Subject: PTO Satellite Office in Dallas, Texas

Dear Sirs:

Dallas Texas is an optimal location for one of the satellite offices for the USPTO. Dallas is centrally located in the United States with accessibility by both air and road to the rest of the country. The community has a large technical workforce including engineers in a variety of technologies. The low cost of living and warm weather provide further reasons to attract potential examiners making this city an ideal location.

Respectfully submitted,

Ira S. Matsil
