UNITED STATES PATENT AND TRADEMARK OFFICE

TRADEMARK PUBLIC ADVISORY COMMITTEE (TPAC)

QUARTERLY MEETING

Alexandria, Virginia Friday, April 28, 2023

1	PARTICIPANTS:
2	TPAC Members:
3	DAVID J. CHO, Chair
4	ANDRAEA BROWN, Vice Chair
5	TRACY L. DEUTMEYER
6	JOMARIE B. FREDERICKS
7	DEBORAH GERHARDT
8	DONNA GRIFFITHS
9	AMY HSIAO
10	RODRICK J. ENNS
11	DANA BROWN NORTHCOTT
12	Union Members:
13	JAY BESCH, NTEU 245
14	HAROLD ROSS, NTEU 243
15	PEDRO FERNANDEZ, POPA
16	USPTO:
17	KATHI VIDAL, Under Secretary of Commerce for
18	Intellectual Property and Director of the USPTO
19	DAVID GOODER, Commissioner for Trademark
20	GLEN BROWN, Group Director for Information Technology
21	GREG DODSON, Deputy Commissioner for Trademark
22	Administration, USPTO

1	PARTICIPANTS (CONT'D):
2	SEAN MILDREW, Deputy Chief Financial Officer, USPTO
3	BRANDEN RITCHIE, Directorate for International Affairs, USPTO
4	
5	GERARD ROGERS, Chief Administrative Trademark Judge, Trademark Trial and Appeal Board, USPTO
6	DAN VAVONESE, Deputy Commissioner for Trademark Operations, USPTO
7	-
8	MICHELLE PICARD, Office of the Chief Financial Officer
9	MONTIA PRESSEY, Director For Trademark Register Protection
10	MADY ODITION OF THE DELICE OFFICE AND
11	MARY CRITHARIS, Chief Policy Officer and Director for International Affairs
12	NANCY OMELKO, Directorate for International Affairs
13	VIM ALTON Division of Community 1 Affician
14	KIM ALTON, Directorate of Governmental Affairs
15	* * * *

1	PROCEEDINGS
2	(1:00 p.m.)
3	CHAIRMAN CHO: Hello and welcome,
4	everyone. I wanted to get your attention because
5	this is our first public meeting of 2023, of the
6	USPTO Trademark Public Advisory Committee, or
7	known as TPAC. My name is David Cho. I'm the
8	current Chair, and at my daytime job, I'm an
9	Assistant Vice President and Senior Legal Counsel
10	for AT&T.
11	I would like to take this opportunity to
12	introduce my esteemed colleagues of TPAC,
13	beginning to my right with my remarkable Vice
14	Chair, Adraea Brown. She is an Assistant General
15	Counsel at Harley-Davidson Motor Company.
16	Following her, in order of seniority are: Tracy
17	Deutmeyer, Shareholder of Fredrikson & Byron; and
18	Jomarie Fredericks, Deputy General Counsel, Chief
19	Intellectual Property, Brand Counsel at Rotary
20	International and The Rotary Foundation.
21	Next, are Rodrick Enns, Partner at Enns
22	& Archer; and Dana Brown Northcott, Vice President

```
1 and Associate General Counsel, Intellectual
```

- 2 Property Legal at Amazon.com; finally, our newest
- 3 members are Deborah Gerhardt, a Reef Ivey
- 4 Excellence Fund Term Professor of Law, at the
- 5 University of North Carolina School of Law; Donna
- 6 Griffiths, IP Specialist, at Cytiva Technologies;
- 7 and, finally, Amy Hsiao, Partner at the Eligon IP
- 8 firm.
- 9 I also want to welcome our three union
- 10 representatives, Harold Ross, President of the
- 11 National Treasury Employee Union, or NTEU, Chapter
- 12 243; Jay Besch, President of NTEU, Chapter 245;
- 13 and Pedro Fernandez of the Patent Office
- 14 Professional Association or known as POPA.
- Next, it's my immense pleasure to
- 16 welcome Kathi Vidal, the Under Secretary of
- 17 Commerce for Intellectual Property and Director of
- 18 the USPTO. And, finally, I am grateful for
- 19 Commissioner David Gooder and the USPTO
- 20 leadership.
- 21 It is an incredibly rewarding experience
- 22 to work with my TPAC colleagues and exceptional

- 1 leaders in the USPTO to continue shaping and
- 2 protecting intellectual property rights of the
- 3 U.S. and its significant global impact.
- 4 One such example is my unbridled
- 5 excitement to announce the April 11th launch of
- 6 the first ever USPTO trademark award, emphasize
- 7 "trademark," called Trademarks for Humanity Award,
- 8 recognizing brand owners who are improving the
- 9 environment.
- 10 The deadline for applicants, so please
- 11 hurry, is July 14th. You can see more details at
- 12 the USPTO website. Well, let me remind you of
- some housekeeping matters to submit any questions
- during our meeting today by email to:
- 15 Tpac@uspto.gov; again, the email is,
- 16 tpac@uspto.gov.
- Now, let me turn the floor over to our
- 18 esteemed director, Kathi Vidal.
- 19 DIRECTOR VIDAL: Got it, got it, thank
- 20 you. Do we still have the slide up?
- 21 CHAIRMAN CHO: They are trying to figure
- 22 it out now.

1 DIRECTOR VIDAL: Okay, great. Well, 2 this is excellent. So, you stole my thunder. super excited about the trademark award, and I will mention that in my remarks. Thank you for 5 the introduction. Thank you to all members of the TPAC for your unwavering support for all that 6 we're doing and helping us in so many different 8 ways. 9 Two weeks ago -- wow, two weeks ago 10 already, I marked the first year of my work here 11 at the USPTO, and I can't say enough about all of you, including my colleagues and the TPAC. You 12 13 have been amazing, and we know we'll get some 14 great work done, and I know we still have much to 1.5 do, as I was reminded yesterday in my hearing. I 16 get to wear color today, so I'm very excited about 17 that. (Laughter) I am delighted to be speaking here also 18 19 this week, where we marked World IP Day, and where 20 the topic was Women and IP Accelerating Innovation 21 and Creativity. And, you know, just thinking

about that language, Accelerating Innovation and

```
1 Creativity by bringing more women into the
```

- 2 innovation entrepreneurship, creativity,
- 3 ecosystem. It's just so powerful.
- 4 The opportunities we have by bringing
- 5 more people into the ecosystem is going to have a
- 6 immeasurable impact on our economy. It's going to
- 7 create jobs in communities. It's going to allow
- 8 people to put their kids through college because
- 9 it will be higher paying jobs. The work that we
- 10 have to do is just so exciting and inspiring to
- 11 me. I'm glad to be doing it with you.
- 12 I'll talk some about our initiatives in
- a bit, but we are doing a lot around women. We
- 14 are doing a lot to bring anybody who is not in the
- innovation entrepreneurship ecosystem into that
- 16 ecosystem. I was also thrilled talking about some
- 17 of our work around women that TPAC attended our WE
- 18 Wednesday this week, as did many of my colleagues.
- 19 Thank you for your support of that.
- I know a number of our patent examining
- 21 attorneys attended as well and said it was
- thoroughly inspiring, and so just really glad that

- 1 we can serve both of those in the USPTO, as well
- 2 as the community, and really would hope and call
- 3 on you and everybody who is on for your support of
- 4 that and getting the word out more, helping us
- 5 reach more people with the programming that we are
- 6 already doing because we have got so many amazing
- 7 offerings.
- 8 It was also great to see you on Capitol
- 9 Hill; that was fantastic, a little different than
- 10 my other visit to Capitol Hill this week. It's
- 11 very, both very enjoyable in their own ways.
- 12 Thank you for participating in that event as well
- and being out there as the face, part of our face
- of the USPTO.
- I do have here in my remarks in yellow
- 16 that I was supposed to update you on anything that
- 17 happened yesterday, so I will do a quick update.
- 18 So, good that trademarks are on the minds of those
- in Congress. And I'm not sure if you've -- I'm
- 20 sure everybody has not heard the testimony or read
- 21 the testimony, but it was really great that
- 22 Ranking Member Hank Johnson asked me some

- 1 questions about some of the fraud.
- 2 Because he recognized, Congress
- 3 recognizes that that an issue for our small-to
- 4 medium-sized companies. It's an issue for
- 5 everyone, quite frankly. As I told him, we are on
- it. That doesn't mean we don't have more work to
- 7 do, we have much more work to do.
- 8 He did mention the Local Counsel Rule,
- 9 the U.S. Local Counsel Rule, and I told him, and
- 10 I'll repeat it again here that between December
- 11 2022 and March 2023, 19 U.S. licensed attorneys
- 12 were referred to our Office of Enrollment and
- 13 Discipline.
- So, those are U.S. attorneys who are
- trying to get around the rule by helping others
- that file things fraudulently. So, and I know you
- 17 know well about all of the sanctions orders we
- have issued, about every attempt that we're making
- 19 to clear the trademark register of anything that's
- 20 fraudulent.
- 21 We have talked about it and work on it
- 22 weekly with the unions and with all of trademark.

- 1 So, I'm glad that Congress recognizes that the
- 2 more that we can elevate these IP issues the
- better it will be for the country. I think that
- 4 was the main update, unless you want to talk about
- 5 the PTAB for a bit -- apparently not. (Laughter)
- 6 There is a lot about the PTAB, okay.
- 7 So, moving on. So, I just want to thank
- 8 the Trademark Office for everything that they have
- 9 done, we have done in the past year, including the
- 10 transition to TM Exam, successful and timely
- 11 rollout of our new response periods under the TMA,
- 12 Trademarks for Humanity, as David mentioned,
- coping with the huge inventory of trademark
- 14 applications that surged during the pandemic.
- You know, sometimes I get asked if that
- surge was caused by all of these fraudulent
- 17 applications. That was the first question I had
- for Trademarks, and it's not. It's the surges
- 19 really more people starting businesses, more
- 20 people realizing that they can be entrepreneurs.
- So, the surge is great and now we just
- have to find a way to bring pendency down, which

- is something, again, we're working on and working
- on with the unions. Managing the residual impact
- 3 of COVID in our professional lives. That's
- 4 something that every organization I know is
- 5 dealing with, and Trademarks is no different than
- 6 anyone else.
- 7 And then, anti-counterfeiting, that was
- 8 something that it was in my written testimony that
- 9 I talked about, that's something that we do mostly
- 10 with our Office of Policy and International
- 11 Affairs, and also with our Comms (phonetic) team,
- but we have been doing a really great job
- 13 educating people. I know I asked you to form a
- subcommittee around anti-counterfeiting.
- 15 Last year, I think that's -- that work
- is still going on. I look forward to hearing any
- other ideas on what more we can do, both across
- 18 government, our work across the world trying to
- 19 help shore up systems across the world so that
- 20 U.S. trademarks and trademarks in those countries
- 21 will be respected and will have good systems
- 22 everywhere because trademarks are so important and

```
1 want to make sure that once people are able to
```

- 2 secure their trademark that it's used in the
- 3 proper way and that people aren't trying to sell
- 4 against them.
- 5 Really appreciate the work of the TPAC
- to the trademark community, especially in these
- 7 last few years, where we have tackled some of
- 8 these challenges, whether it be counterfeiting or
- 9 fraud, et cetera, just It's been phenomenal. Just
- 10 want to give you a few updates -- oh, also want to
- 11 make sure to thank the union.
- 12 I have said the words but thank the
- 13 union. Jay Besch, Harold Ross, and Pedro
- 14 Fernandez, thank you for all you do. As I have
- said over and over again, we are completely
- 16 aligned in wanting to make sure that everybody who
- works at the USPTO is treated fairly, you know,
- 18 they feel like they belong, they feel connected,
- and that we're just doing really great work
- 20 together -- so, really, really appreciate that
- 21 we're on that journey with you and wouldn't want
- 22 to be on it with anyone else. So, thank you for

- 1 that.
- 2 In terms of a few updates on USPTO
- 3 initiatives, this year I joined the National
- 4 Advisory Council on Innovation and
- 5 Entrepreneurship, so certainly happy to make sure
- 6 that you get updates on that. The meetings, for
- 7 the most part, are public, sometimes we go into
- 8 private session, but the meetings for the most
- 9 part are public.
- 10 It's the work that we're doing across
- 11 commerce to make sure that we never get into this
- 12 chip supply chain issue again. We want to bring
- more people into the innovation and
- 14 entrepreneurship economy. We want to make sure
- we're reducing barriers for people and just be the
- 16 startup national that we have always been. And
- so, any thoughts or ideas you have on how we can
- 18 accomplish that better we'd certainly be open to
- 19 that. Also, as we have spoken about numerous
- times, we have our own Council for Inclusive
- 21 Innovation which we have also made across commerce
- 22 now.

```
1
                 We have co-vice chairs from other
 2
       agencies really looking forward to getting all of
       the initial ideas across the finish line. We have
       announced some of those recently including on the
       patent side, a first filer program. Another thing
       that we're working on that we haven't released yet
       is just additional communications with filers.
 8
                 So, if somebody files for a patent
       helping take them through the process but also
10
       say, have you thought about your -- what
11
       trademarks you need to register; if somebody
12
       files, you know, tries to register a trademark
13
       talking to them about what other IP might you
14
       have. And so, we do have our new IP identifier
1.5
       tool that we can use there, so really looking
16
       forward to doing that.
17
                 I mentioned the WE Initiative, it's our
       women Entrepreneurship Initiative. We launched it
18
19
       in November, and it's just been phenomenal.
20
       People will travel states, a number of states just
       to come live and be there in person, even though
21
```

it's also virtual. It's phenomenal. We had one

```
1 session. And I'm trying to where I can host it
```

- 2 from around the country to give many more people
- 3 the opportunity to attend live.
- I had one recently in Phoenix, and one
- of the women who showed up, she brought her
- 6 patents with her in a bag, and she drove from San
- 7 Diego to Phoenix, got a flat tire, tried to fix it
- 8 in two towns, couldn't fix it, and decided she was
- 9 going to drive the rest of the way on her flat
- 10 because she did not want to miss our session.
- It just shows you the level of interest
- and dedication and people seeing that government
- is working for them, that we're here to help
- 14 support them. So, that's really one of our
- initiatives to get the word out there that we're
- here, we're going to try and let them know
- everything government is doing; whether it's the
- 18 Inflation Reduction Act, which is really spurring
- a lot of startup activity; whether it's the CHIPS
- 20 Act; whether it's funding through MBDA, whether
- 21 it's all the amazing programming that we offer.
- So, I look forward to seeing you at

```
those and maybe hosting you at some of them. I'm
```

- 2 real excited about that. Go for Real campaign in
- 3 anti-counterfeiting, I will address that. We have
- 4 reached over a billion people with those
- 5 campaigns, really just trying to change the hearts
- and minds of people across the country.
- 7 As we try and stop the goods from coming
- 8 in, we're trying to change the buying patterns as
- 9 well. We're trying to hit it on both ends, so
- 10 excited about that. I have also been on TV around
- 11 the country and local TV stations to talk about it
- when people were doing their holiday spending. I
- 13 thought that would be a good time to get out
- there, that's been helpful.
- I also know that it's part of our camp
- invention. So, last year, we educated 280,000
- 17 children across the nation with camp invention,
- many of whom were on scholarship, which is
- 19 phenomenal, giving them opportunities. As part of
- 20 that, we educated them on the value of IP and
- 21 respecting other people's IP, so just doing
- 22 everything we can and look forward to

- 1 collaborating with your subcommittee on that.
- I don't need to go through Trademarks
- for Humanity, but just please get the word out. I
- 4 did recently have the pleasure of celebrating
- 5 folks who filed for patents on -- in our Patents
- 6 for Humanity program around COVID. It was a
- 7 tear-jerking ceremony. I mean, it was incredible
- 8 and just to be recognized at that level is
- 9 phenomenal, and I'm so excited that TPAC actually
- 10 came up with the idea.
- 11 That's incredible. We should have come
- 12 up with it as well. I'm glad that you did. And I
- look for more ways to think about what we're doing
- in trademarks that we should be doing in patents,
- and what we're doing in patents that we should be
- 16 doing in trademarks.
- I think we have got a lot of information
- 18 to share and that's why I had suggested that the
- 19 TPAC and PPAC sometimes meet so that we can share
- 20 ideas and see what more we can learn from each
- 21 other.
- In terms of key initiatives, you're

```
going to hear a lot about this, so I won't go
```

- 2 through the details on all of them, obviously,
- 3 reducing pendency is first on our list. But
- 4 equally important is a lot of the other work that
- 5 we're doing including IT modernization. I did get
- 6 asked about that yesterday as well.
- 7 It's really important. Congress knows
- 8 it's really important trying to figure out how we
- 9 can scale and do that more quickly with making
- 10 sure we're rolling it out in the right way. So,
- 11 trademarks did a phenomenal job on that. I know
- in the December timeframe, we were on the call
- daily for a while just to make sure that that
- 14 rolled out in the right way; and then, boost
- 15 trademark register protection.
- We also have fee setting authority
- 17 coming up which, as you know, because the TPAC
- 18 plays a key role in that, our public hearing is
- June 5th. So, anybody interested in being part of
- that, please do so.
- 21 With that, I just thank you for being
- 22 here. It's great to see you in person, and just

- 1 wish you success in the rest of the day. And
- 2 thank you for all you.
- 3 (Applause)
- 4 COMMISSIONER GOODER: Yep, okay, all
- 5 right. At this point, we can kick off the
- 6 business part of the meeting. Conference
- 7 services, if you could pull the slides up, please?
- 8 That would be great. Okay.
- 9 So, in terms of our agenda today, we're
- going to cover a number of things. But, generally
- speaking, we're going to talk about where we are
- 12 fiscal year-to-date. We're in the midst of fiscal
- 13 '23, and we'll talk about our business operations
- 14 so far this year.
- We'll get a financial update from our --
- 16 the Office of our Chief Financial Officer, and
- then you'll hear updates on operations on
- 18 registered protection on our petitions work, our
- 19 trademarks-related IT priorities, from the
- 20 Trademark Trial and Appeal Board, Office of Policy
- 21 and International Affairs, and the Office of
- 22 Government Affairs.

```
1 So, we've got a busy agenda and so with
```

- that we'll jump right in. And, theoretically, I
- 3 can't change the slides, right? All right. Okay.
- 4 I'm missing a graphic in our slide for some
- 5 reason, but I'll explain it to you. (Slide)
- 6 Essentially, what this shows is that with the
- 7 exception of fiscal '21, which had an enormous
- 8 leap in filings, which we have talked about a lot,
- 9 everybody is very familiar with. This year we
- 10 predicted to be sort of in line with our historic
- 11 curve. (Slide) But, as you'll see, with this next
- 12 slide, the ilings themselves have been since about
- last year on a fairly slow decline. So, for
- instance, we -- some of these people have equated
- it to a tire with a slight leak in it. It's not
- dropping off, but it is declining and that is
- something that we obviously watch very closely
- 18 because that's what generates the fees for what
- 19 drives the Agency.
- You'll hear more about that from Sean
- and Michelle in a little bit. We're watching it.
- We're not uncomfortable with it but watching it as

- 1 it does decline. It's entirely dependent on the
- 2 economy because trademarks, as many of you know,
- 3 are sort of a leading economic indicator, whereas
- 4 patents tend to lag behind the economy. So,
- 5 trying to predict the economy, to try and predict
- 6 trademark filings is a lot of art and a lot of
- 7 science, and our folks do a great job at that, but
- 8 they're just like the people reporting the
- 9 weather, they're always wrong half of the time,
- 10 probably.
- 11 So, anyway, we had a very big filing
- month in March, which was great but that's also
- 13 fairly typical to have a big month. So, we're
- 14 halfway through the fiscal year. We'll obviously
- keep watching how it goes. Where those
- applications are coming from is actually -- there
- 17 we go, now we appear to have this back -- there we
- go. (Slide) So, where applications are coming from
- is a really useful thing to look at. Because
- 20 whether the Agency, as a whole, filings are up or
- 21 down is only kind of part of the picture because
- we have people from over 200 countries who file

```
1 here, and what this slide shows you is a very top
```

- line of filings that come in from the U.S.
- 3 And you can see a lot of -- It's not a
- 4 straight-line affair. There is a lot of ups and
- downs during the year. You can send them around
- 6 the holidays; you can see them at the start of
- 7 lunar new year; you can see that as we go along.
- 8 So, the U.S. right now is -- has been up and down
- 9 but is kind of in an upturn. And the next line
- down, you can also see is China is going through,
- 11 after a fairly long period of shrinking filings
- has started to bounce back up.
- The third line down is Europe and it has
- 14 recently started to decline a bit in terms of
- 15 filings. The bottom two lines are Asia-Pacific
- 16 without China in it and the Americas without the
- U.S. in it, and they have stayed pretty much,
- 18 fairly flat.
- 19 That leads us to a kind of overall view
- 20 including the U.S. which accounts for about 64
- 21 percent of filings on a fairly consistent basis.
- 22 China is right around 14 percent, and Europe is

1	about 12, and then six and three for the remainder
2	of the world.
3	Now, what this also indicates is that
4	Director Vidal mentioned pendency and pendency is
5	a direct has a direct correlation to inventory.
6	And Dan Vavonese, who's Deputy Commissioner for
7	Trademark Operations, will talk in more detail
8	about both of these topics.
9	(Slide) The good news I will tell
10	you is that, as this slide shows
11	you, is that our inventory actually
12	is coming down and has been
13	consistently since it peaked
14	somewhere in the early fall, I
15	think somewhere around September,
16	and that's a really good sign.
17	But, like I say, Dan will go into
18	more detail about that.
19	(Slide) In terms of our staff, we
20	are, the slide says, early at 1100,
21	actually, as of Monday,
22	It's slightly over 1100 employees.

```
1 Forty new examining attorneys started in our
```

- 2 Trademark Academy and that's a one-year program
- 3 that trains them on how to be an examiner, and
- 4 then from there they move out into their offices.
- 5 So, we are just over 1100 now, and you can see the
- 6 breakdown in here between examining attorneys,
- 7 support staff, petitions and policy people,
- 8 register protection, kind of all of the different
- 9 areas in the Agency.
- 10 Interestingly, as we have done for
- 11 20-some-odd years, the Trademark Office was the
- 12 first component of the federal government to ever
- formally telework and started it 20 years ago,
- last year. And so, our examiners are literally
- 15 all over the country including, Hawaii, Alaska,
- and Puerto Rico. Where we don't have anybody is
- in the sort of upper Midwest, Montana, and
- 18 Wyoming, et cetera, and Kentucky, for some reason.
- 19 So, but right now about 90 percent of
- 20 the Trademark Office teleworks, to some degree, or
- 21 another. About 88 percent of that is what is
- 22 called the Telework Enhancement Act Program

- 1 (TEAP), where people live more than 50 miles from
- 2 the office. It's one of the things that helps us
- 3 recruit. It provides a great work-life balance
- 4 for our people. And, as we saw during the
- 5 pandemic, people are incredibly productive working
- 6 in this kind of virtual environment.
- 7 That's a bit about where we are in terms
- 8 of the nuts and bolts of the business side. I
- 9 want to turn it over and talk a little bit about
- 10 finance now. And let me introduce you to Sean
- 11 Mildrew, who is our Deputy CFO. And, Sean, I will
- 12 leave it to you.
- 13 MR. MILDREW: Thanks, Dave. It's great
- 14 to be here this afternoon enjoying it with TPAC.
- 15 I'm joined by my colleague, Michelle Picard, who
- is our Senior Advisor and Chief of Staff, in the
- 17 Office of the Chief Financial Officer, and
- 18 Michelle and I will tag team this presentation.
- 19 So, I'll give you overview and the
- status of fiscal year '23 and the budget for '24,
- 21 and Michelle will -- so, I'll set that up, and
- then Michelle will do some future gazing and let

- 1 you know what's on the horizon. Okay. (Slide) So,
- 2 our first slide here, really, the bottom line
- 3 upfront is that end of year trademark operating
- 4 reserve is projected to be \$183.5 million, which
- 5 is \$63.5 million above our minimum operating
- 6 reserve level and that's a good thing. So, that's
- 7 the bottom line upfront.
- 8 As you can see, this is a usual, the
- 9 typical chart that we present to both the PACs.
- 10 It shows our two business lines, the patent
- 11 business line, and the trademark business line.
- 12 And I'm going to focus on that middle column,
- which is trademarks. But if you add those two
- 14 together, you get that USPTO column. So that's
- 15 how this chart works.
- So, I'll start from the very top and
- just walk you through. So, our fiscal year '23,
- 18 which is the year that we're in right now, started
- October the 1st and ends on September the 30th.
- 20 Appropriations for trademarks was \$542.1 million,
- 21 and that was our President's request in the
- 22 President's budget from last year, Fiscal Year '23

```
1 President's Budget, Congress appropriated exactly
```

- what we asked for to the tune of \$4.2 billion for
- 3 the entire USPTO.
- 4 And since then, we've revised our
- 5 estimate. You can see on both, the patent and
- 6 trademark business line, our revenue has softened
- 7 over our estimate. And so, we've updated our
- 8 trademark revenue estimate twice, once in June,
- 9 last June; and then, once again, in December,
- 10 bringing it down \$66.5 million. So that's the
- 11 number in red in the parentheses, which gives us a
- projected end of year fee revenue of \$475.6
- 13 million.
- 14 So that's below the appropriated number
- 15 that we receive from Congress. So, keep that
- number in mind 475.6, and to that number to get to
- our total resources available, we add the
- beginning of the year operating reserve of \$217.6
- 19 million. So that was the operating reserve at the
- 20 beginning of this fiscal year. And we also add an
- 21 extra \$8.2 million to trademarks and that's the
- 22 amount that last year we collected over the

- 1 appropriation.
- 2 So, Congress gave us an appropriation
- 3 last year. We exceeded that with fee collections.
- 4 You can see both for patents and for trademarks,
- 5 just a little bit. For patents it was 23.5
- 6 million and for trademarks it was 8.2 million. We
- 7 get to receive and use those funds through a,
- 8 what's called a Reprogramming Request to Congress.
- 9 And it's basically a letter from the
- 10 Administration to the Congress saying, you gave us
- 11 an appropriation. We collected more than that
- 12 appropriation. We'd like to use those funds and
- 13 return them to our accounts.
- And so, it's just by -- it's a mechanism
- through a letter request, essentially, to the
- 16 Congress and that was just recently approved. So,
- 17 we've added that now to our available funds which
- gives us a total just over \$700 million, \$701.3
- 19 million of total resources available.
- 20 And our spend plan for this fiscal year,
- 21 for trademarks, is \$517.8 million, and you can see
- that number in red with the parentheses. So,

2	518, so keep that number in mind because I'll hit
3	it with another slide in just a moment or two
4	here.
5	So, if you take the total funds
6	available minus the estimated spend plan for the
7	fiscal year, you end up with an operating reserve
8	balance of 183.5. And you can see that number, as
9	I said, the good news is it's \$63.5 million above
10	our minimum operating reserve, but it is lower
11	than the number that we started with at the
12	beginning of the fiscal year, that 217.6. And
13	you'll see in a slide or two just how that
14	operating reserve works. And these numbers, by
15	the way, are as of February. Okay.
16	(Slide) So, the next slide, so that
17	517.8 or \$518 million spend plan,
18	that's that line, that green line
19	at the very top of this chart, and
20	just to give you some orientation.
21	So, this chart, the X-axis is the
22	months, starting with October 1st,

1 that's our spend plan. So, we round that up to

Τ	for this fiscal year, going all of
2	the way through September 30th,
3	month-by-month, showing spending to
4	revenue, and the spending is the
5	blue bar there and the revenue is
6	the red bar, and the Y-axis, is in
7	millions of dollars.
8	And you can see every month, we are
9	spending more than the revenue we're collecting.
10	And you probably are asking yourself, how is that
11	possible? You're spending more money than what
12	you're collecting. Well, it's the beauty and the
13	miracle of the operating reserve. That allows us
14	to continue on with normal business operations.
15	So that's just an insight into the ongoing fiscal
16	year mechanics here at the USPTO.
17	(Slide) Our next slide now focuses
18	on revenue, trademark revenue. And
19	remember that number that I told
20	you about, the appropriated number
21	for this fiscal year, \$542 million.
22	That's that line, that's that green

1	line at the very top of this chart.
2	And, as I mentioned, we have refreshed
3	our revenue estimates, once in June, and again in
4	December, getting us to that \$476 million number
5	that I mentioned on that previous slide. And when
6	we look at our 25-day moving average calculation,
7	we're actually looking at an end of year. That's
8	what the EOY stands for, end of year number for
9	revenue at about, even a little lower than our
10	revised number from December of \$463 million. So,
11	that would be about 2.6 percent or \$13 million
12	below our revised number from December timeframe.
13	(Slide) Our next slide, we'll take
14	a look at the operating reserve.
15	And so, this is about a
16	year-and-a-half of data here,
17	starting with October 1, 2021, and
18	going through to the February
19	timeframe. You can see that our
20	optimal operating reserve balance
21	is targeted at about seven months
22	worth of operations worth just over

1	\$300 million, and our minimum is
2	operating reserve balance is set at
3	120. That's that number that I had
4	mentioned previously.
5	And you can see from over the last
6	year-and-a-half, or so, we have been right sort of
7	in the middle of those two guardrails and that's
8	great. That's kind of where we want to be. We
9	don't want to be above the optimal. We don't want
10	to be below the minimum. We keep an eye on that.
11	That really is our safety net and our reserve to
12	weather any business cycle or economic changes.
13	And, as we look forward, our current
14	analysis shows at the end of February, a \$200
15	million operating reserve. But, as I said, our
16	spend plan will continue to spend that number down
17	and will get to probably around \$183 million that
18	was represented on that prior chart that I showed
19	you.
20	So, switching gears now, so that was
21	'23. We're moving now onto fiscal year '24. This
22	was the budget that was just submitted to the

1	Congress. And you can see the chart here shows
2	fiscal years on the X-axis, on the bottom there,
3	and millions of dollars on the Y-axis, and this
4	shows fee collections: The blue is patents; the
5	solid area there is actual collections; the shaded
6	area is projected; and the red, at the top, is the
7	trademark.
8	And you can see it's a general upward
9	trend, so the good news is that we're going to
L 0	we're forecasting and planning revenue increasing
11	year-over-year. Our total revenue projected is
L2	\$4.2 billion of which that fee collections of \$500
13	million for trademarks. Okay.
L 4	(Slide) Our next slide here is
L5	spending now. This is, gain, for
L 6	fiscal year '24, shows a total
L7	USPTO positions of 14,425 positions
L8	for a total spend of \$4.2 billion,
L 9	and trademark spend is \$555 million
20	of that. And you can see on the
21	pie chart that our total plan
22	spending of \$555 million for fiscal

1	year '24, 69 percent of that is
2	compensation and that's salaries,
3	and overtime, and benefits, and 31
4	percent is non-compensation costs
5	which are things, like, including:
6	Contracts, travel, training,
7	equipment, printing, and supplies.
8	And for on the horizon, I'm going to
9	turn it over to my colleague, Michelle Picard.
LO	MS. PICARD: Great, thank you, Sean.
11	Good afternoon, everyone. So, Sean took you
L2	through our current financial status, now I'm
L3	going to take you a little further looking ahead.
L 4	You'll see right there under the first section on
L5	this slide that our we're getting ready to
L 6	start our FY '25 budget formulation, so that we
L 7	started revalidating our budget for next year and
L 8	then we're updating our estimates that will take
L 9	us all the way into 2029.
20	That process ends with us submitting our
21	budget requests to the Office of Management and
22	Budget which is an arm of the White House and we

- 1 plan to do that in September. The other good news
- 2 on the horizon is we are getting close to
- 3 publishing our new strategic plan. We provided a
- 4 draft to the public and our employees to provide
- 5 comments a few months ago, and we're in the
- 6 process of finalizing all of those based on your
- 7 feedback.
- I want to thank those of you who took
- 9 the time to provide us the feedback because it
- 10 definitely helped us shape it into a better
- 11 document. We received some really valuable
- 12 feedback. We anticipate releasing the new
- 13 strategic plan later this spring, so kind of keep
- 14 your eyes out, it's close. We're getting there.
- 15 Sean, next slide. (Slide) So, the next thing on
- the horizon, which Kathi mentioned in her opening
- 17 remarks is fee setting. So, as Sean discussed in
- our '23 and '24 status, some of our costs are
- 19 outpacing our revenue, and our forecasts in the
- 20 President's budget show that this will continue
- 21 into the horizon for the reasons that Sean
- 22 mentioned, primarily, because our demand

```
forecasts, while our forecasts continue to show
```

- 2 growth, our growth is not as optimistic as we
- 3 thought it was going to be in our 2023 President's
- 4 Budget.
- 5 So that's taking a step back to make
- 6 sure that we're recalibrating our fee structure.
- 7 So, the good news is that, as Sean showed you on
- 8 this slide, the operating reserve is healthy
- 9 enough to sustain us until we go through and reset
- 10 fees. And so, let's -- I'm going to spend some
- 11 time just kind of talking a little bit about the
- 12 process, not the actual proposal.
- So, if you look at -- some of you may
- 14 have noticed that in the Federal Register we
- published and announced the fee setting hearing,
- as Kathi mentioned, it's scheduled for June 5th.
- 17 I would say that Federal Register Notice yesterday
- 18 was kind of like a save the date and more to come.
- 19 (Slide) So, if you look at the bottom of this
- 20 slide, I'm going to spend some time on kind of the
- 21 process. So, if you see in Stage 1, we have
- 22 already completed that. We have figured our --

- got our proposal together and we're just nearing
- into Stage 2; so that's our fee setting hearing,
- 3 that's the public review. And we're going to --
- 4 we will deliver our proposal to the TPAC.
- 5 We're planning the first, the beginning
- of May and that will be -- we'll be posting it on
- 7 both TPAC's webpage and our fee setting and
- 8 adjusting website and kind of if you -- the law
- 9 requires us to hold a hearing for 30 days after we
- 10 -- within the 30 days, we deliver the proposal to
- 11 TPAC, so kind of a spoiler alert, if you heard
- 12 that the fee setting hearing is on June 5th, and
- 13 you back up 30 days for that, we're kind of
- looking somewhere around May 8th, that that should
- 15 be coming out.
- So, keep an eye out for the trademark
- 17 alert. After we issue the proposal to the TPAC, we
- will definitely do an alert so that folks will
- 19 know where that is, where to find it on our
- 20 webpages, and evaluate the proposal. The other
- 21 thing you'll see in the Federal Register Notice
- that came out yesterday is all of the logistics

```
1 about how you could request to do an oral
```

- 2 presentation, or a witness at the hearing, and the
- 3 timeframes for submitting comments.
- I think our date is June 12th to get all
- of the comments in. So, you'll have plenty of
- time to evaluate the proposal once we post it.
- 7 And then, the other thing that I wanted to really
- focus on is, after the hearing is done the TPAC
- 9 will review all of the comments from the members
- of the public. They will issue a report on their
- 11 recommendation to the Agency, as to what we should
- do in the next stages of our fee setting. That
- 13 report will also be made available to the public
- 14 when that's done, and it will give us input, if
- 15 all of our timelines align, it will give us input
- 16 to be able to do the Notice of Proposed Rulemaking
- there in Stage 3.
- 18 And I just want to highlight that
- 19 because if you see Stage 4, that is the second
- 20 opportunity for the public to provide comments
- 21 into the fee setting process and into the
- 22 proposal. And I just really want to encourage

```
1 everybody to provide your comments to TPAC in
```

- 2 Stage 2; provide your comments to us in Stage 4,
- because the more lenses we see this through is
- 4 going to just really help refine the proposal and
- 5 make sure that we get the best fee schedule out
- 6 there that meets everybody's needs.
- 7 And then, you'll see Stage 4; 5 ends up
- 8 being where the -- I'm sorry -- 5 and 6, where the
- 9 final rulemaking happens and there is a
- 10 Congressional comment period. All of this takes a
- 11 bit. It's a very long process, as we published in
- our 2024 President's budget, we're anticipating
- 13 fee changes happening in fiscal year 2025, and
- that aligns with when we look at our forecasts
- that we're in that FY '24 President's budget.
- So, from a financial position
- perspective, we feel like all of these things are
- 18 aligning at the right time, and will be nicely,
- and until then I think we can continue operations
- 20 with -- in trademarks to meet some of the
- 21 priorities that they have already talked about was
- like, pendency, and some of the other things that

- we're working on.
- 2 I think that is the end of -- that
- 3 summarizes the process. And I think -- am I
- 4 turning it back over to Dave?
- 5 MR. MILDREW: Take any questions.
- 6 MS. PICARD: Oh, any questions, if
- 7 anybody has? Yeah.
- 8 MS. BROWN: I have a quick question,
- 9 Michelle.
- 10 MS. PICARD: Sure.
- 11 MS. BROWN: Just in relation to the
- 12 opportunities for the public to give comments and
- 13 feedback, I assume there will be clear directions
- in how, where -- where and how they --
- 15 MS. PICARD: Yes.
- MR. MILDREW: -- can submit those to
- both us, as well as to you?
- 18 MS. PICARD: Absolutely, in the notice
- 19 that published yesterday, there is an email
- 20 address and how you submit the comments, and you
- 21 actually submit them through the Federal
- 22 eRulemaking portal, and then all of those will be

```
1 compiled.
```

- 2 MS. BROWN: Perfect, thank you.
- 3 MS. PICARD: Sure, hi.
- 4 MS. FREDERICKS: So, this is Jomarie
- 5 Fredericks. With respect to the whole debt
- 6 ceiling issue that we have been hearing about so
- 7 much about, how will that affect the USPTO?
- 8 MR. MILDREW: Oh, you want to give that
- 9 one to me, huh, Michelle? Okay. I see how this
- 10 partnership rolls here, tag on that great
- 11 question. (Laughter) I'm glad you asked it.
- 12 It's been certainly in the news recently, and I
- 13 think the best way I can answer that question is
- 14 to say, it's not just a USPTO issue or problem.
- 15 It really is a United States government issue and
- 16 problem.
- 17 And I think if I have the numbers
- 18 correctly, I think we -- that Congress has
- increased the debt ceiling up over 70 times since
- this mechanism came into effect and each time it
- 21 was raised. Because the risk of not raising it is
- 22 to default of the good credit of the United States

```
1 government and that would really harm, not only
```

- 2 our country, but all of our industry and
- 3 businesses and so I don't think anybody wants to
- 4 do that, that's the good news.
- 5 There is enough time for Congress to
- work out an agreement with the Administration and
- 7 we believe that that's what happen is that there
- 8 will be an agreement on raising the debt ceiling
- 9 so that that the government can continue its
- 10 operations and not default on its debt.
- 11 And, but again, it's a much broader
- issue than just a USPTO issue. And as of today,
- we have received no instruction from the Treasury,
- 14 who really is the Agency, the Department Agency
- that's responsible for managing the government's
- 16 macro accounts. And so, they would inform
- 17 agencies of priorities for paying additional debt
- 18 should we default.
- 19 And, again, I don't think that will
- 20 happen. It certainly hasn't happened in the last
- 70 plus times in the past, and we assume that
- there is enough time that a negotiated deal will

- 1 be worked out. Thank you for the question though.
- 2 MS. FREDERICKS: Thank you, and fingers
- 3 crossed, too.
- 4 MR. MILDREW: (Laughter) Yeah. Yes.
- 5 MR. ENNS: Sean, if I could, and
- 6 Michelle, first, as Chair of the Finance
- 7 Committee, which means I'm in charge of asking
- 8 dumb questions of you guys.
- 9 MR. MILDREW: (Laughter)
- 10 MR. ENNS: I really want to compliment
- 11 both of you and your team --
- MR. MILDREW: Rod, could you move the
- 13 mike closer?
- MR. ENNS: Oh, sorry.
- MR. MILDREW: Yeah, great.
- MR. ENNS: Is that better? Okay, great.
- 17 I really want to compliment both of you and your
- 18 team on the -- not only the command you have of
- 19 the subject matter, but your great skill in
- 20 communicating it to us laypeople who are mainly
- 21 trademark lawyers. So, we don't do finance as our
- 22 first job, right. And so, I really appreciate the

- 1 handholding and the insights that you're able to
- 2 give us.
- I wanted to ask, you know, just as a
- 4 layperson at first glance, looking at the
- 5 financials that Sean, you just presented, you kind
- of see, well, filings are under plan; operating
- 7 reserve is going to lose, you know, 65 million by
- 8 current projections. My first reaction is, should
- 9 we panic? And I think I have learned from you
- 10 this week, the answer is no.
- 11 MR. MILDREW: That's the right answer.
- 12 (Laughter)
- 13 MR. ENNS: Thank you. And I thought it
- 14 might be helpful if you could just explain a
- 15 little bit more of the tools that we have. And I
- think these kind of events are not unanticipated,
- is what I'm saying. But so what levers do we have
- 18 to be able to manage, as we go forward, when
- 19 things trend like that?
- MR. MILDREW: Well, thank you for your
- 21 kind remarks. I really appreciate that. And I'm
- going to tag Michelle for this one. How about

```
1 that? (Laughter) You see how this works?
```

- 2 MS. PICARD: Surely. I think the key
- 3 tool during this kind of just financial changes,
- 4 one of the things that, you know, all IP offices,
- 5 including the trademark business area is just,
- 6 it's volatile. It follows business cycles. It
- 7 follows the economy, and we know that.
- 8 And over time we have really matured our
- 9 financial sustainability through the operating
- 10 reserve, having fee setting authority, all of
- 11 those things so that, you know, you look back 20
- 12 years ago, things like this happened and, you
- 13 know, we stopped spending this, we stopped doing
- 14 IT, we didn't hire, we let the back -- because we
- didn't have the tools. And, today, that operating
- 16 reserve has just allowed us to kind of slow and
- steady, you know, keep the course on our key
- 18 goals.
- Does that mean that we're going out and
- spending, you know, unnecessarily? No, it doesn't
- 21 because we do want to conserve. We do want to --
- 22 we don't know what future is going to be, so we're

```
1 being very diligent about our spending and our
```

- 2 plans, and we monitor our fees coming in every
- day. We're reforecasting every day, looking at
- 4 all of this and just -- so I think that's why when
- 5 we look at that, it's like, ooh, it sounds really
- 6 scary, but I think the key thing is, we have this
- 7 operating reserve and it's doing its job.
- 8 We had put it in place, we have minimum
- 9 levels, we have optimal levels, and we manage to
- 10 those to keep within this kind of framework, and
- 11 the minimum level when it starts approaching that
- that's where we go, okay, I think in the future we
- 13 need to start adjusting fees to make sure that it
- doesn't go too far.
- 15 And if you look in our 2024 President's
- Budget, the trend is about 2025, is where we're
- going to be approaching minimum. So that's the
- 18 time when we're like we should adjust our fees and
- make sure that we're getting ourselves back on the
- 20 right trajectory. So, I think between the
- 21 operating reserve and fee setting authority those
- are the two really key tools that are keeping us

- 1 operating right in that sweet spot and allowing us
- 2 to continue to execute on our long-term decisions.
- 3 Thanks for the question.
- 4 MR. ENNS: Thanks very much.
- 5 COMMISSIONER GOODER: Any other
- 6 questions on the finance part? Okay. Thank you
- 7 all very much, we appreciate it. Next, we're
- 8 going to turn the stage over to Dan Vavonese, who
- 9 is our Deputy Commissioner for Trademark
- 10 Operations. That's the part of the Trademark
- 11 Office that examines applications, deals with
- everything post-registration, and all of that.
- So, Dan, I'll turn it over to you.
- MR. VAVONESE: Good afternoon, happy to
- 15 be here today. I'm going to take a few minutes to
- 16 go over trademark operations and kind of give a
- 17 status update on where we are. So, first, a quick
- 18 reminder, on our five strategic goals that we
- 19 have, first Action pendency and disposal pendency.
- 20 That's time from filing of the
- 21 application to either the First Action that's sent
- 22 out, the first determination on the case, and

```
1 disposal, which is either registration or
```

- 2 abandonment of the application, as the final
- 3 disposition of the application.
- 4 So, our goals for this year are
- 5 eight-and-a-half months and 14-and-a-half months,
- 6 respectively; and then in the quality area, we
- 7 have three goals. We have first action
- 8 compliance, and disposal compliance, again, same
- 9 measures for at the beginning and at the end of
- 10 the examination of the application. Compliance
- is, did we make the right decision on the case?
- 12 And then, exceptional Office Actions is
- a holistic view of the entire Office Action: Did
- we not only make the right decision on the case?
- Did we give a well-detailed explanation? Did we
- 16 provide the right amount of evidence in the level
- of the search that was done in the case itself?
- 18 So, I'm going to start with quality.
- 19 I'm happy to report that mid-year, we are
- 20 well-exceeding all three of our quality goals,
- 21 both in compliance and we're at 97 percent and
- 98.6 percent respectively, so we are doing a very,

- 1 very good job on the compliance part of making the
- 2 right decision on the case.
- And then, exceptional Office Actions,
- again, we're at 57.5 percent, and exceptional
- 5 Office Action is well -- well in excess of that 50
- 6 percent goal that we're shooting for. So, I want
- 7 to thank all of our employees for just putting out
- 8 such a high-quality work product, which I know our
- 9 customers really appreciate and what they're
- 10 receiving from the office.
- So, let's move on to pendency where
- obviously we've been in a challenge the last few
- 13 years after the surge and trying to catch up, and
- 14 with the goals of eight-and-a-half months and
- 15 14-and-a-half months, respectively, we are exactly
- on eight-and-a-half months and 14-and-a-half
- months, respectively and this is average monthly
- 18 pendency.
- 19 I'll explain a little bit more about
- 20 that in a minute. But, as you'll see, the trend
- 21 that's been up over the last couple of years, we
- 22 are stabilizing. We're stabilizing around that

```
eight-and-a-half month and 14-and-a-half month,
```

- 2 and we are hoping that the trend is going to start
- 3 to show down, start to move downward. And in the
- 4 next couple of slides, I'll explain why we think
- we're moving in the right direction. (Slide) So,
- 6 as Commissioner Gooder said about the inventory,
- you know, we had a peak in September of 2022,
- 8 where we were up around -- over 550,000, closer to
- 9 555,000 new application classes. An unexamined
- 10 application inventory is all of the applications
- 11 that have been -- since the filing date until that
- 12 first office action goes out, that's how we
- 13 measure the inventory.
- 14 So, since September, we have seen almost
- a seven percent drop in our inventory. So that's
- 16 good news. We are staying ahead of filings that
- are -- enough ahead of the filings that are coming
- in, and we are starting to see it trend downward
- in our total inventory that's in the backlog.
- So, that's a direction that we obviously
- 21 want to keep moving on, and this goes into a
- 22 little more detail. It's similar to the slide

```
1 that was shown earlier with the three months
```

- 2 trends and seven-day trends. This is how many
- filings are coming in the door versus how many
- 4 first office actions are going out the door, and
- 5 the only way you actually start to cut into the
- 6 backlog is when you're putting more work out than
- 7 you're receiving in.
- 8 And the trend definitely most recently,
- 9 especially over the last six to nine months has
- 10 been a good trend downward and that this is just
- showing the amount of applications coming in each
- month versus the number of first Office Actions
- going out each month.
- So, comfortably, we have been seeing
- that trend downward and that gives us some hope
- 16 that the inventory will continue to drop and once
- we get though some of the aged applications in the
- 18 backlog, we will start to see a drop in pendency,
- 19 but it will -- as I have said before, it will
- 20 continue to take time. (Slide?)
- So, for current processing timelines,
- one thing I want to focus on here is, you know, I

```
1 have mentioned in several other TPAC meetings, we
```

- 2 continue to update all of our processing times on
- 3 our website. And while we talk a lot about first
- action pendency and disposal pendency, the surge
- 5 and the rise in filings across the board have
- 6 impacted not only first actions and disposals, but
- 7 all areas of our office.
- 8 And, you know, our Trademark Services
- 9 Unit, which handles all of the filings that come
- in and out the door, they're the ones that are
- 11 keeping up with all of that work, and new
- 12 application processing, responses to office
- 13 actions, Madrid filings, Statements of Use, and
- 14 post-registration maintenance filings.
- They are the ones that are keeping up
- with all of that work that's coming in and out.
- 17 And, you know, I want to thank them for keeping
- 18 up. Because, especially in post-registration,
- just like you have seen the surge in the
- 20 applications, we continue to see increases in
- 21 maintenance filings as well.
- 22 And, you know, the good news in

```
post-registration, especially as we have 10 new
 2
       specialists coming on in the next two weeks, so
       we're getting more help coming in to help with
       that as well. And, you know, again, they do a
       tremendous job across the board throughout
       Trademark Services to keep up with our work.
 6
       we continue to update those processing times on a
 8
       monthly basis, so you can check there to see where
       the other -- where those areas are keeping up.
10
                 The other thing I want to point out is
11
       with first actions and disposals. eight-and-a-half
       months and 14-and-a- half months, that is our
12
13
       strategic metric is based on average months
14
       pendency. It's the average in the dates of the
1.5
       files that are being sent out for a first action
16
       to disposal. That timeframe is always a little
17
       different than the actual files that are on the
       examining attorney's desk because of how we have
18
19
       some Madrid filings that catch up to the front
20
       because of their older dates. We also have some
       other files that are connected together because
21
```

for the same applicant for consistency purposes.

1

```
So, we thought we were getting a lot of questions about the -- it's not really
```

- eight-and-a-half months, it's more like
- nine-and-a-half months. So, we're setting up a
- 5 new tracker on our website that's going to be a
- 6 measure that's going to show a two-week timeframe
- 7 of the applications that are generally on the
- 8 examining attorney's desk.
- 9 And I don't have a graphic for it yet
- 10 because we're still working on it. It's going to
- 11 be out in a couple of weeks. But, again, this
- shows the similar trend downward in the currently
- 13 processing age of the new application. These are
- 14 the first office actions that going out.
- 15 And that date there, because we have to
- 16 send these files in a little -- the slides in a
- 17 little early. That's actually been updated. We
- are now at June 30th to July 14th, and the hope is
- 19 that we continue to catch up on that and get those
- timeframes even cut down even further. So, stay
- tuned on our website, probably in the next month
- we're hoping for, we should have that information

```
1 and that will help allay some questions that
```

- 2 people have. They have often call into our
- 3 Trademark Assistance Center, so this will help,
- 4 you know, resolve some of those questions that are
- 5 coming out. (Slide?)
- 6 On the examining attorney's staffing
- 7 side, you know, so FY 2023, we have hired 87
- 8 examining attorneys. And as Commissioner Gooder
- 9 mentioned, we just hired 40, as of Monday of this
- 10 week, so welcome to them, and we'll get them
- 11 caught up on the job.
- 12 And the Trademark Academy that I have
- 13 mentioned before, this is now our fourth class
- 14 hired into the trademark Academy and, basically,
- it's a way to streamline and be more consistent in
- the training of all our examining attorneys coming
- in for that first -- for, you know, within the
- 18 first year of their job.
- 19 And it's been very successful so far,
- and we're continuing it. So, that's good news
- 21 that we are continuing to move into that progress.
- 22 Also, on the Trademark Modernization Act, a couple

- of reminders here. We did institute three-month
- 2 flexible response periods for the pre-registration
- 3 responses to office actions in December and that
- 4 has been pretty smooth.
- I mean, we are in that -- we're almost
- at the end of that time period where we overlap
- 7 between the old six-month response periods and the
- 8 new three-month response periods. By June, we'll
- 9 be past that overlap. And, you know, we have seen
- 10 an increase but we're obviously dealing with it.
- 11 And then the second phase of the three-month
- 12 flexible response periods is for post-registration
- and that's currently slated for October of 2023 to
- switch to three-month response periods for
- post-registration. (Slide?)
- The last thing I want to mention, you
- 17 know, we have talked a lot about what do we do to
- help with pendency? What do we do to help
- internally in our process? And over the last few
- 20 months, we have been having a lot of internal
- 21 discussions to look at examination efficiency,
- 22 especially the process that the examiner tries to

```
1 handle, to go through their applications.
```

- 2 As you saw earlier, we have several
- 3 quality measures including an exceptional office
- 4 action. Well, the exceptional office action
- 5 requires a lot more work to get those -- to put a
- 6 lot more work into that first office action. So,
- 7 we are looking at that and we're trying to balance
- 8 our pendency and quality expectations.
- 9 We know that our customers want that
- initial determination as soon as possible. So,
- 11 how do we balance that; how do we balance and
- 12 still make sure we're getting the information; how
- 13 to resolve the issue if there is a refuse or
- 14 otherwise; but to get that determination out there
- 15 quicker and easier.
- I have listed a few of the different
- topics that we have been talking about so far.
- 18 want to point out specifically, the identification
- 19 process. We have been, you know, we have the
- 20 difference between TEAS Plus and TEAS Standard.
- 21 TEAS PLUS, you have to take an ID out of our
- 22 acceptable identification of goods and services

- 1 manual. TEAS Standard, you do not have to do that
- 2 although sometimes our customers still do take IDs
- 3 out of the manual.
- 4 It's a ton of work for our examining
- 5 attorneys to go through custom IDs, determine
- 6 which ones are acceptable or unacceptable, and
- 7 then to come up with suggestions for when they
- 8 don't know what the Applicant's doing, they're
- 9 often taking guesses.
- 10 So, we're looking very closely at that
- of the process and how we can be more efficient,
- and then I'm just going to put out the call right
- 13 now. Because, you know, we often get questions
- 14 how, you know, from customers, okay, how can I
- help? How can we help on this?
- 16 Identifications is one place where we
- can really use the help, you know. I guess one
- 18 way, the easiest way to say it is, look at the ID
- 19 manual first, you know. If you can look at the ID
- 20 manual first, if that can't give you the
- 21 identification you want then we understand. But,
- you know, hopefully, if you can give us IDs out of

- the manual, they're already pre-approved; they're
- 2 already accepted.
- It's that much less work to go through
- 4 the administrative part of the determining the
- 5 acceptability. But also, it also allows us to
- 6 make our analysis, streamline our analysis because
- 7 we're not trying to guess what the goods or
- 8 services are because we have a clear
- 9 identification of the product or service that
- 10 you're applying for. So, just a quick callout on
- 11 that, you know, we appreciate any help we can get
- 12 on that.
- 13 COMMISSIONER GOODER: And if you don't
- 14 see the goods and services you want, submit a
- 15 request for them?
- MR. VAVONESE: Yes, so the other thing,
- 17 TMID suggests is another option that's right, we
- have an email box, since there are IDs that are
- 19 not in the manual. You can always make a request
- into that mailbox, and they can work with you on
- 21 whether, okay, this is an ID that should be
- 22 accepted, or more likely, well, here is an ID

- that's already in the manual that really more
- 2 closely matches, you know, what you're looking
- 3 for. Thanks for that reminder.
- 4 COMMISSIONER GOODER: So, Dan, thank you
- 5 very much. It's a very challenging time right
- 6 now. I know we have been asking you, you know, do
- 7 your best and it looks like the pendency issue is
- 8 starting to maybe flatten, now to have plateaued.
- 9 So, let's hope that there is no other unexpected
- 10 increase.
- 11 One question about the identification
- 12 process. If you could share with us how you
- 13 measure this as being, you know, how should say
- it, effecting the efficiency, you know, creating
- 15 -- how do you measure or determine that this is
- taking a lot of time out of the measuring factors?
- 17 MR. VAVONESE: It's because our
- 18 examination process is already very streamlined.
- I mean our examining attorneys do a lot of work on
- 20 the application in a short amount of time, you
- 21 know. That's how our system works. So, we don't
- 22 have like measures down to, okay, this is how much

```
1 time it takes on particular issues, but what we
```

- 2 have, you know, in our discussions with the
- 3 examining attorneys.
- 4 And you can, you know how much time
- 5 you're spending to go through a -- whether it's a
- 6 very long ID and we've -- and I think we have
- 7 talked about that in the past. We have long IDs
- 8 that take an inordinate amount of time, that could
- 9 take hours and hours just to go through a long
- 10 identification, and especially on an international
- 11 application or otherwise.
- But the other thing is by, you know,
- 13 talking through and, you know, we have tools that
- 14 help match up similar to the identification
- 15 manual. But we are able, just through discussions
- 16 with our employees, to understand how much time
- they're actually spending on each identification.
- Because they have to go through each
- one, indicate whether it's acceptable or
- 20 unacceptable, and then come up with a suggestion,
- 21 if possible, because they're trying to help move
- the application along so that the applicants can

- give us a response back, you know, and get us
- 2 moving forward to approval hopefully.
- CHAIRMAN CHO: Thank you, I understand
- 4 that. I guess another point is that I thought you
- 5 all did this -- and it gives you one piece of
- 6 information, you look at your office actions,
- 7 right, how many are having IDs?
- 8 MR. VAVONESE: Yes.
- 9 CHAIRMAN CHO: Within the IDs, how many
- 10 are there that are lengthy ones?
- 11 MR. VAVONESE: Yeah, right.
- 12 CHAIRMAN CHO: So, I imagine that's
- 13 something you all would also --
- MR. VAVONESE: And we have 10 foreign
- paragraphs, so we're able to measure the number of
- office actions that are going out with those
- identification issues, yes. Yeah, Jomarie.
- MS. FREDERICKS: Hi, Dan. I mentioned
- 19 this the other day, but I do -- my company does a
- lot of non-traditional services claims, and we've
- 21 actually found the help that the examiners are
- 22 able to give to be invaluable. I understand that

```
1 it takes a lot of time, but for us it's not
```

- 2 usually really a shot in the dark. It's more of
- 3 taking what we have given them, and then showing
- 4 us a different direction that would be acceptable.
- I know you're in the process of, you
- 6 know, considering fee raising, is there maybe
- 7 there could be an additional charge for this
- 8 service, if it's not just a cookie cutter
- 9 response, something like that. I don't know if
- 10 you have considered it. But rather than having
- 11 the service go away all together, which sort of
- 12 gives me a sense of panic, because sometimes I
- just don't know what you're looking for.
- 14 As we have talked about, then you're
- just going to get a phone call, right, and that's
- going to take the examiner time as well. So, it's
- just a thought. I'm sure you have considered
- 18 various options.
- MR. VAVONESE: Yeah, I mean, we're
- 20 considering various options, and I'm not -- don't
- 21 take from this that we're taking it out of the
- 22 process. But, I mean, we are considering all

- options. I mean, obviously, this is an important
- 2 part of the examining attorney's job is working
- 3 with the Applicants to come up with an
- 4 identification where it's, especially what you're
- 5 talking about.
- 6 Services are more difficult. You know,
- 7 they're not as easy to just, okay, this is a clear
- 8 product, you know. So, sometimes that work that
- 9 we have to go through is necessary anyways. But,
- 10 yeah, we're looking at all options and will
- 11 continue to do that.
- MS. BROWN: Thanks, Dan. It's me right
- 13 here, Adraea. You know, I do appreciate the
- 14 updates on pendency. Obviously, it's an issue
- that you have been tackling. I know we ask a lot
- of tough questions about it almost every quarter
- 17 when we speak, and I think the idea of
- 18 collaboration and asking for support certainly
- makes a lot of sense. And to borrow a page from
- Dana's book, you know, how can we help, right, or
- 21 how can -- is there a way that the public can
- 22 help, like, you know, that we could potentially --

- I know that IDs are one part but, you know, ideas
- or thoughts, or something like that, is that
- 3 something that the office would be open and
- 4 welcoming, like, if we have any -- or the public
- 5 has any ideas as well for how they could help or,
- 6 you know, what could be done?
- 7 MR. VAVONESE: Oh, very much, you know,
- 8 I mean, we'd love any help, and we can -- you
- 9 know, whether we can figure out other ways to get
- 10 together with our stakeholders to get ideas. You
- 11 know, I mean, my email address is on the slides.
- I am always happy to take any suggestions and we
- have I forget what the general TM. Is it TM
- 14 suggestion now? I forget what the latest -- no,
- just the general suggestion, if you want to in --
- 16 the public wants to send in comments.
- MS. BROWN: Okay.
- MR. VAVONESE: We have a general email
- 19 box, too, that where customers can send in
- 20 suggestions as well.
- MS. BROWN: Got it, okay.
- MR. VAVONESE: -- regarding our process.

- 1 But I'm happy to take anything as well.
- MS. BROWN: That's awesome. Okay, so
- 3 everyone can email Dan, as much as -- no, I'm just
- 4 kidding.
- 5 (Laughter)
- 6 MR. VAVONESE: Not all at once, but yes.
- 7 MS. BROWN: So, yeah, within reason.
- 8 But, of course, you know, we're still having our
- 9 TPAC meeting. So, if you have questions or just a
- 10 reminder, right, or ideas even right now during
- 11 the meeting don't hesitate to email us at
- 12 TPAC@uspto.gov. So, yeah, thank you.
- 13 MR. VAVONESE: Thanks.
- 14 COMMISSIONER GOODER: Anything else for
- Dan? (No response) Okay, thank you, sir. All
- 16 right, sir. All right. We're going to pass the
- microphone and the remote, otherwise known as the
- 18 clicker, down to Greg Dodson, who is our Deputy
- 19 Commissioner for Trademark Administration.
- 20 MR. DODSON: I see that Michelle left.
- So, Sean, if I need to phone a friend, I'll just
- 22 hand the microphone to you, as well, so, okay.

```
1 Well, good afternoon, everybody and welcome. It's
```

- 2 great, again, to be virtual -- or not virtual,
- 3 totally virtually, it's great to be hybrid with
- 4 some people in the room and I just love it. So,
- 5 welcome.
- I have got a pretty easy job today. I
- 7 get to hand the microphone off to my colleague,
- 8 Glen Brown, who is the Group Director for
- 9 Information Technology, and he's going to kind of
- 10 unpack a little bit of what we're doing on the IT
- 11 front, but I just wanted to set the stage for a
- moment just to kind of get everybody in the same
- 13 place.
- 14 You know, it's when we wake up and come
- to work on Monday morning, it's going to be May.
- And it was a year ago in May, in 2022, that we
- 17 started the conversation about retiring TRAM. If
- 18 you had been following along prior to the
- 19 pandemic, and then during the pandemic, you'll
- 20 know that you might have heard the term "TRAM,"
- 21 but you would have heard a lot of other things in
- 22 front of TRAM and you might have -- you might

```
1 remember the conversation with the big rocks.
```

- 2 And as the Commissioner used to like to
- 3 say, we were crushing the big rocks. But TRAM
- wasn't really one of the big rocks. It was at the
- 5 end of process and TRAM was going to be ultimately
- 6 retired in the summer of 2024, when really all of
- 7 the other capabilities were brought online.
- 8 And I know Glen doesn't like me to
- 9 characterize it like this, but I do. We were
- 10 going to kind of make TRAM obsolete by having a
- 11 bunch of new stuff that we were going to develop
- and just kind of all of a sudden at the end of the
- 13 road, TRAM was going to be there, and we weren't
- 14 going to need it any longer.
- It was May, like I said, of last year,
- 16 when the Commissioner David Gooder and our CIO,
- Jamie Holcombe, stated having some serious
- 18 conversations about whether we were going to
- 19 re-strategize the IT program and the entire
- 20 process. And, ultimately, by July of last year,
- 21 they agreed that we would put TRAM at the front of
- the line and work to retire that first. And you

- 1 can imagine over the course of the many years that
- 2 we had kind of been working to develop things like
- 3 trademark examination, and some of the other tools
- 4 that exist right now, that reprioritizing was a
- bit of an emotional event for a lot of people.
- 6 But credit to all of the folks that we
- 7 have working on this process to be able to
- 8 internalize that and work with. And I just want
- 9 to call out a few folks. We've got, at the end of
- 10 the table down there, the two presidents of our
- 11 bargaining units.
- 12 And, you know, with the help of Mr.
- Besch, who works with the help of the examining
- 14 attorneys, we were able to gather a whole bunch of
- 15 the requirements that we needed in order to
- develop a trademark examination.
- Mr. Ross, many of his Bargaining Unit
- 18 employees work for us in the form, on the IT side
- of the house. His business analysts are the
- 20 interlocutors between the people that develop the
- 21 requirement and the people that actually turn that
- 22 into IT. And so, they sit in a really, really

```
1 important spot within this process.
```

- And, you know, we couldn't have got Dan,
- 3 you know, likes to callout the folks on his team,
- and rightfully so. We have a lot of people that
- 5 do a lot of really, really, really good work.
- 6 Most of the IT people that work for us, for Glen,
- 7 who you're going to meet in just a moment, are
- 8 NTEU 243 members and they're deeply engrained and
- 9 involved in this process; and then, and as we work
- 10 to develop these capabilities, obviously, we
- 11 certainly rely on the work that they do.
- So, I want, you know, as we get really,
- 13 really close, you know, in July of last year, or
- 14 September of '24, seemed to be like far enough in
- 15 the distance, you know, remember when you were a
- 16 kid and you started school and summer vacation
- seemed like, oh, my god, I'm never going to there?
- Now that when you get a little bit
- older, it's all of a sudden summers kind of come
- 20 pretty quickly and so we're five months away from
- 21 the retirement of TRAM, and that is a serious
- credit to a lot of the people. And I wanted to

```
1 just kind of call that out before I handed the
```

- 2 microphone over to my good buddy, Glen.
- But, with that, unless there are any
- 4 questions for me -- oh, the other thing that I
- 5 wanted to say real quick is -- because I looked
- 6 over at Adraea and I was like, oh, yeah, I
- 7 remember now. You know, we used to -- I was never
- 8 a Marine, but there used to be a thing that we
- 9 used to do once a month and then we had a
- 10 subcommittee for IT, and it was kind of like a
- 11 crucible for us on the IT side of the house,
- 12 right.
- 13 We would gather with our CIO colleagues,
- and we would sit down in a room and at our TPAC,
- 15 IT Subcommittee folks would grill us and they'd
- ask us a bunch of hard questions. And I want to
- say that we don't do that anymore, and I
- 18 appreciate that you guys.
- 19 Because one thing, it does two things
- 20 for us: Number one, it really kind of gives us a
- level of confidence that we're doing our job
- 22 correctly because the reason that we had this IT

```
1 Subcommittee, and we did some of these things was
```

- 2 that IT wasn't really performing too terribly well
- 3 in the beginning.
- 4 And I think from our perspective, you
- 5 know, the fact that you felt like we could stand
- 6 down the IT Subcommittee really makes us kind of
- 7 happy, you know, not -- because, one, we'd have to
- 8 do all of the work that we were doing before to
- 9 kind of feed the request, but at the same time it
- gave us a real vote of confidence that we were
- 11 doing a good job.
- 12 And so, I want to just kind of call that
- out. All right. So, if there --
- MS. BROWN: We miss you though, Greg, we
- do miss you.
- 16 (Laughter)
- 17 MR. DODSON: Yeah.
- MS. BROWN: So, we won't have to -- we
- 19 miss you.
- MR. DODSON: Not that much though,
- 21 right?
- 22 (Laughter)

```
1 MS. BROWN: A little.
```

- 2 (Laughter)
- 3 MR. DODSON: No, but, actually, we like
- doing that. It kind of kept us -- you know, one
- of the things that it forced us to do was to put
- 6 things down on paper that were sometimes just kind
- of out there. And so, but, yeah, we'll -- if we
- 8 ever need to do it again, we could always stand it
- 9 back up.
- So, if there are any other -- aren't any
- 11 questions for me, Glen, are you online?
- MR. BROWN: I am. Can you all hear me
- 13 okay?
- MR. DODSON: All right, Glen, over to
- 15 you, thank you.
- MR. BROWN: Okay, good. All right. So,
- 17 could we get those slides advanced to, I think
- it's slide 40 we're up to at this point -- (pause)
- 19 -- and you can just do one more. Oh, great, he's
- got the clicker, good deal.
- 21 (Slide) So, Trademark IT
- 22 Priorities, next slide

```
1 Please. There you go, right here.
```

- 2 (Slide) So, Trademark IT priorities, I'm going to
- 3 kind of walk you through what our IT priorities
- are. We brief these out the last time, so this is
- 5 -- and maybe the time before -- but it's just kind
- of to recap in case folks, you know, just need a
- 7 reminder, or anybody new on the phone, but you're
- 8 on the call.
- 9 We, basically, said TRAM, the TRAM
- 10 mainframe retirement, you know, that's the 40 plus
- 11 year old TRAM Mainframe, as to get off of that
- mainframe, you know, by September 2023, that's our
- 13 number one priority. So that kind of (inaudible)
- of work that we were going to do about, you know,
- nine months ago, or so, but were committed to
- getting off of it by September of 2023.
- The second big priority is, you know,
- 18 also modernization of our TM exam.
- 19 CHAIRMAN CHO: Glen, Glen, sorry.
- 20 MR. BROWN: And you'll --
- 21 CHAIRMAN CHO: Let me interrupt.
- MR. BROWN: Yeah, sure.

```
1 CHAIRMAN CHO: Glen, we're having
```

- 2 trouble on your mike.
- 3 MR. BROWN: Oh, okay.
- 4 CHAIRMAN CHO: I mean, you're coming in,
- 5 but it's not as clear and loud. I am too loud.
- 6 (Laughter)
- 7 MR. BROWN: Was it, you said it was too
- 8 loud?
- 9 CHAIRMAN CHO: No, I'm too loud.
- 10 (Laughter)
- 11 MR. BROWN: How do I sound now? I moved
- the mike a little closer to me?
- 13 CHAIRMAN CHO: Better, much better.
- MR. BROWN: Okay, good deal. All right,
- sorry about that, and thanks for the feedback.
- So, again, TRAM mainframe retirement is the number
- one priority, followed by TM exam modernization,
- and the four slides I'll show you some of the
- 19 progress we have made on each of these.
- 20 We're also going to continue with the
- 21 Trademark Trial and Appeal modernization work
- 22 because they're in the middle of modernizing as

```
1 well. They have a team devoted to do network. We
```

- 2 also wanted to make sure that we supported
- 3 trademark, any international treaty obligations is
- 4 our number five priority.
- 5 And the last one on the list, on the
- 6 bottom right of this slide, you'll see that we're
- 7 also need to replace our search system, the
- 8 backend search system, which is currently based on
- 9 BRS Open Text, the vendor is basically no longer
- 10 around to support the product, so we need to be
- off of that by the end of September, as well.
- 12 (Slide) Next slide, please. All right. So, this
- is just instead of a recap of what we did to
- 14 basically focus on making TRAM the number one
- priority. And this was presented before but, you
- 16 know, it's just kind of a recap of everything that
- we did, where it was, you know, we added teams.
- 18 We reshuffled resources from one product team to
- 19 another.
- 20 Some of the focus area down near the
- 21 bottom is, we have some Legacy code, we call it,
- that's called FAST2, where we're going to be

- 1 basically staying on that client-side code, the
- 2 legal instruments examiners use but making it work
- 3 against the modern backend platform.
- And then, we also for on the TEAS front,
- 5 TEAS, lot of those forms that are relying upon
- 6 TRAM to work basically. So, we're recoding them,
- 7 refactoring is just the fancy way of saying that
- 8 we're opening up the code. We're reconfiguring
- 9 the calls that the code makes from one database to
- 10 another. So, we'll redirect all of those calls
- from the TRAM mainframe to the new platform that
- 12 we call TRM.
- And you'll see, for TEAS, specifically,
- 14 everywhere you'll see dates we're going to start
- doing deployments for FAST2 in July, and then
- 16 TEAS, we have six releases to basically do those
- in batches, you know. We did one already and it
- 18 will go through August, is when we think we'll be
- done with all of the TEAS forms refactoring of
- 20 code. (Slide) Next slide please. All right. So,
- on the Trademark exam modernization front,
- 22 hopefully, it will show up well on your screen,

```
but we have bolded some of this stuff that's
```

- 2 already been done, so transitioning the first
- 3 thing that we did back in December, first, is
- 4 transition all of the examining attorneys off of
- 5 the Legacy FAST1 code base, which is the client
- 6 that we use, a Windows code that we use to examine
- 7 trademark applications and process them, and we
- 8 put them on TM Exam.
- 9 That was done on December 1st, all of
- 10 the examiners are therefore now using the modern
- 11 platform entirely. And then, two days later, we
- implemented the phase 2 of the Trademark
- 13 Modernization Act. And then you'll see the next
- 14 few lines, we have deployments that went to our
- Post-registration Business Unit, our Petitions
- Business Unit, and then more changes for the TM --
- 17 or the trademark examining attorneys on April 1st.
- And then you'll see we have a cadence,
- 19 you know, you'll see the dates falling out there
- 20 for -- you know, we're just continuing to do
- 21 deployments in, you know, July, October, you know,
- 22 September. That's basically the cadence of what

```
we're going to continue to make and add features
```

- 2 to these business units for them to continue to
- 3 fully adopt the modernized platform.
- 4 And the same thing for the examining
- 5 attorneys, we have pockets of improvements and
- 6 changes that need to be made to basically make
- 7 sure that they're fully off of TRAM and they have
- 8 the best tool, you know, experience that they can
- 9 have while they're doing their work.
- 10 And then, just a few, like, just over
- 11 about 10 days ago, 13 days ago, we started the
- 12 process to remove that FAST1 code base off of the
- 13 universal laptops that the examining attorneys
- use. So, that Windows code, which was the FAST1
- 15 code base was, you know, 20 years old, that's
- 16 coming off, you know.
- 17 And I think it's probably completely
- 18 removed by now, and then here are some backend
- servers that used to support FAST1 that really
- 20 will be shutting down in September. So then, so
- 21 that huge chunk of Legacy IT that was relying
- 22 upon, you know, Windows code on the client side,

```
1
       some old servers in the middle, and then TRAM on
 2
       the backend, all that stuff is going to be off of
       the campus by September. So, it's good news,
       we're making good progress.
 4
 5
                      (Slide) Next slide please.
                      was our third priority. We ave
 6
                      plans to, basically, take all of
 8
                      the Legacy forms that we currently
                      have. I think there is like 58 of
 9
10
                      them, and we're going to try over
11
                      time reduce them down to about
                      seven forms.
12
13
                 And the first area that we're focusing
       on is the initial application forms. I think
14
1.5
       there is -- I think it's about seven forms all
16
       together. We're scheduled to do a deployment that
17
      we call or refer to as the minimally viable
      product (MVP).
18
                 I believe it's going to go out later
19
20
       this summer, then we'll deploy the complete
21
       initial application late summer or early fall for
       people to use in parallel with TEAS so that we can
```

```
1 get that feedback and make those continuous
```

- 2 improvements.
- 3 There will be some abated period testing
- 4 for that initial application form, and then the
- 5 target date is that it would go completely live in
- 6 October of 2023, and probably run in parallel with
- 7 TEAS refurb (phonetic) at that time anyways.
- 8 We're going to see how all of that goes, but
- 9 that's the advantage of Agile(s), we can kind of
- 10 tweak things as we go along, as far as, you know,
- if we're more successful, we can, you know, retire
- the initial application forms off of TEAS earlier,
- 13 but otherwise we'll run them in parallel for a
- 14 while.
- 15 And then, the next bullet is just
- 16 basically some work we did on TEAS to support the
- 17 Trademark Modernization Act Phase 2, which that's
- 18 completed. That happened back in December, as
- 19 well, just wanted to put it up there as a remember
- 20 of some of the work that did kind of on the lines
- 21 of modernization.
- 22 (Slide) Next slide please. Our

1	TTAB Center work. I am not
2	17 really going
3	To go through this because I'm not
4	familiar with all of the ins and outs of what TTAE
5	Center's feature sets are, but they have been
6	working on what they call the Notice of
7	Opposition, of course. That's on one of the
8	forms, and then some of these sub-bullets are
9	basically some of the items that they're working
10	on. They're getting ready to do a production
11	release.
12	TTAB Center is TTAB's modernized
13	platform. So, they are continuing to work on
14	that. And, you know, it's good news on that front
15	as well, because it's been a long time coming for
16	them to, you know, get some modernized efforts
17	going on as well. (Slide) Next slide please. And
18	our fifth priority was a course to support any
19	Trademark International Treaty obligations. And
20	the only one that was on the horizon that we knew
21	about when we reestablished TRAM as the number one
22	priority was that we knew we had to support MP3

- 1 audio and MP4 video exchange with the
- 2 International Bureau.
- 3 So, we wanted to keep that up there
- 4 because the work was already started and so we
- 5 just made this a priority. That work is completed
- 6 though. So, as of now, there is nothing else on
- 7 our radar really that where we have any
- 8 International Treaty obligations. But we're going
- 9 to keep it as a number five priority regardless,
- just in case, you know. But pretty soon we'll be
- able to just drop this one off as, you know,
- 12 stated priority. (Slide) Next slide please. All
- 13 right. And then, the last one, we never really
- 14 gave this a number. And, regardless, it's the
- sixth one on the list and it's highly important as
- 16 well. As I mentioned earlier, the vendor is on
- 17 the backend of the search database for XSEARCH
- internally, and the public you all know it as
- 19 TESS, you know that vendor does not want to
- 20 continue supporting this product anymore. So, we
- 21 need to get off of it, and I think this is our
- 22 last fiscal year.

```
1 It's also part of -- tied into TRAM
```

- 2 retirement. So, what we will be doing is adopting
- 3 a search platform called Elasticsearch, which
- 4 there is one on the Amazon cloud. It's got some
- 5 really cool features, but we've been doing some
- 6 proof of concepts with it internally.
- Right now, we're also now building the
- 8 client-side replacement of XSEARCH to work against
- 9 the elastic search platform and we expect to
- 10 deploy that right now, for XSEARCH is July 28th.
- 11 We'll run that in parallel until October as -- you
- 12 know, when we need to basically do the full
- 13 cutover is the plan.
- So, TESS, we also have what -- we're
- 15 kind of calling it a simple user interface search,
- but it's got a lot of features in it, even though
- it's a bit simple on the first pass, and that's
- 18 what we're going to be starting to use to replace
- 19 the TESS client.
- 20 And what our plan is is to, you know,
- over the summer, you know, late summer or
- 22 mid-summer, late summer, we will be doing a series

- of beta testing with some -- an expanding set of
- data tests with public customers. Eventually,
- 3 we're going to put this simple user interface out
- 4 there, side-by-side with us so that, you know,
- 5 people could use them in parallel to get
- 6 comfortable with them.
- 7 But the same date, October 1st, is when
- 8 we really need to cutover and stop using legacy
- 9 tests and start using this new simple user
- 10 interface. We have got to name it, you know,
- 11 that's going to be part of the fun in the coming
- weeks is we're going to have to give it a name.
- I don't think we're going to call it
- 14 TESS anymore. We're going to give it a brand new
- name just for, you know, public branding, and what
- 16 not.
- 17 So that's, I think, the end of my
- 18 slides. But, like I said, so, two areas where
- we'll be doing some outreach with the public
- 20 through some formats of beta is with the initial
- 21 application forms for eFile, as well as this
- 22 simple user interface or TESS, or for the new

```
1 search system.
```

- 2 And, Greg, I think that's my -- is there
- 3 one more slide, that may be it? Okay, that's it.
- 4 So, I'm happy to take anybody's question.
- 5 MS. BROWN: Thank you so much, Glen, and
- 6 Greg. Let me just start by kind of reiterating
- 7 what Greg was saying. We know that this is a lot
- 8 of work, for sure, that goes into all of the --
- 9 everything that you have been able to accomplish
- 10 this far and all of the work that you have going
- 11 on.
- I know we see the highlights of it, but
- it's truly tremendous to see the amount of
- 14 progress that has been made, the amount of
- projects that are at work, and we understand that
- 16 there are a ton of people who are making that
- 17 happen. So, a true kudos to you all for
- 18 continuing to move the efforts along. It is truly
- 19 appreciated.
- 20 Greg, to the extent that it felt like we
- 21 were grilling you, that certainly wasn't -- that
- 22 certainly wasn't the intention. We want it to be

```
1 collaborative. But, to the extent it was to help
```

- 2 motivate we will take that as positive feedback
- 3 and we will continue doing that, so.
- 4 MR. DODSON: I love litigators.
- 5 MS. BROWN: Sometimes, hey, deadlines,
- 6 or meetings, or things like that, they help move
- 7 things along, so to the extent we helped, we do
- 8 appreciate that because that is the goal and what
- 9 we love to do. Directly to you, Glen, I think it
- 10 is exciting and is fantastic that a new filing
- 11 system and a new searching system are coming to
- 12 the public. I think that is wonderful news and
- 13 I'm excited.
- 14 And to that end, I assume -- I mean it's
- great that they're going to be running parallel
- with the existing TESS and the existing TEAS
- 17 application, but to the extent, you know, just
- 18 wondering are there opportunities for the public,
- 19 certain members of the public to sign up or to do
- some testing before it deploys?
- I think if there are, that could be
- great, just wondering is that an opportunity or

```
1 something that is being looked into by the office?
```

- 2 MR. BROWN: Absolutely, we have plans,
- 3 communication plans, and testing plans, you know,
- 4 each one of those products, if you will, has a
- 5 team of people, or an Agile team of people, they
- 6 call a SCRUM team.
- 7 And that's part of their plan is to
- 8 build an outreach effort and then target, you
- 9 know, different expanding groups of public users
- 10 to basically give them feedback. Because that's
- 11 all about how Agile works, too, is that you have
- 12 to start getting it in front of people sooner
- 13 rather than later, even if it's like an early beta
- 14 so that you can get that feedback, and then you're
- just into that continuous improvement process as
- 16 you get closer to closer to what we call the
- minimally viable product which is, in our case,
- 18 for both of those products.
- A minimally viable product, we're going
- 20 to define that as, you know, feature equivalent to
- 21 what those existing systems do now. So, that's
- 22 where we'll leave that input from customers

- 1 because they might catch things that we just
- 2 missed, you know. So, like I said, both teams are
- 3 going to be reaching out to the public in some
- 4 manner, you know, to basically get input from on,
- 5 you know, development.
- 6 MS. BROWN: That's great.
- 7 MR. BROWN: And then, Charlie Thomas
- 8 just popped into the chat.
- 9 There is a link, you know, to -- oh, it
- 10 just disappeared -- but there is a link to
- 11 basically volunteer, I think it is. I don't know
- if you can talk, or if anybody wants to read it.
- But I think that -- I think what it is is that
- 14 there is a way to volunteer -- let's see -- yeah,
- 15 customers can volunteer here. He's a got a link
- 16 in the chat.
- 17 MS. BROWN: That's awesome. I encourage
- 18 the public to the extent you can, or you're
- 19 available, certainly, go in and give feedback.
- Obviously, this is a system that the PTO is
- 21 building for the public, it's for users. So, the
- 22 more feedback the better; the better system it

```
1 will be. And, you know, I always say, you
```

- 2 shouldn't complain if you have an opportunity and
- 3 you don't say something.
- So, if you don't want to be complaining
- 5 down the road, go ahead and raise your hand and to
- 6 volunteer for testing. So, again, that's all I
- 7 had to say. Thank you. This is great.
- 8 MR. BROWN: Thank you. Thanks for the
- 9 feedback and the questions.
- 10 COMMISSIONER GOODER: I also had one
- 11 thing from Charlie Thomas, who just popped that
- 12 link up, runs our customer experience operation,
- and both the search system but, especially, TM
- 14 Exam have been built based on a lot of customer
- 15 feedback already.
- So things, features, in it that you'll
- see came directly from that in the first place.
- 18 So, getting comments now is even better because it
- just more, more, and more, but it was not built in
- 20 a vacuum, which is great. So, Charlie's team has
- done a tremendous job on this, so.
- MR. ENNS: Glen, this is Rod Enns.

- 1 Could I ask you just to say a few more words to
- 2 explain the minimum viable product concept? I
- mean because when you hear that it sounds sort of
- like, well, we're going to educate our kids with
- 5 the minimum viable education. And, you know,
- 6 everybody wants their kids, all of the kids should
- 7 be above average, right? So, can you talk a
- 8 little bit more about what's behind that and what
- 9 the goal, ultimate goal is to achieve?
- 10 MR. BROWN: So, the concept of minimally
- 11 viable product in the Agile, you know, software
- development, you know, methodology is basically
- 13 you want to get -- you want to get a product,
- 14 whatever that thing is that you're trying to
- 15 buildout into being used in kind of like a
- 16 production manner, as soon as possible so that you
- 17 can get that feedback and continuing to make
- improvements rather than wait until like, you
- 19 know, further on in the process where maybe major
- 20 mistakes have been made and you can do corrections
- 21 faster, if you don't -- if you were to have waited
- is the concept.

```
1 So it's, you know, getting that
```

- 2 feedback, getting the customer involved, whoever
- 3 that customer is, so that they can say, I need at
- 4 least this to start working on this type of
- 5 feature. The whole idea with Agile is that you
- 6 have, you know, you put out what they called MVP,
- 7 and then you continue to improve it and expand
- 8 what its capability is.
- 9 But, again, the idea is that, you know,
- 10 you fail sooner but the failures may not be as big
- and then you can continuously make those
- improvement is the just general concept. But for
- both of these products we're saying MVP, but what
- we mean -- what we mean in these cases,
- especially, is that they have got to be at least
- able to do what the current systems they're
- 17 replacing are doing. So, for the initial
- 18 application forms, you know, it's got to get the
- job done in the same manner with the initial --
- 20 the Legacy TEAS forms.
- 21 And the same thing for this simple
- search, simple user interface search, it's got to

```
1 be able to meet the needs of the customer in the
```

- 2 same manner that TESS currently is. And then the
- 3 point though is that both of those, you know, we
- 4 can then, especially for TESS, or for this elastic
- 5 search effort, there is a whole bunch of
- 6 capabilities that we haven't even scratched the
- 7 surface on.
- But we don't want to do that. We don't
- 9 want a sample of all of that, you know, with what
- 10 we call the MVP, because, you know, that's -- we
- just want to make sure we get it right first, and
- then continue to expand its capabilities and what
- 13 not. So that's a general concept behind it.
- MR. ENNS: So, if I understand, the MVP
- is not an endpoint, it's a waypoint is that right?
- MR. BROWN: Well, yeah, sure, that's
- 17 exactly correct, yes.
- 18 MR. ENNS: Thanks.
- 19 COMMISSIONER GOODER: Okay. Any other
- 20 questions?
- 21 (No response) All right. It
- 22 somehow slipped the schedule, but

we thought we would take a

1

22

```
2
                      10-minute break at this point.
                      It's 2:34, so why don't we be back
                      at 2:45, eastern, 11 minutes.
 4
 5
                      (Recess)
                 CHAIRMAN CHO: Hello, it's 2:45,
       everyone to your seats. Dave Gooder will start in
 7
 8
       a moment.
 9
                      (Pause)
10
                 COMMISSIONER GOODER: Okay. If we can
11
       get everybody to take their seats, we'll roll
       along. As someone told me yesterday, a 10-minute
12
13
      break is actually a 15-minute break, except today,
14
       good. All right. Before we roll along, Dan had
1.5
       one clarification on the suggestion email box.
16
                 MR. VAVONESE: So, well, I appreciate
17
       and will take all suggestions that our customers
       want to give. I did want to provide the correct
18
19
       central TM feedback mailbox. So, if you want to
20
       send any suggestions, or comments, or feedback,
21
      tmfeedback@uspto.gov is the general feedback
```

mailbox. So, I just wanted to clarify that.

- 1 Thanks.
- 2 COMMISSIONER GOODER: Sounds good, thank
- 3 you. Okay. If you have been looking around the
- 4 room, you have realized that Amy Cotton, the
- 5 Deputy Commissioner for Trademark Exam Policy is
- 6 not here today. So we're, a couple of us are
- 7 going to cover for her in the two key areas we
- 8 wanted to talk about.
- 9 The first one is a little bit about our
- 10 Petitions Office, which we don't -- we don't talk
- 11 about near enough. They do an amazing job of
- dealing with a lot the things that come in that
- aren't specific to applications specifically, et
- 14 cetera. And so, we thought we'd just give you a
- 15 little background.
- 16 First of all, the Petitions Office is
- 17 six paralegals, 21 staff attorneys, two senior
- 18 attorneys, a managing attorney, it's a good size
- group of people. All of the attorneys are former
- 20 examiners. I think it's fair to say that all of
- 21 the paralegals have worked in various parts as
- legal instrument examiners, or moved up to being

- 1 paralegals, or they'll have a very long history at
- 2 the office.
- 3 So, when a petition comes in often they
- 4 raise really, novel questions. This is a really
- 5 experienced group that deals with them. What is
- 6 kind of surprising about them is the volume that
- 7 they deal with. In the first half of Fiscal '23,
- 8 they had 8400 actions. An action could be a
- 9 Letter of Protest, a Petition, any of the things
- 10 that they deal with.
- 11 That's up significantly from the first
- 12 half of Fiscal '22. Now, that's -- there is a lot
- of categories. The biggest two categories are the
- 14 Petitions to the Director, Letters of Protest, are
- 15 the two big ones, and then from there, there is a
- 16 lot of categories.
- 17 You can see those on the slide and we --
- there is a great deal that goes into those
- 19 petitions. They can be anything from trying to
- 20 correct something that happened in examination, or
- 21 a registration problem, or you name it, it's a
- 22 huge variety.

```
1 What's interesting is when you look at
```

- 2 the types. So, prior to 1016, this is
- 3 interesting, they were getting about a thousand
- 4 petitions a year. That's only seven years ago.
- 5 And then since they've -- we have been increasing
- 6 just consistently, consistently along the way, so
- 7 with Letters of Protest also, they seem to go up
- 8 and down a little bit but they are also up this
- 9 year, over the past years.
- 10 In terms of the docket progress, or the
- 11 time it's taking to act on these types of things
- 12 with petitions, what this shows is -- I'm trying
- 13 to explain this accurately. When the lawyers and
- 14 the paralegals pull a petition down from the
- inventory, it is now considered in the docket.
- 16 They are dealing with it at that time.
- So, in the last quarter of last fiscal
- 18 year, they had 956 cases going. It was taking
- 19 about 300 days. It dropped some in the first part
- of this fiscal year and the amount of time has
- 21 come down again. And now, in this quarter, they
- 22 have reduced that inventory by 25 percent and the

- 1 amount of days it's taking down to 185. So,
- they're making really significant progress.
- What's unpredictable about what they
- 4 have to do is the nature of what's in the
- 5 petition. So, some of them can be quite
- 6 straightforward, some of them can be very
- 7 complicated.
- 8 Also, a lot of these attorneys were the
- 9 ones who were dealing with TMA expungement and
- 10 reexamination petitions. And for the first year
- of those, literally, every single one raised new
- issues, new questions, so it was taking longer to
- do that. Now they're back more on track. They
- 14 have kind of dealt with most of the TMA kinds of
- 15 situations, so they have picked back up a great
- 16 deal.
- 17 With Letters of Protest, they are also
- 18 the amount of days has gone from the end of last
- 19 year to now, from 53 days down to 18 days. There
- is a two-month time period in the statute, so
- 21 they're well ahead of the time period for Letters
- of Protest.

```
And just to remind folks, Letters of
 1
 2
       Protest are fact-based, not argument-based. So,
       to the extent that people are putting a lot of
       time into making and crafting brilliant legal
       arguments, it's not considered. It's the facts
       that they're trying to get so that the -- and then
 6
       determine is it useful to the examiner.
 8
                 Sometimes it's not useful, sometimes it
       is, and it just depends on what the facts are.
10
       So, the more fact-based it is, the more likely it
11
       is to get through. If it's a lot of brilliant
       argument, it doesn't really help much there at all
12
13
      because it's not -- it may be looked at by the
14
       Petitions attorney but that is not passed along to
1.5
       the examiner, only the facts are passed along.
16
                 So, like I say, the progress though has
17
       been great and they're turning around in the
       amount of time that they really need to be. So,
18
19
       with that, any questions about petitions? We have
20
       four petitions, attorneys all over the place here,
21
       so we can answer any questions that I can't
```

answer. Anything? (No response) Okay.

```
1 The next thing we're going to talk about
```

- 2 -- and I'll pass this down to Dan -- as many of
- 3 you know, we have been engaging in something
- 4 called Register Protection, not dissimilar to
- Brand Protection, that goes on in companies and
- 6 brand owners. And we are thrilled to now have
- 7 taken that program from a rag-tagged group of very
- 8 sharp people, who were doing this in varying parts
- 9 of their day job to now a full-time team with
- 10 investigators and lawyers.
- 11 And I'm thrilled to introduce you to
- Montia Pressey, who is the new Director for
- 13 Trademark Register Protection, and she's going to
- 14 talk a little bit about what's going on in the
- office, and new scams, and all sorts of things.
- 16 So, Montia, over to you.
- MS. PRESSEY: Hi, everyone. I'm just
- 18 getting used to this. So, I have been the
- 19 Director for Register Protection for all of four
- 20 months, so I'm still learning a lot about the STIA
- 21 Group, in particular, our anti-scam group that we
- 22 call it. Before I talk about the Register

- 1 Protection program, I'd like to show you the
- 2 organizational structure of Trademark Examination
- 3 Policy under Deputy Commissioner, Amy Cotton, ad
- 4 also where the Register Protection program fits
- 5 in.
- So, here are the Units in Exam Policy.
- 7 The mission of the first six units, in burgundy,
- 8 which includes the Register and Protection Office
- 9 is improving and sustaining examination quality,
- improving the integrity of the register and also
- 11 supporting trademark operations.
- The mission of the last three units,
- shown in blue, is providing support and guidance
- 14 to external stakeholders to improve the quality of
- the submissions across the entire registration
- 16 process.
- Next, turning to the Register Protection
- 18 Office. First off, I want to mention that it does
- 19 not actually, formerly exist yet. Currently, it's
- an informal office of one, but we're working
- 21 through the steps necessary to stand it up as a
- formal part of our structure.

```
1
                 As the director, as Dave mentioned, I
 2
       oversee three existing Register Protection
       programs, post-registration audits, ex parte
       expungement, and reexamination cases, and the
       anti-scam unit, which, as I mentioned, we
       sometimes refer to as STIA, or the Special Task
       Force for Improper Activities.
                 The work across all of these areas is
 8
       performed by attorneys on work projects from other
10
       parts of other business units in trademarks, along
11
       with two paralegal professionals, who help us
       conduct audits. I have also been working with HR
12
13
       to hire permanent RPO staff soon. But for at
14
       least the time being, we're going to be continuing
1.5
       work projects.
16
                 As you might imagine, I realized soon
17
       after I started as Director, that scams would be
       the subject of many emails, meetings, calls, et
18
19
       cetera. There are four main types of scams that
```

we hear about from our customers. Scammers

tricking customers into paying inflated fees for

fake or unnecessary services; scammers posing as a

20

21

```
1 USPTO and as our staff; scammers hijacking
```

- 2 applications and registrations; and scammers
- 3 hijacking or renting attorney credentials.
- 4 We do have some tools that we use to
- 5 fight against scams and to help protect the
- 6 register. Some of the tools the USPTO uses
- 7 internally, others are external stakeholders can
- 8 use to help us and support us in our efforts. I
- 9 will highlight some of those next.
- 10 So, first, through our Administrative
- 11 Sanctions Program -- and you've heard about that a
- 12 lot today, and Director Vidal also mentioned it.
- 13 We review suspicious behavior that violates our
- 14 rules. We look for evidence of efforts to
- 15 circumvent the rules, and we sanction rule
- 16 violators.
- The program involves three primary
- 18 elements: Reviewing suspicious filings and
- 19 behavior for rules violations; monitoring
- 20 USPTO.gov accounts for suspicious filing behavior;
- 21 and referring any suspicious behavior by attorneys
- 22 to OED. Sanctions include, terminating

- 1 applications and sanction registrations;
- 2 suspending and even shutting down USPTO.gov
- accounts; and attorney discipline for misconduct
- 4 including suspension from practice and referral to
- 5 state bars for reciprocal discipline.
- As I mentioned, the Administrative
- 7 Sanctions Program is key to identifying violations
- 8 of U.S. Rules of Practice, Terms of Use Agreements
- 9 for USPTO websites, and the Verified USPTO.gov
- 10 Account Agreement. Implementing the sanctions
- 11 process has really brought the conversation about
- 12 rules and rules violations to the forefront of
- 13 trademark practice.
- As part of the verification process to
- establish a USPTO.gov account, as I'm sure you all
- 16 know, a customer must choose one of these listed
- 17 user roles. If a customer doesn't fit one of
- 18 these roles, they should not be filing a trademark
- 19 submission with our office.
- So, we monitor filing behavior to
- 21 determine if a customer violates the verified
- 22 account agreement. And, if so, we can issue an

- 1 administrative order to suspend or even terminate
- 2 the USPTO.gov account.
- 3 Here are some of the most significant
- 4 sanctions orders over the last several years.
- 5 Some of them involving thousands of applications
- 6 and registrations, most involved the unauthorized
- 7 practice of the law, along with that specimens and
- 8 improper signatures.
- 9 So, here are some of the highlights of
- 10 our Administrative Sanctions Program. We should
- 11 refresh this. We have some more recent stats.
- But, as of a few weeks ago, those highlights
- included issuing 150 orders for sanctions,
- 14 terminating 19,000 invalid applications, and
- sanctioning 3500 invalid registrations, suspending
- 16 five USPTO.gov accountings -- and, actually, that
- 17 number is now closer to 10 -- and referring 34
- individuals to OED for investigation and for
- 19 possible discipline.
- 20 If you'd like to know about our orders
- 21 and sanctions, you can view them using our new
- decisions and proceedings tool, where you can

```
1 search using keywords and filter by date, party
```

- 2 name, and document type.
- 3
 It's accessible on our -- the trademarks
- 4 page, the main trademarks page, on the USPTO
- 5 website. That database also contains documents
- about expungement and reexamination proceedings,
- 7 the next register protection tool I'm going to
- 8 tell you about.
- 9 So, as an external tool, a third party
- 10 may provide evidence that a registration was not
- in use as of the relevant date. The director will
- determine if a prima facie case of non-use is
- 13 made. If so, the director will institute
- 14 proceedings.
- As an internal tool, the director may
- 16 institute proceedings on her initiative if their
- is evidence to support a prima facie case of
- 18 non-use. In both scenarios, the registrant must
- 19 respond with appropriate evidence of use. If the
- 20 registrant cannot establish use of the mark, the
- 21 registration is cancelled, in whole or part,
- depending on the scope of the goods or services

- 1 involved in the proceeding.
- 2 As of last week, 287 Petitions for
- 3 Expungement and Reexamination had been filed. Of
- 4 the petitions our examiners have reviewed so far,
- 5 we have instituted proceedings in 132 of them, and
- 6 not instituted in 79. Of the 132 instituted
- 7 proceedings, 85 have terminated and resulted in
- 8 full or partial cancellation of 77 registrations,
- 9 and the cancellation of 867 out of 906 challenged
- 10 goods and services.
- 11 So, obviously, the proceedings have been
- 12 very effective so far in helping us to clear
- deadwood from the register. As of last week,
- 14 along with the 132 -- then that should be 132,
- instead of the 127 you listed there -- instituted
- 16 proceedings. We have also instituted 47
- director-initiated proceedings cancelling all 370
- of the challenged goods and services in the
- 19 proceedings that have already terminated.
- 20 The team is currently in the process of
- 21 instituting director-initiated proceedings in more
- than 100 registrations against a company that's

```
1 affiliated with the Trademark Auction site, where
```

- 2 most of the new space registrations are advertised
- 3 as unused, as if that's a good thing. But our
- 4 examiners have already started issuing Notices of
- 5 Institution. I think we're up to like maybe 20 of
- 6 those, or maybe more.
- 7 So, onto the next register protection
- 8 tool. Since 2017, we have audited at least 5,000
- 9 registrations a year, as part of our permanent
- 10 audit program. And with the deadwood, as to the
- 11 audit registrations because, of course, if they
- can't provide us with acceptable proof of use,
- 13 those goods and services are deleted from the
- 14 registration, or the entire registration
- 15 cancelled.
- In an effort to have a broader impact,
- in 2021, we implemented a \$250 per class deletion
- 18 fee. That fee is incurred when goods or services
- 19 are deleted during the pendency of a Section 8 or
- 71 declaration, and it applies to all Section 8
- 21 and 71 declarations, not just to those in audited
- 22 registrations.

It's only been a couple of years, so

1

1.5

16

17

18

22

deletions.

```
2
       it's hard to really measure the full impact of
       that new fee. But we are seeing a downward trend
       in deletion rates for use-based registrations over
       the last few years.
                 Unfortunately, there hasn't been much
 6
       downward movement so far in the Section 44 and
 8
       66(a) registrations, but we are hopeful that
       registration owners will eventually get tired of
10
       paying us extra money just, you know, because they
11
       file a deficient, or an inaccurate declaration.
       Something to note about that 2022 deletion.
12
13
      Because the audit processing can extend 18 months,
14
      we expect the deletions to fluctuate upward some,
```

And our audit examiners tell us that
they're seeing more Section 8 and 71 declarations
with narrowed IDs, and specimens that are

submitted from multiple goods and services in a

we're seeing with regard to the decline in

as responses come in, but so far the number is

looking pretty good for 2022, in terms of what

```
1 class which, of course, we only need one, but they
```

- 2 seem to be giving s additional specimens which
- kind of makes it audit proof, the registration, to
- 4 some degree, because we only audit a registration
- if there is no proof of use that's available or
- 6 provided for certain goods and services.
- 7 So, we're hopeful that it means that
- 8 they're conducting their due diligence upfront,
- 9 that they're confirming use and deleting goods and
- 10 services where necessary.
- 11 Raising awareness to scams is another
- one of or tools. Unfortunately, it's unlikely
- that scams are going to go away any time soon, but
- our goal is to help customers to avoid being
- scammed. We had our very first scam awareness
- webinar yesterday. I think we had about 300
- 17 attendees. A recording will be posted on our
- 18 website in a few weeks, if you missed it.
- 19 We provided real life examples of
- 20 communication from scammers, and we offer tips on
- 21 how to identify those communications as scams. We
- 22 will be offering additional webinars, and also

- we'll be sharing information about scams when we
- 2 hear about it in your social media, as well as
- 3 trademark alerts. We are also continuing to
- 4 revamp our webpages on scams. We're refreshing
- 5 our filing receipt, as well as the registration
- 6 notice emails to include information about scams.
- 7 And I'll end with some external tools
- 8 that our customers can use to help us fight scams.
- 9 Dave mentioned Letters of Protest. So, if a
- 10 customer has evidence that a specimen of use is
- 11 fake, they can provide that evidence to us for
- 12 consideration.
- 13 Petitions to the Director, which Dave
- 14 also mentioned, can be filed to alert the USPTO to
- unauthorized submissions. And, finally, customers
- can email us at tmscams@uspto.gov to report them
- 17 to us. Those emails are reviewed by our Anti-Scam
- Unit, and they consider action appropriate for the
- information that's provided in the email.
- So, with that, I think that's it for me.
- I know I covered a lot. I promised I would only
- take 15 minutes, so I moved fast.

```
1 COMMISSIONER GOODER: Well done. Any
```

- 2 questions for Montia?
- 3 CHAIRMAN CHO: Yes, first, a very
- affirming comment, thank you for talking about the
- 5 formulation of the new office. Congratulations,
- 6 again --
- 7 MS. PESSEY: Thank you.
- 8 CHAIRMAN CHO: -- for the new position
- 9 there. I know we had seen these numbers before.
- 10 I don't think the question was raised, but I did
- 11 see it on another slide. There are two slides you
- have brought up numbers and I was wondering, are
- you all going to track it year-by-year, or I'm
- 14 assuming you are tracking it year-by-year?
- MS. PESSEY: Yes, yeah, we are. We're
- doing it, a lot of it's manual, unfortunately.
- 17 CHAIRMAN CHO: Okay.
- MS. PESSEY: We do have a great team
- that was trying to help us to build reports to
- 20 come up regularly. But, yes, we are definitely
- 21 tracking. It's just, you know, folks are working
- on them, you know, day-to-day and so they. You

```
1 know, we're getting some great work performing,
```

- 2 and so they always kind of are stale, you know,
- 3 sort of like the next days because we have new
- 4 folks that are doing the cases.
- 5 CHAIRMAN CHO: Yeah, that makes sense.
- 6 I mean it's small enough now, the manual -- while
- 7 it's still manual, it's not too cumbersome but
- 8 it's good for that point.
- 9 MS. PRESSEY: Yeah, definitely. We're
- 10 definitely tracking the dates and that the
- 11 webpages, also that tool that I mentioned that's
- 12 another way, you know, we use that to help us to
- 13 track like the number of Notices of Institution,
- 14 the number of terminations. That's actually our
- way of updating and refreshing our own data when
- we need to present in meetings. Did someone else
- 17 have?
- 18 COMMISSIONER GOODER: Any other
- 19 questions?
- 20 SPEAKER: No, sir.
- 21 COMMISSIONER GOODER: All right. I
- 22 think we're good. At this point, I want to turn

1	the program over the Chief Judge Rogers to update
2	us about Trademark Trial and Appeal Board.
3	JUDGE ROGERS: Thank you, Commissioner
4	Gooder. I will start by running through a few
5	slides that deal with pendency measures and
6	inventory. So, something you have heard about
7	already from Dan, in regard to trademarks. You'll
8	hear a similar story, in some respects, at TTAB.
9	There will be some slides that will show
10	the relationship between a pendency and inventory.
11	But the inventory that we're talking about it
12	relates to the number of cases that end up with
13	contested motions that attorneys have to decide or
14	cases that have gone through the complete process
15	and need to be decided by a panel of judges.
16	(Slide) This first slide shows you
17	the total pending inventory. So,
18	these are the total number of cases
19	pending at TTAB. But as any
20	litigator will tell you, there are
21	a whole lot of cases that get
22	commenced that never require a

Τ	disposition on the merits.
2	And since our pendency measures focus on
3	things that are within our control, meaning that
4	from the time contested motions are ready for
5	decision on the merits, or from the time appeals
6	and trial cases are ready for decision on the
7	merits. The inventory of cases that never require
8	those kinds of actions never really affect us, but
9	I do think it's important to note the trend.
10	(Slide) And so, this slide shows
11	that generally the top line
12	oppositions over the last two years
13	have been trending down some. For
14	a long time, we almost always had
15	more than over 5,000 oppositions
16	pending, 5500, or so. But we're
17	just now getting below 5,000.
18	Nothing particularly significant
19	and it could easily trend back up,
20	at some point=, depending on how
21	many of the trademark surge
22	applications get published for

```
1
                      opposition and potentially opposed.
 2
                 The bottom line on this slide is just at
       the end there showing a recent trend up, and
       that's for ex parte appeals from examiner refusals
 5
       and that I'm kind of assuming is going to continue
       to go up because just with the sheer number of
       applications that are being review by examining
 8
       operation. We're going to get more appeals, I
       believe, in the months and years to come, but we
10
       will see. (Slide) The next slide just shows kind
11
       of the Filings by Quarter that have been coming
       in, and it kind of reinforces a little bit of what
12
13
       was going on on the previous slide. So, there's
14
       ups and downs on the top line, which is quarterly
1.5
       receipts of new oppositions but there is generally
16
      more down in that up and down line than there is
17
       up. So that's why the overall trend is down for a
       total number of opportunities pending at any one
18
19
      point and time.
20
                 And you can see cancellations and
       appeals are both trending up, and those are the
21
22
       kinds of things that often come along with the
```

```
1 issuance of more final refusals because maybe
```

- 2 Applicants will petition to cancel cited
- 3 registrations, maybe Applicants will take an
- 4 appeal. So that's why those two lines often kind
- 5 of move in tandem.
- 6 So, this is just another way of kind of
- 7 looking at and recognizing the volatility and some
- 8 of the trends at TTAB and how hard it is to kind
- 9 of predict our workloads from '16 to '19 and into
- 10 the beginning of the pandemic in 2020, things were
- 11 generally trending up, all kinds of cases that
- were coming in the front door were increasing.
- 13 And we had a significant increase in
- 14 trial cases over that four-year period from '16,
- 15 Fiscal '16 to Fiscal '19. But you can see it's
- been a little bit of a roller coaster ride since
- 17 the pandemic hit with some things going down, and
- 18 some things going up.
- 19 And the two blue lines near the end of
- this slide show that last year, we had almost a 10
- 21 percent decrease in the number of new appeals
- coming in, which was really quite surprising and

```
1 we're not quite sure why it happened but -- and I
```

- 2 have talked with Dan about a number of reasons why
- 3 it might have happened last year because I was
- 4 wondering whether it was going to continue this
- 5 year. But clearly, it has not continued this year
- 6 and because now we're trending at a 10 percent
- 7 increase this year in appeals.
- 8 So that's a big swing for us and it may
- 9 be a sign that the trademark filing surge is, at
- 10 this point, resulting in more appeals, and
- 11 potentially more cancellations to come. So, our
- goals for processing the three types of work that
- 13 I mentioned earlier that we do track -- and we
- 14 also track end-to-end pendency, just like
- trademarks tracks disposal pendency excludes cases
- that are involved in TTAB proceedings.
- So, they're really just measuring filing
- of the applications to either abandonment or, you
- 19 know, publication, if I have that measure right in
- 20 trademarks, the disposal measure, and they exclude
- 21 cases that could be involved in appeals or trials
- 22 at the Board because they could be -- those

```
applications could be pending much longer.
```

- 2 But our goals are the things that we
- 3 have more control over, apart from end-to-end
- 4 pendency, which is something we measure but we
- 5 don't have control over. So, we measure it and
- 6 it's reported on our website if you are ever
- 7 interested in looking at those average figures.
- 8 But we like to get contested motions
- 9 that arise in trial cases decided in 12 weeks or
- 10 less; we like to get appeal decisions out in 12
- 11 weeks or less from the time they become ready for
- decision on the merits; and we like to get trial
- 13 cases out in 15 weeks or less, decisions in trial
- 14 cases from the time they're ready for decision.
- So, how are we doing on these goals?
- 16 Well, motion practice is going very well like,
- 17 Webster, our managing attorney and his staff, are
- 18 pushing down the pendency on contested motions,
- which is good for those of you involved in trial
- 20 cases at the Board. Hopefully, we'll get the
- 21 motions decided quickly and keep the cases moving.
- 22 As Dan said with his statistics earlier,

1	these are average figures. So, obviously, some
2	motions are going to take less time, and some are
3	going to take more time, a very large record
4	summary judgement motions are going to take more
5	time than a very short Motion to Suspend a case
6	because of the pendency of a civil action, or
7	something like that.
8	(Slide) But we're pleased that the
9	motion process is going down
10	because we know how quickly things
11	can turn around and go up, as we
12	see on this slide. For the last
13	few years, we have been pushing
14	down appeal processing times and
15	the time it takes judges to get the
16	decisions out from the time the
17	appeals are ready for decision, but
18	it's quickly been going up.
19	And so, we're a few weeks over goal, at
20	this point and time. We'll see what it will be
21	like at the end of the year. It could come back
22	down if it's not given that it's going to continue

- 1 to go up, but we'll just have to kind of see. And
- 2 I will get to takeaways slide in just a few slides
- 3 and let you know what we're doing to try and stay
- 4 on top of these things.
- 5 Trial processing has likewise, again,
- 6 trial cases ready for decision on the merits, the
- 7 timeline for processing those has gone up. But
- 8 it's only slightly above goal, the blue line on
- 9 this slide. And so, there is a very good chance
- 10 we'll be able to get that back down by the end of
- 11 the year.
- 12 But the pressure that suggests we might
- have a challenge in doing that and bringing it
- 14 down is shown by this slide which covers the
- 15 number of cases. The inventory that I mentioned
- 16 earlier that impacts our pendency numbers that we
- just ran through.
- And so, the top line here shows a slight
- 19 trend upwards in total cases, appeals and trials
- 20 combined ready for decision on the merits, but the
- 21 appeals have gone down.
- 22 Earlier we were talking about appeals

```
1 coming in the front door going up, but for those
```

- 2 already in the pipeline the number of appeals
- 3 maturing to ready for decision on the merits is
- 4 actually trending down a little bit. And the
- 5 bottom line shows that the trials are trending up.
- 6 And that's going to put a little pressure on us
- 7 because whenever we have years where we have a
- 8 significant increase in the number of trial cases
- 9 maturing to ready for decision on the merits, they
- 10 take more time to decide often than the appeals
- 11 do.
- 12 So that's where we stand with the
- inventory. And what we're doing to -- in
- 14 recognition of these trends is we're doing our
- best to increase the number of judges. Our
- 16 budgets for the last few years, and for the coming
- 17 fiscal year provide that we can hire judges. We
- 18 had two retirements in '22, that we did not --
- 19 excuse me -- fill those positions because you
- 20 could see on the earlier slides that our numbers
- 21 were good, so we didn't need to fill them right
- away, but we are in the process of hiring judges.

```
1
                 It's a long process that involves
 2
       internal work here at the PTO, an eventual
       appointment by the Secretary of Commerce. We're
       hoping that we will be through the end of that
 5
       process in the near future and have some judges
       onboard to help work on those appeals and trial
 6
       cases that have become ready for a decision.
                 And we are going to be also focusing on
 8
       more efficient approaches to decision-writing and
10
       to case management. We have already had one
11
      meeting where we discussed the subject at length
       with our attorneys and our judges, and we have
12
13
       recently started the final pre-trial conference
14
      pilot.
1.5
                 No case has yet been brought into that
16
       pilot but we are beginning to consider candidates
17
       for that pilot, so that's kind of a wait and see.
       But if you go to our website and you go to the
18
19
       pilot page that includes information on the pilot
20
       and how it works information has recently been
21
       updated since we have officially started the
22
       pilot, which doesn't mean anything other than,
```

- okay, something might happen in the near future,
- 2 but hold on, not yet.
- Any questions about the pendency, the
- 4 numbers, any of that, before I go on to a couple
- of other subjects? (No response) Okay. I just
- 6 wanted to briefly touch on the fact that oral
- arguments are now back on. Since August of last
- year, we have been hearing cases again in-person
- 9 here on campus when parties agree that they would
- 10 like to be here on campus and argue before a panel
- of judges in person.
- But just like they could pre-pandemic
- 13 parties can still choose a virtual option. We
- were doing that a lot prior to the pandemic
- anyway, and there's always the possibility that
- one of our judges, who might be working from a
- 17 home office, in another part of the country, is
- 18 going to appear virtually.
- So, they're kind of hybrids and on an
- 20 average month we're getting eight, nine, ten
- 21 requests for hearings. We're having eight, nine,
- ten hearings a month, and most of them are still

virtual. But we're probably having three, four a

1

22

```
2
       month that are in-person. And what we're also
       doing is having -- and we've done this for a long
       time, but we're kind of resuming more of the
 5
       in-person outside, outreach hearings you might
       refer to them as, and these are hearings that are
       parts of conferences, and CLE programs, and things
 8
       like that.
 9
                 We had one in New Mexico, at a program
10
       that was run by the New Mexico State Bar, and our
11
       Texas regional office, that was in September. We
12
       continue to have hearings here on campus that are
13
       involved in law school clinic programs or other
14
       conferences. We have hearings that are usually
1.5
       featured or often featured as parts of GIPA
16
      programs at OPIA runs. And so, we're going to
17
       continue to work on outreach events like this and
      provide opportunities for people to see how
18
19
      hearings run.
20
                      (Slide) So, we've got just a couple
21
                      of slides on the pilot, and which I
```

mentioned earlier. We issued the

Τ	announcement that the pilot would
2	start April, no joke there. It
3	really is the start date. The
4	pilot planning team has provided
5	instruction to all of our attorneys
6	and judges about the process and
7	the procedure and what we are
8	hoping to accomplish through the
9	pilot and our attorneys and judges
10	or even a panel of judges working
11	with an attorney on a potentially
12	dispositive contested motion can
13	recommend to the pilot team that a
14	particular case be considered for
15	inclusion in the pilot.
16	So, the goals are the same as we have
17	been talking about for a number of meetings in
18	terms of what we hope to accomplish. And we hope
19	that we will have better trial case records in
20	cases that go through the pilot.
21	Because we will have worked with the
22	parties to ensure that they put their best foot

```
1 forward and they do, and the attorneys
```

- 2 representing those parties, if they're represented
- 3 are going to do the best job they can for their
- 4 clients and give us an appropriately sized record
- 5 appropriately tailored to the claims and defenses
- 6 that are most significant in the case and which
- 7 will allow us to get the case decided as quickly
- 8 as possible and make sure that we're looking at
- 9 the best possible evidence for both sides.
- The steps will be that the pilot
- 11 planning team receives a recommendation that a
- 12 case be included in the pilot and the pilot
- 13 planning team will assess the bases for the
- 14 recommendation and the likelihood that inclusion
- would be successful. That's another key factor we
- 16 want to make sure that we kind of pick cases for
- 17 the pilot that we think there is a good chance the
- 18 pilot will help, and it's going to work, and the
- 19 parties are going to work with us to make it work
- 20 well.
- Once we pull a case into the pilot,
- 22 we'll issue an Assignment Order after the close of

```
discovery, but before trial starts, and before any
```

- 2 pre-trial disclosures would have been due. And
- 3 we'll have an orientation conference. The
- 4 Assignment Order will direct the parties to
- 5 specify some dates and an attorney, and a judge
- 6 will have an Orientation Conference with the
- 7 parties to discuss what they need to do in
- 8 preparation for the final Pre-Trial Conference and
- 9 their participation in it.
- 10 Then the parties will exchange the list
- of witnesses. Copies of anticipated trial
- 12 exhibits and discuss their trial plan. They will
- 13 file a Point Proposed Final Pre- Trial Conference
- 14 Order based on reviews. The Board would review
- 15 and schedule the final Pre-Trial Conference after
- 16 review of those submissions.
- 17 ATJ will lead the discussion of possible
- edits and amendments to what would be the Trial
- Order for the case, and then once the conference
- is over, the Order would be finalized and issues
- 21 and that would send -- set the schedule and the
- 22 course for the case going into trial.

```
1 Input is needed. We took a lot of input
```

- on this to develop the contours of the pilot.
- This is what you see on our homepage and I have
- 4 highlighted in the middle the link to the pilot
- 5 information. And if you go to -- that link will
- 6 take you this page, and then that link will take
- you to the input, the information about the pilot.
- 8 And we are going to be taking input
- 9 throughout the conduct of the pilot, which we
- 10 expect will go on for quite some time because
- 11 we'll need to get a number of cases into and
- through the pilot to make sure we can adequately
- 13 assess how well it's working.
- So, that's it for TTAB -- if there are
- 15 any questions?
- 16 COMMISSIONER GOODER: Thanks, Judge
- Rogers. Any questions? (No response) No? Okay,
- 18 thank you much. All right. So, we're going to
- 19 turn now to the Office of Policy and International
- 20 Affairs, and Mary Critharis is here and some of
- 21 her crew, Nancy and Branden. But I think -- I'm
- 22 not sure which one of you is going first but take

```
1 it away.
```

- MS. CRITHARIS: Thanks, Dave. It's a
- 3 pleasure to be here. It's my first in-person TPAC
- 4 meeting. So, I'm also joined by Nancy Omelko and
- 5 Branden Ritchie, who I believe you know they are
- 6 the Senior Trademark Counsel for Office of Policy
- 7 International Affairs.
- 8 So, I am going to give an overview today
- 9 of some developments at WIPO, as well as, TM5,
- some trademark training that we have conducted,
- 11 our NFT study, our newly announced Trademarks for
- 12 Humanity Program, as well as some developments on
- the (inaudible) of the APEC meeting.
- So, turning to the first update, on the
- 15 SCT, which is Standing Committee of Trademarks, I
- wanted to highlight the two key topics, trademarks
- 17 and geographical indications, are always front and
- 18 center at these international discussions.
- The first topic of importance is country
- 20 names and geographical names of national
- 21 significance and nation brands. There are several
- 22 proposals on those particular issues related to

```
developing an examination guideline, as well as,
```

- discussing further ways to, you know, review these
- 3 kinds of applications.
- 4 There is also some information sessions
- 5 on country names and brand names, and also there
- 6 is a questionnaire that we were participating in
- 7 on nation brands. We are also looking at the
- 8 issue of geographical indications and there is an
- 9 information session with respect to refusals based
- on prior rights, something we're participating in.
- 11 And the other development, and WIPO
- 12 really relates to industrial designs, for those of
- you that follow some of those issues as well, 2024
- 14 Schedule for Diplomatic Conference on the Design
- 15 Law Treaty. It's similar to the TLT. It's
- designed to reduce formalities with respect to
- filing design applications throughout the world.
- The treaty, unfortunately, is being held
- 19 up from some -- by some other politically related
- issues, a lot of demands want to insert a
- 21 Disclosure of Origin requirement with respect to
- genetic resources in a particular region, those

- 1 are required to be disclosed in order to get
- 2 protection in a particular region, not something
- 3 that the U.S. is supporting at this time.
- 4 It's unfortunate that those issues are
- 5 bleeding into the DLT. And then we're also
- 6 focusing on a proposal, a joint recommendation
- 7 concerning industrial design protection for
- 8 graphical user interfaces.
- 9 Another development WIPO relates to our
- 10 ongoing work in the Madrid Working Group, and one
- of the two key topics that are being discussed in
- the Madrid Working Group, one is a proposal to add
- 13 new languages, in particular, Arabic, Chinese, and
- 14 Russian. We are working with the State Department
- to kind of evaluate whether we can support the
- 16 addition of these additional languages, and then
- 17 the other issue is the pendency.
- 18 As many of you know, to file a Madrid
- 19 application on other countries it's usually based
- off of basic application, so if you file your
- 21 basic application in the United Sates, you're
- 22 required to have very specific requirements, a

very narrow set of requirements with respect to

- 2 the goods and services.
- 3 Unfortunately, that disadvantages U.S.
- Applicants when they're using the Madrid system
- 5 because they -- when they're basing their other
- 6 applications that they designate as part of
- 7 Madrid, they have to make sure that their -- those
- 8 limitations are also included. So, we're trying
- 9 to come up with a new way to enhance user of the
- 10 Madrid system to, again, better benefit U.S.
- 11 Applicants.
- MS. FREDERICKS: Excuse me, Mary.
- 13 MS. CRITHARIS: Hi.
- MS. FREDERICKS: This is Jomarie
- 15 Fredericks. Before you go on, are you able to
- 16 talk yet about anything to do with the
- 17 establishment or setting of criteria for how new
- languages may be considered now, and in the
- 19 future, to be added or taken away?
- MS. CRITHARIS: Sure.
- 21 MS. FREDERICKS: Or is that just too
- 22 premature?

```
1 MS. CRITHARIS: I can give a few things.
```

- I don't know if you guys have anything. So, you
- 3 know, the issue of new languages is something
- 4 that, like I said, we work very closely with the
- 5 State Department because we're trying to do a cost
- 6 benefit analysis. This is more of an UN issue.
- 7 We have got this issue not just in the Madrid
- 8 Working Group, but also in the Hague Working
- 9 Group, as well, so trying to have more consistency
- 10 of position.
- 11 So, what we look to is, you know, the
- 12 usage, how many applications are being filed in
- 13 these different languages. Add also, what is the
- 14 cost of translation and all of those related fees?
- So, those are taken into account, so
- that's when we're talking about having these
- 17 technical discussions. Those are the kind of
- 18 considerations that the U.S. is asking to ensure
- 19 whether we want to support going forward with,
- 20 including these new languages. I don't know,
- 21 Nancy, if you wanted to add something.
- MS. OMELKO: That's good, thank you.

- 1 MS. FREDERICKS: Thank you.
- MS. CRITHARIS: Yeah, no problem. So,
- 3 now I'm going to turn to some developments at TM5.
- 4 So, the TM5, Annual Mid-term Meeting will happen
- 5 in May 17th, at the User Session, May 17th, at the
- 6 Annual Meeting. Typically, the mid-term meeting
- 7 is on the margins of the intermeeting, and the TM5
- 8 panel on proving use will be held on May 18th, at
- 9 the Annual INTA meeting, and our Annual TM5
- 10 meeting will be held in September. This year is
- 11 Korea's turn to host the TM5.
- I just wanted to highlight one of the
- 13 big accomplishments of the TM5 is that there is
- over 22,750 entries in the ID list, which we led
- these particular projects, and this accepted in 45
- 16 different countries. So, when you file your
- applications you can rely on this basic, you know,
- 18 ID entry list making it easier for you to find
- 19 these other jurisdictions.
- So, again, that's the progress on TM5.
- 21 And also, just to highlight some of our training.
- 22 As you know, we do a lot of training across the

```
1 globe with respect to a trademark education,
```

- 2 examination policies, and practices, and
- 3 awareness. We held a GIPA program with 35
- 4 Government officials from 24 countries at the
- 5 USPTO headquarters.
- 6 We also, as Jerry mentioned, this was
- 7 one of the programs that his office participated
- 8 in. We gave the participants an opportunity to
- 9 understand how we handle our administrative
- 10 trademark appeal system.
- 11 We also had an Andean Community Court of
- Justice program, Mexican Industrial Property
- 13 workshop, and an Algerian National Institute of
- 14 Industrial Property with Ministry of Industry
- there on trademark opposition. So, these are just
- the highlight of some of the training programs
- that we have had, and we continue to do these
- 18 programs throughout the year.
- 19 MS. NORTHCOTT: Go ahead, Jomarie. Do
- you want to go first?
- MS. FREDERICKS: No, you can go first.
- 22 (Laughter)

```
1 MS. NORTHCOTT: Dana Brown Northcott
```

- 2 here. Can you tell us a little bit more about
- 3 what you covered specifically in the Trademark
- 4 Office Administration Workshop?
- 5 MS. CRITHARIS: Sure. So, we had a
- 6 whole different set of issues that were covered.
- We included everything from strategic planning,
- 8 budget, and staffing, as well as different
- 9 electronic tools that we use. We wanted to give
- 10 them kind of a, you know, hands-on experience and
- 11 with the tools that we're using, the different
- 12 manuals and foreign paragraphs, how we do the
- 13 examination process.
- 14 We talked a lot about our telework.
- 15 That's a very common theme that we get a lot of
- 16 questions on from our foreign colleagues. We have
- a little bit ahead of the curve, which was nice,
- 18 so we can really share our experiences, a lot of
- 19 them were forced to kind of telework in response
- 20 to the pandemic.
- 21 We also talked about quality review and
- 22 how we trained our examiners, our trademark

```
1 attorneys, education outreach, as well as, as
```

- 2 mentioned, they got a little bit oversight,
- 3 overview of our Trademark Trial and Appeal Board.
- 4 MS. FREDERICKS: Just briefly, how do
- 5 you decide where to conduct the trainings, which
- 6 countries to go to? Is it just who makes the
- 7 request, or are there other considerations? Are
- 8 they able to make the request over and over again?
- 9 Do you spread them out? I just wonder how it
- 10 works.
- MS. CRITHARIS: Sure, that's a great
- 12 question. It's a very complicated process, so
- it's a very dynamic process. Every year we review
- 14 what we think we should -- we have a budget, so we
- review all of the training programs and all of the
- 16 different regional teams.
- We have regional teams that cover the
- 18 different areas, and we get together and decide,
- 19 you know, which particular problems are in a
- 20 particular region. I don't know if you follow,
- 21 but the Special 301 Report was released earlier
- this week that identified some of our trading

```
1 partners, some of the challenges with respect to
```

- 2 our trademark partners, with respect to
- intellectual property protection and enforcement.
- So, we're guided by some of the problems
- 5 that we see in the region. We're also guided by
- 6 certain requests that are being made. Other
- 7 offices are very interested in our electronic
- 8 systems, telework, how we do quality, how we
- 9 manage our trial of an appeal processes, so that
- 10 also gets folded into the equation.
- Sometimes, when we have free trade
- 12 agreements, there is a lot of training that goes
- into implementing those agreements. So, when
- 14 we're working with, like, USMCA, for example, we
- do a training with Mexico. That's why you saw
- Mexico, a workshop there, because we want to make
- 17 sure they implement their obligations.
- 18 But then, we also take into account that
- we want to do a lot of training in developing
- 20 countries because we want to make sure that they
- get their practices up to speed, as respect to,
- you know, examination and having gold standard.

```
1 Obviously, Nancy and Brandon, please
```

- 2 feel free to add and chime in.
- 3 MS. OMELKO: Thanks, Mary. I would just
- 4 add that we have the IP Attachés out in the world
- 5 and they do various training in their regions.
- 6 But, yeah, we go all around and it's through a
- 7 workplan pretty much that we set up in each region
- 8 to determine what we're going to be doing out
- 9 there. And it's oftentimes requested through the
- 10 Attachés office, or directly from country.
- MS. HSIAO: Do you also offer training
- for, like, some of the hot topics, like, AI, or
- 13 metaverse, that kind of stuff; and also, of
- 14 course, new decisions, the Perkins Bag, that kind
- 15 of stuff?
- MS. CRITHARIS: Yeah, absolutely, we do
- a lot of training on AI and emerging technologies.
- 18 Sometimes the training that we do is not just
- 19 trademark-specific, in conjunction with our patent
- group as well, because it's handling different
- 21 aspects of AI. So, we do a lot of training in
- that area.

```
1 And I just wanted to add, so I'm glad
```

- 2 you asked that question, that if there is
- 3 something that you think a particular problem, in
- 4 a particular region, or area, you'd like to see
- 5 training on, please don't hesitate to reach out to
- 6 either one of us.
- We're, you know, very receptive to
- 8 making sure that we are remaining on the cutting
- 9 edge of, you know, new and emerging technologies
- 10 and new issues facing the trademark system, but
- 11 also if there are certain challenges in particular
- 12 parts of the world.
- You know, obviously, we want to hear
- about that and happy to take that information into
- account where we're devising our training
- 16 programs.
- MS. HSIAO: Good to know, thank you so
- 18 much. We'll kind of brainstorm about that, maybe
- 19 talk some more at our next meeting. Thanks,
- 20 fantastic.
- 21 CHAIRMAN CHO: One of their biggest
- 22 programs that runs fairly regularly that y'all do

- is with your China team, and it's really
- 2 well-attended by practitioners, and in-house
- 3 people. And I don't know how often you do that,
- 4 once or twice a year maybe?
- 5 MS. CRITHARIS: We have got really high
- 6 numbers of participation, especially, as Dave
- 7 mentioned, with respect to our China programs, but
- 8 we just had our China road show programs in-person
- 9 We just had one in Omaha, Nebraska, two weeks ago
- 10 So, these are continuing programs and we're going
- 11 to do more in-person ones.
- Because while the virtual ones are good,
- 13 you know, the in-person ones are nice because then
- do get connection and are able to ask questions a
- 15 little bit more informally. So, again, we're
- hoping to do a little bit more of those programs,
- but I know the China road shows have been a real
- 18 success.
- Now turning to our NFT studies. So, we
- 20 are preparing a report jointly with the Copyright
- Office, in response to a request by the Senate
- Judiciary Committee on NFTs and the impact on IP

- 1 rights and policies.
- 2 So, we issued our Federal Register
- 3 Notice in November, and we held three different
- 4 roundtables, one with respect to trademarks,
- 5 patents, and copyright. We had a whole host of
- 6 participants.
- 7 We had over 90 participants. I believe
- 8 about 34 of them were from -- represented
- 9 trademark interests, all spanning from different
- 10 creators, artists, innovators, brand owners,
- 11 academics, small business, trade associations.
- 12 So, why the variety of representation?
- We are working on putting together our
- 14 report. So, hopefully in the next -- I believe
- the report is due, Branden, in June?
- MR. RITCHIE: Yes.
- MS. CRITHARIS: So, hopefully, we will
- 18 get the report finalized. The report will have a
- 19 nice analysis of all of the different comments
- 20 that we received; highlighting the definition of
- 21 NFTs; is the law sufficient right now with respect
- 22 to IP in enforcing and protecting NFTs; do people

```
1 envision are necessary to protect NFTs in the IP
```

- 2 space. So, we're looking forward to that report.
- 3 Branden and our copyright team at the PTO are
- 4 leading that report.
- 5 And so, one other landmark program that
- 6 I'm happy to announce that we just launched very
- 7 recently is our Trademarks for Humanity Program.
- 8 I don't know if any of you are familiar with our
- 9 Patents for Humanity was launched about a decade
- 10 ago, but we launched this program in April 11th of
- 11 this year.
- 12 And so, the goal of the program is to
- 13 recognize entrepreneurship and trademark owners
- use of their trademarks with respect to
- 15 humanitarian impact. For this particular cycle in
- 16 2023, the eligibility requirements are limited to
- 17 using trademarks in order to address environmental
- 18 concerns, so very broadly, broadly worded.
- And so, that's where we'll be accepting
- 20 about two -- up to 200 applications. I think so
- 21 far, we have four applications that were filed but
- we're really looking forward to this program. I

```
1 just want to also mention that, in addition to the
```

- 2 Trademarks for Humanity program, this particular
- 3 cycle being limited to environmental improvements,
- 4 enhancements, we also have a Patents for Humanity
- 5 program that is also limited to green energy
- 6 technologies, so this particular cycle.
- 7 So, this is a year we're really focusing
- 8 on addressing and mitigating a climate change.
- 9 And then, finally, just to share with you some of
- 10 the developments on the margins of our work with
- 11 the Asia Pacific Economic Forum, there is an IP
- 12 Working Group there.
- 13 And the past, in February, USPTO led a
- 14 program on creating a resilient and sustainable
- 15 future for all, and we had IP experts from the
- 16 APEC ecosystem gathered for this meeting to
- discuss issues of interest and exchange
- 18 information.
- 19 The Trademark team organized a workshop
- 20 on geographical indications and preservation of
- 21 common names to highlight the importance of
- 22 preserving common names when granting GI

1 protection, especially for small- and medium-sized

- 2 enterprises.
- 3 To carry on that theme, there will be an
- 4 APEC meeting. The U.S. is hosting the APEC
- 5 meetings this year. So, in August, there is going
- 6 to be another IPEG meeting in Seattle this time,
- 7 and the Trademark team is going to highlight the
- 8 importance of certification marks, especially with
- 9 the related to green technologies.
- So, you can see this common theme with
- 11 from Trademarks to Humanities program, as well as
- work in APEC is going to focus, on, you know,
- developing an entrepreneurship with respect to
- 14 green and clean technologies.
- And I think we have for you today, but
- 16 happy to take any questions.
- 17 COMMISSIONER GOODER: All right, sounds
- 18 good. Thank you so much for coming. We
- 19 appreciate it. And next on the agenda is the
- Office of Government Affairs, and Kim Alton, who
- 21 is Deputy Director, I think is on the phone.
- SPEAKER: She's on.

```
1 COMMISSIONER GOODER: She's on.
```

- MS. ALTON: Yes, hi, good afternoon.
- 3 I'm here. Can you hear me okay?
- 4 COMMISSIONER GOODER: Yeah, pretty well,
- 5 Kim, thanks.
- 6 MS. ALTON: Okay, wonderful. Good
- 7 afternoon. I am Kim Alton. I'm filling in today
- 8 for Ellen, representing the Office of Government
- 9 Affairs. First, let me start by thanking members
- of TPAC who were able to join us on Wednesday, as
- 11 we celebrated World IP Day on Capitol Hill.
- 12 It was a really nice event, a real
- 13 homecoming for many of us, since we have not been
- 14 able to celebrate World IP Day in person since
- 15 2019. So, we were so glad and pleased to have you
- 16 all join us in this year's celebration. Just very
- 17 quickly, Government Affairs, this week, we have
- been really busy. Yesterday, there was a hearing
- in the House Judiciary, the IP Subcommittee, that
- 20 subcommittee is chaired by Darrell Issa from
- 21 California, and Hank Johnson from Georgia.
- 22 And, just very quickly, I think the

- 1 questions that we got, we certainly expected.
- 2 Many of those questions focused on Trademark
- 3 Modernization Act and trademark fraud. We heard
- 4 those questions come from Ranking Member Hank
- 5 Johnson. He is the member who was a lead in
- 6 developing the Trademark Modernization Act.
- 7 So, we sort of anticipated that he would
- 8 have several questions about that legislation that
- 9 that law has been implemented, any suggested
- 10 tweaks. So, that is an issue that Director Vidal
- 11 addressed, in terms of some of the work that we're
- doing and certainly happy to keep Mr. Johnson
- 13 updated.
- We have a good news story to tell in
- 15 terms of the work that Commissioner Gooder and his
- 16 team have done over the past couple of years to
- 17 address the issue of clutter and trademark fraud.
- 18 The second trademark-related question
- that we got -- really it wasn't a question, more
- 20 sort of a statement, was just from our Chairman,
- 21 Mr. Issa, referencing a bill that he's introduced.
- 22 It's entitled, "No Stolen Trademarks in America

```
1 Act," and so that's a bill that he's been very
```

- 2 interested in for the past couple of years. He
- 3 referenced it, no real Q&A on that question.
- We do expect now that the hearing has
- 5 ended, the hearing record will remain open for
- 6 about a week for members to submit questions for
- 7 the record. So, these would be -- these include
- 8 written questions that the members of Congress
- 9 were not able to ask yesterday during the hearing.
- So, we'll expect to get those written
- 11 questions probably within the next two weeks, and
- then we will be preparing answers to submit back
- 13 to the Committee to close out that hearing record.
- 14 Again, that's all that I have to share.
- We do expect -- we don't know when that we will
- have a similar hearing on the Senate side before
- 17 the Senate Judiciary Committee, an oversight
- hearing for that body. We don't have a date, but
- we're certainly happy to keep you posted when we
- 20 learn more.
- 21 That's all that I have, but I'm open to
- 22 any questions.

- 1 COMMISSIONER GOODER: Great, thanks,
- 2 Kim. Any questions:
- 3 CHAIRMAN CHO: Just an affirming remark
- 4 that it was our pleasure to be there to support
- 5 the USPTO. Many of us, who had never been there
- 6 before, were quite impressed. So, we just want to
- 7 commend you on making a special effort to allow us
- 8 to get there. Thank you.
- 9 MS. ALTON: Oh, you're welcome. It was
- 10 great to have you.
- 11 COMMISSIONER GOODER: Okay, thank you.
- 12 Thank you, Kim. Next, I want to move to Harold
- Ross from NTEU 243.
- MR. ROSS: Good afternoon, ladies and
- 15 gentlemen. Thank you for allowing me to speak.
- 16 First, my name is Harold Ross, President of NTEU
- 17 243. I represent 1300 members of support staff
- 18 throughout Patents and Trademark Office, with
- about 3 or 400, specifically within trademarks.
- 20 For my employees, I'd like to give kudos
- 21 to all of the support staff within trademarks.
- Those offices include the Examination Support

- Unit, Intend to Use Unit, Post-Registration Unit,
- 2 Madrid Protocol Unit, Pre-examination Unit,
- Petitions Unit, the Trademark Assistance Center,
- 4 and the paralegals and information specialists of
- 5 TTAB.
- 6 Our unit does have challenges. Some of
- 7 those challenges include some of the processing
- 8 times for a few of our business units. Most of
- 9 our business units are hitting their numbers, but
- 10 we do have a couple of business units who we are
- 11 concerned about their processing times, and we
- want to work with the Agency to try to improve.
- 13 Those business units include the
- 14 Examination Support Unit, who went from three days
- to processing to 15 days of processing from
- 16 missing corrections. The Pre-examination Unit
- went from three days processing to 83 days
- 18 processing. And, of course, you all know about
- 19 the post-registration issues.
- 20 We have seen post-registration numbers
- 21 increase almost 0 to 80 percent, as far as the
- 22 processing times. So, we are looking forward to

- 1 working with the Agency to try to identify what
- those issues are, resolve those issues, and
- 3 improve the processing times for not only the
- 4 Agency and the public.
- 5 There are also other challenges that we
- 6 are facing. Fifty percent of my workforce is
- 7 eligible to retire within the next five years.
- 8 That is a consideration that needs to be addressed
- 9 and studied.
- There are several system updates
- 11 underway and we are looking forward to
- 12 participating in those system updates and are
- 13 hoping that the agency will include us moving
- 14 forward to have us participate and include our
- input, and there is AI that is currently coming
- 16 aboard here at PTO.
- 17 We are extremely concerned about AI. My
- 18 employees will be impacted by AI, first and
- 19 foremost, because they are the most vulnerable
- 20 employees. But we do want to work with the Agency
- 21 to try to prevent employees from being AI'd out of
- 22 positions. And if AI is to come, we should be

- 1 trying to find things to do with those employees
- who AI is going to work out of a position. So, I
- 3 do look forward to working with the Agency in
- 4 those efforts.
- 5 We also have DEIA issues within our
- 6 business units that we need to identify,
- 7 inequities, non-inclusive, not including us in
- 8 several aspects of work, and not giving us
- 9 accessibility to certain areas. So, again, I do
- 10 look forward to working with the Agency to fix one
- of Ms. Vidal's major aspects of work with just
- DEIA (phonetic), and I do want to thank Ms. Vidal
- for instituting the DEIA here at PTO.
- 14 Lastly, I want to remind the Agency of
- its commitment to PDI and collaboration. When PDI
- and collaboration is done correctly, it limits the
- impacts of negotiating and bargaining because the
- 18 units are there from day one.
- 19 When you do not invite us to PDI, it
- 20 will definitely lengthen bargaining and
- 21 negotiations because you're asking us to catch up
- 22 to what you have already done and that catching up

```
1 usually takes us quite a lot of time because we
```

- 2 have to figure out what the Agency is doing.
- 3 So, I just want to express the
- 4 importance of PDI and the commitment from the
- 5 Agency. I want to let the Agency know that we are
- 6 truly committed to collaborative nature and we
- 7 look forward to continuing working with you guys
- 8 to fix the problems that I have identified. Thank
- 9 you.
- 10 COMMISSIONER GOODER: Thanks, Harold.
- 11 Any questions for Harold?
- MR. ENNS: Well, this is Rod. Harold, I
- just want to acknowledge --
- 14 COMMISSIONER GOODER: Rod, can you get
- 15 closer to your mike?
- MR. ENNS: Sorry.
- 17 COMMISSIONER GOODER: Thanks.
- 18 MR. ENNS: I keep leaning back after I
- 19 turn the mike on. I just want to acknowledge the
- 20 incredible value that your employees, the
- 21 employees in your union provide. I mean this
- 22 operation depends on so many different parts and

```
1 pieces. But the employees in your union are the
```

- 2 backbone. They are the fundamental frontline that
- 3 makes -- that everything kind of drives from.
- And, certainly, from my point of view,
- 5 as a TPAC member, I want you to know that we are
- 6 committed to doing whatever we can to, you know,
- 7 facilitate and we hear and appreciate your
- 8 comments. Thank you, sir.
- 9 COMMISSIONER GOODER: Yeah, I second
- 10 that. Thanks, Rod. Anybody else? (No response)
- 11 No, okay. And, last, but not least, I'll turn it
- over to Jay Besch from NTEU 245.
- 13 MR. BESCH: Thank you, Dave. It's
- 14 always great to be the person between the end of
- the session, and everybody trying to catch their
- plane. But I do appreciate the opportunity to
- 17 speak. First of all, I just want to recognize our
- 18 examining attorneys and interlocutory attorneys in
- our bargaining unit. I represent over 800
- 20 employees in those positions. They all work
- 21 extremely hard to help the Agency meet its goal
- 22 and its mission.

They have and continue to be adaptive

1

```
2
       and diligent in a very dynamic time in trademark
       law, and changes in filing behaviors and
       practices, things that you heard from Montia,
 5
       things that you have heard from Dan. I have been
       here at the Agency for 18 years, and I have not
 6
       seen so much change over the past few years that I
 8
       saw in my 12 years before that.
 9
                 So, it is a very dynamic time and these
10
       employees that I represent have continued to do
11
       their jobs and do their jobs very well, as you can
       by the metrics in our quality. It's an incredible
12
13
       job that they do, and I'm very lucky to be able to
14
       represent those employees.
1.5
                 These employees have also had to adapt
16
       to a lot of changes in technology. Over the
17
       years, you have heard from Glen and Greg about the
```

amount of changes that were going from an old
system that we have been using for nearly two
decades to these new systems which have a lot of
promise but there is also a lot of change that
goes on in those circumstances.

1

2

19

```
most part, so far, and we hope that continues.

You know, and these changes, as you heard from

Glen, this is an iterative thing, so we're working

with minimally viable products that we hope that

our employees will continue to, you know,

presented with new and better technologies that
```

And it's a challenge for them to adopt

and continue their pace, and they do that, for the

10 less errors and we can improve on the product that

help them do their jobs more efficiently and with

- 11 the, you know, external customers, the Applicants,
- 12 and the public deserve and desire.
- So, you know, and I think they're up to
 the challenge. I want to kind of turn to, you
 know, what Director Vidal said earlier today at
 the outset of the session, you know, about our
 involvement in our union's importance to the
- 18 Agency and our union, as the representative of our
- 20 We continue to work with the Office to 21 collectively look at solutions to the challenges 22 the Agency faces. Dan mentioned the pendency

unit, is vital to the Agency's mission.

```
initiative and the ideation -- I'm sorry -- not
```

- 2 the pendency initiative -- I'm sorry -- the
- 3 ideation, the pendency ideation that we're going
- 4 through, that is something that has been a very
- 5 collaborative effort.
- 6 We're working and looking at the
- 7 solutions that can really help our examining
- 8 attorneys efficiently examine, hopefully, address
- 9 pendency, and also improve their, you know, their
- 10 view of work. And I hope that we're able to start
- delivering on some of those work products. I know
- that we're very close and we hope to do that very
- 13 soon.
- 14 So, stay tuned, and I hope we have some
- things for the examining attorneys who might be
- listening right now, know that those things may be
- 17 coming soon. You know, and I think one of the
- 18 things that we're looking for -- and I know that
- we've talked, and we've got some support from the
- 20 Agency on this and on improving our visibility and
- 21 integration into the decision-making processes
- 22 here at the Agency.

```
1 You know, we believe with Director
```

- Vidal's leadership, we will continue working
- 3 towards a really, model labor situation here with
- 4 us and the Office working together and getting the
- 5 best results for both our employees and the
- 6 mission of the Agency.
- 7 So, with that being said, I'm done.
- 8 Hopefully, you all can catch your plans, and I
- 9 appreciate the time to talk. Thanks.
- 10 COMMISSIONER GOODER: Any questions for
- Jay? I know we have some TPAC members who are --
- 12 have to scoot to catch planes.
- 13 CHAIRMAN CHO: Thank you all. Just to
- 14 affirm Jay and Harold, thank you very much for
- expressing the viewpoints. And, you know, as Rod
- said, here at TPAC, we're here to be a resource
- for the entire PTO. So, I just want to reaffirm
- 18 that, so thank you.
- 19 COMMISSIONER GOODER: All right. We
- 20 have one question that was sent into the box, and
- 21 I'll turn it over to Dan. It's a question
- 22 revolved around metrics for the Trademark Academy.

```
1
                 MR. VAVONESE: So, we look at the
 2
       metrics and/or the success of the Academy at any
       of the training of our employees across the board.
       We look at it in terms of performance, you know,
 5
       and so you can tell production and you can tell
       quality, but then you can also -- what's actually
       even more important is the employee experience.
 8
       Are they getting a better experience out of being
       in the Academy at the beginning.
10
                 When it comes to production and quality,
11
       you know, we look at the productivity and we look
       at their performance in the quality area, both
12
13
       objectively and subjectively, and compare it to
14
       prior classes or prior examining attorneys in that
1.5
       first year who were not in the Academy, and we're
16
       seeing very similar numbers in those areas right
17
       now.
                 Where it's really going to make a
18
19
       difference is seeing a few years out, if it really
20
       makes a difference moving forward, and our first
```

class graduated just six months ago. So, we need

some time to gather more data on, you know, are

21

```
they getting up-to-speed, and are they more -- are
```

- 2 they moving more going forward in two, three, or
- 3 four years out in their overall performance.
- But just as important is the consistency
- of the training and are they coming out of the
- 6 Academy with the same mindset as to how they look
- 7 at examination. You know, we have heard issues in
- 8 recent years about consistency, so that is just as
- 9 important is looking at the consistency of how
- 10 they are looking. Generally, trademarks is a very
- 11 gray area of laws, we cannot be 100 percent, but
- we're trying to stay within certain guardrails and
- that's a major focus.
- 14 But on the employee experience side that
- is we are virtually onboarding. Our employees,
- 16 for the most part, are remote, all over the
- 17 country. We have a few that are reporting into
- 18 the office.
- So, in the midst of a new trademark
- 20 Academy, we are also following the pandemic still
- 21 onboarding employees remotely, so making sure that
- the experience in that first year is such that the

```
1 employees are being brought into the environment,
```

- 2 in the culture of trademarks.
- 3 And we have been conducting focus groups
- 4 and surveys in connection with 245, as well as,
- 5 you know, we do evaluate -- they do evaluations of
- 6 the instructors within the Academy so we're
- 7 getting this constant feedback, also about any
- 8 changes or tweaks that we need to make to the
- 9 Academy. And so, we're evaluating those right now
- and then we'll be just having further discussions
- 11 about, you know, do we tweak, you know, a little
- 12 bit, you know, on the lines within, you know, to
- improve, continue to improve the Academy. So
- 14 that's generally how we're measuring the success
- 15 right now.
- 16 COMMISSIONER GOODER: Thank you, Dan.
- 17 That was last question, so back to you, David.
- 18 CHAIRMAN CHO: Thank you. I want to
- 19 always remember, and I save the best for the last
- 20 to send our gratitude and appreciation to the
- 21 entire staff for making this possible, for
- 22 allowing the public to get a glimpse of all the

Τ.	wonderful work you are doing and are upiliting				
2	certain items that we feel would be of interest,				
3	and there are too many names, and I don't want to				
4	mention names because I'll miss somebody, you				
5	know, you always hear that.				
6	But you know who you are, we're seeing				
7	you right now. And I want to just give you, you				
8	know, just a quick applause. (Applause) It				
9	doesn't really capture what you do. This is				
10	extra, extra, extra effort, and I just want you				
11	personally to know it does not go unnoticed.				
12	So, we thank you very much. Thank you				
13	all for participating in our first public meeting				
14	and we look forward to continuing our dialogue to				
15	you in the future. This now concludes the				
16	meeting.				
17	(Whereupon, at 4:02 p.m., the				
18	PROCEEDINGS were adjourned.)				
19	* * * *
