# U.S. Department of Commerce Privacy Impact Assessment USPTO FPNG

**Unique Project Identifier: PTOC-004-00** 

**Introduction: System Description** 

Provide a description of the system that addresses the following elements: The response must be written in plain language and be as comprehensive as necessary to describe the system.

(a) a general description of the information in the system

The Fee Processing Next Generation (FPNG) program provides USPTO customers a modern payment system.

FPNG provides services to the public and internal facing functionality that will enable USPTO employees to support customers. FPNG has interfaces to various USPTO systems and also with US Treasury which include Pay.Gov and OTCNet services.

FPNG allows internal and external users to manage payment accounts, perform profile updates, and make payments for USPTO goods and services, etc. via the FPNG User Interface (UI) web presentation layer. It also provides all functionality related to managing payments, replenishing, and transferring of deposit account balances.

#### (b) a description of a typical transaction conducted on the system

FPNG allows internal and external users to manage payment accounts, perform profile updates, and make payments for USPTO goods and services. It also provides services for managing payments, replenishing, and transferring of deposit account balances.

(c) any information sharing conducted by the system

Information about customers' credit card transactions are sent to (the U.S. Treasury's) Pay.gov system for authorization (real-time) and settlement (same day) and customers' banking information is sent to the Pay.gov system (daily batch- not real-time) for pre-notifications (new account verification-zero dollar transaction) and for EFT processing. Employee information is not shared with any other system or agency.

(d) a citation of the legal authority to collect PII and/or BII

The USPTO collects customer financial information for fee processing under 35 U.S.C. 2 and 41 and 15 U.S.C. 1113, as implemented in 37 CFR 1.16–1.28, 2.6–2.7, and 2.206–2.209.

(e) the Federal Information Processing Standard (FIPS) 199 security impact category for the system

Moderate

## **Section 1:** Status of the Information System

1.1 Indicate whether the information system is a new or existing system.						
☐ This is a new information system.

(Check all that apply.)			
(Encentum apprisi)			
Purpose		F1	
To determine eligibility		For administering human resources programs	
For administrative matters		To promote information sharing initiatives	
For litigation		For criminal law enforcement activities	
For civil enforcement activities		For intelligence activities	
To improve Federal services online	$\boxtimes$	For employee or customer satisfaction	
For web measurement and customization		For web measurement and customization	
technologies (single-session )		technologies (multi-session )	
Other (specify): For financial transactions			
For imancial transactions			

#### **Section 5:** Use of the Information

5.1 In the context of functional areas (business processes, missions, operations, etc.) supported by the IT system, describe how the PII/BII that is collected, maintained, or disseminated will be used. Indicate if the PII/BII identified in Section 2.1 of this document is in reference to a federal employee/contractor, member of the public, foreign national, visitor or other (specify).

The USPTO collects customer financial information for fee processing. Under 35 U.S.C, Section 41 and 15
U.S.C. Section 11 13, as implemented in 37 CFR, the USPTO charges fees for processing and services related to
patents, trademarks, and information products. In the case of payments, we collect information about the
payment method in order to troubleshoot or complete a chargeback should there be a problem with the payment.
All employee information is collected in order to identify the FPNG fee processor and organization in which
they work. The FPNG system is set up with role-based privileges, so an employee only has access to those
specific functions permitted within their organization or by their required duties.

#### **Section 6:** Information Sharing and Access

6.1 Indicate with whom the bureau intends to share the PII/BII in the IT system and how the PII/BII will be shared. (*Check all that apply.*)

Recipient	How Information will be Shared				
Recipient	Case-by-Case	Bulk Transfer	Direct Access		
Within the bureau	$\boxtimes$	$\boxtimes$			
DOC bureaus					
Federal agencies	$\boxtimes$	$\boxtimes$			
State, local, tribal gov't agencies					
Public					
Private sector					
Foreign governments					
Foreign entities

☐ All users signed a confidentiality agreement or non-disclosure agreement.
☐ All users are subject to a Code of Conduct that includes the requirement for confidentiality.

	All users are subject to a Code of Conduct that includes the requirement for confidentiality.
$\boxtimes$	Staff (employees and contractors) received training on privacy and confidentiality policies and practices.
$\boxtimes$	Access to the PII/BII is restricted to authorized personnel only.
$\boxtimes$	Access to the PII/BII is being monitored, tracked, or recorded. Explanation:
$\boxtimes$	The information is secured in accordance with FISMA requirements.  Provide date of most recent Assessment and Authorization (A&A):2/20/2018  This is a new system. The A&A date will be provided when the A&A package is approved.
$\boxtimes$	The Federal Information Processing Standard (FIPS) 199 security impact category for this system is a moderate or higher.
$\boxtimes$	NIST Special Publication (SP) 800-122 and NIST SP 800-53 Revision 4 Appendix J recommended security controls for protecting PII/BII are in place and functioning as intended; or have an approved Plan of Action and Milestones (POAM).

$\boxtimes$	Contractors that have access to the system are subject to information security provisions in their contracts required by DOC policy.
	Contracts with customers establish ownership rights over data including PII/BII.
$\boxtimes$	Acceptance of liability for exposure of PII/BII is clearly defined in agreements with customers.
	Other (specify):

8.2 Provide a general description of the technologies used to protect PII/BII on the IT system.

FPNG is secured by the USPTO's infrastructure systems and other OCIO established technical controls to include password authentication at the server and database levels. HTTPS is used for all data transmissions to and from the Internet, USPTO DMZ, and PTOnet. A dedicated socket is used to perform encryption and decryption.

In supporting fee collection via Internet Web storefronts, FPNG uses a secure architecture. When a fee payment is required, users of a "legacy storefront" are redirected to a Secure Hypertext Transfer Protocol (HTTPS) URL from their specific storefront Web pages. After requesting a purchase transaction, the client's web browser is redirected to the load balanced edge servers located in the USPTO Sensitive DMZ.

#### **Section 9: Privacy Act**

9.1 Indicate whether a system of records is being created under the Privacy Act, 5 U.S.C. § 552a. (A new system of records notice (SORN) is required if the system is not covered by an existing SORN).

As per the Privacy Act of 1974, "the term 'system of records' means a group of any records under the control of any agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual."

$\boxtimes$	Yes, this system is covered by an existing system of records notice (SORN).  Provide the SORN name and number ( <i>list all that apply</i> ):  COMMERCE/PAT-TM-10 Deposit Accounts and Electronic Funds Transfer  Profiles.
	Yes, a SORN has been submitted to the Department for approval on (date).
	No, a SORN is not being created.

#### **Section 10: Retention of Information**

10.1 Indicate whether these records are covered by an approved records control schedule and monitored for compliance. (*Check all that apply.*)

$\boxtimes$	There is an approved record control schedule.  Provide the name of the record control schedule:  GRS 1.1:010: Financial transaction records related to procuring goods and services, paying bills, collecting debts, and accounting.
	No, there is not an approved record control schedule.  Provide the stage in which the project is in developing and submitting a records control schedule:
$\boxtimes$	Yes, retention is monitored for compliance to the schedule.
	No, retention is not monitored for compliance to the schedule. Provide explanation:

10.2 Indicate the disposal method of the PII/BII. (Check all that apply.)

Disposal			
Shredding	$\boxtimes$	Overwriting	
Degaussing	$\boxtimes$	Deleting	$\boxtimes$
Other (specify):			

### **Section 11: NIST Special Publication 800-122 PII Confidentiality Impact Levels**

11.1 Indicate the potential impact that could result to the subject individuals and/or the organization if PII were inappropriately accessed, used, or disclosed.

	Low – the loss of confidentiality, integrity, or availability could be expected to have a limited adverse
	effect on organizational operations, organizational assets, or individuals.
	Moderate – the loss of confidentiality, integrity, or availability could be expected to have a serious
	adverse effect on organizational operations, organizational assets, or individuals.
	High – the loss of confidentiality, integrity, or availability could be expected to have a severe or
$\boxtimes$	catastrophic adverse effect on organizational operations, organizational assets, or individuals.

11.2 Indicate which factors were used to determine the above PII confidentiality impact levels. (*Check all that apply.*)

	Identifiability	Provide explanation: Name, home/business address, email address, telephone number, financial information for fee processing
$\boxtimes$	Quantity of PII	Provide explanation: Collectively, the number of records collected generate an enormous amount of PII and a breach in such large numbers of individual PII must be considered in the

		determination of the impact level.
$\boxtimes$	Data Field Sensitivity	Provide explanation: Combination of name and financial information may be more sensitive.
$\boxtimes$	Context of Use	Provide explanation: PII is collected in order to communicate with external customers in case there are any problems with fee sale or to identify the fee processor and organization.
$\boxtimes$	Obligation to Protect Confidentiality	Provide explanation: Based on the data collected USPTO must protect the PII of each individual in accordance to the Privacy Act of 1974.
$\boxtimes$	Access to and Location of PII	Provide explanation: Due to obtaining PII, necessary measures must be taken to ensure the confidentiality of information during processing, storing and transmission.
	Other:	Provide explanation:

## **Section 12:** Analysis

12.1	Indicate whether	the conduct of this PLA	A results in any re	required business	process changes.
------	------------------	-------------------------	---------------------	-------------------	------------------

	Yes, the conduct of this PIA results in required business process changes.  Explanation:
$\boxtimes$	No, the conduct of this PIA does not result in any required business process changes.

12.2 Indicate whether the conduct of this PIA results in any required technology changes.

	Yes, the conduct of this PIA results in required technology changes.  Explanation:
$\boxtimes$	No, the conduct of this PIA does not result in any required technology changes.
