitting diodes; Semiconductor inspection apparatus, namely, inspection machines for use in optical inspections; Photovoltaic cell inspection apparatus, namely, inspection machines for the physical inspection of photovoltaic cells; Flow cytometers; Infrared detectors for use in scientific and industrial applications; Gas incomplete combustion alarms; Laser diode modules; Optical components, namely, SLD (Super luminescent diodes), light-emitting diodes, and LED light source lamps for photomultipliers; Lighting apparatus for cameras; Lighting apparatus dedicated to digital cameras, namely, lights for use with digital cameras; Infrared lighting apparatus for cameras; Infrared lighting apparatus for digital cameras, namely, infrared lights for use with digital cameras; Wavelength-tunable light sources, namely, light sources devices composed of lamps and wavelength-tunable system; Electron tubes, namely, electron beam irradiation tubes; Electron beam irradiation equipment, namely, energy beam generators and electron beam generators; Measuring machines and instruments using lasers, namely, leaser measuring systems; Cameras; High resolution cameras; ICCD cameras; Security cameras; Video surveillance systems, namely, electric and electronic video surveillance installations; Video surveillance cameras; Computer software for analyzing defects found in semiconductors during manufacture; computer software for operating analyzing machines for use in finding defects in semiconductors during manufacture; Computer software for controlling digital cameras, frame grabbers, line scan cameras, image sensors, and flat panel sensors; Image processing apparatus using computers for converting and processing digital images; Computer software for obtaining or analyzing electronic images; Computer program for managing the operation of UV irradiation apparatus; Micromirror display elements for digital image projection apparatus, namely, scientific and technical apparatus in the nature of optical mirrors; Electronic spectrophotometer for use in identifying and measuring colors, namely, Fourier transform infrared spectrophotometers; Electronic copying machines; Laser printers; Scanners in the nature of scan blocks, namely, small scan heads incorporating galvano scanner for laser scanning; Light filters in the nature of optical filters; Photographic exposure meters; Microscopes; Microscopes using laser; Electric wires and cables; Optical fibers; Telecommunications apparatus, namely, Light emitting/receiving device for optical fiber communications and spatial light transmission; Laser radar for collision prevention or shock prevention for vehicles; Radar apparatus; Liquid-crystal display panel; Power supplies,

namely, high-voltage power supply source; Electric sockets; Current-voltage converter; Temperature controllers for controlling the temperature of photomultiplier tubes, namely, photomultiplier tube coolers; Chromatography apparatus for laboratory use; Electric light regulators in the nature of electric light dimmers; Coin counting or sorting machines; Parts and fittings for all aforesaid goods; Structural parts of positron emission tomography machines not for medical purposes; Lighting parts comprising laser diodes for microscopes

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of a rectangular dark orange label design that carries the mark "SOFTSOAP" in white stylized letters contained in a blue stylized banner shape with a grey bar running along the bottom edge and curving upward in the lower right hand corner of the banner shape. The banner shape is placed towards the top of the mark. Also at the top of the mark are images of brown stylized leaves in one corner and flowers in the opposite corner which have white, purple and dark pink petals and small yellow center petals. Towards the center of the label are the words "TAHITIAN GLOW" in white lettering. Towards the lower part of the label is the image of a flower with white petals, small dark pink petals and tiny yellow center petals above the image of a half grapefruit which is dark pink with a light beige center, a rim which is light beige and the edge of the rim is orange. There are images of droplets of juice which are dark pink, light beige and yellow. Next to that is the image of the sun which is yellow with an orange rim and light yellow glow. The image of the sun floats in a pink sky with white clouds. The image of the sky meets the image of an ocean which is purple and light purple. Beneath the half of grapefruit is the image of a wedge of pineapple which is yellow with brown on the edges. In the lowest corner of the label is a small green and light green leaf and a purple flower with dark pink center petals and tiny yellow petals. In the opposite corner is a white flower with dark pink center. The matter shown in broken lines serves only to show the position or placement of the mark and is not claimed as a feature of the mark. **Color Drawing** Yes **Color Claimed** The color(s) orange, white, blue, grey, brown, purple, light purple, pink, dark pink, yellow, and light beige, light green and green is/are claimed as a feature of the mark. **Acquired Distinctiveness** In part **Distinctiveness Limitation Statement** As to "SOFTSOAP"

Mark Literal(s) M MIDLETON DAIR GHAELACH

CASE IDENTIFIERS

Serial Number 86521008 **Application Filing Date** Feb. 02, 2015 **Register** Principal **Mark Type** Trademark **Publication Date** Dec. 08, 2015

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of a three-part label. The top-most part of the label is an oval that is wider than it is high, with four borders. The outermost border is the widest, and the innermost border is the narrowest. Inside the oval is a capital letter "M" with a curling line extending from behind the center of the letter, out beyond the left and right sides of the letter and then back behind the two arms of the letter "M". The middle portion of the label is a large trapezoid with rounded corners, and deep right-angled indentations in the two upper corners, creating the impression of a flap extending up across most of the top of the label. This middle label is only slightly wider across the top than across the bottom, and it is somewhat wider overall than it is high. At the top of the label, inside the flap but also extending below it into the body of the label, is a rectangle with rounded corners that is much wider than it is high. This rectangle has three borders around the edges, the inner two of which are interrupted on the bottom edge by another smaller rectangle with rounded corners. In the larger rectangle is the word "MIDLETON", with partial outlining around the letters that creates the impression that the letters are three-dimensional. Inside the letter "O" in "MIDLETON", at the top of that letter, is a circle. The smaller rectangle is about three-quarters as wide as the larger rectangle, but very thin, and it overlaps the bottom edge of the larger rectangle. This smaller, narrow rectangle has two thin borders that extend all the way around it, and where it extends below the larger rectangle, it also is enclosed by the larger rectangle's outermost border. Below both rectangles, aligned with the left edge of the larger rectangle, are the words "DAIR GHAELACH". To the right is a depiction of a tree. The third part of the label is a rectangle with rounded edges that is about four-fifths as wide as the middle part of the label, and that is wider than it is high. This label is divided into segments by several lines. One line extends horizontally all the way across the label approximately two-thirds of the way down from the top edge. A second line extends vertically up from the full-width horizontal line without actually touching it; this line stops before the upper edge of the label. The vertical line is closer to the right edge of the label than to the left edge, but it is also closer to the center than to the right edge. Above the full-width horizontal line, and extending from the

left edge of the label almost to the vertical line, is a second horizontal line a little more than one third of the way down from the top edge. There is also a second line that extends horizontally across the right side of the label from the vertical upright line to the right edge of the label. This line is slightly lower than the upper horizontal line on the left side of the label. **Color Claimed** Color is not claimed as a feature of the mark. **Translation** The English translation of "DAIR GHAELACH" in the mark is "IRISH OAK".
