

## **Patent Prosecution Highway Pilot Program between the United States Patent and Trademark Office and European Patent Office**

### **I. Background**

The United States Patent and Trademark Office (USPTO) has established a 21<sup>st</sup> Century Strategic Plan to transform the USPTO into a more quality-focused, highly productive, responsive organization supporting a market-driven intellectual property system. One of the specific action items of the 21<sup>st</sup> Century Strategic Plan is to share search results with other intellectual property offices. By relying on the search results obtained via partnerships with other intellectual property offices, the USPTO can reduce duplication of efforts and decrease workload.

From July 2006 to January 2008, the USPTO partnered with the Japan Patent Office (JPO) to establish the first Patent Prosecution Highway pilot program (PPH). The PPH leverages accelerated examination procedures already available in both offices to allow applicants in both offices to obtain corresponding patents faster and more efficiently. The PPH also permits each office to benefit from the work previously done by the other office, in turn helping to reduce workload and improve patent quality. The USPTO and the JPO began full implementation of the PPH program starting January 4, 2008.

USPTO has also commenced separate PPH pilot programs with the United Kingdom Intellectual Property Office (UK IPO), the Canadian Intellectual Property Office (CIPO), the Korean Intellectual Property Office (KIPO), and IP Australia (IPAU), based on the same framework as the PPH between the USPTO and JPO.

Following on these partnerships, the USPTO and the European Patent Office (EPO) have agreed to launch a PPH pilot program similar to the PPH pilot programs noted above with the exception that PCT international applications (including national stage applications filed under 35 U.S.C. 371) are excluded.

### **II. Patent Prosecution Highway Pilot Program**

The PPH was established to enable an applicant whose claims are determined to be allowable in the Office of first filing (OFF) to have the corresponding application filed in the Office of second filing (OSF) advanced out of turn for examination while at the same time allowing the OSF to exploit the search and examination results of the OFF.

Where the USPTO is the OFF and the U.S. application contains claims that are determined to be allowable, the applicant may likewise request accelerated examination at the EPO for the corresponding application filed with the EPO as the OSF. The procedures and requirements for filing a request with the EPO for participation in the PPH pilot program are available from the EPO web site at: [www.epo.org](http://www.epo.org). Where the EPO is the OSF, applicant may provide the EPO with the necessary documents for requesting participation in the PPH pilot program, or request that the EPO obtain the

necessary documents for requesting participation in the PPH pilot program from the USPTO Public PAIR system. In those rare situations where the U.S. application has not been published, and therefore the U.S. file wrapper is not available via Public PAIR, applicant will be responsible for providing the necessary documents to the EPO.

Where the USPTO is the OSF and the corresponding application filed with the EPO as the OFF contains claims that are determined to be allowable, the applicant may request participation in the PPH pilot program in the USPTO and petition to make the U.S. application special under the PPH pilot program. Note that the procedures for a petition to make special under the accelerated examination program set forth in MPEP 708.02(a) do NOT apply to a petition to make special under the PPH pilot program. The procedures and requirements for filing a request in the USPTO for participation in the PPH pilot program are set forth below.

#### **A. Trial Period for the PPH Pilot Program**

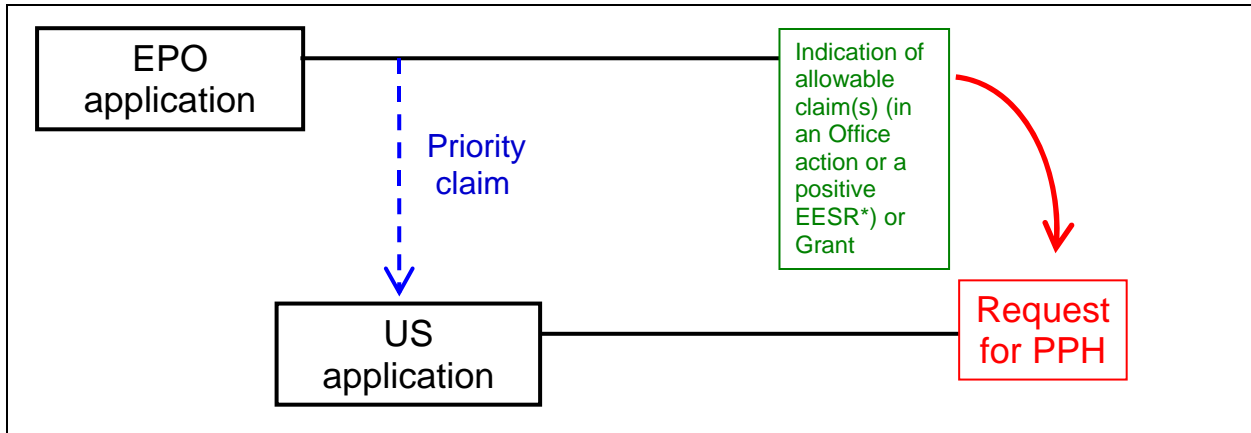

The PPH pilot program will commence on September 29, 2008, for a period of one year ending on September 29, 2009. The trial period may be extended for up to an additional year if necessary to adequately assess the feasibility of the PPH program. The USPTO and the EPO will evaluate the results of the pilot program to determine whether and how the program should be fully implemented after the trial period. The Offices may also terminate the PPH pilot program early if the volume of participation exceeds manageable level, or for any other reason. Notice will be published if the PPH pilot program will be terminated before the September 29, 2009 date.

#### **B. Requirements for Requesting Participation in the PPH Pilot Program in the USPTO**

In order to be eligible to participate in the PPH pilot program, the following conditions must be met:

(1) The U.S. application is a Paris Convention application validly claiming priority under 35 U.S.C. 119(a) and 37 CFR 1.55 to one or more applications filed in the EPO.

An example of U.S. applications that fall under requirement (1) is:

\* EESR – Extended European Search Report

PCT international applications (including national stage applications filed under 35 U.S.C. 371), provisional applications, plant and design applications, reissue applications, reexamination proceedings, and applications subject to a secrecy order are excluded and not subject to participation in the PPH.

(2) The EPO application(s) have at least one claim that was determined by the EPO to be allowable (either in an EPO Office action or in a positive Extended European Search Report (EESR) if no EPO Office action has been issued yet). Applicant must submit a copy of the allowable claims from the EPO application(s). If the EPO Office action does not explicitly state that a particular claim is allowable, applicant must include a statement in the request for participation in the PPH pilot program or in the transmittal letter accompanying the request for participation that no rejection has been made in the EPO Office action regarding that claim, and therefore, the claim is deemed allowable by the EPO. If applicant is relying on a positive EESR to establish that a particular claim is deemed allowable by the EPO, applicant must explain in the request for participation in the PPH pilot program or in the transmittal letter accompanying the request for participation how the EESR establishes allowability of that particular claim.

(3) All the claims in each U.S. application for which a request for participation in the PPH pilot program is made must sufficiently correspond or be amended to sufficiently correspond to the allowable claims in the EPO application(s). Claims will be considered to sufficiently correspond where, accounting for differences due to claim format requirements, the claims are of the same or similar scope. Applicant is also required to submit a claims correspondence table in English. The claims correspondence table must indicate how all the claims in the U.S. application correspond to the allowable claims in the EPO application(s).

(4) Examination of the U.S. application for which participation in the PPH pilot program is requested has not begun.

(5) Applicant must file a request for participation in the PPH pilot program and a petition to make the U.S. application special under the PPH pilot program. A sample request/petition form (PTO/SB/20EP) will be available from the USPTO web site at <http://www.uspto.gov> on September 29, 2008. Applicants are encouraged to use the USPTO request/petition form. A petition fee under 37 CFR 1.17(h) for the petition to make special under 37 CFR 1.102(d) is required and must be submitted.

(6) Applicant must submit a copy of all the Office actions (which are relevant to patentability) from each of the EPO application(s) containing the allowable claims that are the basis for the request. In addition, applicant must submit copies of any Office actions (which are relevant to patentability) from the EPO application(s) issued after the grant of the request for participation in the PPH pilot program in the USPTO (especially where EPO might have reversed a prior holding of allowability).

If applicant is relying on a positive EESR to establish that a particular claim is deemed allowable by the EPO and no EPO Office action which is relevant to patentability has been issued by the EPO, applicant must submit a copy of the positive EESR. In addition, applicant must submit copies of any Office actions (which are relevant to patentability) from the EPO application(s) issued after the grant of the request for participation in the PPH pilot program in the USPTO (especially where EPO might have reversed a prior holding of allowability in the positive EESR).

(7) Applicant must submit an information disclosure statement (IDS) listing the documents cited by the EPO examiner in the EPO Office action or in the positive EESR (unless such an IDS has already been filed in the U.S. application). Applicant must submit copies of all the documents cited in the EPO Office action or in the positive EESR (unless the copies have already been filed in the U.S. application) except U.S. patents or U.S. patent application publications.

The request for participation in the PPH pilot program and all the supporting documents must be submitted to the USPTO via EFS-Web and indexed with the following document description: "Petition to make special under Patent Pros Hwy." Information regarding EFS-Web is available at [http://www.uspto.gov/ebs/efs\\_help.html](http://www.uspto.gov/ebs/efs_help.html). Any preliminary amendments and IDS submitted with the PPH documents must be separately indexed as a preliminary amendment and IDS, respectively.

Where the request for participation in the PPH pilot program and special status are granted, applicant will be notified and the U.S. application will be advanced out of turn for examination. In those instances where the request for participation in the PPH pilot program does not meet all the requirements set forth above, applicant will be notified and the defects in the request will be identified. Applicant will be given one opportunity to perfect the request in a renewed request for participation (which must be submitted via EFS-Web and indexed accordingly as noted above). Note that action on the application by the examiner will NOT be suspended (37 CFR 1.103) awaiting a reply by the applicant to perfect the request in a renewed request for participation. That is, if the

application is picked up for examination by the examiner after applicant has been notified of the defects in the request, any renewed request will be dismissed. If the renewed request is perfected and examination has not begun, the request and special status will be granted, applicant will be notified and the U.S. application will be advanced out of turn for examination. If not perfected, applicant will be notified and the application will await action in its regular turn.

(8) Request for participation in the PPH pilot program and special status granted in a parent application will not carry over to a continuing application. Continuing applications must separately fulfill the conditions set forth above.

If any of the documents identified in items (2), (6) and (7) above have already been filed in the U.S. application prior to the request for participation in the PPH pilot program, it will not be necessary for applicant to resubmit these documents with the request for participation. Applicant may simply refer to these documents and indicate in the request for participation in the PPH pilot program when these documents were previously filed in the U.S. application.

### **C. Special Examining Procedures**

Once the request for participation in the PPH pilot program and special status have been granted to the U.S. application, the U.S. application will be taken up for examination by the U.S. examiner before all other categories of applications except those clearly in condition for allowance, those with set time limits, such as examiner's answers, and those that have been granted special status for "accelerated examination."

Any claims amended or added after the grant of the request for participation in the PPH pilot program must sufficiently correspond to one or more allowable claims in the EPO application(s). Applicant is required to submit a claims correspondence table along with the amendment (see B.(3) above). If the amended or newly added claims do not sufficiently correspond to the allowable claims in the EPO application(s), the amendment will not be entered and will be treated as a non-responsive reply.

The PPH program does not absolve applicants of all their duties under 37 CFR 1.56 and 37 CFR 11.18. By complying with requirements (6) and (7) identified above, applicants would be considered to have complied with their duties to bring to the attention of the USPTO any material prior art cited in the corresponding foreign application(s) (see MPEP § 2001.06(a)). Applicants still have a duty of candor and good faith, including providing to the USPTO other information known to them to be material to patentability.

Any inquiries concerning this notice may be directed to Magdalen Greenlief, Office of the Deputy Commissioner for Patent Examination Policy, at 571-272-8800 or at magdalen.greenlief@uspto.gov.
