GOODS AND SERVICES INFORMATION

For Computers; computer hardware; downloadable computer software for use in database management; downloadable computer software for the collection, editing, organizing, modifying, book marking, transmission, storage, and sharing of data and information; downloadable computer software for storing and managing electronic data; downloadable computer software for controlling the operation of audio and video devices; downloadable network video recording software for IP (Internet Protocol) video surveillance; downloadable digital video recording software for IP (Internet protocol) video surveillance; downloadable computer software for providing access to the Internet; downloadable computer software for connecting computer network users and global computer networks; downloadable computer software for monitoring environmental conditions and rail infrastructure; downloadable computer software for the creation of mobile internet applications and client interfaces; downloadable computer software for managing and validating transactions between transport providers and passengers on buses, trains and emergency services vehicles, namely, fire trucks, ambulances and police vehicles; downloadable computer software for monitoring the performance of digital display screens; computers and computer hardware for use in the transport industry, namely, near field communication (NFC) technology-enabled readers; telematics apparatus, hardware and recorded software for controlling networked devices in the internet of things (IoT), namely, wireless Internet devices which provide telematic services and have a cellular phone function, sold as a unit; plasma signage display panels; digital signage display panels; closed circuit TV camera apparatus, namely, cameras, electronic switchers for audio and video signals, computer and television monitors, microphones, and electronic data recorders; TV monitoring devices in the nature of wireless controllers and infrared sensors, all for use in the transport industry; real time data processing apparatus; network monitoring cameras; display signage monitors for use in vehicles; infrared sensors for counting passengers on buses and trains; passenger counting computer recorded software and hardware; on-board electronic systems in land vehicles comprised of

cameras and monitors for exposing and eliminating the blind spots on both sides of the vehicle for providing driving assistance; safety and driving assistant system for fleet vehicles comprised of downloadable software for processing images in the nature of mechanical road signs, mechanical roadside traffic signs, luminous roadside traffic signs, mobile communications transmission equipment, and security and alarm systems, namely, electronic proximity sensors and switches, high-resolution cameras, integrated circuits for the purpose of imaging processing, and display monitors; recorded security software, navigational equipment, and global positioning systems, namely, electronic proximity sensors and switches, high-resolution cameras, integrated circuits for the purpose of imaging processing, and display monitors; vehicle tracking and monitoring systems, namely, electronic proximity sensors and switches, high-resolution cameras, integrated circuits for the purpose of imaging processing, and display monitors; electrical and electronic equipment for use in vehicles, namely, electronic vibration, shock, motion, angle, temperature and voltage monitors; downloadable geographic in-vehicle information system (GIS) software; electronic automatic ticket examination machines comprised of digital recorders, mechanical traffic guidance apparatus, instruments for monitoring traffic, traffic sign recognition systems, monitoring systems, data storage software and hardware, ticket dispensers, ticket vending machines for use in the transport industry, software for use with ticket vending machines; safety and driving assistant system for mobile vehicles comprised of downloadable internet servers, computer software and computers for vehicles, computer software and computers for autonomous-driving vehicles, software and hardware for electronic driving assistance systems, namely, electronic proximity sensors and switches, high-resolution cameras, integrated circuits for the purpose of imaging processing, and display monitors; recorded computer software for use as an application programming interface (API); vehicle automatic driving control devices, namely, cruise controls for motor vehicles; simulators for driving or control of vehicles

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Vehicle fleet security monitoring services for safety purposes; security alarm monitoring services; electronic alarm monitoring services to ensure safety for passengers, staff and assets aboard fleet vehicles; rental of security surveillance apparatus and equipment, namely, camera surveillance equipment

International Classes 45 - Primary Classes **US Classes** 100, 101 **International Class Title** Personal and legal services

For Transport services by air, road, rail and sea; ticketing services for travel, namely, booking of tickets; travel arrangement services, namely, making reservations and bookings for transportation; traffic management services, namely, management of vehicular traffic flow through advanced communications network and technology; computerised reservation services relating to the carriage of passengers; provision of travel information relating to the transportation of passengers; travel information relating to the transportation of passengers; air transport security storage services for goods; provision of travel information relating to timetables; vehicle routing by computer on data networks; travel information relating to methods of transport; travel information; travel consultancy and advisory services regarding fares, timetables and public transport

International Classes 39 - Primary Classes **US Classes** 100, 105 **International Class Title** Transportation and Storage

For Software as a service (SAAS) services featuring software for use in database management; software as a service (SAAS) services featuring software for the collection, editing, organizing, modifying, book marking, transmission, storage, and sharing of data and information; software as a service (SAAS) services featuring software for storing and managing electronic data; software as a service (SAAS) services featuring software for controlling the operation of audio and video devices; software as a service (SAAS) services featuring software for IP (Internet Protocol) video surveillance; software as a service (SAAS) services featuring software for providing access to the Internet; software as a service (SAAS) services featuring software for connecting computer network users and global computer networks; software as a service (SAAS) services featuring software for monitoring environmental conditions and rail infrastructure; software as a service (SAAS) services featuring software for the creation of mobile internet applications and client interfaces; software as a service (SAAS) services featuring software for managing and validating transactions between transport providers and passengers on buses, trains, and airplanes; software as a service (SAAS) services featuring software for monitoring the performance of digital display screens; software as a service (SAAS) services, namely, providing on-line non-downloadable geographic information system (GIS) software for collecting, storing, analyzing and presenting electronic data in the field of transport; software as a service (SAAS) services featuring software for use as a payment gateway that authorizes processing of credit cards with ticket vending machines; software as a service (SAAS) services featuring software for use as a simulator for driving or control of vehicles; telematics software as a service featuring software for providing information concerning driver behavior and communicating feedback on driving style in real time; online non-downloadable on-vehicle system tracking and monitoring software and data storage software for use in database management in the transport industry

GOODS AND SERVICES INFORMATION

For Training in the use and operation of apparatus and instruments for electronic positioning and navigation, laser measuring systems, range finder lasers and electronic display boards, all for use in construction machines and implements; training in the use and operation of computer software for use in geographical information systems; training in the use, assignment, coordination and operation of computer software for tracking and monitoring of construction equipment and machines, for designing and verification of building projects, for monitoring and conducting of contract offers for works accounting and construction, assessment of contract work, for analyzing productivity of staff assigned to building projects and for managing products implemented for executing construction projects; training in the use of global information networks for locating vehicles and mobile instruments and apparatus and for wireless message sending; customized individual training, educational services, by means of courses, seminars, workshops, non-downloadable Webinars, relating to use and operation of hardware and software, and apparatus and instruments used in the field of mapping and surveying; electronic desktop publishing; all the aforesaid services for use in the field of design and construction of infrastructure and civil engineering works

International Classes 41 - Primary Classes **US Classes** 100, 101, 107 **International Class Title** Education and Entertainment

For Independent sales representatives in the field of technology products for fleet and production monitoring; subscription based order fulfillment services in the fields of mapping, surveying, buildings and infrastructures construction, fleet and production monitoring ; provision of business efficiency and professional services advice with the required data to improve operations in the fields of mapping and surveying; business management consultancy; professional business management consultancy; business management and assistance services and administrative services; analysis, research and information services relating to business; provision of advice to companies relating to franchising; providing consumer products advice in the field of software; providing subscriptions to database services by telecommunications; business consultancy in the field of

information technology management; all the aforesaid services for use in the design and construction of infrastructure and civil engineering works; collection construction data for others; business consultancy services relating to drones. 37 Repair and maintenance of instruments and apparatus for electronic positioning and navigation, laser measuring systems, laser rangefinders and electronic display panels, all for use in construction machines, apparatus and instruments for mapping and construction of permanent buildings, roads, bridges, roundabouts, streets, hydraulic networks, underground, drainage networks, civil engineering and infrastructure works; building construction information; building construction supervision; all the aforesaid services for use in the field of infrastructure construction and civil engineering works; technical support, customization and installation, repair and maintenance of computer hardware for unmanned air vehicles

International Classes 35 - Primary Classes **US Classes** 100, 101, 102 **International Class Title** Advertising and Business

For Repair and maintenance of instruments and apparatus for electronic positioning and navigation, laser measuring systems, laser rangefinders and electronic display panels, all for use in construction machines, apparatus and instruments for mapping and construction of permanent buildings, roads, bridges, roundabouts, streets, hydraulic networks, underground, drainage networks, civil engineering and infrastructure works; construction information; building construction supervision; all the aforesaid services for use in the field of infrastructure construction and civil engineering works; technical support, customization and installation, repair and maintenance of computer hardware for unmanned air vehicles

International Classes 37 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Construction and Repair

For Apparatus for GPS-based surveying, optical or laser technology, namely machine control systems installed on earthmoving and excavation machines, GNSS base stations, GNSS rovers, automatic total station ; scanners, navigation and positioning equipment, electronic and computing instruments, all for determining the exact position geographical of land vehicles and human beings; electronic and computing instruments for surveying, mapping, location and marine, air or vehicle navigation ; sensors recorded software, receivers, computer hardware and recorded software for geographical positioning systems; computer hardware and recorded software systems for control of public works vehicles; parts and component parts of the aforesaid goods; recorded engineering software for use in buildings and infrastructures construction ; recorded maintenance software for use in data processing of software infrastructure and building materials; programmable telecommunication apparatus namely, radios and modems; recorded on-board software for operation of construction machines; downloadable software for analyzing business data in the field of construction and infrastructure management; downloadable software for topography, mapping, design and dimensioning of projects for streets, networks for cabling and piping, drainage, three-dimensional modeling, display and design of projects for roads and roundabouts; downloadable geographical database software namely software for aggregating geographical areas into multiple larger areas, downloadable software for use in creating industrial designs; downloadable software dedicated to the creation of earthworks projects and metered infrastructure projects; downloadable software for CAD (computer-aided design) for designing and calculating infrastructure and earthworks projects; downloadable teamwork software used for data processing in the field of creating earthworks projects and infrastructure projects ; downloadable software for shared digital terrain modeling; downloadable software for designing and improving the quality of construction products such as roads, highways, business projects, sewerage systems); downloadable digital documents namely blueprints, survey plants in the field of architecture provided via a website; downloadable software for displaying information, video content, images and data from sensors for unmanned air vehicles; downloadable

documentation and instructions for software development interfaced with the aforesaid products, in electronic format; all the aforesaid goods for use in the field of design and construction of infrastructure and civil engineering works

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Providing multiple-user access to databases accessible on-line over global information networks in connection with information relating to rental of construction machines, land vehicles, software and electronic apparatus and instruments; messaging services with devices for sending and receiving wireless signals; all the aforesaid services for use in design and construction of infrastructure and civil engineering works

International Classes 38 - Primary Classes **US Classes** 100, 101, 104 **International Class Title** Communication

For Installation, repair, maintenance and updating of computer software; consulting services with respect to selection, implementation and use of computer software, computer hardware; customized design and development of computer software; technical support services, namely, troubleshooting of computer problems and equipment breakdowns; all in the fields of mapping and engineering; providing online non-downloadable computer software for creation, design, visualization, simulation, analysis, collation and storage of data on building, construction, infrastructure and environment for use in the field of building construction, engineering and infrastructure modeling; providing temporary use of non-downloadable software for the creation, design, visualization, simulation, analysis, collation and storage of data on building, construction, infrastructure and environment for use in the field of building construction, engineering and infrastructure modeling; conversion of data or documents from physical to electronic media; research and development of new products for third parties; technical project studies in the fields of mapping, surveying, buildings and infrastructures construction, fleet and production monitoring; architecture; industrial design services; design services in road, urban development; advice on construction, drafting of construction plans, surveying; research and technical project studies in the fields of mapping, surveying, buildings and infrastructures construction, fleet and production monitoring; drafting of plans for construction, road projects; industrial design services in the fields of mapping, surveying, buildings and infrastructures construction, fleet and production monitoring; providing on-line non-downloadable software for locating, control and management of on-site equipment comprising but not limited to machines and vehicles, construction equipment, via computer networks, intranets and the Internet; providing on-line non-downloadable software for drawing up offers and evaluations of costs as well as monitoring costs linked to equipment implemented in worksites comprising but not limited to equipment for use in quarrying and paving applications, equipment for the mining and forestry sectors, as well as motor vehicles, wastes sector; providing on-line non-downloadable software for remote security of worksite equipment and vehicles against hazardous or unauthorized use, for preventing collision of worksite equipment and vehicles and preventing contact between worksite equipment, vehicles and underground equipment; Internet cloud computing services featuring software for flight planning of unmanned air vehicles (drones) and for communication, monitoring, operation, planning, reporting, regulatory compliance and analysis of data from an unmanned air vehicle; consulting, technical support, customization and development, installation, repair and maintenance of computer software, for unmanned air vehicles and consultancy services, technical advice and development of computer hardware for unmanned air vehicles; all the aforesaid services for use in the design and construction of infrastructure and civil engineering works; storage and hosting of construction data

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the stylized word "ILIKA" in blue with the tittles on each letter "I" being a green triangle. **Color Drawing** Yes **Color Claimed** The color(s) blue, green is/are claimed as a feature of the mark.

RELATED PROPERTIES INFORMATION

International Registration 1498903 **International Registration Date** Aug. 14, 2019

GOODS AND SERVICES INFORMATION

For Precious metals and their alloys; gold and its alloys; gold, wrought or beaten; platinum and its alloys; palladium and its alloys

International Classes 14 - Primary Classes **US Classes** 2, 27, 28, 50 **International Class Title** Jewelry

For Chemical substances and chemical preparations used in industry and science; chemical substances and chemical preparations used in agriculture except fungicides, herbicides, insecticides and parasiticides; chemicals for use in industry, science, photography; chemical preparations for use in industry and science; chemicals for use in the manufacture of abrasives; ceramic chemicals for use in energy storage devices; chemical preparations for the manufacture of industrial ceramics; chemicals for use in vehicles; chemical oxidants for use in the manufacture of printed circuits; anti-oxidants for use in manufacture; chemicals for melting, heating, cooling and freezing other substances; waterproofing chemical compositions; water treatment chemicals; metal plating chemical compositions for plating platinum and palladium, and alloys thereof; chemical preparations for facilitating the alloying of metals; catalysts for chemical and biochemical processes; catalysts for use in chemical processes; catalysts for oxidation processes; catalysts for chemical and biochemical processes; catalysts for use in fuel cells; auxiliary fluids for use with abrasives in general industrial use; tempering and soldering preparations; tempering and soldering substances; alkaline metals; alloys of rare earth metals

International Classes 1 - Primary Classes **US Classes** 1, 5, 6, 10, 26, 46 **International Class Title** Chemicals

For Scientific, photographic, cinematographic, optical, weighing, measuring, signalling, checking and supervision apparatus and instruments for use in materials characterization, namely, x-ray fluorescence analyzers and spectrometers, diffractometers, x-ray diffractometers, wafer analyzers, Raman spectrometers, mass spectrometers, microscopes, electron microscopes, optical microscopes, impedance analysers, and ohmmeters; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electrical switches; apparatus, instruments and cables for electricity, namely, electronic circuit boards and electric cables; apparatus and instruments for accumulating and storing electricity, namely, accumulators and batteries; electric cables and wires; testing and quality control devices for electrical and electronic components in the nature of circuit boards, electric cables, electrical switches; electronic instruments for measuring the properties of electric current, namely, power, voltage, frequency; computer memory devices and data recording apparatus and instruments, namely, computer memory modules; computer memory devices; electronic computer memory devices; computer memory storage devices; fuel cells; fuel cell electrodes; electrical and electronic components, namely, electronic sensors for measuring deformation, electronic sensors for measuring acceleration, electronic sensors for measuring temperature, electronic sensors for measuring pressure, electronic sensors for measuring position, electronic sensors for measuring humidity, electronic sensors for measuring light intensity, electronic sensors for detecting the chemical composition of fluids, electronic image sensors, and electronic sensors for measuring solar radiation; semi-conductors; batteries; battery charging equipment; battery charging devices for motor vehicles; battery testing apparatus; auxiliary battery packs; capacitors; power capacitors; electrical capacitors; solar panels for production of electricity; solar panels for electricity generation; piezoelectric sensors; lenses for non-medical imaging apparatus; electric wires of alloy metals; component and replacement parts and fittings for all the aforementioned, namely, LED displays, electronic circuit boards, electric cables, electrical switches

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Treatment of ceramics, polymers and composite materials consisting of metals, ceramics, polymers; treatment of metals; treatment of materials using chemicals; advisory, consultancy and information services relating to the aforementioned

International Classes 40 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Material Treatment

For Electrical insulation articles and materials, namely, electrical insulating materials; dielectrics being electrical insulators; dielectric barriers in the nature of electrical insulators; paper for electrical capacitors; component and replacement parts and fittings for all the aforementioned, namely, electrical tape, insulating tapes, glass fiber for insulation, metal foil for insulation, insulators for cables, insulating coatings

International Classes 17 - Primary Classes **US Classes** 1, 5, 12, 13, 35, 50 **International Class Title** Rubber Goods

For Scientific research; technology consultation and research in the field of materials; research and development of novel materials for others; research relating to science; research in the field of materials science; scientific and technical research relating to metals; advisory, consultancy and information services relating to the aforementioned

International Classes 42 - Primary Classes **US Classes** 100, 101 **International Class Title** Scientific and computer services

For Metals; common metals and their alloys; unwrought or semi-wrought common metals; alloys of metal

International Classes 6 - Primary Classes **US Classes** 2, 12, 13, 14, 23, 25, 50 **International Class Title** Metal Goods

GOODS AND SERVICES INFORMATION

For Educational toys for teaching and testing knowledge relating to science, physics, biology and chemistry, games, namely, electronic educational game machines for children, and play kits, namely, scale model toy kits; children's electrical, physical and chemical experimental play sets and games, namely, toy chemistry sets; children's toy chemistry play sets; children's crystal-growing play kits, namely, toy chemistry sets

International Classes 28 - Primary Classes **US Classes** 22, 23, 38, 50 **International Class Title** Toys and Sporting Goods

For Educational materials in the nature of books and magazines in the field of science, physics, biology and chemistry; books and magazines relating to science, physics, biology and chemistry; books and magazines for educational purposes relating to science, physics, biology and chemistry

International Classes 16 - Primary Classes **US Classes** 2, 5, 22, 23, 29, 37, 38, 50 **International Class Title** Paper Goods and Printed Matter

For Education services, namely, providing classes, seminars, workshops relating to science, physics, biology and chemistry; online electronic publishing of educational matter and materials in the nature of books, e-books, audio books, music and illustrations; publication of electronic journals and web logs, featuring user generated and teaching content relating to science, physics, biology and chemistry; educational services, namely conducting science classes by means of a science club for

children; provision of educational services in the nature of online classes, seminars and workshops accessible via a computer database or the Internet or extranets in the fields of science, physics, biology and chemistry; providing educational, recreational and amusement services in the nature of academic enrichment programs accessible via computer, electronic and online databases in the field of science, physics, biology and chemistry; providing educational courses relating to science, physics, biology and chemistry accessible by means of the internet and mobile telephone or smartphone applications; providing online non-downloadable electronic publications for educational purposes in the nature of books, newsletters, magazines, journals relating to science, physics, biology and chemistry

International Classes 41 - Primary Classes **US Classes** 100, 101, 107 **International Class Title** Education and Entertainment

For Downloadable computer software and downloadable computer software applications for mobile and hand-held electronic devices for educational purposes for providing instruction and information in the fields of science, physics, biology and chemistry; scientific research and laboratory apparatus, namely, laboratory funnels, protective glasses, disposable reusable dispenser syringes for laboratory use, magnifying lenses, laboratory trays and laboratory glassware, namely, beakers, flasks; educational apparatus and simulators, namely, science sets for children comprising laboratory funnels, protective glasses, disposable reusable dispenser syringes for laboratory use, magnifying lenses, laboratory trays and laboratory glassware, namely, beakers, flasks; teaching apparatus and instruments relating to science, physics, biology and chemistry, namely, science sets for children comprising laboratory funnels, protective glasses, disposable reusable dispenser syringes for laboratory use, magnifying lenses, laboratory trays, stoves for use in experiments, and laboratory glassware, namely, beakers, flasks; downloadable electronic publications for educational purposes in the nature of books, newsletters, magazines, journals relating to science, physics, biology and chemistry

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Creating, designing, hosting of websites for others for educational purposes relating to science, physics, biology and chemistry; design and development of computer software; design and development of software applications for mobile and hand-held electronic devices for educational purposes relating to science, physics, biology and chemistry; creating, maintaining and hosting websites and internet portals for others for educational information relating to science, physics, biology and chemistry; installation, maintenance and repair of computer software for educational purposes relating to science, physics, biology and chemistry; creating and maintaining blogs and news websites for others relating to science, physics, biology and chemistry; hosting of digital content for others, namely, on-line journals and blogs relating to science, physics, biology and chemistry; providing temporary use of non-downloadable computer software for use in the creation and publication of on-line journals and blogs relating to science, physics, biology and chemistry; providing online computer databases for educational use in the field of science, physics, biology and chemistry

GOODS AND SERVICES INFORMATION

For Education and instructions services, namely, providing classes and instruction in the field of collecting Earth observation and geospatial data; business training; training of scientists in the fields of Earth observation and geospatial sciences; educational services namely, providing training of scientists in the field of Earth observation and geospatial science; educational services, namely, online training in connection with Earth observation and geospatial science; arranging and conducting of seminars, lectures, workshops and practical training courses using demonstrations, namely, providing online training courses, seminars, lectures and workshops from a computer database or via the Internet in the field of Earth observation and geospatial sciences; arranging of seminars and practical training courses in relation to the use and analysis of satellite and other Earth observation data and information; on-line publication of electronic books and journals in the field of Earth observation and geospatial science; editing and publication of printed matter in the nature of books, texts, directives and instructional manuals in relation to the aforementioned activities, namely, analysis of satellite and Earth observation data; advisory, consultancy and information services relating to all the aforementioned services, namely, analysis of satellite and Earth observation data

International Classes 41 - Primary Classes **US Classes** 100, 101, 107 **International Class Title** Education and Entertainment

For Database management services; computerised database management; collection, compilation, systemisation and analysis of business data and information in computer databases and data and information in computer databases for business purposes; analysis of business data and information in computer databases; updating and maintenance of data and information in computer databases; collection, compilation, systematisation and analysis of satellite and other Earth observation data and information stored in computer databases for business purposes; business consulting in the field of geographical, geospatial

and spatial information software and systems, and database software and systems; business consulting in the field of geographical, geospatial and spatial information design, and database design; negotiating of business contracts for others relating to the purchase of images, including satellite and other Earth observation images and geospatial data; retail and wholesale store services featuring the selling and reselling of Earth observation and geospatial data; business management advisory services, namely, advisory services relating to the integration of Earth observation information and environmental factors into business operations and business workflows and the integration of Earth observation into business workflow; data processing services for data and information; advisory, consultancy and information services relating to the aforementioned services; all of the foregoing relating to the field of Earth observation and geospatial science

International Classes 35 - Primary Classes **US Classes** 100, 101, 102 **International Class Title** Advertising and Business

For Building, construction, assembly, installation and repair of carrier rockets, spacecraft and satellites, and of equipment for carrier rockets, spacecraft and satellites; installation of hardware for mechanical, electric and computer interfaces between a satellite and a launch rocket, namely, carrier rockets; installation of satellites and spacecraft on carrier rockets; construction, building and expansion of installations and ground stations for satellites and for equipment relating thereto; repair, maintenance and servicing in the field of carrier rockets, spacecraft and satellites; construction of satellites, namely, building and installation of peripheral hardware for satellites, namely, sensors; advisory, consultancy and information services relating to the aforementioned services

International Classes 37 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Construction and Repair

For downloadable computer software for database management; downloadable electronic databases, in the field of Earth observation and geospatial sciences; electronic databases in the field of Earth observation and geospatial sciences recorded on computer media; downloadable geospatial and Earth observation database; electronic geospatial and Earth observation database recorded on computer media; data hubs, namely, downloadable electronic data files featuring downloadable electronically stored Earth observation and geospatial science metadata and libraries of Earth observation and geospatial science image files; software, namely, downloadable software that enables users to access algorithms for analysis and interpretation of Earth observation data and imagery, namely, step by step processes for solving a class of Earth observation problems through calculation, data processing and automated reasoning; software, namely, downloadable software that enables users to use indices to classify features appearing in Earth observation data and imagery, namely, statistical measurements; downloadable moving and still image files containing photographs and videos relating to Earth observation and geospatial science; downloadable computer software for creating searchable databases; downloadable computer software for application and database integration; downloadable database software, namely, software for use in database management and software for database integration; downloadable access control software, namely, software for use in computer access control; downloadable application development software; downloadable client and server applications software for delivery and analysis and interpretation of Earth observation data and imagery; downloadable data exchange software, namely, software that enables exchange of data stored in databases; downloadable communication software for monitoring and controlling communication between computers and automated machine systems and for connecting computer network users; downloadable computer database servers software, namely, software for use in monitoring computer database servers; downloadable computer software to enable connection to databases, computer networks and the Internet; downloadable

computer software for the collection, compilation, systemisation, processing, analysis, reproduction, transmission and storage of data, database information and images, namely, aerial and satellite images and Earth observation data and information; downloadable computer software for enabling telemetry of Earth observation data and information; downloadable digital elevation modeling software, namely, software for producing elevation models; land movement sensors and measuring apparatus for measuring land movement distances; data communication apparatus that transmit data and information to databases; data processing equipment and computers; computer apparatus and electronic apparatus for the collection, compilation, systemisation, processing, analysis, reproduction, transmission and storage of data, database information and images, namely, aerial and satellite images and other Earth observation data and information; satellites for scientific purposes; satellites for use in Earth observation; satellite receiving and transmission apparatus and instruments, namely, satellite transmitters and receivers; data communications and electrical communications equipment, apparatus and installations, namely, satellites, sensors and networks for transmitting Earth observation data; electronic sensors for Earth observation and observation of geospatial data and images; instruments for displaying, receiving, storing, indexing and searching electronic information, namely, digital transmitters, optical data links, optical receivers, optical transmitters; data processing equipment; downloadable electronic publications in the nature of newsletters in the field of Earth observation and geospatial science; all of the foregoing relating to the field of Earth observation and geospatial science

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Licensing of computer software; licensing of computer hardware; advisory, consultancy and information services relating to the aforementioned service

International Classes 45 - Primary Classes **US Classes** 100, 101 **International Class Title** Personal and legal services

For Telecommunications and transmission services provided via the Internet, namely, transmission of voice, data, documents and images via telecommunications networks; transmission, communications and telecommunications relating to satellite images and other Earth observation data and information in the nature of communication services, namely, transmission of visual images and data by telecommunications networks, wireless communication networks, the Internet, information services networks and data networks; providing access to databases and data processing systems, via the Internet; rental of access time to global computer networks; transmission of database information and data via telecommunication networks; providing telecommunications connections to a global communication network or databases; transmission and reception of database information via telecommunication networks; electronic exchange of data stored in databases accessible via telecommunication networks; satellite transmission; satellite communication services; transmission of data and information by satellite; telematic sending of information; electronic data interchange services and electronic exchange of data stored in databases accessible via telecommunication networks; electronic, digital and computerised information exchange, namely, exchange of data stored in databases accessible via telecommunication networks; transmission of information accessible by access code, via data processing servers, via computerised database servers, via computer and data transmission networks, namely, the Internet; providing of access by telecommunications to data processing systems; advisory, consultancy and information services relating to the aforementioned services; providing multiple-user access to Earth observation data and imagery and remote sensing data on the Internet for use in environmental monitoring and in the geospatial science industry

International Classes 38 - Primary Classes **US Classes** 100, 101, 104 **International Class Title** Communication

For Design and development of computer software in the field of Earth observation and geospatial data and sciences; research and development of computer software systems in the field of aerial and satellite images and other Earth observation data; research in the field of science, namely, scientific research in the field of satellite technology and Earth observation; database design and development services, namely, design and development of computer and electronic databases; hosting of databases, namely, hosting of digital content on the Internet; computer services, namely, cloud hosting provider services; installation and maintenance of computer database software; design, development and maintenance of computer database software and computer database management software; electronic storage services for databases; leasing of computer database software; rental of database management software; scientific research conducted using databases; updating of computer software for databases; consultancy relating to computer database programmes; leasing of a database server to third parties; electronic storage services for data and information, namely, aerial and satellite images and other Earth observation data and information; providing online non-downloadable software for database management; providing scientific research data and scientific research information from an online searchable database; providing online information in the fields of scientific and technological research relating to Earth observation and geospatial science from a computer database or the Internet; providing scientific data and information relating to aerial and satellite images and other Earth observation data and information from an on-line searchable database; software as a service (SaaS) services featuring software for use in information technology solutions, data centres and data storage, data and information management; development of geographical, geospatial and spatial information software and software systems; advisory services in the field of geographical, geospatial and spatial information software and systems, relating to the use of Earth observation data and images and relating to database software and systems, and consultancy services relating to the aforementioned services; scientific research in the nature of scientific analysis of Earth observation and geospatial data and analysis of insights; providing scientific information relating to insights based on analysis of Earth observation data and imagery; providing scientific information about Earth observation and geospatial data and images; design and development of satellites and peripheral hardware for satellites, namely, sensors for satellites; image analysis software development; design of computer databases and software for Earth observation and geospatial data; cloud computing featuring software for use in managing, processing, transmitting and analyzing Earth observation and geospatial data; data wrangling as a service, namely, conversion of computer programs and data, other than physical conversion; software development as a service; scientific research services; product research and development as a service; scientific research and development as a service; electronic data storage as a service; electronic storage of Earth observation data and imagery; collaboration scientific and technological services, namely, scientific research, analysis and testing in the field of Earth observation and geospatial science; computerised analysis of raw Earth observation data for the creation of images for scientific research purposes; providing scientific information and conducting scientific research in the field of Earth observation, remote sensing and geospatial science; science advisory services, namely, scientific research consulting the field of Earth observation, remote sensing and geospatial science; advisory, consultancy and information services relating to the aforementioned services; all of the foregoing relating to the field of Earth observation and geospatial science

International Registration 1503962 **International Registration Date** Sep. 23, 2019

GOODS AND SERVICES INFORMATION

For vehicle parts of handlebar-guided vehicles, in particular master cylinders for actuating systems shock and vibration absorbers, suspensions, suspension forks, struts, handle bars, handle grips, in particular for bicycles, motorcycles, quad bikes, ATVs, carts, walkers and wheelchairs for invalids; brakes for handlebar-guided vehicles and parts thereof, in particular brake discs and handbrake levers, in particular for bicycles, motorcycles, quad bikes, ATVs, carts, walkers and wheelchairs for invalids; handle bars and stems for handlebar-guided vehicles, in particular bicycles, motorcycles, quad bikes, ATVs, carts, walkers and wheelchairs for invalids; handle bars for single-tracked vehicles, in particular for bicycles and motorcycles; heated grips for handlebar-guided vehicles; hydraulic brakes for bicycles and parts thereof; hydraulic disc brakes of handlebar-guided vehicles and parts thereof, in particular for bicycles, motorcycles, quad bikes, ATVs, carts, walkers and wheelchairs for invalids; hydraulic rim brakes and parts thereof, in particular for bicycles; gearshifts for handlebar-guided vehicles; couplings and power transmission mechanisms for handlebar-guided vehicles and parts thereof, in particular hand clutch levers; turning handles of handlebar-guided vehicles for operating brakes, clutches, gearshifts, decompression, gas, air, ignition in vehicles or combustion machines; accessories for brakes of handlebar-guided vehicles, in particular brake lines, brake discs, brake pads, and brake levers

International Classes 12 - Primary Classes **US Classes** 19, 21, 23, 31, 35, 44 **International Class Title** Vehicles

For electric/electronic controls for vehicle components of handlebar-guided vehicles, in particular for suspensions, brakes, gears, motors; apparatuses for measuring driving statuses of handlebar-guided vehicles, in particular speed, acceleration, engine revolution, gear; time-recording on board computers for handlebar-guided vehicles; controls for vehicle components of handlebar-guided vehicles, in particular for suspensions, brakes, gears; indicators for driving statuses of handlebar-guided vehicles, in particular speed, acceleration, engine revolution, gear

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Clothing, namely, headwear, shirts, hats, pants, skirts, shorts, dresses, skirts, sleepwear, swimwear, nightwear, rainwear and footwear

International Classes 25 - Primary Classes **US Classes** 22, 39 **International Class Title** Clothing

GOODS AND SERVICES INFORMATION

For Installation, maintenance and repair of image processing apparatus for developing and using image processing software, instruments for monitoring traffic, electronic traffic control apparatus, instruments for detecting traffic character recognition apparatus; installation, maintenance and repair of motion recognizing sensors, optical character recognition [OCR] software, optical barcode recognition [OBR] software, optical mark recognition [OMR] software, optical character recognition apparatus [OCR], intelligent character recognition [ICR] software, software for optical character recognition, speed checking apparatus, optical speed sensors, speed measuring instruments; installation, maintenance and repair of laser speed detectors, speed measuring apparatus, sensors for measuring speed, variable speed control apparatus, electronic speed recorders, speed measuring apparatus using photography, and instruments for measuring speed; installation, maintenance and repair of apparatus for recording and evaluating speed, red light, LIDAR, radar and other signals and images from stationary and flowing traffic; installation, maintenance and repair of red light enforcement apparatus, apparatus for monitoring red light offenses, apparatus for photo and video documentation of red light offenses, apparatus for vehicle tracking, apparatus for optical traffic light detection, apparatus for intersection monitoring and traffic control, apparatus for detection of multiple traffic violations at intersections and for documentation of traffic violations, apparatus for automatic number plate recognition, automatic number plate reading [ANPR] apparatus, and lightbar systems with integrated automatic number plate recognition mounted on vehicles; installation, maintenance and repair of mobile automatic number plate recognition apparatus, stationary automatic number plate recognition apparatus, optical apparatus for capturing traffic data, decoding boxes, electronic decoders; installation, maintenance and repair of sensors, in particular optical, electrical and electronic sensors; installation, maintenance and repair of cameras, in particular hand-held cameras, cameras for measuring volume, motion-activated cameras, matrix cameras, line scan cameras, digital cameras, infrared cameras, IP (internet protocol) speed dome cameras, digital speed

cameras, and semiconductor cameras; installation, maintenance and repair of data processing programs and computer software, in particular for controlling, measuring and reading apparatus and cameras, for recording images and recognizing images and for the evaluation and further processing of generated data in the field of traffic monitoring and control

International Classes 37 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Construction and Repair

For Downloadable data processing programs and computer software, in particular for controlling, measuring and reading apparatus and cameras, for recording images and recognizing images and for the evaluation and further processing of generated data; Image processing apparatus for developing and using image processing software; Instruments for monitoring traffic, namely, traffic-monitoring cameras, computer hardware and recorded computer software for monitoring traffic; electric traffic control apparatus, namely, lidar apparatus for analyzing images or videos with respect to characteristic features of individual vehicles or analyzing images or videos with respect to the traffic situation; electronic traffic control apparatus, namely, computer hardware and recorded computer software for traffic control; Instruments for detecting traffic, namely, counting and detecting devices for traffic, consisting of cameras and lidar apparatus for data collection and data evaluation; Character recognition apparatus, namely, optical character recognition (OCR) apparatus and intelligent character recognition (ICR) apparatus with embedded RFID readers ; Motion recognizing sensors; recorded optical Character Recognition (OCR) software; recorded optical Barcode Recognition (OBR) software; recorded optical Mark Recognition (OMR) software; Optical character recognition (OCR) apparatus; recorded software for intelligent Character Recognition (ICR) software; recorded software for optical character recognition; Speed checking apparatus, namely, speed dome cameras, laser rangefinders, laser speed detectors, laser distance meters, speed indicators, speedometers, light detection and ranging apparatus (lidar), radio-frequency identification (RFID) readers, red light cameras, radar guns for police work; Optical speed sensors; Speed measuring instruments, namely, speed dome cameras, laser rangefinders, laser speed detectors, laser distance meters, speed indicators, speedometers, lidar, namely, light detection and ranging apparatus, radio-frequency identification (RFID) readers, red light cameras, radar guns for police work; Laser speed detectors; Speed measuring apparatus, namely, speed dome cameras, laser rangefinders, laser speed detectors, laser distance meters, speed indicators, speedometers, lidar, namely, light detection and ranging apparatus, radio-frequency identification (RFID) readers, red light cameras, radar guns for police work; Sensors for measuring speed; Variable speed control apparatus, namely, luminous road signs to vary the speed limit of traffic; Electronic speed recorders, namely, speed dome cameras, laser rangefinders, laser speed detectors, laser distance meters, speed indicators, speedometers, LIDAR, namely, light detection and ranging apparatus, radio-frequency identification (RFID) readers, red light cameras, radar guns for police work; Speed measuring apparatus, namely, cameras; Instruments for measuring speed, namely, radar apparatus, radar detectors, lidar detectors; Apparatus for recording and evaluating speed, red light, lidar, radar and other signals and images from stationary and flowing traffic; Red light enforcement apparatus, namely, cameras, computer hardware and recorded software for enforcing stopping at red lights; Apparatus for monitoring red light offenses namely, cameras, computer hardware and recorded software for monitoring and enforcing red light offenses; Apparatus for photo and video documentation of red light offenses, namely, cameras and digital video cameras; Apparatus for vehicle tracking, namely, cameras, laser rangefinders, laser detectors, laser distance meters, LIDAR, namely, light detection and ranging apparatus, radio-frequency identification (RFID) readers, optical character recognition (OCR) apparatus, intelligent character recognitions (ICR) apparatus, motion recognizing sensors; Apparatus for optical traffic light detection; Apparatus for intersection monitoring and traffic control namely, cameras, laser rangefinders, laser detectors, laser distance meters, LIDAR, namely, light

detec-tion and ranging apparatus, radio-frequency identification (RFID) readers, optical character recognition (OCR) apparatus, intelligent character recognitions (ICR) apparatus, motion recognizing sensors; Apparatus for detection of multiple traffic violations at intersections and for documentation of traffic violations, namely, cameras, speed dome cameras, red light cameras, laser rangefinders, laser speed detectors, laser distance meters, speedometers, LIDAR, namely, light detection and ranging apparatus, radio-frequency identification (RFID) readers, optical character recognition (OCR) apparatus, intelligent character recognitions (ICR) apparatus, motion recognizing sensors; Apparatus for automatic number plate recognition, namely, cameras, laser rangefinders, laser detectors, laser distance meters, LIDAR, namely, light detection and ranging apparatus, radio-frequency identification (RFID) readers, optical character recognition (OCR) apparatus, intelligent character recognitions (ICR) apparatus, motion recognizing sensors; automatic number plate reading [ANPR] apparatus; lightbar systems with integrated automatic number plate recognition mounted on vehicles; Mobile automatic number plate recognition apparatus; Stationary automatic number plate recognition apparatus; Optical apparatus for capturing traffic data, namely, cameras, laser rangefinders, laser detectors, laser distance meters, LIDAR, namely, light detection and ranging apparatus, radio-frequency identification (RFID) readers, optical character recognition (OCR) apparatus, intelligent character recognitions (ICR) apparatus, motion recognizing sensors; decoding boxes, namely, electronic devices, or devices built into an electronic system, that either encrypts data or decrypts data already encrypted; electronic decoders; sensors, in particular optical, electrical and electronic sensors; cameras, in particular hand-held cameras, cameras for measuring volume, motion-activated cameras, matrix cameras, line scan cameras, digital cameras, infrared cameras, IP (internet protocol) speed dome cameras, digital speed cameras; semiconductor cameras; all the aforementioned cameras in the field of traffic monitoring and control

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Scientific and technological services, namely, research and design in the field of traffic enforcement apparatus and speed or other traffic violations apparatus; Design and development of computer software; Development of electrotechnical and electronic installations, apparatus and controllers, in particular measuring, scanning, reading and image processing apparatus and cameras; Research, development and consultancy for others in the field of optical image recognition and processing; Technical project planning, all the aforesaid services relating in particular to data processing programs and computer software, in particular for controlling, measuring and reading apparatus and cameras, for recording images and recognizing images and for the evaluation and further processing of generated data image processing apparatus for developing and using image processing software, instruments for monitoring traffic, electronic traffic control apparatus, instruments for detecting traffic, character recognition apparatus, motion recognizing sensors, optical Character Recognition [OCR] software, optical Barcode Recognition [OBR] software, optical Mark Recognition [OMR] software, optical character recognition apparatus [OCR], intelligent Character Recognition [ICR] software, software for optical character recognition, speed checking apparatus, optical speed sensors, speed measuring instruments, laser speed detectors, speed measuring apparatus, sensors for measuring speed, variable speed control apparatus, electronic speed recorders, speed measuring apparatus using photography, and instruments for measuring speed; all the aforesaid services relating in particular to apparatus for recording and evaluating speed, red light, LIDAR, radar and other signals and images from stationary and flowing traffic; all the aforesaid services relating in particular to red light enforcement apparatus, apparatus for monitoring red light offenses, apparatus for photo and video documentation of red light offenses, apparatus for vehicle tracking, apparatus for optical traffic light detection, apparatus for intersection monitoring (traffic control), apparatus for detection of multiple traffic violations at intersections and for documentation of

traffic violations, apparatus for automatic number plate recognition, automatic number plate reading [ANPR] apparatus, lightbar systems with integrated automatic number plate recognition mounted on vehicles, mobile automatic number plate recognition apparatus, stationary automatic number plate recogni-tion apparatus, optical apparatus for capturing traffic data, decoding boxes, and electronic decoders; all the aforesaid services relating in particular to sensors, in particular optical, electrical and electronic sensors; all the aforesaid services relating in particular to cameras, in particular hand-held cameras, cameras for measuring volume, motion-activated cameras, matrix cameras, line scan cameras, digital cameras, infrared cameras, IP (internet protocol) speed dome cameras, digital speed cameras, and semiconductor cameras in the field of traffic monitoring and control

International Classes 42 - Primary Classes **US Classes** 100, 101 **International Class Title** Scientific and computer services

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the stylized wording "ELPHOGENE ONCOMONITOR" with the wording "ELPHOGENE" in smaller font above the wording "ONCOMONITOR" in larger font, all of which appears below an image of a DNA helix within a shaded, raindrop-shaped design **Color Claimed** Color is not claimed as a feature of the mark.

RELATED PROPERTIES INFORMATION

International Registration 1521928 **International Registration Date** Nov. 18, 2019

GOODS AND SERVICES INFORMATION

For medical apparatus and instruments for diagnostic radiopharmaceutical use; medical apparatus for use in cellular analysis and diagnosis, namely, cell culture chambers; medical diagnostic apparatus for testing DNA and RNA samples; medical diagnostic apparatus for detecting cancer; ultrasonic medical diagnostic apparatus; surgical apparatus and instruments; blood and body fluid analyzers for medical diagnostic use; robotics for medical purposes, namely, surgical robots; medical apparatus for measuring and displaying data measured from bodily fluids, and parts therefor; blood testing apparatus; medical apparatus for measuring biochemical changes in the blood; medical devices for measuring biomarkers in the blood

International Classes 10 - Primary Classes **US Classes** 26, 39, 44 **International Class Title** Medical Apparatus

For scientific apparatus and instruments for measuring relative DNA, RNA and protein and parts and fittings therefor; laboratory apparatus for analysis and diagnosis carried out on cells; downloadable computer software for processing and synthesizing images of cells and tissues in the field of diagnosis and research; scientific research apparatus and instruments for laboratories, namely, ultra-high vacuum chambers; diagnostic apparatus, not for medical purposes, for the detection of pathogens for laboratory or research use; laboratory chemical reactors; chemistry apparatus and instruments for measuring chemical concentrations in water; measuring apparatus and instrumentation, namely, digitizers for use in the fields of biochemistry and analytical chemistry; apparatus for testing gas, liquids and solids for use in the fields of biochemistry and analytical chemistry; apparatus for the transmission of data; electrical monitoring apparatus, namely, wireless controllers for

monitoring and controlling the functioning of other electronic devices for use in the fields of biochemistry and analytical chemistry; prerecorded magnetic data carriers featuring scientific research data; downloadable software, namely, computer operating programs; recorded computer programs in the field of data processing, namely, database management software; computer hardware and downloadable software for use in database management, data storage, processing and analysis in the fields of healthcare, biochemistry and analytical chemistry; computer hardware and downloadable computer software for use in controlling scientific apparatus; downloadable software for processing, categorization and analysis of laboratory testing data; blank digital storage media for storing audio files, image files, text files or other data or information; electronic databases in the field of biochemistry and analytical chemistry recorded on computer media; interactive computer hardware and recorded software systems for laboratory instrument programming and control; data processors; downloadable electronic publications, namely, magazines, newsletters, and books in the fields of biochemistry and analytical chemistry; electronic publications recorded on computer media, namely, magazines, newsletters, books in the fields of biochemistry and analytical chemistry; downloadable electronic magazines in the fields of biochemistry and analytical chemistry; downloadable e-books in the field of biochemistry and analytical chemistry; computer hardware and downloadable software for use in downloading, storing and displaying electronic periodicals, books and magazines

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For medical diagnostic testing, monitoring and reporting services; medical services in the field of oncology and outpatient oncology; genetic testing for medical purposes; performing diagnosis of diseases; health screening in the field of oncology and genetic testing; providing medical information in the form of reports in the field of oncology and genetic testing; health assessment services conducted through the use of health assessment surveys; medical advisory services; providing on-line medical information relating to oncology; providing news and information in the field of medicine; medical treatment analysis provided by medical laboratories; medical laboratory services for the medical analysis of samples taken from patients; health advice and information services; medical information services provided via the internet

International Classes 44 - Primary Classes **US Classes** 100, 101 **International Class Title** Medical, beauty and agricultural services

Mark Literal(s) ZEPIRO

CASE IDENTIFIERS

Serial Number 79287605 **Application Filing Date** Jan. 22, 2020 **Registration Number** 6236036 **Registration Date** Jan. 05, 2021 **Register** Principal **Mark Type** Service Mark Trademark **Publication Date** Oct. 20, 2020

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the stylized wording "ZEPIRO", with an arch extending from the top right of the letter "Z", through and below and to the right of the letter "O". The arch and a circle intersect above the letter "I". **Color Claimed** Color is not claimed as a feature of the mark.

RELATED PROPERTIES INFORMATION

International Registration 1535987 **International Registration Date** Jan. 22, 2020

GOODS AND SERVICES INFORMATION

For Add-in cards for micro computers, namely, blank smart cards; aerials for the reception of signals; apparatus for processing digital data; apparatus for processing information, namely, computers and computer hardware; apparatus for programming data, namely, computers and computer hardware; apparatus for programming electronic control apparatus, namely, computers and computer hardware; apparatus for reading data, namely, optical readers, electronic card readers, bar code readers; apparatus for reading information, namely, optical character readers, smart card readers; apparatus for receiving data, namely, wireless receivers; apparatus for recording digital information, namely, video recorders; apparatus for recording electrical information, namely, event recorders; apparatus for recording humidity, namely, event recorders; aerials for the transmission of signals; apparatus for recording radiation, namely, event recorders; apparatus for remote data transmission, namely, wireless transmitters; apparatus for remote meter reading, namely, wireless transmitters and receivers; apparatus for retrieving data, namely, wireless receivers; apparatus for sending data, namely, wireless transmitters; apparatus for sending messages, namely, wireless transmitters; apparatus for sensing movement, namely, motion sensors; apparatus for surface measurements, namely, distance measuring apparatus; apparatus for the acquisition of data, namely, event recorders; apparatus for the acquisition of information, namely, event recorders; air analysis apparatus; apparatus for the acquisition of signals, namely, signal processors; apparatus for the analysis of air; apparatus for the analysis of gas, namely, residual gas analyzers; apparatus for the communication of data, namely, network routers; apparatus for the control of power supply to electrically driven motors, namely, electronic power supplies for driving electric motors; apparatus for the conversion of data, namely, data processors; apparatus for the conversion of information, namely, data processors; apparatus for the detection of moisture, namely, moisture sensors; apparatus for the detection of radiation, namely, radiation sensors; apparatus for the measurement of

moisture levels, namely, electronic plant moisture sensors; air temperature sensors; apparatus for the monitoring of personnel, namely, electronic devices for locating and tracking people using global positioning systems; apparatus for the processing of data; apparatus for the processing of digital information, namely, data processors; apparatus for the processing of information, namely, data processors; apparatus for the remote control of industrial operations; apparatus for the storage of data, namely, blank electronic storage media; apparatus for the storage of information, namely, blank electronic storage media; apparatus for the storage of physical measurements, namely, blank electronic storage media; apparatus for the supply of electricity, namely, electricity distribution consoles; apparatus for the testing of air, namely, air analysis apparatus; alarm management apparatus, namely, alarm central units; apparatus for the testing of electrical circuits, namely, circuit testers; apparatus for the testing of gas; apparatus for the transmission of data, namely, wireless transmitters; apparatus for the volumetric measurement of liquids, namely, liquid level sensors; apparatus for the volumetric transfer of liquids, namely, mechanical devices in the nature of dispensers of preset portions of fluids for dosing purposes, not for medical use; apparatus for transmission via satellites, namely, satellite receivers and satellite dishes; apparatus for transmitting data, namely, satellite transceivers; apparatus for transmitting data by the telephone network, namely, mobile telephones; apparatus for transmitting electronic signals, namely, wireless signal transmitters; apparatus for transmitting information, namely, networking routers; alarm management installations, namely, central alarm units; apparatus for use in access control, namely, electronic access control systems for interlocking doors; apparatus for use in data logging, namely, electronic data loggers; apparatus for use in digital communication transmission, namely, wireless transmitters; apparatus for use in fuel measurement, namely, fuel gauges; apparatus for use in high-frequency reception, namely, wireless receivers; apparatus for use in high-frequency transmission, namely, high frequency antennas; automatic analyzers other than for medical diagnosis, namely, automatic air analysis apparatus; automatic control apparatus, namely, electric controls panels; automatic control instruments, namely, electric control panels; automatic control operating apparatus, namely, electric control panels; alarm sensors; circuit board assemblies; boiler control apparatus; bore checking gauges, namely, water level meters; bore testing instruments, namely, water level meters; cases adapted for batteries; cases adapted for electronic circuits; cases adapted for electronic components, namely, electronic diaries; cases adapted for electronic equipment, namely, document printers, computers; cases adapted for microcircuits; cases for electronic devices, namely, mobile phones; alarm signaling apparatus, namely, burglar alarms; communication apparatus, namely, mobile phones; communication devices, namely, cell phones; communication instruments, namely, telephones; communication interface units, namely, computers; communication modems; downloadable and recorded communication software for connecting users to a global computer network; communications antennae; communications apparatus, namely, networking routers and modems; downloadable and recorded communications processing computer software for transmitting and receiving data over a global computer network; acoustic alarms in the nature of alarm signaling receivers; communications processors being data processing apparatus; downloadable and recorded communications computer programs for connecting users to a global computer network; communications systems comprised of computers, modems, and network routers; computer apparatus for process control, namely, data processing apparatus; computer apparatus for processing data; computer apparatus for the storage of data, namely, blank electronic storage media; computer apparatus for transmitting data, namely, wireless transmitters; computer circuit boards; computer circuits; computer communication apparatus, namely, computer modems; alarm signaling transmitters; computer communications modems; computer components, namely, computer hardware and computer peripherals; computer control apparatus, namely, computer hardware; computer control devices, namely, computer mouse; computer control units, namely, computer hardware; computer controls, namely, computer hardware; computer controls for lighting apparatus; computer data in recorded form, namely, CD-ROMs featuring

telecommunication data; computer data input apparatus, namely, computer hardware; computer data input devices, namely, computer hardware; aerial boosters, namely, masts for wireless aerials; ancillary input and output controllers, namely, digital input and output scanners; computer data interchange apparatus, namely, computer hardware; computer design hardware; computer documentation in electronic form, namely, downloadable manuals featuring operating instructions for computers; downloadable and recorded computer firmware for connecting users to a global computer network; computer modems; computer memory modules; computer monitoring apparatus, namely, computer hardware for monitoring computer operating status; computer monitoring instruments, namely, computer hardware for monitoring computer operating status; computer operated control apparatus, namely, computer-operated lighting control apparatus; downloadable and recorded computer operating programs; ancillary input and output devices, namely, digital input and output scanners; downloadable and recorded computer programs for data processing for enabling the processing of financial transactions over a global computer network; downloadable and recorded computer programs for establishing sump pump operating schedules; downloadable and recorded computer programs for processing data for enabling the processing of financial transactions over a global computer network; downloadable and recorded computer programs for processing information for enabling the processing of financial transactions over a global computer network; downloadable and recorded computer programs for providing a graphical presentation of data; downloadable and recorded computer programs for sales purposes, namely, for performing point-of-sale transactions via a global computer network; downloadable and recorded computer programs for scientific data analysis in the field of chemistry; downloadable and recorded computer programs for testing computer hardware; downloadable and recorded computer programs for the analysis of data processing performance of computers; downloadable and recorded computer programs for the analysis of data processing procedures; antennas; downloadable and recorded computer programs for the control of telecommunication instruments; downloadable and recorded computer programs for use in communications for connecting users to a global computer network; downloadable and recorded computer programs for use in farming for crop forecasting; downloadable and recorded computer programs for use in fluid flow analysis; downloadable and recorded computer programs for use in telecommunications for connecting users to a global computer network; computer related data communication apparatus, namely, modems; computer related voice communication apparatus, namely, smart phones; downloadable and recorded computer software for database management; downloadable and recorded computer software for database management; recorded computer software for database management; antennas for the reception of electromagnetic waves; downloadable and recorded computer software adapted for use in the operation of computers, namely, downloadable and recorded computer operating programs; downloadable and recorded computer software designed to estimate resource requirements in the field of agriculture; downloadable and recorded computer software for authorizing access to data bases; downloadable and recorded computer software for business purposes for performing electronic business transactions over a global computer network; downloadable and recorded computer software for communicating purposes between microcomputers; downloadable and recorded computer software for communication between computer processes; computer software packages comprised of downloadable and recorded computer software for database management; computer software products, namely, downloadable and recorded computer software for database management; downloadable and recorded computer software programs for database management; control apparatus, namely, thermostats; antennas for the transmission of electromagnetic waves; control apparatus, namely, time clocks; control apparatus for computers, namely, microcontrollers; control apparatus for determining position, namely, LED position sensors; control apparatus for use in refrigeration, namely, thermostats; control circuits, namely, electronic circuits; control devices, namely, thermostats for heating installations; control

devices, namely, timers for heating installations; control units, namely, thermostats for heating installations; control units, namely, thermostats for use in electric immersion heaters; control units, namely, timers for heating installations; antennas for wireless communication apparatus; control units, namely, timers for use in electric immersion heaters; controller circuit boards; controller interface modules for computers; data communications apparatus, namely, modems; data communications hardware; data communications installations comprised of computer hardware and modems; data communications instruments, namely, modems; wireless data communications receivers; downloadable and recorded data communications software for transmitting data over a global computer network; data compilations, namely, downloadable and recorded electronic data files in the field of electronics; apparatus and instruments for switching electricity, namely, electric switches; data compressors being audio processing equipment; data conversion apparatus, namely, computer hardware; data display apparatus, namely, video monitors; data display instruments, namely, computer monitors; data encoding apparatus; data encryption apparatus being encoding and decoding apparatus; data handling apparatus, namely, computer hardware; data handling installations, namely, computer hardware; data in machine readable form, namely, CD-ROMS featuring information in the field of telecommunications; data information processing apparatus, namely, data processors; apparatus for climatic technology, namely, climate control digital thermostats; data information processing units, namely, data processors; data input apparatus for use with computers, namely, computer hardware; data interconnecting computer installations, namely, computer hardware and computer cables; data logging apparatus, namely, electronic data loggers; data processing apparatus for use in information storage; data processing apparatus for use with computers; data processing components, namely, computer hardware; data processing devices; data processing equipment; data processing information carriers, namely, CD-ROMS featuring recorded computer software for database management; apparatus for collecting by radio frequency, namely, radio transmitters; data processing installations comprised of computer hardware; data processing installations incorporating expandable architecture comprised of computer hardware; data processing instruments; data processing machines; data processing materials, namely, data processors; downloadable and recorded computer data processing programs for vehicle driving simulations; downloadable and recorded computer data processing programs for simulating vehicle driver's behavior; downloadable and recorded computer data processing programs for vehicle driving simulations; data processing programs recorded on data carriers for database management; recorded data processing programs stored on data carriers for database management; apparatus for collecting encoded data for supply to computers, namely, wireless receivers; downloadable and recorded computer data processing software for database management; downloadable and recorded computer data processing software for creating graphic representations; data processing systems comprised of data processing apparatus; data processing units, namely, data processors; data processors; downloadable and recorded computer data programs for database management; data readers being acoustic devices for data processing apparatus, namely, electronic voice recognition readers; data readers being optical devices for data processing apparatus, namely, optical readers; wireless data receivers; data receiving apparatus, namely, wireless receivers; aerial combiners, namely, antennas; apparatus for communication, namely, cell phones; data recorded electronically, namely, downloadable electronic data files featuring information in the field of telecommunications; data recorded electronically from the internet downloadable electronic data files featuring information in the field of telecommunications; data recorded in computer accessible form downloadable electronic data files featuring information in the field of telecommunications; data recorded in electronic form downloadable electronic data files featuring information in the field of telecommunications; data recorded in machine-readable form compact discs featuring information in the field of telecommunications; data recorded in magnetic readable form prerecorded magnetic data carriers featuring information in the field of telecommunications; data recorded on magnetic materials prerecorded magnetic data carriers featuring information in

the field of telecommunications; data recorded on optical materials optical discs featuring information in the field of telecommunications; data recording apparatus, namely, video recorders; data recording machines, namely, video recorders; apparatus for computation, namely, calculators; data recording materials, namely, blank optical discs; data recording materials for use with computers, namely, blank optical discs; data retrieval apparatus, namely, wireless receivers; data security apparatus, namely, encoding and decoding apparatus; data security instruments, namely, electronic encryption units; data sorting apparatus, namely, data processors; data storage apparatus, namely, blank electronic storage media; data storage apparatus for computers, namely, blank electronic storage media; data storage apparatus for use with data processing apparatus, namely, blank electronic storage media; data storage cartridges being blank electronic storage media; apparatus for connecting electrical circuit components, namely, electric wires; blank data storage cassettes; data storage devices, namely, blank electronic storage media; data storage devices bearing data, namely, electronic storage device in the nature of memory media for storing information collected from medical ventilators; electronic data storage devices containing photographs in the field of telecommunications equipment; data storage discs, namely, blank optical storage discs; data storage installations, namely, blank electronic storage media; data storage instruments, namely, blank electronic storage media; data storage machines, namely, memory modules; apparatus for connecting electronics, namely, computer cables; data stored for access by computer programs, namely, downloadable electronic data files featuring telecommunication information; data switches being computer switches; data switching apparatus, namely, computer switches; mobile data terminals; mobile data terminals for the communication of data to a central computer system; mobile data terminals for the entry of data to a central computer system; mobile data terminals for the validation of data; data transfer apparatus, namely, computer hardware; data transfer instruments, namely, computer hardware; apparatus for controlling lighting; data transmission apparatus, namely, computer hardware; data transmission computer cables; data transmission installations comprised of computer hardware and modems; wireless data transmitters; data transmitting apparatus, namely, wireless transmitters; data transmitting instruments, namely, wireless transmitters; downloadable and recorded computer database programs for database management; downloadable electronic databases in the field of telecommunications technology; electronic databases featuring electronic publications in the nature of newsletters and manuals in the field of telecommunications technology, recorded in computer media; development apparatus for data processing apparatus, namely, computer hardware; apparatus for controlling the input of data, namely, input devices for computers; devices for detecting exposure to radiation; devices for measuring electric quantities, namely, electric meters; devices for measuring energy, namely, voltmeters; devices for measuring exposure to radiation, namely, radiation detectors; devices for measuring water depth; devices for measuring water temperature; devices for measuring wind direction; devices for measuring wind speed; devices for storing measured values, namely, blank electronic storage media; digital telecommunications apparatus, namely, mobile phones; apparatus for controlling the operation of machines, namely, computers; digital telecommunications instruments, namely, smart phones; electric apparatus relating to telecommunications, namely, electric control panels for telecommunications equipment; electric communication apparatus, namely, modems; electric monitoring apparatus, namely, battery monitors; electrical apparatus for monitoring, namely, battery monitors; electrical communications apparatus adapted for use on vehicles, namely, telephones; electrical instruments for telecommunications purposes, namely, electric control panels for telecommunications equipment; electrical transmitters; electronic amplifiers; electronic analyzers, other than for medical purposes, namely, liquid analyzers; electric apparatus for controlling the operation of machines, namely, electric control panels for telecommunications equipment; electronic multimedia publications in the nature of magazines in the field of telecommunications, recorded on computer media; electronic

anti-theft bollard sensors to prevent shoplifting; electronic apparatus for controlling access, namely, electronic readers and controllers for controlling access to a premises; electronic apparatus for controlling toll points, namely, electronic terminals for highway toll collection; electronic apparatus for counter-jamming weapon systems, namely, radar jamming apparatus; electronic apparatus for data processing; electronic apparatus for detecting leaks; electronic apparatus for developing communication links, namely, telecommunications cables; electronic apparatus for information delivery, namely, computer servers; electronic apparatus for information exchange, namely, computer servers; electronic apparatus for controlling the operation of machines, namely, industrial automation controls; electronic apparatus for manipulating data, namely, computer hardware; electronic apparatus for measuring environmental conditions, namely, moisture sensors; electronic apparatus for monitoring machines, namely, optical inspection apparatus; electronic apparatus for providing communication links, namely, computer servers; electronic apparatus for reading information, namely, bar code readers; electronic apparatus for relaying data, namely, computer servers; electronic apparatus for telemetry, namely, wireless transmitters and receivers; electronic apparatus for testing communication links, namely, computer hardware; electronic apparatus for the measurement of toxic gases; electronic apparatus for the transmission of data, namely, computer servers; apparatus for controlling the remote operation of machines, namely, automated digital controls for commercial and industrial food service equipment; electronic apparatus for transmitting information, namely, wireless transmitters; electronic assemblies comprised of electric wires and electric switches; electronic chips in the nature of semi-conductors for the manufacture of integrated circuits; electronic circuit boards; electronic circuit substrate, namely, quantum dots being crystalline semiconductor material; electronic circuits; electronic circuits for data processing apparatus; electronic circuits for use with computers; electronic coding apparatus; electronic color analyzers; electric aerial converters; apparatus for controlling the output of data, namely, computer hardware; electronic color analysis apparatus; electronic communication apparatus, namely, smart phones; electronic communication installations comprised of computer servers and modems; electronic component carriers, namely, electronic circuits; electronic components, namely, semiconductor power elements; electronic components in the nature of microchips; electronic computer apparatus, namely, computers; electronic connectors for electronic circuits; electronic control apparatus, namely, computer hardware; electronic control apparatus for agricultural machines, namely, flow regulators for agriculture use; apparatus for controlling the processing of data, namely, microcontrollers; electronic control apparatus for automatic machines, namely, optical inspection apparatus; electronic control apparatus for computer programs, namely, computer hardware; electronic control apparatus for electric motors, namely, electronic servo motor controllers; electronic control apparatus for engines; electronic control apparatus for the remote control of gear pumps; electronic control apparatus for the remote control of industrial machines; electronic control apparatus for lighting; electronic control apparatus for the remote control of machine tools; electronic control apparatus for the remote control of industrial machines; electronic control apparatus for the remote control of motors; apparatus for controlling the storage of data, namely, high-speed storage subsystems for storage and backup of electronic data either locally or via a telecommunications network; electronic control apparatus for use with the remote control of vacuum pumps; electronic control apparatus for the remote control of valves; electronic control circuits; electronic control devices for the remote control of industrial rotary machines; electronic control devices for the remote control of turbines; electronic control installations for the remote control of industrial operations; electronic control installations for the remote control of sensors used in industrial operations; electronic control operating apparatus, namely, electric switches and electric control panels; electronic control systems comprised of electric switches and electric control panels; electronic control units comprised of electric switches and electric control panels; apparatus for data collection, namely, wireless receivers; electronic speed controllers; electronic controls for the remote control of industrial machines; electronic counting apparatus,

namely, currency counting machines; electronic damper control apparatus; electronic data apparatus for use with computers, namely, data processors; electronic data carriers, namely, optical data carriers featuring telecommunications equipment operating instructions; electronic data carriers, namely, CD-ROMs with computer operating programs ; electronic data collection apparatus, namely, wireless receivers; electronic data communications apparatus, namely, modems; electronic data communications installations, namely, computer servers; apparatus for data input, namely, input devices for computers; electronic data input apparatus, namely, input devices for computers; electronic data interchange apparatus, namely, computer network switches; electronic data output apparatus, namely, computer hardware; electronic data processing apparatus; electronic data processing devices; electronic data processing equipment; electronic data processing installations comprised of data processors; electronic data processing machines; electronic decoders; electronic design analysis apparatus, namely, computer hardware; apparatus for data output, namely, computer hardware; electronic devices for data processing, namely, computer hardware; electronic devices for indicating the interaction of fields, namely, computer hardware; electronic devices for information processing, namely, computer hardware; electronic devices for the transmission of data between computers, namely, computer servers; electronic devices for the transmission of data between microprocessors, namely, computer servers; electronic devices for transmitting data, namely, computer servers; electronic measuring apparatus, namely, lasers for measuring; electronic measuring instruments, namely, lasers for measuring; electronic metering apparatus, namely, water meters; electronic metronomes; apparatus for data processing; electronic microprocessors; electronic miniature electric relays; electronic monitoring apparatus, other than for medical use, namely, battery monitors; electronic monitoring instruments, other than for medical use, namely, battery monitors; electronic plug-in cards, namely, blank smart cards; electronic point of sale transaction terminals; electronic pressure sensors; electronic process apparatus, namely, data processing apparatus; electronic programmable logic controllers; electronic programming units, namely, programmable logic controllers; apparatus for data storage, namely, blank data storage media; electronic rain gauges; electronic receiving apparatus, namely, wireless receivers; electronic data relays for sensors; electronic sensors, namely, temperature sensors; electronic signal generating apparatus, namely, signal generators; electronic signal processing apparatus; electronic signal processing apparatus for musical instruments; electronic signal transmission apparatus, namely, emergency signal transmitters; electronic signal transmitters for emergencies; electronic computer switches; apparatus for data transmitting, namely, radio transmitters; electronic switching amplifiers; electronic switching apparatus, namely, computer switches; electronic system control apparatus, namely, thermostats; electronic temperature monitors, other than for medical use, namely, thermometers; electronic temperature recorders, other than for medical use; electronic test apparatus for testing bonds between metals; electronic test apparatus for testing welds; electronic testing instruments for testing electrical systems, namely, voltmeters; electronic theft prevention apparatus, other than for vehicles, namely, burglar alarms; electronic theft prevention installations, other than for vehicles, namely, central alarm units; apparatus for decoding encoded signals; electronic thermometers, other than for medical use; electronic time recording apparatus; electronic timers; electronic timers for lubricating installations; electronic timing apparatus, namely, timers; electronic timing control apparatus, namely, timers; electronic timing control instruments, namely, timers; evaluation apparatus, namely, moisture sensors; fixed multi-channel communication apparatus, namely, radios; fixed radio apparatus for voice transceivers; aerial filters; apparatus for detecting fire, namely, smoke detectors; fixed radio apparatus for voice transmission; fixed radio instruments for data transceivers; fixed radio instruments for data transmission; fixed single channel communication apparatus, namely, radios; housings for computers; housings for electrical apparatus, namely, electrical junction box housings; housings for electrical instruments, namely, electrical junction box housings;

housings for electrical sub-assemblies, namely, electrical switch housings; housings for electronic instruments, namely, electrical switch housings; housings for electronic sub-assemblies, namely, electrical switch housings; apparatus for detecting gases; housings for measuring apparatus, namely, housings for moisture sensors; integrated circuit boards; integrated circuit cards; integrated circuit cards for bearing stored data in the field of telecommunication equipment; integrated circuit cards for storing data; integrated circuits; integrated circuit test clips being computer hardware; integrated circuits; integrated circuits for networks for use in identification; interface network modems; apparatus for detecting light obscuring substances; logging apparatus, namely, electronic data loggers; logic circuits; measuring instrument, namely, electronic data loggers; mobile telecommunications apparatus, namely, mobile phones; modems; modems for communications networks; modular instrumentation apparatus, namely, computer hardware; monitoring apparatus, other than for medical purposes, namely, battery monitors; monitoring control apparatus, electric control panels; electronic monitoring installations for the remote control of industrial operations; apparatus for detecting smoke; electronic monitoring instruments, namely, battery monitors; monitoring units, namely, battery monitors; downloadable and recorded computer programs for the remote monitoring of industrial operations; portable apparatus for receiving satellite transmissions, namely, satellite telephones; portable telecommunications apparatus, namely, satellite telephones; pressure measurement apparatus, namely, pressure sensors; pressure measurement tools, namely, pressure indicators; pressure measuring apparatus, namely, pressure indicators; pressure meters; pressure monitors, other than for medical use, namely, pressure sensors; apparatus for detecting vapors, namely, smoke detectors; primary cells being photovoltaic cells; printed circuit boards; printed circuit boards for computers; printed circuit boards for mounting in computers; printed circuit boards for remote data transmission; printed circuit cards; printed circuit expansion boards; printed circuits; printed circuits for use with timing mechanisms; printed circuits on substrates of flexible film; apparatus for digital signal processing; printed circuits on substrates of plastics material; printed electronic circuits; printed electronic circuits for apparatus; printed electronic circuits for machines; process computers; electronic process control apparatus for the remote control of industrial operations; process control computers; process control digital controllers for the remote control of industrial operations; electric process control instruments for the remote control of industrial operations; electronic process control instruments for the remote control of industrial operations; apparatus for electronic digital signal processing; process control operator consoles, namely, electronic apparatus for the remote control of industrial operations; process control operator interface units; process control units, namely, electronic apparatus for the remote control of industrial operations; process control units being controller modules, namely, electronic apparatus for the remote control of industrial operations; process control units using process control computers, namely, electronic apparatus for the remote control of industrial operations; electric process controllers, namely, electric installations for the remote control of industrial operations; electronic process controllers, namely, electronic apparatus for the remote control of industrial operations; electric process controlling apparatus, namely, electric installations for the remote control of industrial operation; electronic process controlling apparatus, namely, electronic apparatus for the remote control of industrial operations; downloadable and recorded process controlling computer software for remote control of industrial operations; apparatus for electronic information processing, namely, data processors; processing circuit boards; processing computers; programmable computers; programmable control apparatus, namely, lighting control apparatus; programmable electronic controllers for computers; programmable controls, namely, lighting control apparatus; programmable controls for lighting installations; programmable digital read-out units, namely, electronic display interfaces; programmable electronic apparatus, namely, lighting control apparatus; programmable electronic apparatus for use with machines, namely, programmable logic controllers; apparatus for fault detection, namely, fault circuit indicators; programmable logic arrays; programmable telecommunication apparatus, namely, modems;

programmable timers; programming apparatus, namely, computer hardware; programming apparatus for use with computers, namely, programmable logic controllers; recorded optical discs featuring programming instructions for data processing apparatus ; recorded computer programs for controlling lighting installations; downloadable and recorded computer programs bearing encoded information for controlling lighting installations; downloadable and recorded programs for computers for controlling lighting installations; recorded programs for computers for controlling lighting installations; apparatus for gathering information, namely, wireless receivers; recorded computer programs for operating data processing apparatus ; computer programs for operating data processing apparatus, recorded on disks; computer programs for operating data processing apparatus recorded on tapes; downloadable and recorded computer programs for operating data-processing apparatus; downloadable and recorded computer programs for operating microcomputers; downloadable and recorded computer programs for operating personal computers; downloadable and recorded computer programs for processing data on computers; downloadable and recorded computer programs for use in communications for connecting users to a global computer network; digital signal transmitters, namely, pulse code modulation apparatus for transmission via cable; digital signal transmitters, namely, pulse code modulation apparatus for transmission via microwave; aerial electric sockets; apparatus for handling information, namely, data processing apparatus; digital signal transmitters, namely, pulse code modulation apparatus for transmission via radio; digital signal transmitters, namely, pulse code modulation apparatus for transmission via satellite; digital signal transmitters, namely, pulse code modulation instruments for transmission via cable; digital signal transmitters, namely, pulse code modulation instruments for transmission via microwave; digital signal transmitters, namely, pulse code modulation instruments for transmission via optical fibers; digital signal transmitters, namely, pulse code modulation instruments for transmission via radio; digital signal transmitters, namely, pulse code modulation instruments for transmission via satellite; pulse code modulation multiplexing instruments; pulse counters not for medical use; radio sets; apparatus for identifying cows, namely, radio frequency identification tags; radio signal antennae; radio signal transmission apparatus; radio transceivers; radio transmission apparatus; radio-frequency antennas; radio-frequency components, namely, antennas; radio-frequency filters; radio-frequency modulators; radio-frequency power meters; radio-frequency receivers; radio-frequency transmitter; real-time data processing apparatus; receiving antennas for satellite broadcast; receiving devices for connection to communication networks, namely, wireless receivers; electric relay sockets; electric relays with name bearing tags; relays, electric; remote control apparatus connected by modems to computers; remote data gathering apparatus, namely, global positioning systems; remote data processing apparatus; apparatus for information teleprocessing, namely, data processors; remote monitoring apparatus, namely, video recorders; research apparatus for scientific use, namely, laboratory pipettes; research instruments for scientific use, namely, laboratory pipettes; satellite communication apparatus, namely, satellite dishes; satellite communications equipment, namely, satellite receivers and transmitters; satellite communications instruments, namely, satellite aerials; satellite navigational apparatus; satellite receivers; satellite receiving aerials; satellite receiving apparatus; apparatus for information transmission, namely, network routers; satellite signal receiving antennae; satellite transceivers; satellite transmitting aerials; sensing apparatus not for medical use, namely, pressure sensors; sensing apparatus being parts of anti-theft apparatus, namely, motion sensors; sensing apparatus being parts of intruder detection apparatus, namely, motion sensors; sensing apparatus being parts of outside lighting apparatus, namely, motion sensors, light sensors; sensing apparatus for use with windows, namely, motion sensors, glass break sensors; sensing devices, namely, motion sensors; sensing devices for the automatic control of machines, namely, pressure sensors; apparatus for interconnecting data processing equipment, namely, computer cables; sensing devices for the control of air currents, namely, wind speed

sensors; sensing devices for the control of liquid levels not for medical use, namely, liquid level sensors; sensing devices for the control of temperatures, namely, temperature sensors; digital signal convertors; digital signal processors; signal transmission apparatus, namely, transmitters of electronic signals; electronic signal transmitters; downloadable and recorded computer software drivers for installation and operation of document printers; soil moisture meters; solar batteries; apparatus for lighting control; solar batteries for industrial use; solar cells for electricity generation; solar collectors for electricity generation; solar energy collectors for electricity generation; solar energy operating apparatus, namely, solar wafers; strategic telecommunication apparatus for land vehicles, namely, mobile phones; strategic telecommunication apparatus for ships, namely, radios; satellite target surveillance apparatus, namely, global positioning systems; satellite target trackers, namely, global positioning systems; telecommunications apparatus, namely, mobile phones; apparatus for localization for vehicles via radio-electrical transmission, namely, radios; telecommunications apparatus for diagnostic purposes, namely, global positioning systems; telecommunications apparatus for measuring purposes, namely, global positioning systems; telecommunications apparatus for transferring data to computers, namely, network routers; telecommunications apparatus for transmission purposes, namely, network routers; telecommunications apparatus for transmitting data for use with computers, namely, network routers; telecommunications equipment, namely, network routers; telecommunications instruments for use in cellular radio networks, namely, antenna; temperature compensated crystal oscillators; temperature compensation controls, namely, thermostats; temperature control apparatus, namely, electric switches; apparatus for localization for vehicles via satellites, namely, global positioning systems; temperature control apparatus, namely, electric switches for machines; temperature control apparatus, namely, electric switches for vehicles; temperature control apparatus, namely, thermostats; temperature control apparatus, namely, thermostats for machines; temperature control apparatus, namely, thermostats for vehicles; temperature controllers, namely, thermostats; temperature controllers apparatus for machines, namely, thermostats; temperature controlling apparatus, namely, thermostats; temperature controlling apparatus, namely, thermostats for central heating installations; temperature controlling apparatus for machines, namely, thermostats; apparatus for low power electrical engineering, namely, electric switches; temperature controlling instruments, namely, thermostats; temperature display units, namely, thermostats; temperature feedback units, namely, thermostats; temperature gauges; temperature indicating apparatus; temperature indicators; temperature limiters, namely, thermostats incorporating bi-metallic discs; temperature limiters, namely, thermostats incorporating expansion rods; temperature limiters, namely, thermostats for central heating installations; temperature limiters for machines, namely, thermostats; aerials; apparatus for mass flow measurement, namely, mass flow meters; temperature limiters for metal molding machines, namely, thermostats; temperature limiters for use in metal molding, namely, thermostats; temperature limiters for use in vehicle engines, namely, thermostats; temperature limiters for use in vehicle heating systems, namely, thermostats; electronic temperature logging apparatus; electronic temperature matrix regulators; temperature measurement instruments, namely, thermometers not for medical use; temperature measuring apparatus for household use, namely, thermometers not for medical use; temperature measuring apparatus for scientific use, namely, thermometers; temperature measuring instruments for household use, namely, thermometers not for medical use; apparatus for measured valve acquisition, namely, pressure sensors for valves; temperature measuring instruments for industrial use, namely, thermometers not for medical use; temperature measuring instruments for scientific use, namely, thermometers; temperature meters for household use, namely, thermometers not for medical use; temperature meters for industrial use, namely, thermometers not for medical use; temperature meters for scientific use, namely, thermometers; temperature monitors, namely, thermostats for central heating installations; temperature monitors for household use, namely, thermostats; temperature monitors for industrial use, namely, thermostats; temperature monitors for machines, namely, thermostats; temperature

monitors for metal molding machines, namely, thermostats; apparatus for measurement of gas components in air; temperature monitors for scientific use, namely, thermostats; temperature monitors for use in metal molding, namely, thermostats; temperature monitors for vehicle engines, namely, thermostats; temperature monitors for vehicle heating systems, namely, thermostats; temperature recorders not for medical use, namely, thermostats; temperature recorders for testing static electricity; temperature recording apparatus not for medical use, namely, thermostats; temperature regulators, namely, thermostats incorporating bimetallic discs; temperature regulators, namely, thermostats incorporating expansion rods; temperature regulators for vehicle engines, namely, thermostats; apparatus for measuring, namely, thermometers not for medical use; temperature responsive control apparatus for vehicle engines, namely, thermostats; temperature responsive control apparatus for vehicle heating systems, namely, thermostats; temperature scanners for industrial use; temperature scanners for scientific use; temperature sensing apparatus for industrial use; temperature sensing apparatus for machines; temperature sensing apparatus for metal molding machines; temperature sensing apparatus for scientific use; temperature sensing apparatus for use in metal molding; temperature sensing apparatus for vehicle engines; apparatus for measuring agents, namely, residual gas analyzers; temperature sensing apparatus for vehicle heating systems; temperature sensitive controls for automatically operating valves, namely, thermostats; temperature sensitive testing apparatus for scientific use, namely, temperature sensors; temperature sensitive testing instruments for industrial use, namely, temperature sensors; temperature sensitive testing instruments for scientific use, namely, temperature sensors; temperature sensors for industrial use; electric temperature switches; thermistors; thermostat control apparatus; thermostat controllers; apparatus for measuring amounts of products for filling into sacks, namely, controlled volume pumps; thermostat controllers for heating installations; electric thermostat wires; thermostats; time recorded devices, namely, time clocks ; time clocks for time recording; time coding apparatus, namely, timers; time controlled feeding devices for aquatic animals, namely, timers; time correction filters, namely, timers; time data generators, namely, time clocks; time delay generators, namely, time clocks; apparatus for measuring biomagnetic signals, namely, magnetic locators; time dividers for digital communication apparatus, namely, timers; time division multiplexers; time programmers being time recording apparatus; time recording apparatus; time recording instruments; time registering apparatus, namely, time clocks; time switches, automatic; time-code generators being time recording apparatus; control devices, namely, timers ; timers for automatic apparatus; apparatus for measuring board materials, namely, tape measures; timers for switching on electrical devices at pre-programmed times; measuring devices, namely, timing devices in the nature of timers; timing apparatus, namely, timers; timing devices for controlling machines, namely, timers; timing devices for industrial processing apparatus, namely, timers; training guides in the form of a downloadable computer program for providing instruction concerning the use of time recording devices; training manuals in electronic format, namely, downloadable training manuals featuring instructions for time recording devices; training manuals in the form of a downloadable computer program for providing instruction concerning the use of time recording devices; training materials, namely, vehicle drive training simulators; transceivers; apparatus for measuring distance; telecommunications transmitters ; transmitters for the transmission of electric signals; transmitters for the transmission of electronic signals; telecommunications transmitters for use with computers; transmitters of electronic signals; transmitting apparatus, namely, transceivers; transmitting apparatus for satellite broadcast, namely, global positioning systems; transmitting apparatus for telecommunications, namely, telecommunications transmitters; transmitting apparatus for use in communications, namely, telecommunications transmitters; transmitting instruments, namely, telecommunications transmitters; apparatus for measuring humidity, namely, humidity sensors; transmitting sets, namely, telecommunications transmitters; electric triggering circuits; two-way wireless communication

systems comprised of two-way radios; units for converting information received in machine readable format, namely, bar code readers; units for displaying information received in machine readable format, namely, video monitors; wireless communication apparatus, namely, wireless receivers and transmitters; wireless high frequency transmission instruments, namely, wireless receivers and transmitters; wireless pulse transmitters; wireless receiving apparatus, namely, wireless receivers ; wireless transmission apparatus, namely, wireless transmitters; aerials for radios; apparatus for measuring liquids, namely, liquid level sensors; apparatus for measuring noise, namely, noise level meters; apparatus for measuring overheat, namely, thermometer sensors; apparatus for measuring paper, namely, measuring rules; apparatus for measuring pressure, namely, pressure sensors; apparatus for measuring temperature, namely, thermometers not for medical purposes; apparatus for measuring the temperature of fluids, namely, thermometers not for medical purposes; apparatus for message sending, namely, modems; apparatus for meteorological monitoring, namely, rain gauges; apparatus for monitoring atmospheric conditions, namely, rain gauges and thermometers not for medical use; aerials for telecommunications; apparatus for monitoring combustion, namely, automatic combustion controls machines and instruments; apparatus for monitoring electrical components, namely, electric meters; apparatus for monitoring electrical instruments, namely, electric meters; apparatus for monitoring electronic components, namely, pressure sensors; apparatus for monitoring electronic instruments, namely, pressure sensors; apparatus for monitoring fluid pipes, namely, flow meters; apparatus for monitoring gas in the atmosphere, namely, air analysis apparatus; apparatus for monitoring the operations of engines, namely, temperature sensors; apparatus for monitoring vacuum pumps, namely, pressure sensors; apparatus for processing data

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Electronic communications services, namely, electronic transmission of data; provision of electronic communications links which transfer the web site user to other local and global web pages; satellite communications services; remote transmission of data by means of telecommunications

International Classes 38 - Primary Classes **US Classes** 100, 101, 104 **International Class Title** Communication

For Electrical research, namely, research on electricity; design engineering; design of communication systems; design of communications apparatus; design of electric circuit boards; design of electronic systems; engineering design; mechanical engineering research; industrial research in the field of telecommunications technology; scientific research in the nature oceanographic research services; preparation of reports relating to technical research, namely, technical writing; research and development of new products for others; research relating to telecommunication technology; environmental monitoring services, namely, monitoring of water quality, erosion, and sedimentation; new product design consultancy

International Classes 42 - Primary Classes **US Classes** 100, 101 **International Class Title** Scientific and computer services

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the wording "KINKY CANDY" in white and gray stylized font with a black border. Behind the wording is the stylized image of a red and white lollipop, with a black border, with the stylized image of a white lollipop stick with a black border extending from the lower left-hand side of the lollipop. Behind the lollipop image is the stylized image of a mouth, with red and white lips, a red and white tongue, and white teeth, all bordered in black, with the color black filling in the space between the lips, teeth, and tongue. The mouth appears to be about to eat the lollipop. All of the aforementioned appears with a white border set against a yellow circular background with evenly spaced white rays emanating from the central image against the yellow background. All other instances of the color white other than the aforementioned represent background, outlining, shading, and/or transparent area and are not part of the mark. **Color Drawing** Yes **Color Claimed** The colors white, gray, black, yellow, and red are claimed as a feature of the mark.
