U. S. P. T. O.

Dear Mr Bilski,

As a writer, I have had tremendous difficulty over the years with software conflicts and overlapping commercial interests and unforeseen sudden changes in software; these matters need more than just corporate dictation the likes of Gates Foundation.

The real loss in creativity is a tremendous one, in an era that we see the USA declining, likely permanently in International contributions, via the individuals.

An Am. Writer,

Roland Lee Clark II
