Subject: Comments on the new rules re: fitf

At the request of Mark Reyland of the U I A. I submit my concerns re; "first Inventor To File" .

I have had the pleasure of submitting ideas to Mr. David J. Kappos regarding inventors and his office was the only one to reply, with encouragement. I have a lot of respect for the USPTO having obtained 5 patents in the last 3 years with swiftness and am very impressed.

The one thing that bothers me is the title "inventor". There is no procedure to obtain an "inventors" license and other than submitting paperwork or in my case actual approved patents to be able to call myself an "inventor".

In fact all of the words of F I T F concern me. "First"... that word alone will have me in the courts arguing "First".

As to "To File" with whom? the USPTO or is there another place "to file".

Particular definitions must clear up any confusion regarding F I T F.

FYI the subject I shared with the office of David J. Kappos was creating jobs for U S Citizens. I have communicated with all of the representatives of my district and received no response. I recently sent my proposal to Congressman Paul Ryan hoping to get some action from him.

I will be happy to share it with your group if you are interested.

Very Truly Yours,

Robert Logan, Inventor
