*A PATENT TECHNOLOGY MONITORING TEAM REPORT*

Design Patents Report  
1/1989 - 12/2013  
Explanation of Data

This Patent Technology Monitoring Team (PTMT) Report profiles patent activity for U.S. design patents (hereafter referred to as patents) granted between **1989** and **December 2013**. The source of the data used for this report is the TAF database maintained by the U.S. Patent and Trademark Office.

Data Distribution By Date of Grant and By Date of Application

**Parts A1 and A2**

Part A1 distributes design patent GRANT data by year of patent grant ("Patents Granted By Date of Patent Grant"). Part A2 distributes grant data by the year in which the patented application was filed ("Patents Granted By Date of Patent Application"). Parts A1 and A2 each provide patent counts (pages A1-1 and A2-1) and percent distributions (pages A1-2 and A2-2).

Patent data in the "**Pre YYYY**" column correspond to the time period **prior to YYYY**.

**Part B**

Part B of this report distributes patent GRANT data for organizations that have received U.S. patents since **1989**. Data are presented by the year in which the patent was granted ("Patents By Year of Grant") and the year the patented application was filed ("Patents by Year of Application").

DATA FOR THOSE APPLICATIONS WHICH WERE FILED BUT NEVER ISSUED (ROUGHLY 20% OF TOTAL DESIGN PATENT FILINGS) ARE NOT INCLUDED IN THIS REPORT.

Since the average time period between filing for a design patent and the issuing of that patent (i.e., the patent's issue "pendency") is now about 15 months, the patented application data for the most recent years of this report are incomplete.\* This is because a significant number of the applications filed during the most recent years were still pending at the end of the report period. While many of these applications eventually will be patented, they will not be patented until sometime following the report period.

Patented application data are of significant value since the date an application was filed more accurately reflects when the design was developed. Additionally, fluctuations in data based on application date are much more likely to reflect changes in design activity, since such fluctuations would for the most part be immune from changes in PTO processing such as occurred in years such as 1986 and 2005 when the PTO issued fewer patents than would normally have been expected because of administrative reasons. Note that a patent's "pendency" can be quite variable from one patent to another thereby affecting the date of patent grant. Such variation in pendency is determined by many factors, including PTO workload (which can vary between design subject areas), budget

and manpower levels, patent printing schedules, etc.

Patent data in the "**Pre YYYY**" column correspond to the period **prior to YYYY**.

Parts of the Report

**Parts A1 and A2** present tables which show, by number and percent, the patent activity. Part A1 presents data by year of patent grant ("Patents Granted by Date of Patent Grant"). Part A2 redistributes grant data by year of patent application ("Patents Granted by Date of Patent Application"). The location of **patent origin is determined by the residence of the first-named inventor at the time of grant**.

**Patent ownership** reflects ownership at the time of patent grant and does not include subsequent changes in ownership. If more than one assignee was declared at the time of grant, the patent is attributed to the first-named assignee. The U.S. and Foreign Corporation ownership categories count predominantly corporate patents; however, patents assigned to other organizations such as small businesses, nonprofit organizations, universities, etc. are also included in these categories. While U.S. Government patent ownership includes only patents granted to the Federal Government, no similar distinction is made for Foreign Government ownership category patents.

Note that for a patent, the country of origin may differ from the country of ownership. Therefore, **the sum of U.S. origin patents does not equal the sum of U.S. ownership category patents**.

**Part B** is a ranked listing of national and international organizations (i.e., corporations, universities, government agencies) which have received **50** or more U.S. design patents since **1989**. Data line 1 for each listed organization distributes counts of patent grants by year of grant. Data line 2 for each organization redistributes those same patent grants by year in which the patented application was filed. Information for patent ownership reflects ownership at the time of patent grant. Although a substantial effort has been made to combine name variations into a single organizational name, many organizations continue to have patents listed under more than one organizational name.

-----  
\* For example, in this report profiling design patents granted through December 2013, patent grant data, as distributed by year of application, are approximately 94% complete for design patent applications filed in 2011, 62% complete for applications filed in 2012, and 7% complete for applications filed in 2013; data are essentially complete for applications filed prior to 2011.

## Part A1
