MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the wording "TOCONAUTE" in which "TOCO" appears in bold, all beneath a stylized design of a lotus flower. **Color Claimed** Color is not claimed as a feature of the mark.

RELATED PROPERTIES INFORMATION

International Registration 1440707 **International Registration Date** Oct. 05, 2018

GOODS AND SERVICES INFORMATION

For Medical apparatus and instruments, namely, for recording, transmission, imaging or analysis of bioelectric signals, namely, electroencephalogram machine, electrocardiographs and electromyogram machines, thermographic cameras, ultrasonographs for monitoring pregnancy, foetal electrocardiograph machine, maternal electrocardiograph machine, electrohysterogram, and wearable technology in the nature of sensors and monitors for medical use for checking biometric and physiological data as well as position, movement, geographical and lifestyle metrics

International Classes 10 - Primary Classes **US Classes** 26, 39, 44 **International Class Title** Medical Apparatus

For Computerized file management service

International Classes 35 - Primary Classes **US Classes** 100, 101, 102 **International Class Title** Advertising and Business

For Scientific apparatus and instruments using artificial intelligence, namely, scientific apparatus and instruments for recording, transmission and analysis of electric signals, infrared imaging apparatus, ultrasonography apparatus; measuring apparatus and instruments, using artificial intelligence namely, for measuring voltage of electric signals, intensity of infrared signals, intensity of ultrasonography signals; checking and supervision apparatus and instruments, namely, wearable technology for checking physiological, medical, position movement, geographical and lifestyle metrics; diagnostic apparatus not for medical use, namely, apparatus for wearable technology for recording and transmission of electric, infrared and ultrasonographic signals; sound recording apparatus, namely, wearable technology for recording sound; sound transmission apparatus, namely, wearable technology for transmitting sound; Wearable technology in the nature of an image recording apparatus for recording still images and video; Wearable technology in the nature of an image transmission apparatus for

transmitting still images and video; Wearable technology in the nature of an image reproduction apparatus and external monitors for displaying still images and video: digital recording media, namely, blank digital storage media; software in the nature of recorded programs for use in database management

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Medical services including telemedicine and telehealth ; medical assistance; hospital services

International Classes 44 - Primary Classes **US Classes** 100, 101 **International Class Title** Medical, beauty and agricultural services

For Clothing, namely, belts being clothing; underwear

International Classes 25 - Primary Classes **US Classes** 22, 39 **International Class Title** Clothing

For Technical evaluations concerning design in the nature of engineering services; scientific research; technological research in the field of medicine, telemedicine and health ; design of computers for others; computer development; software design; software development; research and development of new products for others; conducting of technical project studies in the field of physiological signal analysis and electrical signal analysis ; architecture; design of interior décor; software development and design; software installation; software maintenance; updating of software; software rental; programming for computers; computer system analysis; computer system design; computer hardware consultation services provided by consultants relating to computer hardware design and development; digitization of documents; software as a service (SaaS) featuring software for use in data base management; cloud computing featuring software and software as a service for use in database management; information technology (IT) consultancy; hosting of servers; electronic data storage

International Classes 42 - Primary Classes **US Classes** 100, 101 **International Class Title** Scientific and computer services

GOODS AND SERVICES INFORMATION

For Machines and machine tools for preparing samples for subsequent analysis in scientific, industrial, laboratory, optical, weighing and measuring apparatus and instruments; electric fusion machines for the dosing, mixing and fusing of samples to prepare samples by fusion in the cement, lime, carbonate, ceramic, glass, slag, refractory, mining and geological, silicate, clay, ores, sulphide, fluoride, bauxite, aluminium, catalyst, polymer, pigment, steel, pure metal, ferroalloy, non-ferrous alloy and pharmaceutical industries; forging moulds for laboratory use; casting machines; machines to transform ores, rocks, cements and other materials into glass discs; pressure regulators and mixers being parts of machines for liquids and gases; all the aforesaid goods also being capable of communicating their status, activities and data with each other and with enterprise information systems; component parts and fittings for all the aforesaid goods, namely spare parts and consumables

International Classes 7 - Primary Classes **US Classes** 13, 19, 21, 23, 31, 34, 35 **International Class Title** Machinery

For Furnaces for sample preparation; bead furnaces; heating apparatus for preparing samples for XRF analysis; all the aforesaid goods also being capable of communicating their status, activities and data with each other and with enterprise information systems; component parts and fittings for all the aforesaid goods, namely spare parts and consumables

International Classes 11 - Primary Classes **US Classes** 13, 21, 23, 31, 34 **International Class Title** Environmental Control Apparatus

For Educational services, namely conducting conferences, seminars and training sessions on the subject matter of the use, maintenance and operation of chemicals for use in industry, science and photography, chemicals for use in fusion processes being the dosing, mixing and fusing of samples, namely, lithium, oxides, potassium iodide, lithium bromide, sodium iodide, lithium fluoride, lithium nitrate, and sodium nitrate, chemicals for use in industry for the assessment of fusion methods and processes for the dosing, mixing and fusing of samples, beads made of borate, halides and a stabilized sample matrix of ores,

rocks, soils, sludges, sediments, raw material, waste, catalysts, cements, glass or fly ash; educational services, namely, conducting conferences, seminars and training sessions on the subject matter of the use, maintenance and operation of machines and machine tools for use with scientific, industrial, laboratory, optical, weighing and measuring apparatus and instruments, machines and machine tools for the treatment of materials, machines and machine tools for sample preparation, moving and handling equipment, electric fusion instruments for the dosing, mixing and fusing of samples, namely, automatic fusion machines for the dosing, mixing and fusing of samples for preparing samples by fusion in the cement, lime, carbonate, ceramic, glass, slag, refractory, mining and geological, silicate, clay, ores, sulphide, fluoride, bauxite, aluminium, catalyst, polymer, pigment, steel, pure metal, ferroalloy, non-ferrous alloy and pharmaceutical industries, forging moulds for laboratory use, fusion machines for the dosing, mixing and fusing of samples, casting machine, machines to transform ores, rocks, cements and other materials into glass discs, pressure regulators and mixers for liquids and gases, grinders, coating machines and coating systems for the surface treatment of paper and other materials and parts therefor, ceramic-coated blades for use in paper refining, sensors, measuring instruments and systems for process technology optimisation for use in pulp and paper processing, all the aforesaid goods also being capable of communicating their status, activities and data with each other and with enterprise information systems, and parts and fittings for the aforesaid goods; education services, namely, conducting conferences, seminars and training sessions on the subject matter of the use, maintenance and operation of hand tools for use with scientific, industrial, laboratory, optical, weighing and measuring apparatus and instruments, hand tools and implements for the treatment of materials, hand tools and implements for sample preparation, laboratory tweezers, stamping-out hand tools, scraping hand tools, perforating hand tools, cutting hand tools, polishing hand operated tools, spatulas being hand tools, and parts and fittings for the aforesaid goods; educational services, namely conducting conferences, seminars and training sessions on the subject matter of the use, maintenance and operation of scientific, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking as supervision, teaching apparatus and instruments, apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, apparatus for recording, transmission or reproduction of sound or images, magnetic data carriers, recording discs, compact discs, DVDs and other digital recording media, mechanisms for coin-operated apparatus, cash registers, calculating machines, data processing equipment, computers, computer software, fire-extinguishing apparatus, scientific, industrial and laboratory apparatus and instruments applicable to the physical, chemical, biological, geological and biochemical analysis of the environment, solids, liquids, gases and particulates, instruments and apparatus for performing chromatography, for the measurement of weight, size, shape, density, structure, concentration and characteristics of particles, molecules and macromolecules, instruments and apparatus performing optical image analysis, for the measurement weight, size, shape, density, structure, concentration and characteristics of particles, molecules and macromolecules, instruments and apparatus using laser diffraction and scattering, for the measurement of weight, size, shape, density, structure, concentration and characteristics of particles, molecules and macromolecules, scientific, and laboratory apparatus and instruments, scientific, industrial and laboratory apparatus and instruments for counting, sizing, classifying, differentiating and identifying particles in solids, liquids or gases, instruments to enable the measurement of rheological properties, namely, viscometers, rotary and capillary rheometers, instruments to enable the measurement of dimensional information of particles, particle size, shape, density, structure and composition analysers, particle size and shape distribution and concentration measuring instruments, namely, particle counting instruments, air and liquid particle counters, photocorrelation spectroscopy instruments, instruments for producing zimm plots to determine the molecular weight of polymers, acoustic spectroscopy instruments, and laser diffraction measuring instruments, particle charge measuring instruments, namely, zeta potential measuring instruments,

electrophoretic mobility measuring instruments, particle mobility measuring instruments, pH measuring instruments, and micro electrophoresis measuring instruments, instruments to enable the measurement of the amount of heat involved in a chemical reaction or other process, namely calorimeters, instruments to enable the measurement of molecular diffusion coefficient and hydrodynamic of molecules, namely, instruments that produce taylor dispersion analysis plots, scientific and measuring apparatus and instruments, namely spectrometers, X-ray fluorescence analyzers and spectrometers, diffractometers, X-ray diffractometers and wafer analyzers, neutron activation analyzers, pulsed fast and thermal neutron activation analyzers, analytical apparatus for use in analyzing samples of composites for use in scientific, industrial and laboratory applications, namely, X-ray diffraction and spectrometry apparatus, diffractometers, X-ray diffractometers, X-ray analysers, X-ray fluorescence spectrometers, wafer analysers, X-ray tubes, materials characterization apparatus, namely, scientific and measuring apparatus and instruments, namely, spectrometers, X-ray fluorescence analyzers and spectrometers, diffractometers, X-ray diffractometers and wafer analyzers, X-ray apparatus not for medical use, analytical, process control and measuring apparatus, namely, reflectometers, spectrometers, X-ray fluorescence analyzers and X-ray diffraction meters, analytical, process control and measuring apparatus, namely, reflectometers, spectrometers, X-ray fluorescence analyzers and X-ray diffraction meters for the cement, steel, aluminium, petrochemicals, industrial minerals, glass and polymers industry, and to customers in research and development institutions, metrology tools, namely, reflectometers, spectrometers, X-ray fluorescence analyzers and X-ray diffraction meters, reflectometers, spectrometers, X-ray fluorescence analyzers and X-ray diffraction meters for both silicon and compound semiconductor applications, X-ray fluorescence wafer and disc analyzers and automated ellipsometers, X-ray fluorescence wafer and disc analyzers and automated ellipsometers for the silicon semiconductor industry, for analyzing film thickness, composition and density, X-ray diffraction instruments, namely, X-ray diffraction meters for the compound semiconductor industry, X-ray tubes, not for medical purposes, X-ray detectors, laboratory equipment, namely, crucibles, flasks, stirrers, Petri dishes, electrodes, laboratory apparatus, namely, scales, mechanical dispensers, robots, robots for weighing and dosing samples and dispensing the flux for use in analysis by X-ray fluorescence analysis (XRF), atomic absorption analysis (AA), inductively coupled plasma analysis (ICP) and wet chemistry analysis for the ceramic, cement, steel, aluminium, glass, polymer, mining, lime, bauxite, ferroalloy, pure metal, catalyst, geology and mineral prospecting, petroleum and oil industries, gas and electric automatic fusion apparatuses for the dosing, mixing and fusing of samples, namely, laboratory robots, robots for use in X-ray fluorescence analysis (XRF), atomic absorption analysis (AA), inductively coupled plasma analysis (ICP) and wet chemistry analysis for the ceramic, cement, steel, aluminium, glass, polymer, mining, lime, bauxite, ferroalloy, pure metal, catalyst, geology and mineral prospecting, petroleum and oil industries, electric fusion instruments for the dosing, mixing and fusing of samples, namely, automatic fluxer for sample fusing in the cement, lime, carbonate, ceramic, glass, slag, refractory, mining and geological, silicate, clay, ores, sulphide, fluoride, bauxite, aluminium, catalyst, polymer, pigment, steel, pure metal, ferroalloy, non-ferrous alloy and pharmaceutical industries, laboratory weighing apparatus and instruments and balances, apparatus for separating and preparing samples, suspensions, sprays, and emulsions of particles for use with any of the aforesaid goods, namely, gel permeation chromatography, sample dispersion units, stirred cells, autosamplers, dry powder feeders, dispensers, auto titrators, nebulizers, ultrasonic baths, and temperature controllers, instrument controllers, namely, computers, digital signal processors and microprocessors, computer printers, machine readable data carriers, namely, solid state memory devices, optical or magnetic storage media disks, magnetic tapes, all sold pre-programmed with control or analysis programs for use with the all of the aforesaid goods, computer software and hardware for controlling and operating all of the aforesaid goods and for analysing

measurements made by all of the aforesaid goods, computer software for use in diffractometry, computer software for use in spectrometry, computer software for use in X-ray fluorescence analysis, computer software for use in the determination of X-ray intensities, computer software for use in the determination of the thickness of layer samples, computer software for use in the determination of chemical composition, computer software for use in the standardless analysis of samples, all the aforesaid goods also being capable of communicating their status, activities and data with each other and with enterprise information systems, and parts and fittings for all the aforesaid goods; Educational services, namely, conducting conferences, seminars and training sessions on the subject matter of the use, maintenance and operation of apparatus and instruments for heating, furnaces for sample preparation, bead furnaces, heating apparatus for preparing samples, all the aforesaid goods also being capable of communicating their status, activities and data with each other and with enterprise information systems, and parts and fittings for the aforesaid goods; information, advisory and consultancy services relating to the aforesaid services

International Classes 41 - Primary Classes **US Classes** 100, 101, 107 **International Class Title** Education and Entertainment

For Chemicals for use in industry, science and photography; chemicals for use in fusion processes being the dosing, mixing and fusing of samples, namely, lithium, oxides, potassium iodide, lithium bromide, sodium iodide, lithium fluoride, lithium nitrate, and sodium nitrate; chemicals for use in industry for the assessment of fusion methods and processes being the dosing, mixing and fusing of samples; borate, halides and a stabilized sample matrix of ores, rocks, soils, sludges, sediments, raw material, waste, catalysts, cements, glass or fly ash for use in X-ray fluorescence

International Classes 1 - Primary Classes **US Classes** 1, 5, 6, 10, 26, 46 **International Class Title** Chemicals

For Data processing services in the field of industrial plant control and materials characterization; data processing services related to scientific and industrial instruments and components thereof; computerised data processing services; data management services, namely, updating and maintenance of data in computer databases; database management services; services consisting of the compilation of statistical data for use in scientific and industrial research; retail store services and online retail store services featuring chemicals for use in industry, science and photography, chemicals for use in fusion processes the dosing, mixing and fusing of samples, namely, lithium, oxides, potassium iodide, lithium bromide, sodium iodide, lithium fluoride, lithium nitrate, and sodium nitrate, chemicals for use in industry for the assessment of fusion methods and processes, namely, the dosing, mixing and fusing of samples, beads made of borate, halides and a stabilized sample matrix of ores, rocks, soils, sludges, sediments, raw material, waste, catalysts, cements, glass or fly ash; retail store services and online retail store services featuring machines and machine tools for use with scientific, industrial, laboratory, optical, weighing and measuring apparatus and instruments, machines and machine tools for the treatment of materials, machines and machine tools for sample preparation, moving and handling equipment, electric fusion instruments for the dosing, mixing and fusing of samples, namely, automatic fusion machines for the dosing, mixing and fusing of samples to prepare samples by fusion in the cement, lime, carbonate, ceramic, glass, slag, refractory, mining and geological, silicate, clay, ores, sulphide, fluoride, bauxite, aluminium, catalyst, polymer, pigment, steel, pure metal, ferroalloy, non-ferrous alloy and pharmaceutical industries, forging moulds for laboratory use, fusion machines for the dosing, mixing and fusing of samples, casting machine, machines to transform ores, rocks, cements and other materials into glass discs, pressure regulators and mixers and parts of these machines for liquids and gases, hand-held power driven grinders, coating machines and coating systems for the surface treatment of paper and other materials and parts therefor, ceramic-coated blades for use in paper refining, sensors, measuring instruments and systems for process technology optimisation for use in pulp and paper processing, all the aforesaid goods also being

capable of communicating their status, activities and data with each other and with enterprise information systems, and parts and fittings for the aforesaid goods; retail store services and online retail store services featuring hand tools for use with scientific, industrial, laboratory, optical, weighing and measuring apparatus and instruments, hand tools for the treatment of materials, hand tools, and implements for sample preparation, laboratory tweezers, stamping-out tools hand tools, scraping hand tools, perforating hand tools, cutting hand tools, polishing hand operated tools, spatulas being hand tools, and parts and fittings for the aforesaid goods; retail store services and online retail store services featuring scientific, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking, teaching apparatus and instruments, apparatus and instruments for conducting, switching, transforming, accumulating, regulating and controlling electricity, apparatus for recording, transmission and reproduction of sound or images, magnetic data carriers, recording discs, compact discs, DVDs and other digital recording media being flash cards, optical or solid state storage systems, and downloadable media files, data processing equipment, computers, computer software, scientific, industrial and laboratory apparatus and instruments applicable to the physical, chemical, biological, geological and biochemical analysis of the environment, solids, liquids, gases and particulates, instruments and apparatus for performing chromatoqraphy, for the measurement of weight, size, shape, density, structure, concentration and characteristics of particles, molecules and macromolecules, instruments and apparatus performing optical image analysis, for the measurement weight, size, shape, density, structure, concentration and characteristics of particles, molecules and macromolecules, instruments and apparatus using laser diffraction and scattering, for the measurement of weight, size, shape, density, structure, concentration and characteristics of particles, molecules and macromolecules, scientific, and laboratory apparatus and instruments, scientific, industrial and laboratory apparatus and instruments for counting, sizing, classifying, differentiating and identifying particles in solids, liquids or gases, instruments to enable the measurement of rheological properties, namely, viscometers, rotary and capillary rheometers, instruments to enable the measurement of dimensional information of particles, particle size, shape, density, structure and composition analysers, particle size and shape distribution and concentration measuring instruments, namely, particle counting instruments, air and liquid particle counters, photocorrelation spectroscopy instruments, instruments for producing zimm plots to determine the molecular weight of polymers, acoustic spectroscopy instruments, and laser diffraction measuring instruments, particle charge measuring instruments, namely, zeta potential measuring instruments, electrophoretic mobility measuring instruments, particle mobility measuring instruments, pH measuring instruments, and micro electrophoresis measuring instruments, instruments to enable the measurement of the amount of heat involved in a chemical reaction or other process, namely, calorimeters, instruments to enable the measurement of molecular diffusion coefficient and hydrodynamic of molecules, namely, instruments that produce taylor dispersion analysis plots, scientific and measuring apparatus and instruments, namely, spectrometers, X-ray fluorescence analyzers and spectrometers, diffractometers, X-ray diffractometers and wafer analyzers, neutron activation analyzers, pulsed fast and thermal neutron activation analyzers, analytical apparatus for use in analyzing samples of composites for use in scientific, industrial and laboratory applications, namely, X-ray diffraction and spectrometry apparatus, diffractometers, X¬-ray diffractometers, X-ray analysers, X-ray fluorescence spectrometers, wafer analysers, X-ray tubes, materials characterization apparatus, namely, scientific and measuring apparatus and instruments being spectrometers, X-ray fluorescence analyzers and spectrometers, diffractometers, X-ray diffractometers and wafer analyzers, X-ray apparatus not for medical use, analytical, process control and measuring apparatus, namely, reflectometers, spectrometers, X-ray fluorescence analyzers and X-ray diffraction meters, analytical, process control and measuring apparatus, namely, reflectometers, spectrometers, X-ray fluorescence analyzers and X-ray diffraction meters for the cement, steel, aluminium, petrochemicals, industrial minerals, glass and polymers industry, and to customers in research and development institutions,

metrology tools, namely, reflectometers, spectrometers, X-ray fluorescence analyzers and X-ray diffraction meters, reflectometers, spectrometers, X-ray fluorescence analyzers and X-ray diffraction meters for both silicon and compound semiconductor applications, X-ray fluorescence wafer and disc analyzers and automated ellipsometers, X-ray fluorescence wafer and disc analyzers and automated ellipsometers for the silicon semiconductor industry, for analyzing film thickness, composition and density, X-ray diffraction instruments, namely, X-ray diffraction meters for the compound semiconductor industry, X-ray tubes, not for medical purposes, X-ray detectors, laboratory equipment, namely, crucibles, flasks, stirrers, petri dishes, electrodes, laboratory apparatus, namely, scales, mechanical dispensers, robots, namely, robots for weighing and dosing samples and dispensing the flux for use in analysis by X-ray fluorescence analysis (XRF), atomic absorption analysis (AA), inductively coupled plasma analysis (ICP) and wet chemistry analysis for the ceramic, cement, steel, aluminium, glass, polymer, mining, lime, bauxite, ferroalloy, pure metal, catalyst, geology and mineral prospecting, petroleum and oil industries, gas and electric automatic fusion apparatuses for the dosing, mixing and fusing of samples, namely, laboratory robots, robots for use in X-ray fluorescence analysis (XRF), atomic absorption analysis (AA), inductively coupled plasma analysis (ICP) and wet chemistry analysis for the ceramic, cement, steel, aluminium, glass, polymer, mining, lime, bauxite, ferroalloy, pure metal, catalyst, geology and mineral prospecting, petroleum and oil industries, electric fusion instruments for the dosing, mixing and fusing of samples, namely, automatic fluxer for sample fusing in the cement, lime, carbonate, ceramic, glass, slag, refractory, mining and geological, silicate, clay, ores, sulphide, fluoride, bauxite, aluminium, catalyst, polymer, pigment, steel, pure metal, ferroalloy, non-ferrous alloy and pharmaceutical industries, laboratory weighing apparatus and instruments and balances, apparatus for separating and preparing samples, suspensions, sprays, and emulsions of particles for use with any of the aforesaid goods, namely, gel permeation chromatography, sample dispersion units, stirred cells, autosamplers, dry powder feeders, dispensers, auto titrators, nebulizers, ultrasonic baths, and temperature controllers, instrument controllers, computers, digital signal processors and microprocessors, computer printers, machine readable data carriers, namely, solid state memory devices, optical or magnetic storage media disks, magnetic tapes, all sold pre-programmed with control and analysis programs for use with the all of the aforesaid goods, computer software and hardware for controlling and operating all of the aforesaid goods and for analysing measurements made by all of the aforesaid goods, computer software for use in relation to diffractometry, computer software for use in relation to spectrometry, computer software for use in relation to X-ray fluorescence analysis, computer software for use in relation to the determination of X-ray intensities, computer software for use in relation to the determination of the thickness of layer samples, computer software for use in relation to the determination of chemical composition, computer software for use in relation to the standardless analysis of samples, namely, all the aforesaid goods also being capable of communicating their status, activities and data with each other and with enterprise information systems, and parts and fittings for all the aforesaid goods; retail store services and online retail store services featuring apparatus and instruments for heating, furnaces for sample preparation, bead furnaces, heating apparatus for preparing samples, all the aforesaid goods which are capable of communicating their status, activities and data with each other and with enterprise information systems, and parts and fittings for the aforesaid goods; providing information, advisory and consultancy services all relating to the aforesaid services; data processing services related to scientific and industrial instruments and components thereof

International Classes 12 - Primary Classes **US Classes** 19, 21, 23, 31, 35, 44 **International Class Title** Vehicles

For Apparatus for recording, transmission or reproduction of sound or images; electric navigational instruments; satellite navigation apparatus, namely, a global positioning system (GPS); Global Positioning System (GPS) apparatus; satellite-aided navigation systems, namely, global navigation satellite systems (GNSS), global navigation satellite instruments and global navigation satellite apparatus; measuring and surveying instruments and apparatus, namely, positioning infrastructure systems of GPS/GNSS comprising a transmitter, receiver, reference station, power supply, wired and wireless communications link, cabling, computer hardware and downloadable software for automatic determination of geographic position, both indoor and outdoor, for instruments for surveying; navigation apparatus for vehicles in the nature of on-board computers; GNSS and GPS receivers for guidance, heading, machine control, mapping and position control; anti-jamming devices for satellite navigation and positioning systems, namely, antennas, computer hardware, downloadable software, and downloadable firmware for attenuating interfering signals and allowing global navigation satellite system receivers to acquire and track signals from satellite positioning systems; locating devices consisting of downloadable firmware and hardware components; global navigation satellite system receivers, downloadable software for operating global navigation satellite system receivers, receiver circuit boards; components for GPS systems and devices (GNSS), namely, electronic docking stations, antennae, transmitters, and receivers; positioning systems consisting of downloadable software, downloadable firmware and hardware components,

the aforementioned positioning systems for calculating real-time global navigation satellite system (GNSS) and inertial measurement unit (IMU) integrating information based on data of position, speed and altitude from global navigation satellite systems (GNSS) and inertial measurement units (IMU); graphical user interfaces for global navigation satellite system (GNSS) receivers; global positioning receivers; Global Navigation Satellite System (GNSS) receivers; wearable activity trackers; directional compasses; signaling panels, luminous or mechanical; electronic tags for goods; surveying apparatus and instruments; total stations surveying instruments; electronic distance measuring apparatus; data collectors namely, downloadable software for the collection of data; surveying instruments, coordinate measuring apparatus, coordinate measuring machines and coordinate measuring instruments; absolute encoders; tilt sensors; laser range finders; levels; telescopes for distance measurements; automatic focusing devices; laser scanners; electric monitoring apparatus for monitoring electric current and electrical signals; leveling instruments, namely, level gauges and indicators; surveyors' levels; theodolites; precision measuring apparatus, namely, precision balances; telemetry-based measuring apparatus, telemetry-based measuring instruments, namely, GPS tracking devices; computer hardware, downloadable software and hardware with embedded programs for measuring apparatus and for measuring instruments; hygrometers; temperature indicators; hydrometers; air analysis apparatus; levels being instruments for determining the horizontal, namely level indicators; salinometers; photometers; radar apparatus; pressure measuring apparatus; pressure indicators; speed checking apparatus for vehicles, namely, radar object detectors for use on vehicles; speed indicators; ergometers not for medical purposes; remote control apparatus for use in industrial operations; electric installations for the remote control of industrial operations; frequency meters; flow meters; clinometers; avionics systems for remote-piloted vehicles or unmanned air vehicles (UAV), namely, navigation systems, aircraft altitude indicators, aircraft speed sensors; jigs being measuring instruments, namely, jiggers; gauges, namely, water level gauge measuring systems; rulers being measuring instruments; photon detectors; infrared detectors; sensors for measuring depth; sensors for unmanned aerial vehicles (UAV), namely, sensors for determination of temperatures, positions, and distance; distance measuring apparatus; distance recording apparatus; range finders, namely, telemeters; micrometers; optical goods, namely, eyepieces to perform autocollimation for use with total stations; optical lenses; close-up lenses; mirrors for optics purposes; prisms for optics purposes; optical apparatus and instruments, namely, calibration devices for calibrating optical emission spectrometers, atomic absorption spectrometers and X-ray apparatus, other than for medical use; optical apparatus and instruments, namely, vision inspection apparatus comprised of optical inspection apparatus for industrial use for dimensional inspection of manufactured components; optical apparatus and instruments, namely, optical levels for measuring heights, height differences and distances; optical apparatus and instruments, namely, optical comparators and optical gauges; optical apparatus and instruments, namely, non-contact measuring machines with opto-electronic projection for measuring dimensions, shapes and other surface of objects; lasers not for medical use; simulators for the steering and control of vehicles; intercommunication apparatus, namely, apparatus for transmission of communication; apparatus for use in phototelegraphy; anode batteries; apparatus for charging electric accumulators; electronic connectors; electric regulating apparatus namely, voltage regulators for electric power; electrical inductors; comparators; integrated circuits, chips as integrated circuits and integrated circuit cards as blank smart cards; integrated circuit cards in the nature of smart cards containing programming used to authenticate users for secure access to software and applications in the field of cloud computing; radio transmitters, radio receivers, combined radio transmitter and receiver devices, radio equipment in the nature of radio relay cables, wireless telegraphic and telecommunication equipment in the nature of telegraphic transmitting apparatus and telecommunication cables, parts and accessories for all the aforementioned goods; cellular telephones, wireless modems and routers in the nature of telecommunications systems; interactive touch-screen terminals; scanners and data processing equipment; humanoid robots

with artificial intelligence; central processing units (processors); electronic agendas; electronic notice boards; electronic interactive whiteboards; electronic book readers; magnetic identity cards; encoded magnetic cards, namely, secure Digital (SD) Memory Cards; photographic apparatus, namely cameras; photographic viewfinders; cases especially made for photographic apparatus and instruments; devices for editing cinematographic film; projection apparatus; computer monitors; local area networks, namely, local area networks hardware; wide area networks, namely, wide area network hardware; antennas; computer hardware; data processing apparatus; computer peripheral devices; virtual reality headsets; mathematical instruments, namely, calculators; smart glasses; recorded computer programs, namely, computer operating software; recorded computer operating system programs; computer programs, namely, downloadable software for word processing; downloadable computer software applications for database management; downloadable graphics software for computers; interfaces for computers; monitor computer programs for user interface design, namely, downloadable computer programs for user interface design; downloadable electronic publications in the nature of newsletters in the field of science; downloadable software for scanning images and documents; downloadable software for the management and visual representation of complex information; downloadable software for extracting, analyzing and reporting business intelligence data; downloadable software for integration and information management; downloadable software for the design, engineering, construction, production, operation, maintenance and life-cycle management of manufacturing, power and process plants, ships, offshore platforms and other marine structures; downloadable software for incident and response management; downloadable software for jail records management, video enhancement and analysis, alarm display and common operational picture display; downloadable software for the management of information regarding infrastructure, facilities, assets, land, power outages and mobile workforce; downloadable software for processing global positioning and navigation data for surveying, mapping, trajectory re-construction and other control point and base station positioning applications; downloadable geospatial data and image management software; downloadable software for geospatial mapping, terrestrial imaging, development and deployment of a spatial data infrastructure; downloadable software for geospatial intelligence exploitation and product generation; downloadable software for navigating and determining position, velocity, alignment and attitude for post-mission determination of navigation parameters and sensor orientation from data in land, air and sea applications; downloadable software for calculating correction factors for use with global navigation satellite systems; downloadable economic planning software; downloadable software for agricultural applications and purposes, namely, downloadable software for use in monitoring, measuring, forecasting, reporting, and analyzing agricultural data; downloadable software for use in monitoring, measuring, forecasting, reporting, and analyzing agricultural data for use in the fields of farming, agriculture, horticulture, crop protection and fertilizers, downloadable crop simulation software; downloadable computer software and hardware for the collection, editing, organizing, modifying, transmission, storage and sharing of data and information in the agricultural sector; computer hardware and downloadable software for tracking, recording, storing, monitoring, and analyzing farming data; downloadable software for the management, presentation and analysis of agricultural data, downloadable software for the creation of control regimes for all of the aforementioned control systems; downloadable software for use in connection with agricultural machines and apparatus; downloadable software for use with agricultural machines, equipment and vehicles; downloadable software for testing, monitoring and operating vehicles, equipment, machines, and parts therefor, for use in agriculture, forestry and mining; electronic equipment and parts therefor, namely, electronic computers, for locating, positioning and controlling machines, machine tools and parts therefor, for use in agriculture, forestry and mining; downloadable software for transportation management, scheduling and dispatching; downloadable software for engaging and

coordinating transportation services; downloadable software, namely, downloadable software for logistics, downloadable software for freight forwarding, downloadable software for route planning, downloadable software for routing, downloadable software for vehicle fleet management; electronic control mechanism used with a global positioning system (GPS) receiver to provide automatic shutoff on agricultural spray equipment; downloadable software for geologic modeling, mine design, mine planning and surveying and mining operations in the field of mineral mining applications; downloadable software and microcontroller downloadable software and programmable controls, in particular for transport vehicle control, track optimization, route control, collision avoidance, points adjustment, lift control, location, swarm control, communication between transport vehicles within a swarming storage systems, as well as downloadable logistics software; fatigue detection systems not for medical purposes, for informing the driver to remain vigilant and/or of his/her fatigue levels, comprised of cameras, electronic sensors, namely, electric sensors for monitoring eye movements to gather data, and downloadable software for recording, analyzing, communication and interpretation of the eye movements, as well as of a web interface; electronic collision avoidance systems and downloadable software to detect vehicle collisions; downloadable electronic collision avoidance systems software; electronic instruction manuals sold with software

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Analysis of oil fields for oil-field exploitation; technical research in the field of engineering and technology; engineering; calibration; computer project management services in the field of electronic data processing; quality control; surveying and engineering work; advice related to energy saving, namely, energy auditing; water analysis; mapping services featuring geography; information technology consultancy services; telecommunication technology consultancy services; computer-aided industrial design, research, testing and analysis services in the field of geospatial computer systems; GNSS correction services, namely, providing corrections data via geostationary satellites for scalable accuracy and seamless real time kinematic (RTK) assistance for land, marine and airborne applications; architectural services; architectural consultancy; construction drafting; urban planning; industrial design; software development for creation of simulations and models, business process simulation and visualization of objects to enhance situational understanding, and consultancy services relating thereto; data model development services, namely, computer modeling services; computer system design; website design consultancy; computer-aided design services (CAD); design of software for use with computer-aided manufacture; computer-aided engineering services (CAE); design of software for use with computer-aided quality control; geological surveys; oil-field surveys; geological research services; underwater exploration; computer services, namely, data migration and complete data integration services; computer system and software analysis; monitoring of computer systems by remote access to ensure proper functioning; outsourced services, in the nature of outsourced service providers, in the field of information technology; consulting services provided by consultants relating to Internet security; consulting services provided by consultants relating to data security; duplication of computer programs; conversion of data or documents from physical to electronic media; digitization of documents in the nature of scanning; conversion of computer programs and data, other than physical conversion; data encryption services; computer rental; rental of computer hardware and software; rental of computer software; hosting of computer sites, namely, hosting of web sites of others on a computer server for a global computer network; software as a service (SaaS) services featuring software for use in database management; hosting of servers; off-site data backup; electronic data storage; cloud computing, namely, cloud hosting provider services; programming for computers; software development and design; updating of software; computer system integration; development of web sites, namely, design and

implementation of web applications for others; creating and designing website-based indexes of information for others using information technology services; research and development of new products for others; maintenance of computer software; software installation; technical support services relating to software, namely, technical advice related to the installation of software; installation, maintenance and repair of agricultural software; consulting services provided by consultants relating to computer hardware design and development; design and development of computers and software for the agricultural sector; consulting services provided by consultants in the field of computer system integration; consultancy in the field of network security services, namely, assistance, design, assessment, evaluation, selection, implementation, monitoring and management of computer hardware and software for network security for others; network security software maintenance; computer system security monitoring services for others for technical purposes, namely, computer services for protecting data and information from unauthorized access; recovery of computer data; monitoring of computer systems to detect breakdowns; monitoring of computer systems for detecting unauthorized access or data breach; computer network analysis, design, configuration, integration of computer networks for others, and consultancy thereon; computer systems integration; quality control and testing of computer hardware and software in the context of technical network management; quality control computer services, namely, monitoring of network application software and testing of optimal software performance; software consultancy; computer software consultation for others regarding design, development, installation, configuration, integration, maintenance, upgrading, testing, repair; helpdesk services consisting of computer software technical support services for others; consultancy services relating to the development and use of computer hardware; information technology (IT) consultancy; providing information relating to information technology and programming by means of websites; computer security consultancy

GOODS AND SERVICES INFORMATION

For Scientific and laboratory apparatus for non-medical use, in particular scientific and laboratory apparatus using terahertz radiation in the nature of gas chromatography apparatus, beam-positioning, power measurements, phase measurements, optical and quasi-optical measurements, material testing, thickness and refractive index measurements and other geometric and physical measurements; medical laboratory research instruments, industrial research instruments, industrial qualification instruments devices for molecular analysis for non-medical use in particular devices for molecular analysis by imaging or terahertz reflectometry; devices for structural analysis of objects, bodies or materials for non-medical use, in particular laboratory research, production-qualification of plastics, composites, textiles, ceramics and other materials devices for structural analysis of objects, bodies or materials by terahertz radiation; industrial imaging devices, in particular terahertz industrial imaging devices for gemstones, roots, plastics, composites, textiles, fibres, paper, leather, ceramics, metals, liquids, and other materials; imaging or reflectometry devices for non-medical use, in particular terahertz imaging or reflectometry devices for gemstones, roots, plastics, composites, textiles, fibres, paper, leather, ceramics, metals, liquids, and other materials; spectroscopy devices for non-medical use, in particular terahertz spectroscopy devices; devices for the detection of explosives, in particular devices for the detection of explosives by terahertz imaging or reflectometry; devices for analysis of parcels, in particular devices for analysis of parcels by terahertz imaging or reflectometry; devices for gas analysis, in particular devices for gas analysis by terahertz imaging or reflectometry; devices for analysis of semi-conductors, in particular devices for

analysis of semi-conductors by terahertz imaging or reflectometry; devices for inspecting circuits and mechanical, electronic, optical, or optoelectronic devices, in particular by terahertz imaging or reflectometry; integrated circuits, in particular integrated circuits for terahertz signal transmission, integrated circuits for terahertz signal reception, integrated circuits for transmitting and receiving terahertz signals; downloadable, executable, cloud-accessible or not, analytical, data-management, interactive with humans and with machines software, in particular terahertz signal processing software; downloadable, executable, cloud-accessible or not, analytical, data-management, interactive with humans and with machines imaging software, in particular software for imaging by terahertz signal processing; device for data transmission by terahertz radiation; integrated circuits for data transmission by terahertz radiation; downloadable, executable, cloud-accessible or not, analytical, data-management, interactive with humans and with machines software for data transmission by terahertz radiation; device for telecommunication by terahertz radiation in the nature of telecommunications transmitters, backhauling, device to device communications, secure communications, data-center communications, encrypted communications; integrated circuits for telecommunication by terahertz radiation; downloadable, executable, cloud-accessible or not, analytical, data-management, interactive with humans and with machines, encrypted telecommunication software by terahertz radiation; devices in the nature of biometric identification bracelets, material sensing, material imaging, material mapping of reflectance, transmittance and absorbance for identification or for authentication of persons or objects by terahertz radiation; integrated circuits for identification or for authentication of persons or objects by terahertz radiation; downloadable, executable, cloud-accessible or not, analytical, data-management, interactive with humans and with machines, encrypted software for identification or for authentication of persons or objects by terahertz radiation; devices for tracing or tracking of objects and packages by terahertz radiation; integrated circuits for tracing or tracking of objects and packages by terahertz radiation; downloadable, executable, cloud-accessible or not, analytical, data-management, interactive with humans and with machines, encrypted software for tracing and tracking of objects and packages by terahertz radiation; safety devices in the nature of optical inspection apparatus, vision systems, sensing apparatus, designed for inspecting objects, parcels, or persons in particular by terahertz radiation; integrated circuits for inspecting objects, parcels, or persons in particular by terahertz radiation; downloadable, executable, cloud-accessible or not, analytical, data-management, interactive with humans and with machines, encrypted security software for inspecting objects, parcels, or persons in particular by terahertz radiation; devices in the nature of optical inspection apparatus, vision systems, sensing apparatus for measuring the wear of components or parts, in particular by terahertz radiation

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Inspection of objects, parcels, or persons for security purposes, in particular by terahertz radiation, namely, security screening of passengers and baggage at airports, detection of hidden illicit objects

International Classes 45 - Primary Classes **US Classes** 100, 101 **International Class Title** Personal and legal services

For Non-medical imaging services, in particular non-medical imaging services based on terahertz signals; interpretation and analysis of non-medical technical data obtained by imaging, in particular by terahertz imaging or reflectometry; engineering services, in particular engineering services in the nature of engineering design services, simulations, developments, computer aided simulations, analysis of data, correlation of data, prototyping, testing and measurements in the field of terahertz signals; engineering services in the nature of engineering design services, simulations, developments, computer aided simulations, analysis of data, correlation of data, prototyping, testing and measurements for the analysis of structures, in particular by

terahertz radiation; engineering, financial, industrial, operational, investment consulting and engineering services in the nature of engineering design services, simulations, developments, computer aided simulations, analysis of data, correlation of data, prototyping, testing and measurements, techno-market fit and Return on Investment assessments, capital and operational investments, non-destructive inspection, quality of products, tracking and tracing, sensing, telecommunications, in particular with respect to terahertz technology; design of integrated circuits, in particular integrated circuits for terahertz signal transmission, for terahertz signal reception, for transmission and reception of terahertz signals; design, development, and maintenance of software, in particular terahertz signal processing software; design, development, and maintenance of software for imaging or reflectometry, in particular software for imaging or reflectometry by terahertz signal processing; design, development, and maintenance of analysis devices, in particular of terahertz radiation analysis devices in the nature of analysis machines, sensing machines, analysis platforms based on software and hardware for the analysis of objects, bodies or materials, in particular by terahertz imaging or reflectometry; identification and authentication of persons or objects in the field of coins, bank notes, luxury items such as leather and textiles and gems, physical assets, in particular by terahertz radiation; software as a service (saas) featuring software for tracking or tracing of objects or packages, in particular by terahertz radiation

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 2 - AN ILLUSTRATION DRAWING WITHOUT ANY WORDS(S)/ LETTER(S) **Description of the Mark** The mark consists of a three-dimensional configuration of a window operator handle and cover. The cover having a generally rectangular footprint with a flat top, rounded corners and edges on the front face, the bottom of the sidewalls angled upward from the bottom to meet the rear part of the sidewalls angled backward from the top face. The handle has a generally rectangular cross section with the longer face parallel with the front face of the cover proximate the left side of the cover and the handle twisting and curving inward to have a generally rectangular cross section with the longer face parallel with the top face of the cover proximate the right side of the cover. The handle having a hinge at its left end and a trapezoidal knob on its right end. The cover has an indent in the top and front faces to nest the handle so that the top face of the handle is parallel with the top face of the cover and the front face of the cover flares out from the bottom so the front face follows the same contour as the front curving face of the handle at the right side of the handle. The lines of window operator handle and cover are intended to indicate the three-dimensional shape of the goods and do not indicate color or texture. **Color Claimed** Color is not claimed as a feature of the mark. **Acquired Distinctiveness** In whole
