Subject: Derivation Proceedings (Before Proposed Rules)

Not as concerned on Derivations. It is the inventor job to cover variations within the patent and claims.

I agree with Henry Ford:

"I invented nothing new. I simply assembled the discoveries of other men behind whom were centuries of work. Had I worked fifty or ten or even five years before, I would have failed. So it is with every new thing. Progress happens when all the factors that make for it are ready and then it is inevitable. To teach that a comparatively few men are responsible for the greatest forward steps of mankind is the worst sort of nonsense."

You should only own what you protect!
