General Comment

I am writing to say that I strongly oppose the U.S. Patent and Trademark Offices proposed regulations changing the nature of PTAB trials., Docket No. PTO-C-2020-0055.

I care about the public's ability to fight low-quality patents. Wrongly granted patents are a major burden on the economy and drain on innovation. Every week, theyre used to threaten small businesses with extortionate licensing demandsespecially people who make and use technology like me. I work for a medium-sized software company that employs hundreds of people. Bad software patents could easily cause us to have to shut down or waste money we don't have fighting a costly legal battle.

If these proposed regulations are adopted, people and companies wont be able to challenge patents through the IPR process when they need to. The PTAB will be able to deny IPRs simply because of the timing of district court cases. This will allow patent holders to game the system and file strategic litigation to avoid IPRs. The PTAB should not give any consideration to the status of court proceedings when deciding whether to initiate an IPR.

The proposed regulations limit the number of petitions that can be filed against the same patent.

That makes no sense. There will often be multiple challenge to the same patent, especially if its being asserted aggressively. Different challenges raise different evidence and sometimes address different claims. Congresss intent in the America Invents Act was to reduce the amount of unnecessary patent litigation by allowing the PTAB to weed out invalid patents before a trial takes place. There should be no arbitrary limits on the number of petitions per patent.

The rights of technology developers and users are no less important than the rights of patent owners. When patents are evaluated in federal court, nearly half of them are found to be invalid.

Overall, PTAB trials must be fair, affordable, and accessible. When petitions are likely to succeed on the merits, they should be granted. What happens in the courts, or to other petitions, shouldnt matter.

These proposed regulations will destroy the U.S. system for post-grant patent challenges. To promote innovation, the Patent Office needs to improve the quality of granted patents, and to do that, we need the robust IPR system Congress designed.

Please stop this proposed rule PTO-C-2020-0055.
