# U.S. DEPARTMENT OF COMMERCE PATENT AND TRADEMARK OFFICE

## CLASSIFICATION ORDER 1882

#### **JANUARY 6, 2009**

## PROJECT E-6066

#### The following classification changes will be effected by this order:

	<u>Class</u>	<u>Subclass</u>	<u>Art Unit</u>	Ex'r Search <u>Room</u>
Abolished:	361	679 – 687	2835	OS0001
Established:	361	679.01-679.09, 679.1, 679.11-679.19, 679.2, 679.21-679.29, 679.3, 679.31-679.39, 679.4, 679.41-679.49, 679.5, 679.51-679.59, 679.6, 679.61	2835	OS0001

## This order includes the following:

174, 257, 330, 331, 340, 349, 358, 399, 438, 463, 708, 709, 710, 711

## A. CLASSIFICATION MANUAL CHANGES

- B. LISTING OF PRINCIPAL SOURCE OF ESTABLISHED AND DISPOSITION OF ABOLISHED SUBCLASSES
- C. CHANGES TO THE USPC-TO-IPC CONCORDANCE
- D. DEFINITION CHANGES AND NEW OR ADDITIONAL DEFINITIONS

## CLASSIFICATION ORDER 1882

## **JANUARY 6, 2009**

## PROJECT C-6066

#### JANUARY 2009

1	SAFETY AND PROTECTION OF SYSTEMS AND	50	With more than two wires
	DEVICES	51	.Overspeed responsive
2	Arc suppression at switching point (i.e., includes solid-state switch)	52	.By regulating source or load (e.g., generator field killed)
3	Synchronized or sequential opening or	53	Prime mover control
	closing	54	.Load shunting by fault responsive means
4	Counter electromotive force		(e.g., crowbar circuit)
5	With current sensitive control	55	Disconnect after shunting
~	circuit	56	Voltage responsive
6	With voltage sensitive control circuit	57	Current responsive
7	With combined voltage and current	58	.Impedance insertion
	sensitive control circuit	59	Circuit automatically reconnected only after the fault is cleared
8 9	Shunt bypass With sequentially inserted impedance	60 .	With differential voltage comparison across the circuit interrupting
10	By inserting series impedance		means
11	Nonlinear impedance	61	Reclosing of the nonfaulty phases of a
12	By arc stretching (e.g., horn gap)		polyphase system
13	Shunt bypass of main switch	62	.Feeder protection in distribution
14	Arc blowout for main breaker contact		networks
	(e.g., electromagnet, gas, fluid,	63	With current responsive fault sensor
16	etc.)	64	With communication between feeder
15 16	Capacitor protection	65	disconnect points
10	Series connected capacitors Shunt connected capacitors	65	With current and voltage responsive fault sensors
18	.Voltage regulator protective circuits	66	With communication between feeder
19	.Superconductor protective circuits		disconnect points
20	.Generator protective circuits	67	.Series connected sections with faulty
21	Voltage responsive		section disconnect
22	.Compressor protective circuits	68	With communication between disconnect
23	Motor protective condition responsive		points
	circuits	69	Pilot wire communication
24	Current and temperature	70	Constant current system
25	Motor temperature	71	Automatic reclosing
26	With bimetallic sensor	72	With lockout means
27	With thermistor sensor	73 74	Including timer reset before lockoutContinuous
28	With time delay	74 75	With time delay before reclosing
29	During energization of motor	76	With phase sequence network analyzer
30	Current and voltage	77	.Reverse phase responsive
31	Current	78	.With specific quantity comparison means
32	Bimetallic element	79	Voltage and current
33	Voltage	80	Distance relaying
34	Bimetallic element	81	With communication means between
35	.Transformer protection	•-	disconnect points
36	With differential sensing means	82	Reverse energy responsive (e.g.,
37	With temperature or pressure sensing means		directional)
38	Transformer with structurally combined	83	With time delay protective means
	protective device	84	Reverse energy responsive (e.g.,
39	With lightning arrester and fuse	95	directional)
40	With lightning arrester (e.g., spark	85 86	Phase Voltage
	gap)	87	Current
41	With fuse		
42	Ground fault protection	88	With specific voltage responsive fault sensor
43	Fault suppression (e.g., Petersen	89	
	coil)	90	Overvoltage and undervoltage
44	With differential sensing in a	91.1	Overvoltage
45	polyphase system With differential sensing in a single	91.2	With resistor sensor
4.D	phase system	91.3	Including time delay
46	With more than two wires		~ 4
47	In a polyphase system		
48	With more than three wires		
49

.

	SAFETY AND PROTECTION OF SYSTEMS AND	122	Electrolytic
	DEVICES	123	Gas blast
	.With specific voltage responsive fault sensor	124	Thermal (e.g., fusible, bimetallic)
	Overvoltage	125	With cutout (e.g., blowout type)
91.4	Including photo-coupling (e.g.,	126	Current limiting material in discharge path
	photo-receptors, photo-emitters,	127	Nonlinear material (e.g., valve type)
91.5	etc.)	128	With plural gaps in discharge path
91.5	Including P-N junction (e.g., a diode, a zener diode, or	129	. Plural gaps with common electrode
	transistor)	130	Plural gaps serially connected
91.6	With zener diode sensor	131	Combined (e.g., with disconnect
91.7	Protection by snubber circuitry	4.5.0	switch)
91.8	Protection for thyristor	132	With line supporting insulator
92	Undervoltage	133	With magnetic means (e.g.,
93.1	.With specific current responsive fault	134	electromagnet)
	sensor	134	Arc stretching (e.g., blowout)
93.2	Digital control	135	By separating contacts
93.3	Rating plug	· 137	For grounding line Horn gap
93.4	Automatic reset after trip	138	With resistance insertion
93.5	Transformer and resistor sensors	138	CONTROL CIRCUITS FOR ELECTROMAGNETIC
93.6	Transformer sensor (i.e., toroidal	139	DEVICES
	current sensor)	140	.Including compensation for thermal
93.7	Resistor sensor	110	change of electromagnetic device
93.8	Thermal sensing	141	.Including superconductivity
93.9	Current limiting	142	.Including housing
94	With time delay protective means	143	.Systems for magnetizing, demagnetizing,
95	With instantaneous override		or controlling the magnetic field
96	With multiple timing characteristics	144	For lifting or holding
	(e.g., short, long)	145	Magnetic chuck-type
97	With multiple timing characteristics	146	Systems for magnetic field
98	Transistorized		stabilization or compensation
99	Combined thermal-electromagnetic	147	With permanent magnet
100	relay	148	Calibration or permanent magnet
100	With semiconductor circuit interrupter (e.g., SCR, Triac, Tunnel Diode,	149	Demagnetizing
	etc.)	150	Television degaussing
101	With transistor circuit interrupter	151	Magnetic tape
102	With mechanical circuit breaker	152	Including particular drive circuit
103	.Circuit interruption by thermal sensing	153	Pulse initiated
104	With fuse	154	Including means to establish plural
105	With bimetallic element		distinct current levels (e.g., high, low)
106	With thermistor	155	With capacitor charging or
107	.With specific transmission line (e.g., quarded)		discharging through coil
108		156	With capacitor charging or discharging through coil
109	.Too large fault makes breaker	157	.Including instrument (e.g.,
TOD	inoperative	100	meter-relay)
110	.Transient nonresponsive (e.g., ignores	158	
	surge on transmission line)	159	.Including means for using, or compensating for, the induced EMF of
111	.Transient responsive		the electromagnetic device
112	.With space discharge means	160	.For relays or solenoids
113	.With tuned circuit	161	Including thermal device
114	.With manual or automatic opening of breaker and manual reclose	162	Thermoelectric
115	With specific circuit breaker or	163	Bimetallic element
	control structure	164	Including heater
116	Pneumatically operated circuit breaker	165	Thermistor
117	.High voltage dissipation (e.g., lightning arrester)	166	Plural relays or solenoids sequentially operated
118		167	Alternately operated
119	In communication systems		
120	Vacuum or gas filled space discharge		
121	Fluid (e.g., mercury, quenching)

			officiality house
	CONTROL CIRCUITS FOR ELECTROMAGNETIC DEVICES	215	.Of storage or hazardous area or fluid handling
	.For relays or solenoids	216	.Structurally combined with building or vehicle
	Plural relays or solenoids sequentially operated	217	
168.1	Pulse responsive	218	Aircraft
169.1	Including electronic element	219	Chain-type grounding means
170	Condition responsive (e.g., external	220	.Specific conduction means or dissipator
170	circuit condition)	221	Brush- or roller-type structure
171	Code responsive	222	Rod-type structure
172	Including electronic element	223	
173	Light	224	Integral with shoe
174	Light sensor controls its light path	225	ELECTRIC CHARGING OF OBJECTS OR
175	Including electronic element	225	MATERIALS
176	Plural light sensors	226	.Particulate matter (e.g., liquids with
177	Plural light sensors		suspended particles)
178	Fluid (e.g., liquid level, humidity)	227	For spray production
179	Proximity or contact	228	Liquid type
180	Metal presence or absence responsive	229	.By charged gas irradiation
181	Capacitance change-type	230	ELECTRIC CHARGE GENERATING OR CONDUCTING
182	Frequency (e.g., audio, radio)		MEANS (E.G., CHARGING OF GASES)
183	Plural relays or solenoids as loads	231	.Modification of environmental electric
184			charge
185	Phase	232	.For application to living beings
185	Pulse	233	.Use of forces of electric charge or
180	Voltage or current level		field
107	discriminators	234	Pinning
188	Variable impedance	235	.With specific power supply
189		236	ELECTRICAL SPEED SIGNAL PROCESSING
190	Including electronic switch		SYSTEMS
191	Plural relay or solenoid load	237	.With centrifugal weight means
171	selectively operated	238	Antislip detection and circuitry
192	Including interlock	239	.With speed analog electrical signal
193	Electronic interlock	240	.Including frequency generators
194	Holding means	241	.Two position (e.g., on-off)
195		242	.With speed comparison
196	Including semiconductor device	243	.Synchronization of shafts
190	connected to timing element	244	Phase comparison
197	Threshold device (e.g., zener,	245	POLARITY REVERSING
	schockley diode)	246	.Automatic
198	Including three or more electrodes	247	IGNITING SYSTEMS
	(e.g., unijunction)	248	.For explosive devices
199	Including electric discharge device	249	With sequential firing by electronic
200	Threshold device (neon tube)		switching
201 '	Including thyratron	250	With sequential firing by mechanical
202	Electromechanical delay means	0.54	switching
203	With oscillator	251	With capacitor discharging into
204	With magnetic amplifier or saturable	252	explosive device With electromechanical power source
	reactor	252	
205	Threshold device (e.g., SCR,		.For electric spark ignition
	thyratron)	254	. With electromagnet control means Including spark electrode make-break
206	Particular relay or solenoid	255	• •
207	Electrostatic	256	With capacitor discharging into sparking transformer
208	Polarized	257	
209	Alternating current type	257	gap
210	Plural coils	258	With electromechanical generator
211	CONTROL CIRCUITS FOR NONELECTROMAGNETIC	259	With permanent magnet
	TYPE RELAY (E.G., THERMAL RELAYS)	260	With piezoelectric element
212	DISCHARGING OR PREVENTING ACCUMULATION	261	With mechanical arrangement for spark
	OF ELECTRIC CHARGE (E.G., STATIC ELECTRICITY)	241	electrode make-break
213	.By charged gas irradiation		
213	. Of paper or paper handling machine		
414	or baber or baber nanaring maching		
· .

	IGNITING SYSTEMS	298.4	Details of electrical connecting
	.For electric spark ignition		means (e.g., terminal or lead)
262	With one spark electrode which is hand	298.5	With adjustment means
	held	300	With controlling or indicating means
263	With spark coil or transformer	301.1	.Fixed capacitor
264	.For incandescent ignition	301.2	Special type (e.g., "bypass" type)
265	With electromagnet control means	301.3	Encapsulated
266	With helical heating element	301.4	Stack
267	DEMAGNETIZING SYSTEMS AND PROCESSES	301.5	Wound
268	TRANSFORMERS AND INDUCTORS WITH INTEGRAL	302	Feed through
	SWITCH, CAPACITOR, OR LOCK (E.G.,	303	Significant electrode feature
	IGNITION COIL)	304	Non-self-supporting electrodes
269	.With lock for preventing unauthorized	305	Material
	use	306.1	Details of electrical connection means
270	.With capacitor element		(e.g., terminal or lead)
271	ELECTROSTATIC CAPACITORS	306.2	For decoupling type capacitor
272	.With protection or compensating means	306.3	For multilayer capacitor
273	Self-healing	307	Lead extends into body of capacitor
274.1	Temperature	308.1	Lead attached to edge of capacitor
274.2	With fluid cooling means	308.2	Cap
274.3	With heat sink	308.3	Wire
275.1	For electrical irregularities	309	Metallized terminal
275.2	With over-pressure breakaway fuse	310	Lead extends around at least a
275.3	With resistance element	510	portion of capacitor
275.4	With thermal fuse	311	Solid dielectric
276	.Cryogenic	312	Plural dielectrics
277	.Variable	313	Lavered
278	With significant electrode or terminal	314	Impregnated
210	feature	315	
279	Gas or vacuum dielectric	315 316	With specific impregnant
280	Responsive to external condition		Including wax
281	Electrical	317	Including halogen (e.g., chlorinated)
282	Thermal	318	With stabilizer or modifying
283.1	Pressure	510	substance
283.2	By displacement of stylus or lever	319	With stabilizer or modifying
283.3	By differential capacitor	519	substance
283.4	By diaphragm	320	Ceramic and glass
284	Liquid level	321.1	Ceramic, glass, or oxide particles
285	Fluid flow	321.2	With multilayer ceramic capacitor
286	Humidity	321.3	Including metallization coating
287	Mechanically variable	321.4	Composition
288	Push button	321.5	Composition
288	Motor driven	321.5	With tubular capacitor
289	By varying distance between	322	Oxide film
290	electrodes	323	Plastic
291	Compression type	323 324	Fibrous or fabric (e.g., paper, etc.)
292	By varying effective area of	325	Mica
424	electrode		
293	Disk trimmer	326	Vacuum or gas dielectric
294	Direct travel piston type	327	Liquid dielectric
295	Piston trimmer	328	Multiple capacitors
295	Sliding plates	329	Distinct physically
	Spiral or helical plates	330	Shared electrode
297 298.1		600	HOUSING OR MOUNTING ASSEMBLIES WITH
	Rotary plates	601	DIVERSE ELECTRICAL COMPONENTS
299.1	Plural capacitors	601	.For electrical power distribution
299.2	Details of electrical connecting means (e.g., terminal or lead)	602	systems and devices
200.2		602	Distribution station (i.e., substation)
299.3	Details of mounting means	603	Having transformer
299.4	With adjustment means	603 604	Gas insulated
299.5	Details of insulator feature	604 605	Gas insulated Electrical switchgear
298.2	Details of plate feature	605 606	
298.3	Details of dielectric	000	Truck type

.

#### JANUARY 2009

	HOUSING OR MOUNTING ASSEMBLIES WITH	662	Bypass arrangement
	DIVERSE ELECTRICAL COMPONENTS	663	With transformer or circuit breaker
	.For electrical power distribution	664	Meter mounting arrangements
	systems and devices	665	Adaptable meter supports
	Electrical switchgear Truck type	666	Retractable or detachable meter support
607	With interlock	667	Removable cover
608	Drawer type	668	Meter terminal and connector
609	With interlock	000	arrangements
610	Pivoted support means	669	Terminal block
611 ·	Busbar arrangements	670	Contact blade receiving structure
612	Gas insulated	671	Adjustable or adaptable contacts
613	Liquid insulated	672	Tamper resistant
614	With plural removable control units in housing	673	Circuit breaker supporting means (i.e., attaching, mounting, etc.)
615	With interlock	674	For ballast elements
616	Door or cover type	675	Bus duct
617	Shutter type	676	With cooling means
618	Gas insulated	677	Fluid
619	Having gas circuit breaker	678	Air
620	Having transformer	* 679.01	.For electronic systems and devices
621	Having isolating switch	* 679.02	Computer related housing or mounting
622	Distribution or control unit		assemblies
623	Having transformer	* 679.03	Wearable computer structure
624	Having busbar arrangement	* 679.04	Plural independently movable displays
625	Portable	* 679.05	Telescoping display
626	Having fuse or relay	* 679.06	Display rotatable about plural axes
627	Distribution or control panel board	* 679.07	About perpendicular axes
628	With switches and fuses	* 679.08	For computer keyboard
629	Unit block	* 679.09	Portable computer type
630	With fuses	* 679.1	Integrated pointing device; e.g.,
631	With switches		trackball, joystick
632	With switch actuating arrangements	* 679.11	Adjustable keyboard
633	Plugboards	* 679.12	Tiltable
634	With circuit breaker arrangements	* 679.13	Collapsible key type
635	With discriminating means	* 679.14	Split keyboard
636	Plug-in or removable	* 679.15	Foldable keyboard
637	Busbar or conductor arrangements	* 679.16	Plural foldable sections
638	U-shaped member	* 679.17	Detachable keyboard
639 640	With horizontal busbar With removable or plug-in connection	* 679.18	Integrated pointing device; e.g., trackball, joystick, etc.
641	Electrical service distribution box	* 679.19	Hand, wrist or palm rest
642	With fuse	* 679.2	Adjustable
643	With switch	* 679.21	For computer display
644	Including panel board	* 679.22	Desktop type
645	Adjustable panel	* 679.23	With support for multimedia device;
646	With fuse support means		e.g., speaker, camera, microphone
647	With switch support means	* 679.24	With support for light protective
648	Busbar arrangements	072.24	shield
649	U-shaped member	* 679.25	With document holder
650	Spaced parallel relationship	* 679.26	Portable computer type
651	Panel board corner mountings	* 679.27	Hinged or folding display; e.g.,
652	Circuit breaker supporting arrangements	* 679.28	laptop computer display Electrically connected through
653	With discriminating means	0.2.20	hinge means
654	With tamper prevention means	* 679.29	Removable display
655	Having two row arrangement	* 679.3	Handheld computer; e.g., personal
656	With plug-in circuit breakers		digital assistant (PDA)
657	With removable member	* 679.31	For computer memory unit
658	With plastic enclosure or support	* 679.32	Expansion module type
659	For electricity service meter		
660	Plural		
661	With meter circuit controller

	HOUSING OR MOUNTING ASSEMBLIES WITH	709	Heat sink
	DIVERSE ELECTRICAL COMPONENTS	710	Details
	.For electronic systems and devices	711	Cooling plate or bar
	Computer related housing or mounting assemblies	712	Thermally and electrically conductive
* 679.33	For computer memory unit Disk drive type	713	Electrically insulating thermally conductive
		714	Through component housing
* 679.34	External shock mounting/vibration		
+ (20 )5	damping	715	For module
* 679.35	Spring	716	Plural
* 679.36	Elastomeric	717	For active solid state devices
* 679.37	Removable disk drive support	718	For integrated circuit
* 679.38	Ejectable	719	Circuit board mounted
* 679.39	Slidable	720	For printed circuit board
* 679.4	For input/output device	721	Plural
* 679.41	Expansion/docking station	722	For electronic circuit
* 679 42	Motorized	723	For lead frame
* 679.43	Latching	724	Cabinet-type housing
* 679.44	Adjustable	725	With retractable or readily
* 679.45	Port replicator		detachable chassis
* 679.46	With cooling means	726	With locking means or device
* 679.47	Plural diverse cooling means	727	Sliding component or commpartment
	integrated into one system; e.g.,	728	Module
	fan with heat pipe or heat sink,	729	Plural
	etc.	730	With housing
* 679.48	Fan	731	Interchangeable
* 679.49	With air flow enclosure; e.g.,	732	Having lock or interlock
	ducts, plenums, etc.	733	Selective connections
* 679.5	Plurality of air streams	734	With coupling or decoupling
* 679.51	With baffle	1.54	capacitor
* 679.52	Heat pipe	735	Stacked
* 679.53	Liquid	736	With printed circuit boards
* 679.54	Thermal conduction; e.g., heat sink	737	IC card or card member
* 679.55	For portable computer	738	With resistor and capacitor
* 679.56	Handheld; e.g., PDA	739	_
* 679.57	With security means (i.e., locking		With particular material
	structure)	740	With locking means or device
* 679.58	With latching mechanism	741	Guiding means
* 679.59	Handle/foot support	742	With spacer
* 679.6	For desktop computer	743	Solder connection
* 679.61	CRT type	744	Cordwood type
688	With cooling means	745	Welded connection
689	Fluid	746	With specific dielectric material or
690	Air		layer
691	Pressurized or conditioned	747	With locking means or device
692	Plural Openings	748	Printed circuit board
693	Circular	749	Flexible board
		750	With specific dielectric material or
694	With air circulating means		layer
695	Fan or blower	751	With particular conductive material
696	With heat exchanger unit		or coating
697	With heat sink or cooling fins	752	With housing or chassis
698	And liquid	753	Specific chassis or ground
699	Liquid	754	With ejector means
700	Change of physical state	755	Rotatable
701	With heat exchanger unit	756	Guiding means
702	With cold plate or heat sink	757	With particular material
703	With cooling fins	758	With spacer
704	Thermal conduction	759	With lock or interlock
705	By specific coating	760	Connection of components to board
706	Containing silicon or aluminum	761	Component within printed circuit
707	Through support means		board
708	Specific chemical compound or		
	element

## C. CHANGES TO THE U.S. – I.P.C. CONCORDANCE

<u>Class</u>	<u>U.S.</u>	<u>Subclass</u>	I.P.C. Subclass	Notation
361		679.01	H05K	5/00
		679.02-679.45	G06F H05K	7/00 1/16 5/00
		679.46-679.54	G06F	7/00 1/20
			H05K H05K	5/00 7/20
		679.55-679.61	G06F H05K H05K	1/16 5/00 7/00

## PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

#### CLASS 174 - ELECTRICITY: CONDUCTORS AND INSULATORS

#### **Definitions Modified:**

Subclass 547: Under SEE OR SEARCH CLASS

Delete:

The entire reference to subclass 361

Insert:

361, Electricity: Electrical Systems and Devices, subclass 676 for cooling means in a power distribution system and devices, subclasses 679.46-679.54 for computer support equipment with cooling means, subclasses 688-723 for cooling means with electronic apparatus, subclass 702 for electronic system with liquid cooling means and heat sinks, and subclass 709 for thermal conduction through support means having heat sinks.

#### PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

CLASS 257 – ACTIVE SOLID-STATE DEVICES (E.G., TRANSISTORS, SOLID-STATE DIODES)

**Definitions Modified:** 

Class Definition: Under REFERENCES TO OTHER CLASSES, SEE OR SEARCH CLASS

Delete:

The entire reference to subclass 361

#### Insert:

361, Electricity: Electrical Systems and Devices, subclass 2 for solid-state switch type arc suppressors; subclasses 98, 100, and 101 for current fault responsive sensors involving semiconductor active solid-state devices; subclasses 196+ for semiconductor time delay devices; subclass 205 for threshold devices including SCR thyratrons; subclasses 275.1+ for electrical, e.g., fuse element for electrolytic capacitors; subclasses 277+ for variable capacitor not involving active solid-state devices; subclasses 525 for solid electrolytic capacitors with significant semiconductor; subclasses 679.01-679.61 for cooling devices, housings, supports, electrical contacts, etc., for diverse electrical components; subclass 421 for lead frames; and subclasses 523+ for solid electrolytic capacitors. (class employing active solid-state devices in electronic circuits. See Lines With Other Classes and Within This Class, A, above)

Subclass 678: Under SEE OR SEARCH CLASS

Delete:

The entire reference to subclass 361

Insert:

361, Electricity: Electrical Systems or Devices, subclass 679.01 for housings and mounting assemblies for electronic devices and components.

#### PROJECT E-6066

## D. CHANGES TO THE DEFINITIONS

Subclass 787: Under SEE OR SEARCH CLASS

Delete:

The entire reference to subclass 361

#### Insert:

361, Electricity: Electrical Systems and Devices, subclasses 600 and 679.01 for enclosures, including encapsulated types, for electrical and electronic devices.

## PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

CLASS 330 - AMPLIFIERS

## **Definitions Modified**:

Subclass 65: Under SEE OR SEARCH CLASS

Delete:

The entire reference to subclass 361

#### Insert:

361, Electricity: Electrical Systems and Devices, subclasses 271+ for capacitor structure, subclasses 600+ for housing and mounting assemblies with plural diverse electrical components, subclass 679.01 for electronic systems and devices, subclasses 679.02-679.61 for computer related housing or mounting assemblies, and subclasses 500+ for electrolytic capacitors.

## PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

## CLASS 331 – OSCILLATORS

#### **Definitions Modified**:

Subclass 187: Under SEE OR SEARCH CLASS

Delete:

The entire reference to subclass 361

## Insert:

361, Electricity: Electrical Systems and Devices, subclasses 679.01 for structural arrangements of diverse electronic or radio type devices not provided for in any other class or in other subclasses of Class 361.

# PROJECT E-6066

## D. CHANGES TO THE DEFINITIONS

## CLASS 340 - COMMUNICATIONS: ELECTRICAL

# **Definitions Modified**:

Subclass 693.5: Under SEE OR SEARCH CLASS

Delete:

The entire reference to subclass 361

# Insert:

361, Electricity: Electrical Systems and Devices, subclass 679.01 for electronic systems or devices housing or mounting assemblies, and subclasses 679.02-679.61 for computer related housing or mounting assemblies.

# PROJECT E-6066

## D. CHANGES TO THE DEFINITIONS

## CLASS 349 - LIQUID CRYSTAL CELLS, ELEMENTS AND SYSTEMS

## **Definitions Modified:**

Class Definition: Under REFERENCES TO OTHER CLASSES, SEE OR SEARCH CLASS

Delete:

The entire reference to subclass 361

## Insert:

361, Electricity: Electrical Systems and Devices, subclasses 679.21-679.3 for computer related housing or mounting assemblies with display support, and subclasses 789+ for the use of flexible circuits.

# Subclass 58: Under SEE OR SEARCH CLASS

Delete:

The entire reference to subclass 361

# Insert:

361, Electricity: Electrical Systems and Devices, subclasses 679.21-679.3 for computer related housing or mounting assemblies with display support.

# PROJECT E-6066

## D. CHANGES TO THE DEFINITIONS

# CLASS 358 - FACSIMILE AND STATIC PRESENTATION PROCESSING

# **Definitions Modified**:

Class Definition: Under REFERENCES TO OTHER CLASSES, SEE OR SEARCH CLASS

Delete:

The entire reference to subclass 361

## Insert:

361, Electricity: Electrical Systems and Devices, subclasses 679.01-821 for housing or mounting assemblies for electronic systems and devices.

# PROJECT E-6066

## D. CHANGES TO THE DEFINITIONS

# CLASS 361 - ELECTRICITY: ELECTRICAL SYSTEMS AND DEVICES

**Definitions Abolished:** 

Subclasses:

679 - 687

**Definitions Modified**:

Subclass 676: Under SEE OR SEARCH THIS CLASS, SUBCLASS

Delete:

The entire reference to subclass 687

Insert:

679.46, thru 679.54 for computer support equipment with cooling means.

Subclass 688: Delete:

The entire subclass definition

Insert:

This subclass is indented under subclass 679.01. Subject matter wherein the electronic system or device comprises means for dissipating heat from electronic components.

Subclass 724: Delete:

The entire subclass definition

Insert:

This subclass is indented under subclass 679.01. Subject matter comprising a box or housing having drawers or doors with structure to support readily accessible electrical components.

# PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

Subclass 728: Delete:

The entire subclass definition

## Insert:

This subclass is indented under subclass 679.01. Subject matter wherein the electrical components are separately housed in a container or supported in a unit or packaging scheme displaying regularity and separable repetition.

## Subclass 748: Delete:

The entire subclass definition

#### Insert:

This subclass is indented under subclass 679.01. Subject matter comprising an insulating panel wherein conductors are applied thereto by coating, laminating, or bonding in such a manner that the conductors are permanently attached to the panel.

# Subclass 805: Delete:

The entire subclass definition

#### Insert:

This subclass is indented under subclass 679.01. Subject matter comprising a plurality of diverse electrical components connected by crossed gratings and located at intersections of conductors.

#### Subclass 807: Delete:

The entire subclass definition

## Insert:

This subclass is indented under subclass 679.01. Subject matter wherein an upholding structure or chassis is utilized to hold a plurality of diverse electrical components in an interconnected relationship.

# PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

Subclass 813: Delete:

The entire subclass definition

#### Insert:

This subclass is indented under subclass 679.01. Subject matter wherein a metal skeletal structure is utilized to support a plurality of diverse electrical components, portions of a metal skeletal structure being removed to provide connecting paths.

# Subclass 814: Delete:

The entire subclass definition

Insert:

This subclass is indented under subclass 679.01. Subject matter comprising communication type devices having no significant art limitations and such devices in combination with diverse pieces of electrical apparatus wherein the combination is not provided for in any other class or in other subclasses of this class.

Subclass 816: Delete:

The entire subclass definition

#### Insert:

This subclass is indented under subclass 679.01. Subject matter wherein the electronic systems and devices are provided: (a) With means for protecting at least part of the devices from external electric or magnetic fields; (b) with means to protect one or more elements of the device from electric or magnetic fields generated in one or more other parts of the system; or (c) with protecting or screening means to prevent radiation of undesired electric or magnetic fields generated within the system.

Subclass 819: Delete:

The entire subclass definition

## PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

#### Insert:

This subclass is indented under subclass 679.01. Subject matter comprising a support or housing for an electromechanical device in which contacts are opened or closed by variations in conditions of one electric circuit and thereby affect operation of other devices in the same or other electric circuits.

## Subclass 820: Delete:

The entire subclass definition

#### Insert:

This subclass is indented under subclass 679.01. Subject matter comprising a support or housing for at least an active solid state device.

## Subclass 821: Delete:

The entire subclass definition

## Insert:

This subclass is indented under subclass 679.01. Subject matter comprising a support or housing for at least a device consisting essentially of two conducting surfaces separated by an insulating material or dielectric such as air, paper, mica, glass, plastic film, or oil, and at least one retardation coil.

## Definitions Established:

#### 679.01 For electronic systems and devices:

This subclass is indented under subclass 600. Subject matter comprising housing or mounting assemblies specifically for electronic systems and devices not provided for elsewhere.

#### 679.02 Computer related housing or mounting assemblies:

This subclass is indented under subclass 679.01. Subject matter comprising means for housing or mounting a computer or computer component.

(1) Note. This subclass and the subclasses indented under it provide for housing and mounting assemblies for which the computer or its components are only nominally recited.

#### PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

(2) Note. A computer component may be, for example, a central processing unit (e.g., motherboard), input device (e.g., keyboard), output device (e.g., display), or memory (e.g., disk drive).

#### 679.03 Wearable computer structure:

This subclass is indented under subclass 679.02. Subject matter including means to attach a computer or computer component to the hand, arm or other portion of a user's body.

#### 679.04 Plural independently movable displays:

This subclass is indented under subclass 679.02. Subject matter having two or more visual output devices of a computer which are repositionable or reorientable with respect to one another.

#### 679.05 Telescoping display:

This subclass is indented under subclass 679.02. Subject matter wherein a visual output device of a computer is supported by linearly extensible means.

#### 679.06 Display rotatable about plural axes:

This subclass is indented under subclass 679.02. Subject matter wherein a visual output device of a computer is angularly movable relative to its supporting structure about two or more axes.

(1) Note. The display may be rotated from an out-of-use position to an in-use position, or it may be rotated from one in-use position to another.

## 679.07 About perpendicular axes:

This subclass is indented under subclass 679.05. Subject matter wherein at least two of the plural axes intersect at right angles.

#### 679.08 For computer keyboard:

This subclass is indented under subclass 679.02. Subject matter comprising housing or mounting assemblies for input means consisting of a plurality of user actuatable alphanumeric or operational keys.

# 679.09 Portable computer type:

This subclass is indented under subclass 679.08. Subject matter wherein the keyboard is structurally connected to a computer that may be supported by a user while in use.

(1) Note. Desktop-type computers that are referred to as "portable computers" but which are not supported by the user when in use are not classifiable in this subclass or its indents.

#### PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

(2) Note. This subclass and its indents provide for combinations of keyboard and display housings or mounting assemblies only if details of the structural relationship of the keyboard to its housing or mounting assembly is recited. Such combinations wherein no details are recited of the structural relationship of the keyboard to its housing or mounting assembly, i.e., wherein the relationship is only nominally recited, are classified elsewhere.

## SEE OR SEARCH THIS CLASS, SUBCLASS:

679.27, for laptop computer display with keyboard wherein the housing or mounting assembly of the keyboard are nominally recited.

#### 679.1 Integrated pointing device; e.g. trackball, joystick:

This subclass is indented under subclass 679.09. Subject matter wherein the keyboard supports a means manipulable in diverse directions by the user to control the position of a cursor on a display screen.

- (1) Note. A trackball includes a spherical member that is rolled against the hand to place the cursor.
- (2) Note. A joystick includes a stick type control device that pivots in all directions.

#### 679.11 Adjustable keyboard:

This subclass is indented subclass 679.09. Subject matter wherein the keyboard or a section thereof may be physically moved to alternate positions.

## 679.12 Tiltable:

This subclass is indented under subclass 679.11. Subject matter wherein the entire keyboard is angularly adjustable to more than one operable position relative to a horizontal plane.

## 679.13 Collapsible key type:

This subclass is indented under subclass 679.11. Subject matter in which the computer or keyboard housing or mounting assembly includes means to depress at least one key.

#### 679.14 Split keyboard:

This subclass is indented under subclass 679.11. Subject matter in which the keyboard consists of at least two coplanar sections one of which is movable with respect to the other in the same plane.

(1) Note. The movable section may be moved linearly or rotatably in the same plane with respect to the other portion.

#### PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

#### 679.15 Foldable keyboard:

This subclass is indented under subclass 679.11. Subject matter in which a section of the keyboard is rotatable into a compact position with respect to another keyboard section.

## 679.16 Plural foldable sections:

This subclass is indented under subclass 679.15. Subject matter having two or more keyboard sections rotatable into a compact position with respect to another keyboard section.

#### 679.17 Detachable keyboard:

This subclass is indented under subclass 679.11. Subject matter wherein the keyboard is structurally separable or liftable from the body of the computer housing or mounting assembly.

## 679.18 Integrated pointing device; e.g. trackball, joystick, etc.:

This subclass is indented under subclass 679.08. Subject matter wherein the keyboard supports a means manipulable in diverse directions by the user to control the position of a cursor on a display screen.

- (1) Note. A trackball includes a spherical member that is rolled against the hand to place the cursor.
- (2) Note. A joystick includes a stick type control device that pivots in all directions.

#### 679.19 Hand, wrist or palm rest:

This subclass is indented under subclass 679.08. Subject matter comprising means to elevate or support the weight of the user's hand or forearm during keyboard operations.

# 679.2 Adjustable:

This subclass is indented subclass 679.08. Subject matter wherein the keyboard or a section thereof may be physically moved to alternate positions.

## 679.21 For computer display:

This subclass is indented under subclass 679.02. Subject matter comprising housing or mounting assemblies for the visual output device of a computer.

#### 679.22 Desktop type:

This subclass is indented under subclass 679.21. Subject matter wherein the display housing is structurally separate from the rest of the computer and is designed to be placed upon a desk or other work surface.

## PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

#### 679.23 With support for multimedia device; e.g. speaker, camera, microphone:

This subclass is indented under subclass 679.22. Subject matter wherein the display housing includes means to mount audio output means or video or audio input means.

#### 679.24 With support for light protective shield:

This subclass is indented under subclass 679.22. Subject matter wherein the display housing includes means to mount a device to prevent ambient light from reflecting off the display screen.

#### 679.25 With document holder:

This subclass is indented under subclass 679.22. Subject matter wherein the display housing includes means to support a page of text or graphics.

## 679.26 Portable computer type:

This subclass is indented under subclass 679.21. Subject matter wherein the display is structurally connected to a computer that may be supported by a user while in use.

#### 679.27 Hinged or folding display; e.g., laptop computer display:

This subclass is indented under subclass 679.26. Subject matter wherein the computer display is rotatable with respect to the rest of the computer housing or mounting assembly.

#### 679.28 Electrically connected through hinge means:

This subclass is indented under subclass 679.27. Subject matter wherein a means structurally connecting the display to the rest of the computer for relative rotation also houses or supports an electrical connection between the display and the rest of the computer.

## 679.29 Removable display:

This subclass is indented under subclass 679.27. Subject matter wherein the display is separable by the user from the rest of the computer.

## 679.3 Handheld computer; e.g., personal digital assistant (PDA):

This subclass is indented under subclass 679.26. Subject matter wherein the computer is small enough to be placed and used in the human hand.

#### 679.31 For computer memory unit:

This subclass is indented under subclass 679.02. Subject matter comprising housing or mounting assemblies for devices which electronically store information written to them, or read from them, by a computer.

## PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

(1) Note. Memory units; i.e., devices for electronically storing information, covered by this subclass typically include their own casings. Thus, the housings or mounting assemblies of this subclass type actually house or mount memory units including their casings.

## 679.32 Expansion module type:

This subclass is indented under subclass 679.31. Subject matter comprising housing or mounting assemblies that are plugged into a computer to add extra memory and one or more functions or resources to the computer.

(1) Note. Modules of this subclass type are typically comprised of a printed circuit board and a carrier therefor.

#### 679.33 Disk drive type:

This subclass is indented under subclass 679.31. Subject matter comprising housing or mount assemblies for memory units consisting of means to rotate a storage disk and a read/write head to read information from, or to write information, the disk.

## 679.34 External shock mounting/vibration damping:

This subclass is indented under subclass 679.33. Subject matter wherein the housing or mounting assembly includes means to absorb mechanical pulses or waves transmitted between it and the memory unit.

## 679.35 Spring:

This subclass is indented under subclass 679.34. Subject matter wherein the shock or vibration damping means is a resiliently bendable or twistable element.

### 679.36 Elastomeric:

This subclass is indented under subclass 679.34. Subject matter wherein the shock or vibration damping means is made of a resiliently compressible material.

#### 679.37 Removable disk drive support:

This subclass is indented under subclass 679.33. Subject matter wherein the disk drive housing or mounting means is itself detachably mounted in a housing.

#### 679.38 Ejectable:

This subclass is indented under subclass 679.33. Subject matter wherein the housing or mounting means includes means to force the disk drive from it.

## PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

#### 679.39 Slidable:

This subclass is indented under subclass 679.33. Subject matter wherein the housing or mounting means includes passive means cooperating with the disk drive to guide its movement into or out of operable position.

# 679.4 For input/output device:

This subclass is indented under subclass 679.02. Subject matter comprising a housing or mounting assembly for a device which passes data to and from a computer or computer component.

#### 679.41 Expansion/docking station:

This subclass is indented under subclass 679.4. Subject matter comprising a housing or mounting assembly for supporting a portable computer and having electrical connection means connectible to the portable computer.

# 679.42 Motorized:

This subclass is indented under subclass 679.41. Subject matter having electrical drive means for moving the portable computer into or on the expansion/docking station.

## 679.43 Latching:

This subclass is indented under subclass 679.41. Subject matter comprising means to secure the portable computer to the expansion/docking station.

## 679.44 Adjustable:

This subclass is indented under subclass 679.41. Subject matter wherein the housing or mounting assembly includes means for supporting the portable computer in more than one position.

#### 679.45 Port replicator:

This subclass is indented under subclass 679.4. Subject matter comprising a housing or mounting assembly having a single connector connectible to a portable computer and at least one other connector duplicating another connector on the computer.

#### 679.46 With cooling means:

This subclass is indented under subclass 679.02. Subject matter wherein the housing or mounting assembly includes means for dissipating heat from the computer or computer component.

#### PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

# 679.47 Plural diverse cooling means integrated into one system; e.g. fan with heat pipe or heat sink, etc.:

This subclass is indented under subclass 679.46. Subject matter including two or more cooperative means utilizing different types of media for dissipating heat.

- (1) Note. Types of media utilized in the subject matter of this subclass may include gas (e.g., air), liquid and solid heat conducting or conveying means.
- (2) Note. The heat dissipated by the two or more media provided for by this subclass must be more than merely incidental to some other non-cooling function they may perform. For example, a metal conduit which may incidentally irradiate heat from a heat transporting fluid inside it is not classifiable in this subclass. However, if the conduit is disclosed as radiating heat from the fluid medium, classification is proper for this subclass.

## 679.48 Fan:

This subclass is indented under subclass 679.46. Subject matter wherein the cooling means includes means to move air in or around the computer or computer component comprising a series of blades and means to rotate them about an axis.

## 679.49 With air flow enclosure; e.g., ducts, plenums, etc.:

This subclass is indented under subclass 679.48. Subject matter having containment means radially surrounding at least a portion of the flow of air from the fan.

#### 679.5 Plurality of air streams:

Subject matter under subclass 679.49. Subject matter wherein the enclosure defines two or more paths for air from the fan.

## 679.51 With baffle:

This subclass is indented under subclass 679.48. Subject matter including a deflector to change the direction of the air from the fan.

## 679.52 Heat pipe:

This subclass is indented under subclass 679.46. Subject matter including an elongated sealed enclosure containing a fluid in a wick in contact with the enclosure whereby heat conducted to one part of the enclosure converts the fluid to a vapor which is converted back to a fluid in another part of the enclosure where the heat is dissipated, the fluid then being reabsorbed by the wick.

## 679.53 Liquid:

This subclass is indented under subclass 679.46. Subject matter wherein heat is absorbed by a fluid material.

#### PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

#### 679.54 Thermal conduction, e.g. heat sink:

This subclass is indented under subclass 679.46. Subject matter wherein a solid material absorbs and disperses heat from the computer or computer component.

#### 679.55 For portable computer:

This subclass is indented under subclass 679.02. Subject matter comprising means for housing or mounting a microcomputer that is small enough for use on a user's lap, and folds into a compact position for carrying.

(1) Note. Desktop-type computers that are referred to as "portable computers" but which are not supported by the user when in use are not classifiable in this subclass or its indents.

## 679.56 Handheld; e.g. PDA:

This subclass is indented under subclass 679.55. Subject matter wherein the computer is small enough to be placed and used in the human hand.

## 679.57 With security means (i.e., locking structure):

This subclass is indented under subclass 679.02. Subject matter comprising means mounted on, or engageable with, a computer or computer component housing or mounting assembly to prevent unauthorized removal of, or tampering with, the computer or computer component.

#### 679.58 With latching mechanism:

This subclass is indented under subclass 679.02. Subject matter comprising means to selectively fasten one part of a computer or computer component housing or mounting assembly to another part of the same, or another, housing or mounting assembly.

#### 679.59 Handle/foot support:

This subclass is indented under subclass 679.02. Subject matter comprising a carrying member or a support brace that extends from the body of the computer or computer component.

#### 679.6 For desktop computer:

This subclass is indented under subclass 679.02. Subject matter comprising a housing or mounting assembly for a computer that may be supported by a table or desktop when in use but is too large or heavy to be supported by a user when in use.

## 679.61 CRT type:

This subclass is indented under subclass 679.01. Subject matter comprising a housing or mounting assembly for a cathode ray tube.

## PROJECT E-6066

# D. CHANGES TO THE DEFINITIONS

## FOREIGN ART COLLECTIONS

The definitions below correspond to abolished subclasses from which these collections were formed. See the Foreign Art Collection schedule of this class for specific correspondences. [Note: The titles and definitions for *indented* art collections include all the details of the one(s) that are hierarchically superior.]

## FOR 102 For electronic systems and devices:

Foreign art collection for subject matter wherein the comprising housings or mounting assemblies specifically for electronic systems and devices not provided for elsewhere.

(1) Note. Support equipment and housings for disk drives, keyboards, display units and cathode-ray tubes (CRTs) without structural detail or particular equipment description for disk drive, keyboard, display unit, or CRT will be classified in this subclass.

# FOR 103 Including keyboard support:

Foreign art collection for subject wherein (a) at least one electronic device is a portion of a terminal used to generate a character stream to a computer or other communication device combined with housing or mounting arrangement or (b) at least one electronic device has key input means combined with housing or mounting arrangement.

(1) Note. This subclass provides for only nominal recitation of a keyboard.

## FOR 104 Including display support:

Foreign art collection for subject matter wherein at least one electronic device presents information in visual form combined with housing or mounting arrangement.

(1) Note. This subclass provides for only nominal recitation of a display.

# FOR 105 CRT support:

Foreign art collection for subject matter wherein at least one electronic device is a vacuum tube in which its electron beam can be focused to a small cross section on a luminescent screen and can be varied in position and intensity to produce a visible pattern combined with housing or mounting arrangement.

(1) Note. This subclass provides for only nominal recitation of a CRT.

## FOR 106 Computer related support:

Foreign art collection for subject matter wherein (a) at least one electronic device is a data processor or calculator combined with housing or mounting

## PROJECT E-6066

#### D. CHANGES TO THE DEFINITIONS

arrangement or (b) at least one electronic device is a component of a data processor or calculator combined with housing or mounting arrangement.

(1) Note. This subclass provides for only nominal recitation of computer or computer component.

#### FOR 107 Memory unit support:

Foreign art collection for subject matter wherein at least one electronic device is a computer component that stores information combined with housing or mounting arrangement.

(1) Note. This subclass provides for only nominal recitation of memory unit.

## FOR 108 Disk drive support:

Foreign art collection for subject matter wherein at least one electronic component is a device that rotates a storage medium, writes data onto it, and reads data from it as instructed by a program combined with housing or mounting arrangement.

(1) Note. This subclass provides for only nominal recitation of a disk drive unit.

## FOR 109 Input/output device support:

Foreign art collection for subject matter wherein at least one electronic component (a) provides a means of communication between the computer and other electrical equipment or (b) provides a means of communication between two or more computers, combined with housing or mounting arrangement.

(1) Note. This subclass provides for only nominal recitation of an inputoutput device.

# FOR 110 With cooling means:

Foreign art collection for subject matter wherein the computer related support equipment includes means for dissipating heat from computer components.
