

## D03D

### WOVEN FABRICS; METHODS OF WEAVING; LOOMS

#### Definition statement

*This place covers:*

Woven fabrics or weaving processes resulting in particular woven fabrics. These aspects are covered by [D03D 1/00](#) - [D03D 27/00](#).

Specific types of weaving machines or processes to operate such weaving machines. These aspects are covered by [D03D 29/00](#) - [D03D 47/00](#).

Details or features common to different types of weaving machines. These aspects are covered by [D03D 49/00](#) and [D03D 51/00](#).

#### References

##### Limiting references

*This place does not cover:*

Devices for warp yarn preparation (i.e. creeling, warping, beaming or leasing)	<a href="#">D02H</a>
Shedding mechanisms	<a href="#">D03C</a>
Auxiliary apparatuses combined with or associated with looms	<a href="#">D03J 1/00</a>
Post treatments of fabrics	<a href="#">D06B</a> , <a href="#">D06C</a> , <a href="#">D06M</a>

##### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Knitting	<a href="#">D04B</a>
Felts, non-woven fabrics, waddings and their manufacturing	<a href="#">D04H</a>
Sewing	<a href="#">D05B</a>
Embroidering and tufting	<a href="#">D05C</a>

#### Special rules of classification

Class [D06](#) takes precedence over this subclass in respect of processes involving both weaving and finishing steps and in respect of the finished fabrics.

In this subclass, further classification in indexing scheme [D10B](#) for aspects relating to textiles is required.

A method of weaving is classified in the group designating the fabric woven unless the method is characterised by the operation of a particular loom rather than by the production of a particular fabric. In this case, the method is classified in the group for the loom.

In this subclass, if there is any doubt as to which of the essential features is the most important (this is usually the most restrictive feature), the groups designating woven fabrics should be considered in the order in which they appear at each level of indentation, except that groups designating woven pile fabrics are to be considered as taking precedence over groups designating other woven fabrics.

## D03D 1/00

### Woven fabrics designed to make specified articles

#### Definition statement

*This place covers:*

Woven fabrics or weaving methods where the structure or method makes the fabric specifically suitable for a certain application (e.g. a warp and weft yarn density can make a fabric specifically suitable for use as an airbag).

#### References

##### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Special materials for outerwear	<a href="#">A41D 31/00</a>
Floor fabrics	<a href="#">A47G 27/00</a> , <a href="#">D06N 7/00</a>

Papermaking fabrics	<a href="#">D21F 1/0036</a> , <a href="#">D21F 1/0054</a> , <a href="#">D21F 1/105</a> , <a href="#">D21F 1/12</a> , <a href="#">D21F 1/16</a> , <a href="#">D21F 7/10</a>
Surfaces simulating grass	<a href="#">E01C 13/08</a>
Window screens	<a href="#">E06B</a>
Lighting devices or systems using a string or strip of light sources, e.g. lighting webs	<a href="#">F21S 4/00</a>

#### Special rules of classification

Documents should only be classified here if the invention is specifically directed to the weaving of the product and has general relevance for weaving. Otherwise the documents should only be classified in the relevant application fields (see informative references).

The following Indexing Codes should be used in [D03D 1/00](#):

- physical properties [D10B 2401/00](#);
- wearing apparel [D10B 2501/00](#);
- domestic or personal use [D10B 2503/00](#);
- industrial use [D10B 2505/00](#);
- sport or military use [D10B 2507/00](#);
- medical or hygiene use [D10B 2509/00](#).

## D03D 3/02

### Tubular fabrics

#### Definition statement

*This place covers:*

Sleeve-like structures integrally woven in a tubular shape.

Illustrative example of subject matter classified in this group:

#### References

##### Informative references

Attention is drawn to the following places, which may be of interest for search:

Vascular stents	<a href="#">A61F 2/82</a> , <a href="#">D10B 2509/06</a>
Hoses made of fibres or threads	<a href="#">F16L 11/02</a>
Insulation of connections using a heat shrinking insulating sleeve	<a href="#">H01R 4/72</a>

#### Special rules of classification

Tubular woven fabrics that are intended for use as protective sleeves should additionally be classified in [D03D 1/0043](#).

#### Glossary of terms

*In this place, the following terms or expressions are used with the meaning indicated:*

Tubular fabric	A tubular woven fabric is either a (1) flat-woven multi-layer fabric integrally woven as a tube, i.e. with a continuous weft connecting the layers at both edges of the fabric, and only at the edges, or (2) an integrally circular woven fabric. Woven fabrics where the tubular shape is achieved after weaving, e.g. a flat woven fabric rolled up into a tubular shape, are not considered as tubular fabrics.
----------------	---

## D03D 3/04

### Endless fabrics

#### Definition statement

*This place covers:*

Endless fabrics, for example belts without a seam.

#### References

##### Limiting references

*This place does not cover:*

Papermaking fabrics	<a href="#">D21F 1/0036</a> , <a href="#">D21F 1/0054</a> , <a href="#">D21F 1/105</a> , <a href="#">D21F 1/12</a> , <a href="#">D21F 1/16</a> , <a href="#">D21F 7/10</a>
---------------------	---

## D03D 5/00

### Selvages

#### Definition statement

*This place covers:*

Selvages, i.e. the side edges of woven fabrics.

#### References

##### Limiting references

*This place does not cover:*

Means to form selvages	<a href="#">D03D 47/40</a>
Selvedge jacquards	<a href="#">D03C 3/18</a>
Leno shedding mechanisms	<a href="#">D03C 7/00</a>
Selvedge shedding mechanisms not forming part of main shedding	<a href="#">D03C 11/00</a>

## D03D 7/00

### Woven fabrics designed to be resilient, i.e. to recover from compressive stress

#### Definition statement

*This place covers:*

Multi-layered fabrics with elastic yarns connecting the individual layers in particular spacer fabrics.

## D03D 9/00

### Open-work fabrics

#### Definition statement

*This place covers:*

Net like fabrics, with spaced apart warp and weft yarns, where the spacing results from the weaving process.

#### References

##### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Ladder-tape fabrics	<a href="#">D03D 1/08</a>
Gauze or leno-woven fabrics	<a href="#">D03D 19/00</a>
Filtering materials	<a href="#">B01D 39/08</a>
Wire nets	<a href="#">B21F 27/00</a>
Mesh fabrics as backings	<a href="#">B24D 11/02</a>

## D03D 11/00

### Double or multi-ply fabrics not otherwise provided for

#### Definition statement

*This place covers:*

Fabrics with multiple woven layers connected by warp or weft yarns, the layers being all of the same size, i.e. the dimension of the layers does not vary in the z-direction (i.e. the direction perpendicular to the warp and weft yarns).

#### References

##### Limiting references

*This place does not cover:*

Multi-ply fabrics in which the length or width direction is limited to a predetermined dimension in order to create a rectangular or other three dimensional shape	<a href="#">D03D 25/005</a>
Layered products whereby the layers are not connected by warp or weft yarns, i.e. layers connected by lamination	<a href="#">B32B 5/26</a>

##### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Fibrous reinforcements for composites	<a href="#">B29C 70/222</a> , <a href="#">B29C 70/224</a> , <a href="#">B29C 70/24</a>
---------------------------------------	--

## D03D 11/02

**Fabrics formed with pockets, tubes, loops, folds, tucks or flaps (fabrics consisting of a single tube [D03D 3/02](#))**

### References

#### Limiting references

*This place does not cover:*

Fabrics consisting of a single tube	<a href="#">D03D 3/02</a>
-------------------------------------	---------------------------

#### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Fabrics for curtain heading tapes	<a href="#">D03D 1/06</a>
-----------------------------------	---------------------------

## D03D 13/00

**Woven fabrics characterised by the special disposition of the warp or weft threads, e.g. with curved weft threads, with discontinuous warp threads, with diagonal warp or weft**

### References

#### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Fabrics with non-woven perpendicular yarns, which can be connected by woven weft and/or warp yarns	<a href="#">D04H 3/04</a>
--	---------------------------

## D03D 13/004

**{with weave pattern being non-standard or providing special effects}**

### Definition statement

*This place covers:*

Fabrics characterised by their weave pattern.

Fabrics having a non-standard weave pattern (standard weave patterns are e.g. plain weave, twill, basket, sateen etc).

Fabrics having a standard weave pattern but new effects are created due to the pattern.

## D03D 13/006

**{With additional leno yarn}**

### Definition statement

*This place covers:*

Fabric patterns with a leno binding yarn additional to the weft and warp yarns, e.g. for fixing yarns in reinforcement fabrics.

## References

### Limiting references

*This place does not cover:*

Leno yarns in selvages	<a href="#">D03D 5/00</a>
Gauze or leno woven fabrics (i.e. fabrics consisting mainly of leno yarns in the warp)	<a href="#">D03D 19/00</a>

## D03D 13/008

{characterised by weave density or surface weight}

### Definition statement

*This place covers:*

Fabrics characterised by the yarn fineness, the weave density or surface weight.

## D03D 15/00

**Woven fabrics characterised by the material, structure or properties of the fibres, filaments, yarns, threads or other warp or weft elements used**

### Definition statement

*This place covers:*

Woven fabrics obtained by interlacing of warp and weft elements.

Documents classified here are directed to the weaving and have general relevance for weaving. If the application relates to properties of the yarns per se and a woven fabric is mentioned only by way of example, the corresponding place should be identified.

### Relationships with other classification places

Subclass [D03D](#) covers only woven fabrics, but not knitted fabrics ([D04B](#)) or non-woven fabrics ([D04H](#)).

## References

### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Natural or man-made threads or fibres	<a href="#">D01</a>
Yarns per se	<a href="#">D02G</a>
Knitted fabrics	<a href="#">D04B</a>
Non-woven fabrics in general	<a href="#">D04H</a>

### Special rules of classification

Documents should only be classified here if the invention is directed to the weaving and has general relevance for weaving. Documents should not be classified here if a woven fabric is mentioned only by way of example.

Classification within [D03D 15/00](#) also requires an appropriate Indexing symbol in [D10B](#).

## Synonyms and Keywords

In patent documents, the following words/expressions are often used as synonyms:

- "polymeric fibre" and "synthetic fibre"

In patent documents the following terms, "polymeric fibre" and "synthetic fibre" are often used as keywords that would be useful to a searcher.

In patent documents, the following terms "fiber", "fibre" and "filament" are often used as keywords that would be useful to a searcher.

In patent documents, the following terms "yarn" and "thread" are often used as keywords that would be useful to a searcher.

## D03D 15/208

### cellulose-based

#### Special rules of classification

Cellulose-based fibres or filaments, e.g. vegetable fibres are also classified with an appropriate Indexing symbol in [D10B 2201/00](#).

## D03D 15/217

### natural from plants, e.g. cotton

#### Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

Plant	Vegetable that usually grows in earth and may have a stem, leaves, roots or flowers, or may produce seeds.
-------	--

## D03D 15/233

### protein-based, e.g. wool or silk

#### Definition statement

*This place covers:*

Fabrics with warp and/or weft yarns or threads comprising protein-based fibres or filaments, e.g wool fibres.

#### Special rules of classification

Protein-based fibres or filaments, e.g. animal fibres are also classified with an appropriate Indexing symbol in [D10B 2211/00](#).

## D03D 15/235

### {Cashmere or silk}

#### Definition statement

*This place covers:*

Fabrics with warp and/or weft yarns or threads comprising cashmere or silk fibres.

**D03D 15/247****{Mineral}****Definition statement***This place covers:*

Fabrics with warp or weft yarns or threads comprising a mineral like rock or basalt.

**References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Yarns or threads made from mineral substances	<a href="#">D02G 3/16</a>
---	---------------------------

**D03D 15/258****Noble metal****Definition statement***This place covers:*

Fabrics with warp or weft yarns or threads comprising "noble metal", e.g. gold, silver, platinum or iridium.

**D03D 15/267****Glass****References****Informative references***Attention is drawn to the following places, which may be of interest for search:*

Yarns or threads made from glass or the like	<a href="#">D02G 3/18</a>
--	---------------------------

**D03D 15/283****synthetic polymer-based, e.g. polyamide or polyester fibres (cellulose-based artificial fibres [D03D 15/225](#))****References****Limiting references***This place does not cover:*

Cellulose-based artificial fibres	<a href="#">D03D 15/225</a>
-----------------------------------	-----------------------------

**Special rules of classification**

- Fibres or filaments made from polymers obtained by reactions only involving carbon-to-carbon unsaturated bonds are also classified with an appropriate Indexing symbol in [D10B 2321/00](#).

- Fibres or filaments made from polymers obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds, e.g. polycondensation products, are also classified with an appropriate Indexing symbol in [D10B 2331/00](#).

## D03D 15/292

### Conjugate, i.e. bi- or multicomponent, fibres or filaments

#### Definition statement

*This place covers:*

Fabrics with warp or weft yarns or threads comprising conjugate fibres or filaments, i.e. bi- or multicomponent fibres or filaments, e.g. core-sheath and island-in-sea.

Core-sheath

Island-in-sea

**The single fibre or filament is built up of two or more components.**

#### References

##### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Multicomponent yarns or threads, e.g. blended yarns or threads	<a href="#">D03D 15/47</a>
Formation of man-made conjugate filaments	<a href="#">D01D 5/30</a>
Conjugated, i.e. bi- or multicomponent, man-made filaments or the like; Manufacture thereof	<a href="#">D01F 8/00</a>

#### Glossary of terms

*In this place, the following terms or expressions are used with the meaning indicated:*

Conjugate	Indicates fibres or filaments having two or more different components within the individual fibre or filament, e.g. a polyethylene sheath component and a polyester core component.
-----------	---

## D03D 15/33

### Ultrafine fibres, e.g. microfibres or nanofibres

#### Definition statement

*This place covers:*

Fabrics with warp or weft yarns or threads with extremely fine staple fibres or filaments, typically less than 1 dtex.

**D03D 15/41****with specific twist****References*****Informative references****Attention is drawn to the following places, which may be of interest for search:*

Yarns with characteristics dependent on the amount or direction of twist	<a href="#">D02G 3/26</a>
--	---------------------------

**D03D 15/43****with differing diameters****Definition statement***This place covers:*

Fabrics comprising separate yarns or threads of different diameters or linear densities or with different diameters within individual yarns or threads.

**D03D 15/44****with specific cross-section or surface shape****Definition statement***This place covers:*

Fabrics with warp or weft yarns or threads defined by a particular cross-sectional shape, e.g. flat, oval or asymmetrical.

**D03D 15/46****Flat yarns, e.g. tapes or films****Definition statement***This place covers:*

Fabrics with warp and/or weft yarns or threads which are flat or tape-like or films.

**References*****Informative references****Attention is drawn to the following places, which may be of interest for search:*

Looms for weaving flat yarns	<a href="#">D03D 41/008</a>
------------------------------	-----------------------------

**D03D 15/47**

**multicomponent, e.g. blended yarns or threads (multicomponent fibres or filaments [D03D 15/292](#))**

**Definition statement**

*This place covers:*

Fabrics with warp or weft yarns or threads comprising yarns or threads of different materials, e.g. cotton and polyester.

**Yarns and/or threads which are made up of fibres and/or filaments.**

**References****Limiting references**

*This place does not cover:*

Multicomponent fibres or filaments	<a href="#">D03D 15/292</a>
------------------------------------	-----------------------------

**Glossary of terms**

*In this place, the following terms or expressions are used with the meaning indicated:*

Multicomponent	Yarns or threads having two or more different types of fibres or filaments that are combined together into a yarn or thread structure, indicates yarns or threads built up of two or more components which are joined, e.g. core spun yarn or plied yarn.
----------------	---

**D03D 15/49**

**textured (chenille [D03D 27/18](#)); curled; crimped**

**Definition statement**

*This place covers:*

Fabrics with warp or weft yarns or threads comprising textured or fancy yarns.

**References****Limiting references**

*This place does not cover:*

Chenille	<a href="#">D03D 27/18</a>
----------	----------------------------

---	---------------------------

## D03D 15/60

**characterised by the warp or weft elements other than yarns or threads**

### Definition statement

*This place covers:*

Woven fabric characterised by elements not covered by subgroups [D03D 15/20](#) - [D03D 15/593](#), or by using the element as an extra component, either in the machine direction or in the cross direction, e.g. as a reinforcement or an effect.

## D03D 15/63

**Straps, e.g. leather straps**

### Definition statement

*This place covers:*

Fabrics with warp or weft components formed from strips of materials, e.g. leather straps.

## References

### Informative references

Attention is drawn to the following places, which may be of interest for search:

Threads formed from strip material other than paper	<a href="#">D02G 3/06</a>
Artificial leather	<a href="#">D06N 3/00</a>

**D03D 15/65****Paper****Definition statement**

*This place covers:*

Fabrics with warp or weft yarns or threads of paper, often paper strips.

**References****Informative references**

*Attention is drawn to the following places, which may be of interest for search:*

Paper yarns or threads	<a href="#">D02G 3/08</a>
------------------------	---------------------------

**D03D 15/68****Scaffolding threads, i.e. threads removed after weaving****Definition statement**

*This place covers:*

Fabrics containing temporary warp or weft yarns or threads.

**D03D 15/69****{Threads with beads}****Definition statement**

*This place covers:*

Fabrics with warp and/or weft threads containing beads, pearls and the like.

**D03D 17/00****Woven fabrics having elastic or stretch properties due to manner of weaving (fabrics using stretchable or elastic threads [D03D 15/56](#))****Definition statement**

*This place covers:*

Woven fabrics having elastic or stretch properties due to the manner of weaving.

**References****Limiting references**

*This place does not cover:*

Fabrics using stretchable or elastic threads	<a href="#">D03D 15/56</a>
--	----------------------------

## D03D 19/00

### Gauze or leno-woven fabrics

#### Definition statement

*This place covers:*

Fabrics comprising mainly leno yarns outside the selvages. The leno yarns are normally provided to ensure that the warp yarns do not slide along the weft yarns in loosely woven fabrics.

#### References

##### Limiting references

*This place does not cover:*

Selvages with or without leno yarns	<a href="#">D03D 5/00</a>
Fabric with a leno binding yarn additional to the weft and warp yarns, e.g. for fixing yarns in reinforcement fabrics	<a href="#">D03D 13/006</a>
Leno shedding mechanisms	<a href="#">D03C 7/00</a>

##### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Filtering materials	<a href="#">B01D 39/08</a>
Wire nets	<a href="#">B21F 27/00</a>
Mesh fabrics as backings	<a href="#">B24D 11/02</a>

## D03D 21/00

### Lappet- or swivel-woven fabrics

#### Definition statement

*This place covers:*

Fabrics with yarns passing only over part of the width or length of the fabric.

#### Glossary of terms

*In this place, the following terms or expressions are used with the meaning indicated:*

Lappet	weaving is figured by the introduction of additional warp yarns which pass only over part of the length of the fabric
Swivel	weaving is figured by the introduction of additional weft yarns which pass only over part of the width of the fabric

**D03D 23/00**

**General weaving methods not special to the production of any particular woven fabric or the use of any particular loom; Weaves not provided for in any other single group**

**Definition statement**

*This place covers:*

Weaving methods of fabrics which are not specific for a certain loom.

**D03D 25/00**

**Woven fabrics not otherwise provided for**

**Definition statement**

*This place covers:*

Woven fabrics not otherwise provided for.

**D03D 25/005**

**{Three-dimensional woven fabrics}**

**Definition statement**

*This place covers:*

Integrally woven 3D-constructions. It also covers multi-ply fabrics in which the length or width direction is limited to a predetermined dimension in order to create a rectangular shape.

**References****Limiting references**

*This place does not cover:*

Multi-ply fabrics which extend, apart from having a certain thickness, in two directions	<a href="#">D03D 11/00</a>
--	----------------------------

**Informative references**

*Attention is drawn to the following places, which may be of interest for search:*

Fibrous reinforcements in composites	<a href="#">B29C 70/222</a> , <a href="#">B29C 70/224</a> , <a href="#">B29C 70/24</a>
--------------------------------------	--

**D03D 27/00**

**Woven pile fabrics**

**Definition statement**

*This place covers:*

Woven pile fabrics.

## References

### *Informative references*

*Attention is drawn to the following places, which may be of interest for search:*

Carpets in general	<a href="#">A47G 27/02</a>
--------------------	----------------------------

## D03D 27/08

### Terry fabrics

#### Definition statement

*This place covers:*

Terry fabrics, e.g. towels, beach robes.

## D03D 27/10

### Fabrics woven face-to-face, e.g. double velvet

#### Definition statement

*This place covers:*

Fabrics consisting of two layers which are connected by pile yarns, the two layers being simultaneously woven on the loom.

## References

### *Informative references*

*Attention is drawn to the following places, which may be of interest for search:*

Face to face fabrics which are not cut	<a href="#">D03D 7/00</a> , <a href="#">D03D 11/00</a>
--	--

## D03D 27/12

### wherein pile tufts are inserted during weaving

#### Definition statement

*This place covers:*

In particular fabrics woven on Axminster looms.

## D03D 27/18

### Chenille fabrics

## References

### *Informative references*

*Attention is drawn to the following places, which may be of interest for search:*

Chenille threads	<a href="#">D02G 3/42</a>
------------------	---------------------------

## Glossary of terms

*In this place, the following terms or expressions are used with the meaning indicated:*

Chenille yarn	is manufactured by placing short lengths of yarn, called the "pile", between two "core yarns" and then twisting the yarn together. The edges of these piles then stand at right angles from the yarn's core, giving chenille both its softness and its characteristic look. Chenille will look different in one direction compared to another, as the fibres catch the light differently.
---------------	---

## D03D 29/00

### Hand looms

#### Definition statement

*This place covers:*

Looms where the weft thread is inserted by hand.

## D03D 31/00

### Lappet, swivel or other looms for forming embroidery-like decoration on fabrics

## Glossary of terms

*In this place, the following terms or expressions are used with the meaning indicated:*

Lappet	weaving is figured by the introduction of additional warp yarns which pass only over part of the length of the fabric
Swivel	weaving is figured by the introduction of additional weft yarns which pass only over part of the width of the fabric

## D03D 33/00

### Multiple looms, i.e. two or more looms assembled together, whether or not they have mechanisms in common ([D03D 35/00](#) takes precedence)

#### Definition statement

*This place covers:*

Multiple looms, i.e. two or more looms assembled together, whether or not they have mechanisms in common.

## D03D 35/00

### Smallware looms, i.e. looms for weaving ribbons or other narrow fabrics ([D03D 47/00](#) takes precedence)

#### Definition statement

*This place covers:*

Smallware looms, i.e. looms for weaving ribbons or other narrow fabrics.

## References

### Informative references

Attention is drawn to the following places, which may be of interest for search:

Ribbons or narrow fabrics	<a href="#">D03D 3/005</a>
---------------------------	----------------------------

## D03D 37/00

**Circular looms (looms for weaving separate fabrics disposed in a circle or polygon [D03D 33/00](#))**

### Definition statement

*This place covers:*

Looms where the weft inserting means follows a circular path.

## D03D 39/00

### Pile-fabric looms

### Definition statement

*This place covers:*

Looms for weaving pile fabrics.

## D03D 39/02

**Axminster looms, i.e. wherein pile tufts are inserted during weaving**

## References

### Informative references

Attention is drawn to the following places, which may be of interest for search:

Woven pile fabrics wherein pile tufts are inserted during weaving	<a href="#">D03D 27/12</a>
---	----------------------------

## D03D 39/04

### Spool Axminster looms

### Definition statement

*This place covers:*

Axminster looms where the yarn comes from a tube, actuated mechanically, without gripper.

## References

### Informative references

Attention is drawn to the following places, which may be of interest for search:

Methods or apparatus with yarn packages as yarn supply	<a href="#">B65H 49/02</a> or <a href="#">B65H 49/18</a>
Creels	<a href="#">D02H 1/00</a>

**D03D 39/083****{Selecting mechanisms}****Definition statement***This place covers:*

The tuft yarn selection in Axminster looms.

**D03D 39/223****{Cloth control}****Definition statement***This place covers:*

Cloth shifting type terry looms.

**D03D 39/226****{Sley control}****Definition statement***This place covers:*

Sley movement adjusting type terry looms.

**D03D 41/00****Looms not otherwise provided for, e.g. for weaving chenille yarn; Details peculiar to these looms****Definition statement***This place covers:*

Looms not otherwise provided for, e.g. for weaving chenille yarns.

**D03D 41/005****{Linear-shed multiphase looms}****Definition statement***This place covers:*

Looms with a rotor having multiple weft insertion channels in each of which a weft is inserted into the shed simultaneously.

Documents relating to the Sulzer rotor loom.

**D03D 41/007****{Vertical looms}****Definition statement***This place covers:*

Looms with a vertical arrangement of the warp yarns at the weft insertion position.

**D03D 41/008****{Looms for weaving flat yarns}****Definition statement**

*This place covers:*

Looms especially adapted to weave fabrics with flat yarns in the warp or weft.

**References****Informative references**

*Attention is drawn to the following places, which may be of interest for search:*

Fabrics using flat yarns	<a href="#">D03D 15/46</a>
--------------------------	----------------------------

**D03D 43/00****Looms with change-boxes****Definition statement**

*This place covers:*

Shuttle looms which have shuttle boxes for storing multiple shuttles, in particular with different weft yarns, from which the shuttles are selected in accordance with a specific pattern.

**D03D 43/02****with drop boxes****Definition statement**

*This place covers:*

Change boxes with compartments in a non-rotary arrangement, in which the shuttles are dropped.

**D03D 43/06****with rotary boxes****Definition statement**

*This place covers:*

Change boxes with compartments in a rotary arrangement, in which the shuttles are dropped.

**D03D 45/00****Looms with automatic weft replenishment (automatic replenishment in smallware looms [D03D 35/00](#), in circular looms [D03D 37/00](#))****Definition statement**

*This place covers:*

Automatic replenishment of weft yarn stored in a shuttle.

## References

### Limiting references

*This place does not cover:*

Automatic replenishment in smallware looms	<a href="#">D03D 35/00</a>
Automatic replenishment in circular looms	<a href="#">D03D 37/00</a>

### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Bobbins rewound on loom	<a href="#">D03J 1/12</a>
-------------------------	---------------------------

## D03D 47/00

**Looms in which bulk supply of weft does not pass through shed, e.g. shuttleless looms, gripper shuttle looms, dummy shuttle looms (circular looms [D03D 37/00](#))**

### Definition statement

*This place covers:*

Looms in which the weft yarn is stored outside the shed (often at the side) and taken up by weft insertion means for introduction into the shed, e.g. rapier looms, needle looms and fluid jet looms.

## D03D 47/02

**wherein loops of continuous weft thread are inserted, i.e. double picks**

### Definition statement

*This place covers:*

Looms wherein loops of continuous weft thread are inserted, e.g. smallware looms where loops of weft yarn are normally inserted with a needle.

## D03D 47/12

**wherein single picks of weft thread are inserted, i.e. with shedding between each pick**

### Definition statement

*This place covers:*

Looms wherein single picks of weft thread are inserted, e.g. with a rapier.

## D03D 47/125

**{Weft holding devices (if the weft is reinserted in the next shed [D03D 47/48](#); in jet looms [D03D 47/308](#))}**

### Definition statement

*This place covers:*

Means for holding the weft at the side of the shed.

## References

### *Informative references*

Attention is drawn to the following places, which may be of interest for search:

Stretching or holding the weft in jet looms	<a href="#">D03D 47/308</a>
Forming selvages by inserting cut end of weft in next shed	<a href="#">D03D 47/48</a>

## D03D 47/20

### Constructional features of the thread-engaging device on the inserters

#### Definition statement

*This place covers:*

Details of rapier grippers.

## D03D 47/233

### {Carrying grippers}

#### Definition statement

*This place covers:*

Carrying, giver or bringing grippers for transporting the weft to the middle of the shed.

#### Special rules of classification

Documents describing additionally the drawing gripper in detail are additionally classified in [D03D 47/236](#).

## D03D 47/236

### {Drawing grippers}

#### Definition statement

*This place covers:*

Drawing, taker, pulling or receiving grippers for transporting the weft from the middle of the shed to the end of the shed.

#### Special rules of classification

Documents describing additionally the carrying gripper in detail are additionally classified in [D03D 47/233](#).

## D03D 47/24

by gripper or dummy shuttle (travelling-wave-shed looms [D03D 47/26](#); inserting mechanisms for shuttles [D03D 49/24](#))

#### Definition statement

*This place covers:*

Projectile looms, where the shuttle does not carry a bobbin.

## References

### Limiting references

*This place does not cover:*

Travelling-wave-shed looms	<a href="#">D03D 47/26</a>
Inserting mechanisms for shuttles	<a href="#">D03D 49/24</a>

### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Gripper or dummy shuttles	<a href="#">D03J 5/06</a>
---------------------------	---------------------------

## D03D 47/26

### Travelling-wave-shed looms

#### Definition statement

*This place covers:*

Looms having multiple phase shifted sheds and a rotary reed.

## D03D 47/27

### Drive or guide mechanisms for weft inserting

#### Definition statement

*This place covers:*

Drive or guide means for weft thread insertion.

## References

### Limiting references

*This place does not cover:*

Guide mechanisms for pneumatic looms (normally means for creating an air channel for weft insertion)	<a href="#">D03D 47/278</a>
Carrying the weft thread with a fluid through the shed	<a href="#">D03D 47/28</a>

### Informative references

*Attention is drawn to the following places, which may be of interest for search:*

Drive means for shuttle looms	<a href="#">D03D 49/24</a>
-------------------------------	----------------------------

## Glossary of terms

*In this place, the following terms or expressions are used with the meaning indicated:*

In this group, the following terms are relevant for correct classification:

Rapier	means for carrying the weft thread through the shed with a rod (sometimes also called lance or needle) or a flexible band
--------	---

Drive mechanism	the part outside the shed driving the means for carrying the weft thread through the shed
Guide mechanism	parts inside and outside the shed to guide the means for carrying the weft threads through the shed

## D03D 47/271

### {Rapiers}

#### Definition statement

*This place covers:*

Rapiers, i.e. means to insert the weft thread with a flexible band or rod.

## D03D 47/272

### {Rapier bands}

#### Definition statement

*This place covers:*

Details of the rapier band.

## D03D 47/273

### {Rapier rods}

#### Definition statement

*This place covers:*

Details of the rapier rod.

#### References

##### Limiting references

*This place does not cover:*

Needles for smallware looms	<a href="#">D03D 47/02</a>
-----------------------------	----------------------------

#### Synonyms and Keywords

*In the documents, the following words "rod", "lance" and "needle" are often used as synonyms.*

However, weft insertion needles as used in smallware looms are not considered to be rapier rods.

## D03D 47/275

### {Drive mechanisms}

#### Definition statement

*This place covers:*

The part outside the shed driving the means for carrying the weft thread through the shed.

**D03D 47/277****{Guide mechanisms (for shuttles [D03D 49/24](#))}****Definition statement***This place covers:*

Guides for all insertion means except shuttle. For example: grippers, bands, lances or dummy shuttles.

**D03D 47/278****{for pneumatic looms}****Definition statement***This place covers:*

Means for creating an air channel for weft insertion.

**D03D 47/3046****{Weft yarn selection}****Definition statement***This place covers:*

The weft yarn selection on air jet looms.

**D03D 47/306****{Construction or details of parts, e.g. valves, ducts}****References****Informative references**

Attention is drawn to the following places, which may be of interest for search:

Lift valves with valve members of conical shape (i.e. throttle valves)	<a href="#">F16K 1/38</a>
Operating means, releasing means using a motor in general	<a href="#">F16K 31/04</a>

**D03D 47/34****Handling the weft between bulk storage and weft-inserting means****Definition statement***This place covers:*

All aspects concerning the handling of the weft yarns from the weft yarn supply means (i.e. normally bobbins) up to (but not including) the weft insertion.

## References

### Informative references

Attention is drawn to the following places, which may be of interest for search:

Methods and apparatuses for unwinding or paying-out filamentary material from packages in general	<a href="#">B65H 49/02</a> , <a href="#">B65H 49/18</a>
Forwarding filamentary material	<a href="#">B65H 51/00</a>

Guides for filamentary material adapted to prevent excessive ballooning	<a href="#">B65H 57/22</a>

## D03D 47/342

{knot detection}

### Definition statement

*This place covers:*

Systems for detecting wefts with faults such as knots.

### Special rules of classification

If the knot detection is part of a weft stop motion additionally the class [D03D 51/34](#) is given.

## D03D 47/345

{Rotating bobbins}

### Definition statement

*This place covers:*

Bulk storage bobbins which are rotatable supported and/or driven for lateral unwinding without inducing twist to the yarn.

## D03D 47/347

{Yarn brakes ([D03D 47/364](#) takes precedence)}

### Definition statement

*This place covers:*

Braking devices for weft yarns to be inserted.

## References

### Informative references

Attention is drawn to the following places, which may be of interest for search:

Warp yarn tension regulation	<a href="#">D03D 49/04</a>
Adjusting or controlling tension in filamentary material in general	<a href="#">B65H 59/00</a>

**D03D 47/36****Measuring and cutting the weft****Definition statement**

*This place covers:*

Devices and methods of measuring and cutting the weft.

Devices for measuring and temporary storing the weft.

**Relationships with other classification places**

Cutting weft threads is classified in [D03D 49/70](#).

**References****Informative references**

*Attention is drawn to the following places, which may be of interest for search:*

Cutting weft threads	<a href="#">D03D 49/70</a>

**Definition statement**

*This place covers:*

Methods and their implementations to detect broken warp yarns and to stop the weaving machine upon this detection.

**D03D 51/28**

**electrical**

**Definition statement**

*This place covers:*

E.g. optical warp stop motions.

## D03D 51/34

### Weft stop motions

#### Definition statement

*This place covers:*

Methods and their implementations to detect broken weft yarns and to stop the weaving machine upon this detection.

#### References
