Schöck Bauteile GmbH (GERMANY GESELLSCHAFT MIT
BESCHRÄNKTER HAFTUNG (GMBH))

Schöckstraße 1

76534 Baden-Baden

FED REP GERMANY

CLASS 6: Common metals and their alloys; ores of metal; metal materials for building and construction, namely, metal doors, metal windows, reinforcement elements for slabs of concrete, shear studs for slabs of concrete, anchoring elements for slabs of concrete; buildings, transportable, of metal; non-electric cables and wires of common metal; small items of metal hardware, namely, nails, screws, washers, nuts, bolts; general purpose containers of metal for storage and transport; metal containers for the storage and transportation of goods; building and construction materials and elements of metal, namely, metal doors, metal windows, reinforcement elements for slabs of concrete, shear studs for slabs of concrete, anchoring elements for slabs of concrete, metal wall claddings, metal anchor plates, reinforcement angle iron, reinforcement elements in the nature of steel rebars, rods, and mesh used for strengthening and reinforcing concrete structures, transverse force anchoring rods and transverse force casing, anchoring elements, pegs, joining pegs, and wall plugs, distance pieces for reinforcements, adapter sleeves for structural steels, connecting sleeves for crimp pins and pipeline casings of metal; unwrought or semi-wrought common metals; doors, gates, windows and exterior window blinds of metal; portable buildings of metal; statues and works of art of common metals; containers, and transportation and packaging articles, of metal, namely, metal containers for transport, industrial packaging containers of metal; spacers being building elements made of metal for use in the installation of flooring and facades; fastening anchors of metal; anchor plates for building; reinforcing materials of metal for building, namely, angle irons of metal, metal beams, shear studs for slabs of concrete, anchoring elements for slabs of concrete, reinforcement angle iron, reinforcement elements in the nature of steel rebars, rods, and mesh used for strengthening and reinforcing concrete structures, transverse force anchoring rods and transverse force casing, anchoring elements, pegs, joining pegs, and wall plugs, cavity wall anchors; reinforcement rods of metal for building; building materials, namely reinforcing pins of metal for formwork; cladding of metal for building; building materials of metal, namely, metal roof trusses; metal building components in the form of slabs; metal modular building units, namely, prefabricated metal buildings; building structures of metal, namely, transportable metal buildings; steel building materials, namely, steel rods, steel sheets; metal reinforcement materials for construction, namely, steel rebars, rods and mesh used for strengthening and reinforcing concrete structures; bolts of metal; bridge bearings being construction materials of metal; pegs of metal; non-electric wall plugs of metal for building; brackets of metal for building; facade construction components of metal, namely, metal wall panels, metal wall claddings, metal anchor plates; fabricated metal components for building foundations, namely, steel rebar, rods, and mesh used for strengthening and reinforcing concrete foundations; refractory construction materials of metal; architectural mouldings of metal for building; scaffolding of metal; framework of metal for building; metal hardware, namely, hooks; alloys of common metal; frames of

Katherine Kelly Vidal

Director of the United States
Patent and Trademark Office

metal for building; strapping ties of metal for use in building; screws of metal; overhead suspension tracks of metal for building; steel, unwrought or semi-wrought; steel reinforcement in the form of rebar, rods and mesh for use in the construction of concrete floors; steel alloys unwrought or semi-wrought; portable steel buildings; threaded rods of metal; beams of metal; frameworks of metal for ceilings; door fittings of metal; linings of metal for building; wall linings of metal for building; architectural hardware made of common metals and alloys thereof, namely, nails, nuts, screws, washers, bolts; nuts of metal; nuts, bolts and threaded fasteners, of metal; nails; wire cloth; metallic building facade elements, namely, metal wall panels, metal wall claddings, metal anchor plates; metal panels for buildings incorporating insulation; metal building beams; facades of metal, namely, metal facade panels for construction purposes; curtain walling of metal; cladding of metal for facades; strapping ties of metal for tying during building construction; architectural metalwork for use in building, namely, metal rails; panels of metal for cladding on buildings; fittings of metal for building, namely, nails, screws, washers, nuts, bolts, pegs, joining pegs, wall plugs; staples for construction use; wall covering of metal for buildings, namely, metal wall panels, metal wall claddings, metal anchor plates; casings of metal for oilwells; casings of metal; acoustic panels of metal for walls, namely, building panels of metal incorporating acoustic insulation; metal fastening anchors for securing pictures to walls; metal wall panels; faceplates of metal in the nature of metal wall panels for building

CLASS 9: Apparatus and instruments for controlling electricity; apparatus and instruments for accumulating electricity, namely, batteries; apparatus and instruments for switching electricity, namely, electric switches; apparatus and instruments for transforming electricity, namely, transformers; apparatus and instruments for regulating electricity; apparatus and instruments for conducting electricity, namely, electric conductors; recording apparatus, namely, video recorders; pre-recorded magnetic data carriers in the field of building construction, blank optical recording discs and pre-recorded optical discs in the field of building construction; compact discs in the field of building construction; dvds in the field of building construction; digital recording media, namely, blank optical discs and pre-recorded optical discs in the field of building construction; mechanisms for coin-operated apparatus; cash registers; calculating devices; data processing equipment; computers; downloadable and recorded computer software for data base management, for configuring, quoting and ordering electrical distribution products, for structural analysis of buildings and concrete formwork, for building construction observation, namely, static inspection, functional verification inspection, performance verification inspection, for building information modeling (BIM), for determining, dimensioning and designing insulating materials, metal reinforcement materials for building, reinforcing materials, not of metal, for building, for measurement of surface temperature and thermal bridges in the field of building construction, for distance measuring in the field of building construction, for measuring of the relative position of building parts in the field of building construction; downloadable and recorded computer software for use in remote electric meter monitoring; downloadable and recorded computer software for the remote control of security apparatus in the nature of burglar alarms; downloadable and recorded computer software for wireless network communications, namely transmitting data over a wireless communications network; downloadable and recorded computer software for the collection of global positioning data; downloadable and recorded computer software for the transmission of global positioning data; downloadable and recorded computer software for the processing of global positioning data; downloadable and recorded computer software for the compilation of global positioning data; downloadable computer software for the transmission of information over a global communications network; downloadable computer software for designing and modelling of three dimensional printable products; downloadable and recorded interactive computer software enabling exchange of information over a global communications network; fire extinguishers; electronic publications, downloadable, in the nature of books, magazines, newsletters, brochures and product data sheets in the field of building construction; downloadable and recorded civil engineering software for implementing engineering analysis of structure against applied loads, downloadable and recorded civil engineering

software designed to estimate costs, downloadable and recorded civil engineering software designed to estimate resource requirements; downloadable mobile software apps for configuring, quoting and ordering electrical distribution products, for estimating costs and resource requirements in the field of building construction; distance measuring instruments; dimension measuring instruments, namely, optical profilers; security surveillance apparatus, namely, video cameras and recorders; scientific research and laboratory apparatus, namely, data processing equipment and calculators for structural analysis in the field of building construction and for statistical calculations in the field of building construction, apparatus for measurement of surface temperature and thermal bridges in the field of building construction, apparatus for distance measuring in the field of building construction, and apparatus for measuring of the relative position of building parts in the field of building construction; educational simulators, namely, downloadable and recorded virtual reality training simulation software in the field of building construction; apparatus, instruments and cables for electricity, namely, electric cables, electric wires, electric meters, electric switches; geophysical apparatus, namely, surveying instruments, seismic detectors ; speed measuring instruments, namely, speedometers; weight measuring instruments, namely, scales; monitoring instruments, namely access control and alarm monitoring instruments, environmental monitoring systems comprised of meters and sensors that measure pressure, humidity, temperature and includes alarm and reporting functions, electronic devices for monitoring and optimizing photovoltaic arrays, electronic devices, namely, radio frequency repeaters used in long range communication for tracking and monitoring energy usage; thermal imaging cameras; apparatus for monitoring heat consumption, namely, thermostats; thermal imaging apparatus other than for medical use; downloadable software for operation and remote control of GPS navigation systems; downloadable and recorded industrial process control software; downloadable and recorded gesture recognition software; downloadable and recorded software for diagnostics and troubleshooting of computer hardware and monitoring systems; downloadable software applications for operation and remote control of three dimensional printers; safe load indicating apparatus, namely, pressure indicators and temperature indicators

CLASS 17: Insulation and barrier articles and materials, namely, insulating materials, laminated vapor barrier, glass fiber cloth for insulation, glass fibers for insulation, glass wool for insulation, insulating paints, insulating foils of metal, insulating fabrics, and insulating carbon fibers not for textile purposes, mineral wool for use as a building insulator, soundproofing materials of [rock wool,] * mineral wool, * insulation material of plastic materials for road making, thermally insulating glass fibre reinforcement rods, bars and anchors; concrete curing blankets made of plastic; acoustic insulating materials; ceiling panels made of mineral fibers for insulating buildings; seals, sealants and fillers, namely, packing material for forming seals, non-metal sealing rings for use as connection seals, pipe joint sealant, expansion joint fillers; dielectrics, namely, insulating dielectric materials for use in integrated circuits, semiconductor devices, computer disk drives and other computer hardware; heat resistant fabrics, namely, insulating fabrics; glass fibers for insulating purposes; synthetic fibers, other than for textile use, namely, plastic fibers not for textile use; elastomers, namely, thermoplastic elastomer resins in pellet form for use in further manufacture; insulating refractory materials; non-metal flexible pipes, tubes, hoses, and fittings therefor, including valves of rubber or vulcanized fibre; resin impregnated fiberglass fabrics for insulating use in the fabrication of components; fabrics of inorganic fibers for use as insulation; fabrics of chemically produced fibers for use as insulation; glass fibre and glass wool for insulation; fiberglass fabrics for insulation; glass fiber fireproof textiles; glass fibers for use in the manufacture of building insulation; glass fiber reinforced flexible hose; fire resistant and fire preventive articles and materials, other than safety and life-saving equipment, namely, fire-resistant composite panels, rods, bars, anchors made of aramid, glass, carbon or ceramic fibers; fiberglass for insulation; glass fiber insulation for use in construction; fiberglass webs for insulating purposes; electric insulators; insulating materials produced from plastics; electric insulators for use in the protection of buildings; insulating materials for building; glass fiber insulation materials for use in construction; soundproofing materials; semi-finished products, namely,

extruded plastics for use in further manufacturing; extruded plastic in the form of bars, blocks, pellets, rods, sheets and tubes for use in manufacturing; extruded plastics in the form of rods for use in manufacture; extruded plastics in the form of bars for use in manufacture; extruded plastics in the form of tubes for use in manufacture; semi-finished injection moulding plastics for use in further manufacture; semi-finished products, namely, plastics materials in the form of sections for use in further manufacturing; flexible hose of plastics with wire braiding; flexible hoses composed of plastics; flexible plastic pipe insulation; semi-processed plastics in the form of sheets, films, blocks, rods and tubes; semi-processed plastics materials in the form of rods; metal foil for building insulation; mineral fibers for insulating purposes; sound proofing boards for use in building; foam insulation materials for use in building and construction; thermal insulation material for the construction of lofts; acoustical insulation for buildings; sealants for buildings; foam sheeting for use as a building insulation; polyurethane foam sheeting for use as building insulation; insulating paints for facades; packing materials of rubber or plastics; stopping materials, namely, draught excluder strips; insulating materials; soundproofing materials, namely, sound absorbing structures of metal for buildings

CLASS 19: Building and construction materials and elements, not of metal, namely, non-metal doors, non-metal windows, reinforcement elements for slabs of concrete, shear studs for slabs of concrete, anchoring elements for slabs of concrete, non-metal concrete construction hardware, namely, load transfer dowels, connecting pieces, namely, adapter sleeves for structural sleeves and connecting sleeves for crimp pins or keyed joints of structural steels, air space anchors, wall cramps for facades and for insulating material; doors, gates and windows not of metal; non-metal window coverings, namely, outdoor blinds, not of metal or of textile, non-metal exterior window shades; transportable buildings, not of metal; reinforcing materials, not of metal, for building; non-metallic structural reinforcing materials for construction purposes; non-metallic wall ties for use in building; non-metallic beams for building purposes; non-metallic structural elements for use in building, namely, non-metal wall panels, non-metal roof trusses, braces, supports; non-metallic prefabricated building components, namely, non-metal wall panels, non-metal roof trusses, prefabricated concrete parts for erecting building works in the form of concrete piles, bollards, beams, blocks, bricks, posts, slabs, panels; concrete building elements, namely, concrete piles, bollards, beams, blocks, bricks, posts, slabs, panels; building components of wood, namely, wood veneer, wood trim, wood posts; construction elements of plastic, namely, multilayer panels of plastic for use in building; non-metallic manufactured building elements, namely, non-metal wall panels, non-metal roof trusses, plastic reinforced wall panels for use as sound and light barriers, multiple-layered drywall; non-metallic prefabricated building elements, namely, non-metal wall panels, non-metal roof trusses for onsite assembly, fabric wall systems used for environmental separation and containment in industrial and commercial applications, waterproofing system comprised of non-metal wall system elements designed to prevent entry of moisture and to prevent growth of mold; non-metallic building materials for screeding, namely, concrete; intumescent construction materials, namely, tar-based sealants for roofing, asphalt-based coatings and sealants for use on roofs and walls; concrete building materials, namely, concrete piles, bollards, beams, blocks, bricks, posts, slabs, panels; non-metallic damp course materials, namely, concrete blocks; refractory construction materials, not of metal; non-metallic roof construction materials, namely, non-metal roof trusses, asphalt roof coatings, non-metal roof flashing; bitumen building materials, namely, bitumen-based compositions for building purposes; building materials consisting of glass, namely, glass for building; building materials of plastics material, namely, plastic tiles, plastic floorboards, plastic wall boards, plastic precast wall elements, namely, energy conserving plastic wall panels; fiber reinforced plastic construction materials, namely, fiber reinforced plastic tiles, plastic floorboards, plastic wall boards; non-metallic building materials having acoustic properties, namely, non-metal building panels incorporating acoustic insulation, sound deadening gypsum wallboard; building materials of concrete reinforced with plastics and glass fibers, namely, concrete piles, bollards, beams, blocks, bricks, posts, slabs, panels; building materials made of rock

fibers, namely, non-metal wall panels; construction materials of artificial stone, namely, artificial stone blocks for building; construction materials of natural stone, namely, natural stone quarry blocks; fireproof seals in the nature of building materials, namely, fireproof tiles; non-metallic interlocking wall panels for building; glass building blocks incorporating insulating materials; slabs, not of metal, for building; space frame modular units, not of metal, namely, non-metal greenhouse frames and framework, not of metal, for buildings; prefabricated non-metal buildings; concrete poles for use as building materials; construction materials, namely, bridge bearings, not of metal; non-metal casting forms for concrete, namely, shuttering, not of metal, for concrete; concrete walls for building; reinforcement rods, not of metal, for building; expansion joints of non-metallic materials for use in construction, namely, non-metal expansion joints for floors and walls; brackets, not of metal, for building; building materials, namely, fiberboard; facade construction components of non-metallic materials, namely, non-metal windows, non-metal wall panels; non-metallic building facade elements, namely, non-metal windows, non-metal wall panels, non-metal railings and facade panels for construction purposes; non-metallic facing tiles for use in buildings, namely, non-metal covers for facades; non-metallic cladding for building facades; preformed concrete building elements, namely, concrete piles, bollards, beams and blocks; refractory construction materials, not of metal; non-metallic modular building units, namely, non-metal modular wall panels, non-metal railings and facade panels for construction purposes; non-metallic casings for use in building or construction; non-metallic woven textiles made of synthetic fibers for use in buildings; scaffolding, non-metallic; framework, not of metal, for building; latticework, not of metal; latticed netting of glass for building purposes; glass slabs for use in building; mortar for building; non-metallic stabilisation geotextile fabrics for use in construction for stabilization of soil walls and facades; fiberboard for building; non-metallic foundation material for use in construction, namely, concrete; non-metallic modular units for constructing prefabricated buildings, namely, non-metal wall panels; non-metal drains for use in construction of basement waterproofing system; non-metallic minerals for building or construction; transparent plastic boards for use in building; transparent plastic panels for building construction purposes; expanded plastics for use in construction, namely, plastic wallboards; films of plastic for use in building, namely, waterproofing membranes for roofing, floors and walls; building boards of plastic materials; multilayer panels of plastic for use in building; non-metallic structural frameworks for buildings; non-metallic exterior building shutters; non-metallic prefabricated monocoque buildings; building materials, namely, drywall corner bead not of metal; non-metallic reinforcing fabrics for building; reinforcing mesh made of textile fibers for construction purposes; roofing material, namely, corrugated sheets made of plastic materials; partitions being non-metallic building materials; non-metallic building fronts, namely, non-metal facade panels for construction purposes; non-metal fiber cement siding; facade cladding sheets of mortar coated foamed materials; coverings, not of metal, for building, namely, non-metal coverings for ceilings, non-metal roof coverings; spacers being building elements made of fiber reinforced cement used in the installation of flooring, walls and facades; cladding, not of metal, for building; non-metallic building materials for draught proofing, namely, insulating glass for windows for building purposes; laminates of non-metallic materials for use in building, namely, laminated flooring and laminated wall panels; glazed panels in the nature of non-metallic framework for construction; non-metal cladding for construction and building; linings, not of metal, for building, namely, roofing membranes, nonmetal tubular liners for the lining of sewer systems; building panels, not of metal; cement fillers for repairing walls; non-metallic laminated boards for walls; prefabricated non-metal walls; building materials, namely, stone veneers; non-metallic facing bricks

CLASS 37: Building construction services; building repair; concrete repairs; repairing steel structure and facade construction works; installation of insulating materials in buildings, roofs and structures; installing wallboard; installation of thermal insulation for buildings; building renovation, building construction and demolition of buildings; installation of reinforcement elements for slabs of concrete, shear studs for slabs of concrete, anchoring elements for slabs of concrete facades, doors and windows for

buildings; roofing installation; scaffolding installation services; building construction of cubicles; installation of bolts; erection of prefabricated buildings and structures; building sealing services; providing construction information; refurbishment of buildings; building construction of hard-standing areas; building construction of ceilings; building construction of foundations for buildings; building construction of complexes for business; building construction of steel structures for buildings; building construction of partition walls for interiors; building of underground structures; building construction of curtain walls; building construction of screens; building construction of steel fabrications; building construction works for prefabricated houses; building construction supervision services for building projects; construction supervision of building demolition; building construction supervision services for real estate projects; construction supervision of building renovation; building inspection in the course of building construction; building construction services relating to building for industry purposes; building construction services relating to building for habitation; temporary structure construction services; building construction supervision; on site construction project management relating to the construction of buildings; construction consultancy; consultancy and information services relating to construction; building construction advisory services; dismantling of building structures; installation of plumbing fixtures and fittings for buildings and installation of fixtures and fittings for heating pipes and air conditioning pipes for buildings; installation of glazed building structures; building construction and repair; construction of buildings and other structures; information services relating to maintenance of security systems; information services relating to the construction of buildings; general building contractor services; installation of building scaffolds, working and building platforms; installation of fabricated construction units, namely, installation of modular wall panels and facade panels; maintenance of buildings; installation of building insulation; custom construction of buildings; custom construction of houses; on site building construction project management; construction supervision of building repair; erection of pre-fabricated buildings; construction project management services; renovation and repair of buildings; building restoration; building restoration of architectural works; rental of tools and equipment for building construction, demolition, cleaning and maintenance; building reinforcing; provision of construction information by electronic means; providing information relating to building construction; installation of insulating materials for buildings; insulating services, installation of insulation in internal and external walls, ceilings and roofs; heat insulation of windows, namely, installation of insulation for windows; insulation of roofing, namely, installation of insulation for roofing; installation of building insulation; application of protective coatings for buildings; maintenance advisory services relating to the alteration of buildings; advisory services relating to building refurbishment; building construction consultancy; consultancy services relating to the repair of buildings; providing information relating to the construction, repair and maintenance of buildings; building maintenance and repair; renovation and restoration of buildings; building sealing and caulking services; thermal insulating of buildings, namely, installation of thermal insulation in buildings; repair of building facades, namely, resurfacing of facades; cleaning of building exteriors; repair of building facades, namely, redressing facades; advisory services relating to the maintenance of plumbing fixtures and fittings for buildings, and of fixtures and fittings for heating pipes and air conditioning pipes for buildings; consultation in building construction supervision; erection of scaffolding for building and construction; erection of formwork for building and construction; installation of building scaffolds, working and building platforms; installation of prefabricated building elements in buildings; providing online information relating to building construction; erection of formwork for civil engineering construction; erection of curtain walling; building construction of walls; installation of coloured panels in building facades; maintenance and repair of plumbing fixtures and fittings for buildings, and of fixtures and fittings for heating pipes and air conditioning pipes for buildings; shuttering services, namely, installation of building shutters

CLASS 42: Industrial analysis and research services in the field of building construction; providing information about the design and development of computer hardware and software; design and development of computer hardware; software design

and development; design of space-truss structures; design services relating to civil engineering; architectural services for the preparation of architectural plans; building research services, namely, research in the field of building construction; building design services; planning of building, namely, design of buildings; building inspection services, namely, surveying; civil engineering planning services; computer component testing; advisory services relating to planning software applications; advisory services relating to building design; computer aided design services relating to building projects; civil engineering; conducting technical project studies, namely, conducting scientific feasibility studies for construction projects; analysis of the structural behaviour of building materials; technical project studies, namely, conducting scientific feasibility studies in the field of construction; design services relating to roof covering components; design of remedial treatment to remedy defects in structures; designing feasibility studies on building designs; preparation of engineering reports relating to design; research on building construction or city planning; geological probing, namely, surveying of building plots; engineering services for the analysis of structures; monitoring of building structures, namely, engineering analysis of building structures; quality control of building materials for others; technical consultancy services relating to civil engineering; technical project studies, namely, conducting scientific feasibility studies in the field of construction; technological research for the building construction industry in the field of building design and engineering; surveying of defective structures; preparation of reports relating to technical project studies, namely, conducting scientific feasibility studies for construction projects; design services relating to real estate, namely, design of buildings; preparation of surveying reports relating to real estate planning; recording data relating to energy consumption in buildings, namely, measurement of energy consumption in buildings; engineering analysis of the structural behaviour of buildings; professional consultancy relating to energy measurement of energy efficiency in buildings; engineering services in the field of building technology; quality control of completed buildings for others; monitoring of events which influence the environment within buildings, namely, seismic analysis services and climate analysis services; measuring the environment within buildings, namely, technical air quality monitoring services; testing of the energy efficiency of buildings to determine conformity with certification standards; engineering services; architectural and engineering services; civil engineering consultancy; design of engineered building systems; structural engineering services; technical project planning, namely, conducting scientific feasibility studies in the field of engineering; technical consultancy services relating to structural engineering; architectural consultancy; architectural design for exterior decoration; architectural planning services; consulting in the field of architecture; computer aided design services relating to architecture; design services for architecture; architectural services for the design of buildings; professional consultancy relating to architecture; architectural services, namely, preparation of reports relating to architecture; testing of architectural ironmongery; computer project management services in the field of architecture; civil engineering drawing services; drafting of architectural house plans; preparation of architectural plans; consultancy in the field of architecture and construction drafting; computer-aided engineering design and drawing services; research in the field of building construction; construction drafting; planning services, namely, design of buildings

The mark consists of the wording "FAÇADE SOLUTIONS" with a superscript "2" appearing immediately after the final "S" in "SOLUTIONS".

PRIORITY DATE OF 08-08-2019 IS CLAIMED

OWNER OF INTERNATIONAL REGISTRATION 1527583 DATED 12-27-2019, EXPIRES 12-27-2029

No claim is made to the exclusive right to use the following apart from the mark as shown: "FAÇADE"

SER. NO. 79-284,278, FILED 12-27-2019

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
