

H05K

PRINTED CIRCUITS; CASINGS OR CONSTRUCTIONAL DETAILS OF ELECTRIC APPARATUS; MANUFACTURE OF ASSEMBLAGES OF ELECTRICAL COMPONENTS

Definition statement

This place covers:

Constructional features of

- Details of electronic circuit boards such as their materials or their interconnections
- Printed circuit boards
- Casings, cabinets or drawers for electric apparatus
- Constructional details common to different types of electric apparatus such as modifications to facilitate cooling, ventilating or heating, e.g. cooling arrangement for casings / cabinets
- Constructional details of screening for electric apparatus or components against electric or magnetic fields, e.g. EMI shielding arrangements for casings / cabinets
- Manufacture of assemblages of electrical components
- Machines for mounting electronic components on circuit boards

References

Informative references

| | |
|---|---|
| Details of instruments or comparable details of other apparatus not otherwise provided for | G12B |
| Thin-film or thick-film circuits | H01L 27/01 , H01L 27/13 |
| Non-printed means for electric connections to or between printed circuits, electric connections or line connectors, apparatus or processes for manufacturing, assembling, maintaining or repairing such connections or connectors | H01R |

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|------------------|--|
| Printed circuits | The term covers all kinds of mechanical arrangements of circuits that consist of an insulating base or substrate, having at least one conductive layer permanently formed on the base. The base often extends in a two-dimensional plane. Other conductive layers may be formed in a layer structure within the base. The base may support components on its surface or between its layers. Each conductive layer is formed as separate patterns or tracks to connect the components as required. The term is also applied adjectivally to processes or apparatus for manufacturing such circuits, e.g. by mechanical or chemical treatment of conductive foil, paste, or film that has been applied to an insulating base, support, or substrate. |
|------------------|--|

H05K 1/00

Printed circuits

Definition statement

This place covers:

- Details of printed circuit boards [PCBs], e.g. structural aspects or use of materials for PCBs
- Printed elements for electrical connection to or between printed circuits
- Printed electric components in PCBs, e.g. resistors, capacitors or inductors formed by printing materials onto the board, or within its layer structure
- Structural association of two or more PCBs
- Structural association of PCBs and non-printed electric components, e.g. within internal layers

Relationships with other classification places

There is no clear boundary between the field of printed circuit boards and other more specific fields, e.g. inductors ([H01F](#)), antennas ([H01Q](#)), waveguides ([H01P](#)), chip cards ([G06K 19/07](#)), thin film and thick film circuits ([H01L 27/00](#)), other packaging levels (semiconductor packages [H01L 21/48](#), [H01L 23/00](#), [H01L 25/00](#)), connectors ([H01R](#)) and various electronic components. The materials and methods (deposition, patterning, connection, etc.) used for manufacture of printed circuit boards have their general fields.

Documents often contain information relevant to several technical fields and have to be circulated for classification in these fields, in particular to [H01L](#) (semiconductors) but also the other parts of [H05K](#), [H01R](#) (connectors).

Special rules of classification

In this main group, both "invention information" and "additional information" are classified by the appropriate CPC group symbol.

Indexing Codes are also attributed to provide additional information when no CPC sub-group exists, i.e. to subdivide subject matter belonging to a sub-group.

H05K 1/0203

{Cooling of mounted components ([H05K 1/0272](#) takes precedence)}

References

Limiting references

| Incorporating printed electric components, e.g. printed resistor, capacitor, inductor | H05K 1/16 |
|---|---------------------------|

H05K 1/0236

{Electromagnetic band-gap structures}

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|--|
| Conductive planes with an opening or a split | H05K 1/0225 , H05K 1/0227 |
|--|--|

H05K 1/025

{Impedance arrangements, e.g. impedance matching, reduction of parasitic impedance ([H05K 1/024](#) and [H05K 1/0243](#) take precedence; for semiconductor devices [H01L 23/66](#))}

References

Limiting references

This place does not cover:

| | |
|--|-----------------------------|
| Dielectric details, e.g. changing the dielectric material around a transmission line | H05K 1/024 |
| Printed circuits associated with mounted high frequency components | H05K 1/0243 |
| Impedance arrangements of semiconductor or other solid state devices | H01L 23/64 |
| High frequency adaptations of semiconductor or other solid state devices | H01L 23/66 |

Special rules of classification

Indexing Codes are used to additionally specify how impedance is adjusted, e.g. for change in trace width of differential pair [H05K 1/0245](#).

H05K 1/0253

{Impedance adaptations of transmission lines by special lay-out of power planes, e.g. providing openings ([H05K 1/0251](#) takes precedence)}

References

Limiting references

This place does not cover:

| | |
|---|-----------------------------|
| Impedance arrangements related to vias or transitions between vias and transmission lines | H05K 1/0251 |
|---|-----------------------------|

Special rules of classification

The lay-out of the power plane is additionally classified with Indexing Codes, e.g. when slotted [H05K 1/0236](#). Except for [H05K 1/0224](#) because that is the default layout in [H05K 1/0253](#).

H05K 1/0254

{High voltage adaptations; Electrical insulation details; Overvoltage or electrostatic discharge protection (electrostatic discharge protection for electric apparatus in general [H05K 9/0067](#), [H05K 9/0079](#)); Arrangements for regulating voltages or for using plural voltages}

H05K 3/00

Apparatus or processes for manufacturing printed circuits

Definition statement

This place covers:

General processing of printed circuit boards [PCBs]:

- Processing of insulating substrates or layers for PCBs or processing of conductive layers for PCBs.
- Forming printed elements for providing electric connection to or between printed circuits.
- Manufacturing multilayer printed circuits.
- Manufacturing metal core printed circuits.
- Secondary treatment of PCBs.
- Mounting or printing electric components on PCBs.
- Assembling PCBs with other PCBs.

[H05K 3/00](#) covers mainly manufacturing (apparatuses and process) of printed circuits. However certain sub-groups of [H05K 3/00](#) cover also the respective structural aspects (e.g. [H05K 3/303](#), [H05K 3/306](#)) and materials (e.g. [H05K 3/386](#)).

Relationships with other classification places

There is no clear boundary between the field of printed circuit boards and other more specific fields, e.g. inductors ([H01F](#)), antennas ([H01Q](#)), waveguides ([H01P](#)), chip cards ([G06K 19/07](#)), thin film and thick film circuits ([H01L 27/00](#)), other packaging levels (semiconductor packages [H01L 21/48](#), [H01L 23/00](#), [H01L 25/00](#)), connectors ([H01R](#)) and various electronic components. The materials and methods e.g. deposition, patterning or connection, used for manufacture of printed circuit boards have their general fields.

Documents often contain information relevant to several technical fields and have to be circulated for classification in these fields, in particular to [H01L](#) (semiconductors) but also the other parts of [H05K](#), or [H01R](#) (connectors).

Casings, cabinets or drawers for electric apparatus

Definition statement

This place covers:

Constructional features of electronic housings that are not characterised by their inner electronic arrangement, such as:

- means for assembling the housing parts
- means for associating or coupling several housings
- venting means
- sealing means
- interlocking means
- mounting and fixing means
- handling means

H05K 7/00

Constructional details common to different types of electric apparatus (casings, cabinets, drawers [H05K 5/00](#))

Definition statement

This place covers:

- Constructional features of electronic housings common to different types of electric apparatus;
- Constructional features of standardized electronic cabinets and racks for receiving Printed Circuit Boards (PCB) such as guides, retainers, drawers, plug-in modules;
- Constructional features of Servers, Data Center Rooms, 19-inch computer racks such as mounting means of blades within cabinets, cable management, power distribution, mobile data centers arranged in shipping containers;
- Constructional features of industrial controllers such as PLCs;
- Cooling features of electronic housings,
- Cooling features of standardized electronic cabinets and racks for receiving Printed Circuit Boards (PCB);
- Cooling features of Servers, Data Center Rooms, 19-inch computer racks;
- Cooling features of power electronics, such as inverters;
- Cooling features of vehicle control units;
- Cooling features of display panels;
- Cooling features of outdoor telecommunication equipments, such as base stations.

Screening of apparatus or components against electric or magnetic fields
(devices for absorbing radiation from an antenna [H01Q 17/00](#))

Definition statement

This place covers:

- Screening of electronic equipment against magnetic or electromagnetic fields, or electrostatic discharges;
- Shielding features applied to rooms or buildings for protecting against external electromagnetic interference;
- Shielded electronic casings achieving electromagnetic compatibility;
- Shielding features of electronic equipment having standardized dimensions, such as 19-inch racks;
- Shielding materials therefor.

| Electric redundant control systems | G05B 9/03 |
| Error detection or correction of data by redundancy in digital computer hardware | G06F 11/16 |
| Security signalling or alarm systems | G08B 29/16 |
| Redundant emergency protective circuit arrangements | H02H 3/05 |
| Arrangements for parallel feeding of a single network | H02J 3/38 |
| Circuit arrangements with stand-by power supply | H02J 9/04 |
| Modifications for increasing the reliability of logic circuits or inverting circuits | H03K 19/003 |
| Fail-safe logic circuits or inverting circuits | H03K 19/007 |
| Redundant clock signal generation in generators of electronic oscillations or pulses | H03L 7/07 |
| Transmission systems using redundant channels or apparatus | H04B 1/74 |
| Redundant apparatus for increasing reliability of arrangements used for the transmission of digital information | H04L 1/22 |

H05K 11/00

Combinations of a radio or television receiver with apparatus having a different main function {(combined with clocks [G04B 47/00](#); controlled by a clock [G04C 21/28](#))}

References

Limiting references

This place does not cover:

| | |
|--|----------------------------|
| Combinations of a radio or television receiver with clocks | G04B 47/00 |
| Radio or television receiver controlled by a clock | G04C 21/28 |

H05K 13/00

Apparatus or processes specially adapted for manufacturing or adjusting assemblages of electric components

Definition statement

This place covers:

Apparatus and methods for placing components, e.g. onto the printed circuit boards. This group only relates to bare printed circuit boards and not circuit boards already fitted in an apparatus (thus no displays or hard disks, etc.).

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|----------------------------|
| Manufacture of printed circuit boards | H05K 1/00 |
| Assembling printed circuits with electric components | H05K 3/30 |
| Apparatus and methods for soldering | B23K |
| Manipulators | B25J |
| Packaging, Packing or unpacking | B65B |
| Manufacture or treatments of solid state devices | H01L 21/00 |

Synonyms and Keywords

In patent documents, the following abbreviations are often used:

| | |
|-----|-----------------------|
| PCB | Printed Circuit Board |
|-----|-----------------------|

H05K 13/0007

{using handtools (for mounting on a circuit board [H05K 13/0447](#))}

Definition statement

This place covers:

Hand-tools specially adapted for adjusting assemblages of electric components

References

Limiting references

This place does not cover:

| | |
|--|------------------------------|
| Hand-tools for mounting electric components on a circuit board | H05K 13/0447 |
|--|------------------------------|

H05K 13/0015

{Orientation; Alignment; Positioning}

Definition statement

This place covers:

orientation, alignment and positioning only of the printed circuit boards

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|----------------------------|
| Orientation, alignment and positioning of the printed circuit boards for testing | G01R 31/00 |
|--|----------------------------|

H05K 13/003

{Placing of components on belts holding the terminals}

Definition statement

This place covers:

preparing the components before delivering to mounting machines by grouping the components for batch mounting

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|---|----------------------------|
| Attaching a series of articles, e.g. small electrical components, to a continuous web | B65B 15/04 |
|---|----------------------------|

Special rules of classification

Only concerns filling of belts as a separate operation

H05K 13/0038

{placing the components in a predetermined order}

Definition statement

This place covers:

Filling of belts according to the mounting order of different types of components.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|---|----------------------------|
| Attaching a series of articles, e.g. small electrical components, to a continuous web | B65B 15/04 |
|---|----------------------------|

Special rules of classification

Must concern different type of components

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|------|--|
| Belt | continuous web holding the components in order to be delivered in rolls to the mounting machines |
|------|--|

H05K 13/0053

{Arrangements for assisting the manual mounting of components, e.g. special tables or light spots indicating the place for mounting}

Definition statement

This place covers:

Manual mounting posts for components on PCB

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|------------------------------|
| Hand-tools for mounting electric components on a circuit board | H05K 13/0447 |
|--|------------------------------|

H05K 13/0061

{Tools for holding the circuit boards during processing; handling transport of printed circuit boards}

Definition statement

This place covers:

Provision for displacing printed circuit boards [PCB] between machines or for displacing PCBs inside mounting machines

Gripping PCBs for transport or conveyance

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|----------------------------|
| Transport of articles, e.g. conveyors | B65G |
| Apparatus specially adapted for handling semiconductor or electric solid state devices during manufacture or treatment thereof | H01L 21/67 |

Special rules of classification

Documents must include movement of printed circuit board

H05K 13/0069

{Holders for printed circuit boards}

Definition statement

This place covers:

Fixation of printed circuit boards inside mounting machines

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|----------------------------|
| Fixation of printed circuit boards in testing machines | G01R 31/00 |
|--|----------------------------|

Special rules of classification

Printed circuit board must be static relative to holder.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|-------|------------------------------|
| Chuck | Holder, usually using vacuum |
|-------|------------------------------|

H05K 13/0076

{Straightening or aligning terminal leads of pins mounted on boards, during transport of the boards}

Definition statement

This place covers:

Transport of boards temporary fitted with components before definitive fixation, e.g. soldering.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|------------------------------|
| Straightening or aligning terminal leads of pins mounted on boards, during the mounting operation, after fitting components on the board | H05K 13/0473 |
|--|------------------------------|

Special rules of classification

Components are not definitively fixed.

H05K 13/0084

{Containers and magazines for components, e.g. tube-like magazines}

Definition statement

This place covers:

Any type of container for delivering components to mounting machines and manufacture thereof

Details of component tubes, trays or belts.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|---|----------------------------|
| Filling of containers | H05K 13/02 |
| Use of said containers in mounting machines | H05K 13/04 |
| Containers for storage or transport | B65D |

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|-------|---------------------|
| Stick | tube-like container |
|-------|---------------------|

H05K 13/0092

{Treatment of the terminal leads as a separate operation (during transport [H05K 13/0076](#), [H05K 13/023](#); during mounting [H05K 13/04](#))}

Definition statement

This place covers:

Preparing leads of components before bringing to mounting machines

Special separate machines for lead treatment.

References

Limiting references

This place does not cover:

| | |
|--|---|
| Treatment of the terminal leads as a separate operation during transport | H05K 13/0076 , H05K 13/023 |
| Treatment of leads after fitting in printed circuit boards | H05K 13/04 |

Special rules of classification

Must be a separate machine.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|-----------|------------------|
| Clinching | bending of leads |
|-----------|------------------|

H05K 13/02

Feeding of components

Definition statement

This place covers:

Feeding of components to containers before fitting said container to machines, e.g. filling or refilling of containers

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|---|----------------------------|
| Emptying of containers by the mounting machine itself | H05K 13/04 |
| Feeding of components in general | B65G |

H05K 13/021

{Loading or unloading of containers ([H05K 13/028](#) takes precedence)}

Definition statement

This place covers:

Loading or unloading containers with components, the containers not being in use by the mounting machine.

References

Limiting references

This place does not cover:

| | |
|---|-----------------------------|
| Simultaneously loading a plurality of loose objects, e.g. by means of vibrations, pressure differences, magnetic fields | H05K 13/028 |
|---|-----------------------------|

Special rules of classification

Do not classify here documents concerning pick and place in the mounting machine

H05K 13/022

{with orientation of the elements}

Definition statement

This place covers:

Giving orientation to components before feeding into containers

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|------------------------|----------------------------|
| Orientation in general | B23P 19/00 |
|------------------------|----------------------------|

H05K 13/023

{with bending or straightening of the terminal leads}

Definition statement

This place covers:

Feeding of components with bending or straightening of the terminal leads, e.g. in order to fit into containers

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|------------------------------|
| Treatment of the terminal leads as a separate operation (not during transport) | H05K 13/0092 |
| Bending and cutting after the mounting on a pc board | H05K 13/0473 |

Special rules of classification

Not during or after mounting of component.

H05K 13/024

{Straightening or aligning terminal leads}

Definition statement

This place covers:

Straightening or aligning leads during the feeding

H05K 13/025

{of components having oppositely extending terminal leads}

Definition statement

This place covers:

Straightening or aligning leads of e.g. resistors

H05K 13/026

{of components having terminal leads in side by side relationship, e.g. using combing elements}

Definition statement

This place covers:

Straightening or aligning lead of chips.

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|--------------|--------------------------------------|
| Dual in line | chip with two rows of parallel leads |
|--------------|--------------------------------------|

H05K 13/027**{Fluid transport of components}****Definition statement***This place covers:*

Transport of components using fluids, e.g. jets of air, water.

H05K 13/028**{Simultaneously loading a plurality of loose objects, e.g. by means of vibrations, pressure differences, magnetic fields}****Definition statement***This place covers:*

Feeding bulk components simultaneously to containers

References**Informative references***Attention is drawn to the following places, which may be of interest for search:*

| | |
|-----------------------------|-----------------------------|
| Orientation of the elements | H05K 13/022 |
|-----------------------------|-----------------------------|

H05K 13/029**{Feeding axial lead components, e.g. using vibrating bowls, magnetic fields ([H05K 13/022](#) takes precedence)}****Definition statement***This place covers:*

Feeding bulk axial components to containers.

References**Limiting references***This place does not cover:*

| | |
|-----------------------------|-----------------------------|
| Orientation of the elements | H05K 13/022 |
|-----------------------------|-----------------------------|

H05K 13/04**Mounting of components {, e.g. of leadless components}****Definition statement***This place covers:*

Mounting of components such as:

- mounting machines for components on printed circuit boards;
- attaching containers to mounting machines for components delivery.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|---------------------------|
| Assembling printed circuits with electric components | H05K 3/30 |
| Manipulators | B25J |

H05K 13/0404

{Pick-and-place heads or apparatus, e.g. with jaws}

Definition statement

This place covers:

Pick-and-place-heads for picking components out of a container and placing them on a printed circuit board using gripping devices.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--------------|----------------------|
| Manipulators | B25J |
|--------------|----------------------|

Special rules of classification

Orientation while holding component is not classified here

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|------|---|
| Jaws | gripping device having means moving towards each other for pinching component |
|------|---|

H05K 13/0408

{Incorporating a pick-up tool}

Definition statement

This place covers:

Pick-and-place-heads for picking components out of a container and placing them on a printed circuit board by suction, e.g. using vacuum.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--------------|----------------------|
| Manipulators | B25J |
|--------------|----------------------|

Special rules of classification

Orientation while holding component is not classified here

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|--------|------------------------------|
| Nozzle | vacuum or air suction device |
|--------|------------------------------|

H05K 13/0413

{with orientation of the component while holding it; Drive mechanisms for gripping tools, e.g. lifting, lowering or turning of gripping tools}

Definition statement

This place covers:

Orientation of component held by mounting head just before or during mounting.

Mechanical and vacuum holders for components with orientation provisions.

Vision devices for orientation or correct placing of components.

Includes camera looking at the PC boards before mounting

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|---------------|--------|
| Vision system | camera |
|---------------|--------|

H05K 13/0417

{Feeding with belts or tapes}

Definition statement

This place covers:

Delivery of components to a mounting machine via belts or tapes; tape feeders; attachment of tape feeders to the mounting machine; details related to the picking up of components by mounting head from tapes/belts.

Special rules of classification

Interconnection/splicing of belts/tapes to be classified in [H05K 13/021](#).

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|---------------------|---|
| Blister, belt, tape | Belt or tape wound on a reel/roll and carrying electronic devices |
|---------------------|---|

Synonyms and Keywords

| | |
|---------|-------------------------|
| Blister | component belt in rolls |
|---------|-------------------------|

H05K 13/0421**{with treatment of the terminal leads}****Definition statement***This place covers:*

Treatment of leads during or after picking up.

References**Informative references***Attention is drawn to the following places, which may be of interest for search:*

| | |
|--|------------------------------|
| Feeding one by one by other means than belts | H05K 13/043 |
| Bending and cutting after fitting on a circuit board | H05K 13/0473 |

H05K 13/0426**{for components being oppositely extending terminal leads ([H05K 13/0421](#) takes precedence)}****Definition statement***This place covers:*

For resistor type components.

References**Limiting references***This place does not cover:*

| | |
|---|------------------------------|
| Treatment of the terminal leads (bending and cutting after fitting on a circuit board | H05K 13/0421 |
|---|------------------------------|

H05K 13/043**{Feeding one by one by other means than belts}****Definition statement***This place covers:*

Delivery of single components by other type of containers.

H05K 13/0434**{with containers}****Definition statement***This place covers:*

Delivery with containers, e.g. trays.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|------------------|------------------------------|
| Components belts | H05K 13/0417 |
|------------------|------------------------------|

H05K 13/0439

{incorporating means for treating the terminal leads only before insertion}

Definition statement

This place covers:

Treatment of leads before insertion.

H05K 13/0443

{incorporating means for treating the terminal leads before and after insertion or only after insertion}

Definition statement

This place covers:

Treatment of leads before and/or only after insertion.

H05K 13/0452

{Mounting machines or lines comprising a plurality of tools for guiding different components to the same mounting place ([H05K 13/0406](#), [H05K 13/041](#) take precedence)}

Definition statement

This place covers:

Mounting machine for several types of components.

Mounting of different type of components to the same mounting place.

Multi nozzle machines

Machines with several holders for pc boards

References

Limiting references

This place does not cover:

| | |
|--|------------------------------|
| Drive mechanisms for pick-and-place heads | H05K 13/0406 |
| Pick-and-place heads having multiple pick-up tools | H05K 13/041 |

Special rules of classification

Multiple work tables and multiple heads, e.g. revolver heads, are classified here

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|---------------|---|
| Revolver head | turning multiple head with multiple nozzles or grippers |
|---------------|---|

H05K 13/0456

{simultaneously punching the circuit board}

Definition statement

This place covers:

Mounting machines including hole puncher

References**Informative references**

Attention is drawn to the following places, which may be of interest for search:

| | |
|-----------------------------------|---------------------------|
| Hole shaping and details of holes | H05K 3/00 |
|-----------------------------------|---------------------------|

H05K 13/046

{Surface mounting (surface mounted components [H05K 3/341](#))}

Definition statement

This place covers:

Methods and apparatus for surface mounting electric components in general

References**Limiting references**

This place does not cover:

| | |
|----------------------------|----------------------------|
| Surface mounted components | H05K 3/341 |
|----------------------------|----------------------------|

Glossary of terms

In this place, the following terms or expressions are used with the meaning indicated:

| | |
|-----|------------------------|
| SMD | Surface mounted device |
|-----|------------------------|

H05K 13/0465

{by soldering ([H05K 13/0469](#) takes precedence)}

Definition statement

This place covers:

Soldering machines of surface mounted components

References

Limiting references

This place does not cover:

| | |
|---|------------------------------|
| Surface mounting by applying a glue or viscous material | H05K 13/0469 |
|---|------------------------------|

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|----------------------------|
| Surface mounting on PCBs by soldering | H05K 3/341 |
| Reflow soldering apparatus and process; Soldering process per se | B23K |

H05K 13/0469

{by applying a glue or viscous material}

Definition statement

This place covers:

Use of glue or viscous material with dispenser nozzles.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|---|---------------------------|
| Details of glue fixation between component and PC board | H05K 3/00 |
|---|---------------------------|

H05K 13/0473

{Cutting and clinching the terminal ends of the leads after they are fitted on a circuit board}

Definition statement

This place covers:

Treatment of leads after insertion out of mounting process

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|--|------------------------------|
| Cutting and clinching the terminal ends of the leads after they are fitted on a circuit board during transport | H05K 13/0076 |
|--|------------------------------|

H05K 13/0478**{Simultaneously mounting of different components}****Definition statement***This place covers:*

simultaneous mounting of different components placed on PC board at the same moment.

H05K 13/0482**{using templates; using magazines, the configuration of which corresponds to the sites on the boards where the components have to be attached}****Definition statement***This place covers:*

Simultaneous mounting of different components being arranged beforehand in preset positions.

Templates, trays and special multi heads.

H05K 13/0486**{Replacement and removal of components}****Definition statement***This place covers:*

Method and apparatus for taking off or replacing misplaced components

Special rules of classification

No recycling.

May include a de-soldering device

H05K 13/0491**{Hand tools therefor}****Definition statement***This place covers:*

Hand tools for repairing printed circuit boards or exchanging components.

Special rules of classification

No recycling.

H05K 13/0495**{having a plurality of work-stations}****Definition statement***This place covers:*

Arrangements of mounting machines in clusters or lines

H05K 13/06

Wiring by machine

Definition statement

This place covers:

Placing of wires on or in printed circuit boards by machines; machines therefor.

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|-------------------------------------|----------------------|
| Multiplex wire bundles for vehicles | B60R |
|-------------------------------------|----------------------|

H05K 13/065

{Accessories therefor, e.g. light spots}

Definition statement

This place covers:

Accessories for wiring, e.g. special tables or light spots.

H05K 13/08

Monitoring manufacture of assemblages

Definition statement

This place covers:

- Control or planning of manufacturing processes of assemblages, e.g. of processes for mounting components on printed circuit boards
- Control of apparatus therefor
- Planning of production facilities and apparatus layout
- Visual inspection after placing of components

References

Informative references

Attention is drawn to the following places, which may be of interest for search:

| | |
|---|----------------------------|
| Electrical testing of finished printed circuit boards | G01R 31/00 |
|---|----------------------------|
