#### B81 MICROSTRUCTURAL TECHNOLOGY

(NOTES omitted)

#### B81B MICROSTRUCTURAL DEVICES OR SYSTEMS, e.g. MICROMECHANICAL DEVICES (piezoelectric, electrostrictive or magnetostrictive elements per se [H10N 30/00](#))

##### NOTES

- This subclass does not cover:
  - purely electrical or electronic devices per se which are covered by section [H](#), e.g. subclass [H01L](#) or class [H10](#);
  - purely optical devices per se which are covered by subclasses [G02B](#) or [G02F](#);
  - essentially two-dimensional structures, e.g. layered products which are covered by subclass [B32B](#);
  - chemical or biological structures per se which are covered by section [C](#);
  - structures in atomic scale produced by manipulation of single atoms or molecules, which are covered by group [B82B 1/00](#).
- Devices or systems classified in this subclass are also classified in appropriate subclasses providing for their structural or functional features, if such features are of interest.
- Attention is drawn to the following places:
 

<a href="#">A61K 9/50</a>	Microcapsules for medicinal preparations
<a href="#">B25J 7/00</a>	Micromanipulators
<a href="#">G02B 21/32</a>	Micromanipulators combined with microscopes
<a href="#">G11B 5/127</a>	Magnetic heads
<a href="#">H01P 3/08</a>	Waveguide microstrips.
- In this subclass, local "residual" subgroups, e.g. [B81B 7/0077](#), are used with the following purpose:  
 When classifying a document which does not fit in any of a set of subgroups with the same dot-level, the document should be classified in the residual group, if present, and not in the group at the hierarchical level one dot above.  
 In the example, the document shall be classified in [B81B 7/0077](#) and not in [B81B 7/0032](#) as [B81B 7/0077](#) is "residual" to [B81B 7/0035-B81B 7/0074](#)
