GOODS AND SERVICES INFORMATION

For Stamping foils containing primarily metals, particularly hot stamping foils and cold stamping foils, with pigmented layers, color layers, and lacquer layers all for use in painting, decorating, printing and art; transfer foils containing primarily metals, particularly thermal transfer foils, with pigments, marking substances, color layers and lacquer layers all for use in painting, decorating, printing and art; stamping foils and transfer foils containing primarily metals, particularly thermal transfer foils, containing a consumption layer which can be detached during stamping consisting of, a metal layer, color layer, lacquer layer, pigmented layer, a layer with marking substances for application onto a substrate all for use in painting, decorating, printing and art; laminating foils containing primarily metals, containing a metal layer, color layer, lacquer layer, pigmented layer, and a layer with marking substances for application onto a substrate all for use in painting, decorating, printing and art; paints, varnishes, lacquers, particularly containing optical effect pigments, ceramic pigments, and marking substances; dry lacquers, in the form of foils and sheetings, particularly containing colored pigments, optical effect pigments, ceramic pigments, and marking substances; pigments, particularly colored pigments, optical effect pigments, and ceramic pigments, also in the form of pastes and concentrates, and mixtures thereof; marking inks, marking pigments and marking color particles all for use as paint additives, lacquer additives or color additives for introducing and mixing into paints and lacquers, in layers of foils or in plastics, in plastic mixtures or in plastic master batches, to add texture, color or reflection; pigments and pigment mixtures comprised primarily of pigments, colorants and color mixtures comprised primarily of colorants, fluorescent pigments and pigment mixtures comprised primarily of fluorescent pigments, phosphorescent pigments and pigment mixtures comprised primarily of phosphorescent pigments, paints and lacquers, unprocessed natural and synthetic resins, for use as marking substances also in smallest-sized forms as well as in form of powders, pastes and concentrates; metals and their alloys as well as metals and their compounds, each in form of powders and other small particles as well as in form of pastes and concentrates in the nature of metal pastes and metal paste concentrates for use as marking substances and for use in painting,

decorating, printing and art; master batches of additives, namely, paint additives and color additives and colorant mixtures, each containing pigments, particularly effect pigments, and marking substances, for use by working-in into plastics and plastic mixtures, to add texture, color or reflection; color powders, namely, color powdered paints and colorants in form of powders; color mixtures being mixtures of color pigments; colorants; coloring agents, namely additives containing pigments for coloring purposes; printing inks, engraving inks and marking inks, and toners for printing, marking and engraving; powder lacquers

International Classes 2 - Primary Classes **US Classes** 6, 11, 16 **International Class Title** Paints

For Goods of paper and goods of plastic for use for packaging purposes, namely, tags, stickers, labels, stamps, vignettes, tokens, seals and bands; packaging covers and packaging sheaths, of paper or plastics; pouches, for documents and goods as packaging materials, patches, as packaging materials, foils as packaging materials, sheaths as packaging materials and jackets as packaging materials, each made of paper or plastics or synthetic materials and for packaging purposes; all afore-mentioned goods are particularly containing marking substances and/or optically active spatial structures and/or optical diffraction structures and/or holographic structures and/or optically-effective effect pigments and/or pigments and/or magnetic structures and/or electrically conductive structures and/or electronic circuits; stamping foils primarily of paper and of plastic for packaging purposes, particularly hot stamping foils and cold stamping foils, primarily of paper, for use in the decoration as well as for manufacturing of identification devices or payment means or authentication devices or money replacement means or for use for identification purposes or authentication purposes or as money replacement means or for use for banknotes, bills or payment means; stickers, stamping plastic foils, transfer plastic foils, thermal transfer plastic foils and laminating plastic foils for packaging purposes as well as foil strips or foil patches, both being plastic foils; paper with UV-curable adhesives for cold stamping; labels of paper or primarily of paper; vignettes in form of stickers primarily made of paper for application on products and on documents or other objects for decoration purposes; goods made of paper in form of tokens, cards, discs, tags and bands of paper and sheets and foils of paper or plastics for packaging purposes for use in manufacturing non-electronic unencoded data carriers for identification purposes, authentication purposes or for use as money replacement means; stamping plastic foils, particularly hot stamping foils and cold stamping foils, transfer plastic foils and thermal transfer plastic foils, for packaging purposes, these foils consist of a carrier film primarily of plastics and at least one transfer layer which can be detached from the carrier film and applied to a substrate and which transfer layer is provided with decor elements and/or with marking substances, optically active structures, optically effective effect pigments, colored pigments, magnetic structures, electrically conductive structures, electronic circuits, or combinations thereof or which is designed to receive such elements, structures and/or substances; laminating plastic foils for packaging purposes, consisting of a carrier film which is primarily made of plastic and which is provided with decor elements and/or with marking substances, optically active structures, optically effective effect pigments, colored pigments, magnetic structures, electrically conductive structures, electronic circuits or combinations thereof, or which is designed for receiving such elements, structures and/or substances, for application onto a substrate; labels, stamps, seals, bands as well as sheets and foils of paper or primarily of paper for use as identification means, authentication means and money replacement means, as far as contained in this class; stamping plastic foils, particularly hot stamping foils and cold stamping foils, for packaging purposes as well as for use for decoration as well as for identification means or authentication means or money replacement means or for use for banknotes, bills or payment means; packaging materials of paper or primarily of paper and/or of plastic, namely, bags, pouches, envelopes, covers, sheets and foils; self-adhesive plastic foils for packaging purposes; laminate foils and films of synthetic plastic for packaging purposes; printed matter, namely, paper signs, books, manuals, curricula, newsletters, catalogues, brochures, charts, posters, leaflets, flyers,

hand-outs and informational cards and brochures in the field of plastics and paper processing, product design and decoration, packaging design and decoration, product and document security, operation of machines and of computer software and hardware; printed instructional and teaching materials in the field of plastics and paper processing, product design and decoration, packaging design and decoration, product design and decoration, product and document security, operation of machines and of computer software and hardware; packaging material of plastic, namely, plastic film, plastic sheets, plastic foils, plastic bands and plastic sheaths for use as wrapping and packaging material; printers' type; printing blocks; fiber paper materials for use as marking substances including optically-effective marking substances

International Classes 16 - Primary Classes **US Classes** 2, 5, 22, 23, 29, 37, 38, 50 **International Class Title** Paper Goods and Printed Matter

For Collecting, compiling, systematizing, updating and maintenance of data and information in computer databases, namely of data for checking the stock, the authenticity of goods and documents, for tracking and tracing of goods and documents as well as for authentication validation and identity validation; business administration services, namely, computer-based organizational and business-management data verification and data analysis concerning data for checking of the stock, the authenticity of goods and documents, for tracking and tracing of goods and documents as well as for authentication validation and identity validation; compiling, systematizing and updating of data in computer databases concerning data for checking of the stock, the authenticity of goods and documents, for tracking and tracing of goods and documents as well as for authentication validation and identity validation; computerized file management; business advice and commercial advice about the movement of goods, by means of databases as well as by means of an internet portal; business consultancy, particularly concerning measures and operational processes for tracking the stock, the authenticity of goods and documents, for tracking and tracing of goods and documents as well as for authentication validation and identity validation, particularly by means of detecting, checking and verifying of optical effects, optical security features as well as of markings and marking substances

International Classes 35 - Primary Classes **US Classes** 100, 101, 102 **International Class Title** Advertising and Business

For Blank magnetic, optical and electronic information carriers and magnetic, optical and electronic information carriers pre-recorded with identification data and authentication data, in the form of foils, foil sheetings, foil strips, foil patches, stickers, labels, vignettes, bands, tokens, coins, discs, cards and plates featuring encoding means, namely, featuring optical marking substances, machine-readable marking substances, optically-effective spatial structures, optical diffractive structures, holographic structures, optical effect pigments, pigments, or combinations thereof, for use as identification means, authentication means or money replacement means or for use with banknotes, bills or payment means; magnetic, optical and electronically encoded identification devices and authentication devices in the form of encoded foil sheetings, foil strips, foil bands, foil patches, stickers, labels, bands, threads, discs, cards or plates, encoded with layers with marking substances, with magnetic layers, optical layers, pigmented layers, electrically conductive layers, and with optical structures, for use for the storing, processing and display of information; encoded identification devices and encoded authentication devices, namely, data carriers in the form of encoded foils, foil strips, foil patches, stickers, labels, bands, threads, discs, cards and images, with marking substances, optically active spatial structures, optical diffraction structures, holographic structures, optically effective effect pigments, and with pigments; optical security elements in form of optically-encoded data carriers for integration into banknotes, into goods or into documents, containing authentication information and authentication data for certifying the authenticity of banknotes and for the authentication of persons or goods or documents; optical data carriers in the form of

optical security foils primarily of plastics which contain optically encoded information carriers and optically encoded structures with authentication data for certifying the authenticity of persons, goods, documents, passes, IDs and other identification documents, certificates, banknotes, bills, payment means or money replacement means or other documents of value; all afore-mentioned goods also for use as encoding means with marking substances, optically active interference layers, polarization layers and/or liquid crystal layers and/or with optically active spatial structures, optical diffraction structures, holographic structures, optically effective effect pigments, pigments or combinations thereof; magnetic, optical, electric and electronic parts and components in form of foil sheetings and foil bands, foil patches, stickers, labels, bands, threads, discs, cards or plates which are encoded and/or provided with optical structures and/or pigmented layers and/or with layers with marking substances, for storing, processing and/or display of information; identification devices, authentication devices and money replacement means, namely, data carriers in form of coins, cards, discs, stamps, plates, tokens, bands as well as sheets and foils of plastics, synthetic materials, paper or metal, which are encoded or provided with optical effect structures; encoded embossing stamps, encoded sheets and foils of metal which contain identification data and authentication data and feature optical effect structures, for use as identification devices, authentication devices and money replacement means; encoding means, namely, magnetic and optical data carriers and data carriers carrying magnetically, optically and electronically recorded and encoded identification and authentication information in form of covers and sheaths, dimensionally-stable sheaths of plastic, except for packaging purposes, stamping foils, transfer foils, thermal transfer foils and laminating foils, also in form of bands or patches, except for packaging, all these goods as encoding devices containing marking substances, optically active spatial structures, optical diffraction structures, holographic structures, optically effective effect pigments, pigments, magnetic structures, electrically conductive structures, electronic circuits, or combinations thereof; electronic security tags and electronic security labels for goods; electric and optical data processing apparatus; apparatus for checking and validating the authenticity of banknotes; detectors and optical readers for optical security features or optically-active identification features of goods and documents; blank magnetic data carriers; blank magnetic and optical and electronic data carriers; magnetic and optical and electronic data carriers, pre-recorded with identification information and authentication information; computer hardware; peripheral devices for computers; portable mini-computers, mobile telephones, personal digital assistants (PDA); data processing apparatus and electronic and optical and opto-electronic checking and testing devices, also portable, particularly for detecting, checking and verifying of optical effects, markings, marking substances and optical security features; downloadable firmware and software and recorded firmware and software, for controlling and operating data processing apparatus and testing devices; computer peripheral devices for detecting, checking and verifying of optical effects, markings, marking substances and optical security features; computer software, downloadable, and recorded computer software, particularly for detecting, checking and verifying of optical effects, markings, marking substances and optical security features; downloadable and recorded computer software for database management, for database integration and electronic databases in the field of product and document validation and authentication, tracking and tracing of goods and documents and identity validation and authentication; downloadable computer software and recorded computer software, particularly computer database software and client software for providing access to databases; downloadable computer software and recorded computer software for checking and verifying of optical effects, markings, marking substances and optical security features, the authenticity of goods and documents, for tracking and tracing of goods and documents as well as for authentication validation and identity validation; downloadable computer software and recorded computer software for database administration and database management; downloadable computer software and recorded computer software for decryption and encryption of information and data; downloadable and recorded software and firmware for use as updates, patches and upgrades for all afore-mentioned

software and firmware; downloadable electronic documentations in the field of product and document authentication, in the field of plastics and paper processing, product design and decoration, product and document security, operation of machines and of computer software and hardware and downloadable electronic publications in the nature of books, manuals and newsletters in these aforementioned fields

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Semi-finished goods of plastics or primarily of plastics in the form of semi-finished synthetic plastic foils and semi-finished goods of plastic or primarily of plastic in form of semi-finished plastic tags, semi-finished plastic stickers, semi-finished plastic labels, semi-finished plastic covers and semi-finished plastic sheaths, all not for packaging purposes; synthetic plastics as semi-finished goods, in the form of bands, sheetings, patches, foils, sheets, covers, sheaths and laminating foils, except for packaging purposes; semi-processed semi-finished plastics in form of laminating foils, which consist of a carrier film for laminating onto a substrate, the carrier film is also containing decor elements and marking substances, optically active structures, optically effective effect pigments, colored pigments, magnetic structures, electrically conductive structures, electronic circuits and which is designed for containing such elements, structures and substances; plastic stamping foils, plastic hot stamping foils and plastic cold stamping foils, plastic transfer foils as well as plastic thermal transfer foils, all primarily of plastic and other than for packing, these foils consists of a carrier film and a consumption layer for application onto a substrate, and the consumption layer contains decor elements and marking substances, optically active structures, optically effective effect pigments, colored pigments, magnetic structures, electrically conductive structures, electronic circuits, and which is designed for containing such elements, structures and substances; plastic stamping foils, plastic transfer foils and plastic laminating foils as well as plastic foil strips and foil patches, primarily of plastics, other than for packing; plastic stamping foils and plastic transfer foils, namely, plastic foils, that are consisting of a carrier film which is primarily of plastics and at least one transfer layer, which can be detached from the carrier film and applied onto a substrate, other than for packing; semi-finished goods of plastic or primarily of plastic for industrial purposes, namely, self-adhesive foils of plastic, plastic sheets, plastic bands, plastic laminates, stamping foils of plastic, each for receiving of or already provided with decor elements, with marking substances, with optically effective structures, with optically effective effect pigments, with colored pigments, with magnetic structures, with electrically conductive structures, with electronic circuits; semi-finished goods of plastic, namely, semi-processed plastics in sheet form, laminating foils with or without a metal layer for application to a substrate, plastic stamping foils for surface decoration as well as for identification means, authentication means and money replacement means or for use for banknotes, bills or payment means; security threads of plastic in form of narrow stamping foil strips, transfer foil strips and laminating foil strips, all not for textile use; plastic laminating foils primarily of plastic with or without a metal layer for application onto a substrate, other than for packing; synthetic plastic as semi-finished products in the form of foils, other than for wrapping, for use as optical security devices; semi-processed plastics in the form of bands, sheets and foils for identification devices, authentication devices and money replacement means except for packaging purposes; semi-finished plastic goods, namely, plastic laminate sheets, films and foils, and semi-finished extruded plastic goods in the form of sheetings, bands, patches, plates, covers and workpieces, semi-finished molded plastic goods in the form of covers, semi-finished parts and workpieces other than for wrapping and packaging; semi-finished goods, of plastic or primarily plastic, namely, self-adhesive plastic foils, semi-finished plastic laminates and semi-finished plastic laminate films, sheets and panels, other than for packing; semi-finished goods of plastic or primarily of plastic and/or synthetic resins, in form of granules,

powders, pellets and in form of other small particles, not for wrapping or packaging for use in the further manufacturing as marking substances

International Classes 17 - Primary Classes **US Classes** 1, 5, 12, 13, 35, 50 **International Class Title** Rubber Goods

For Technology consultancy in the field of surface decoration and surface coating by means of stamping foils, transfer foils, thermal transfer foils and laminating foils; technology consultancy in the field of the transfer of patterns, decors, structures, functional surface structures and coatings that are pigmented or otherwise provided with optically active additives and with marking substances; technology consultancy in the field of possibilities of application of identification means, authentication means and money replacement means, particularly of data carriers and data media in form of foil strips, foil sheetings and foil bands, foil patches, stickers, markings, pigmented color layers and lacquer layers, marking substances, labels, threads, plates, chips, tokens, stamps, seals, cards, discs, tags, bands as well as sheets and foils of plastic, paper or metal; technology consultancy in the field of possibilities of use and application of security elements in form of foil strips, foil sheetings, foil bands, foil patches, stickers, labels, threads, tokens, bands, sheets and foils of plastic, paper or metal on goods, banknotes, bills or payment means, particularly for increasing the security against forgery; technology consultancy in the field of possibilities of application and the working-in of security elements in the form of optically active additives and of marking substances, particularly of pigments and effect pigments, in production processes and finishing processes; technology consultancy in the field of security architectures using marking substances, optical means, and optically active additives for authentication of goods or documents; technology consultancy in the field of application of identification means, authentication means and money replacement means, namely, data carriers like chips, tokens, bands, sheets as well as foils of synthetic materials, paper or metal; technology consultancy in the field of security architectures and security concepts for access control, for authentication checks of goods, documents, money and commercial papers as well as for data protection; technology consultancy in the field of the use and optimization of surface decoration and surface coating by means of stamping foils, transfer foils, thermal transfer foils, laminating foils, color layers, lacquer layers and coatings and marking substances with respect to computer software and computer hardware, particularly with respect to databases; technology consultancy in the field of possibilities of application of decorative and functional surface structures and surface coatings and marking substances and optically effective additives in combination with software and hardware for data processing; computer-based technical data analysis with computer systems and data conversion of electronic information; computer technology consultancy and computer security consultancy; computer software consultancy; data-warehousing services; services of updating of database information and database software via computers; IT consulting services with respect to data processing; development, creation, updating and maintenance of computer software for data processing, particularly with respect to databases as well as of computer software for detecting, checking and verifying of optical effects, optical security features as well as of markings and marking substances, the authenticity of goods and documents, for tracking and tracing of goods and documents as well as for authentication validation and identity validation; development of computer hardware and software for data processing, data storage and data transmission, particularly with respect to databases as well as with respect to the detection, checking and verifying of optical effects, optical security features as well as of markings and marking substances, the authenticity of goods and documents, for tracking and tracing of goods and documents as well as for authentication validation and identity validation; technical development of scientific and technical methods and processes for measuring and testing the optical, electronic, opto-electronic, physical and chemical properties of goods and of security elements that are contained in goods or

their packaging; technical development of testing and measuring apparatus and of related computer hardware and software for such testing and measuring processes; data encryption and decryption services; electronic authentication of product and document information and identification information and electronic authentication of related data; computer time-sharing services being leasing of data processing equipment; technology consultancy in the field of computer security and data protection; electronic data storage; leasing of computer hardware for using the computing capacity for data processing **International Classes** 42 - Primary Classes **US Classes** 100, 101 **International Class Title** Scientific and computer services
