Re: Request for Comments on Additional USPTO
Satellite Offices for the Nationwide Workforce Program

Dear Mr. Khan,

Texas is a logical choice for a PTO Satellite office for at least the following reasons:

- For more than five years, Texas inventors have ranked second behind Californians in the number of patents granted. In 2010, 7,545 patents were awarded to Texans – from our businesses and corporations to our university professors, start-ups and garage tinkerers.
(http://www.uspto.gov/web/offices/ac/ido/oeip/taf/cst_utl.htm)
- Texas is centrally located geographically. It would complement other PTO locations in Detroit, Washington D.C. and California.
- The cost of living in Texas is attractive for PTO personnel when compared with many other parts of the United States.
- Texas has a wealth of qualified technologists that would make good patent examiners across a wide spectrum of industries that include petroleum and chemical engineering, biotechnology, semiconductors, computer hardware and software. In 2010, the state's top 10 patent grantees were IBM; Texas Instruments Incorporated; Freescale Semiconductor; Hewlett-Packard; Dell; Baker Hughes; Schlumberger Technology; Halliburton; ExxonMobil; and the University of Texas.

Very truly yours,

David L. McCombs
