Subject: Proposing next USPTO satellite office location: Edison, NJ

Dear USPTO,

It is so exciting to hear that you will open at least two more satellite offices in addition to the one in Detroit in the next three years. I propose that Edison, NJ to be one of the satellite office locations.

The reasons are but not limited to:

- First of all, Edison (NJ) was the hometown of Thomas Edison. What could be more appropriate than having a USPTO office in a city that bears the name of the greatest inventor of all times!
- Second, Edison (NJ) is convenient to many major municipalities including New York City, Philadelphia, and Washington, D.C, all of which have many corporations an/or law firms that employ large number of patent filers and innovators. Metro Park, one of the 3 train stations in or near Edison, is a main stop for both Amtrak and NJ Transit. Edison is only about 20 miles away from New Jersey's Newark International Airport.
- Third, Edison has relatively low cost of living, and has been voted as one of the "Best Places To Live" in the past few years. I firmly believe whoever you hire to work in the USPTO Edison satellite office, he/she will be happy to stay for a long time. This will certainly enhance the patent examiner retention and improve recruitment of patent examiners.

That being said, I for one, who is a registered Patent Agent and has been living in Edison, NJ for the past 15 years, will be very excited to see a USPTO satellite office in Edison, NJ in the near future. Perhaps this will finally help me fulfill my dream of becoming a USPTO Patent Examiner!

Please, select Edison, NJ to be the location for your next USPTO satellite office!
Thank you for your consideration. Happy Holidays!

Regards,

Dr. Hong Sajonz
