Subject: Suggestions for Satellite Offices

Satellite Office for Mountain And Pacific Region  
Sacramento, CA

Close to UC Davis and Sacramento State Univ.; Only 2 hours away from Silicon Valley and renowned educational institutions like Stanford and Berkeley. Still, has Intel and HP sites nearby. Relatively cheaper cost of living than situating an office in the San Francisco Bay area. Direct flights available to all major cities. Would primarily serve states in Pacific and Mountain time zones. Will also serve patent practitioners in Alaska and Hawaii.

Satellite Office for States in Central Time Zone; South/Southwest  
Austin, TX

Close to Univ. of Texas at Austin.  
Lots of start-up activity. Has established firms like National Instruments and IBM.

About 3 hours away from Dallas, TX (home of Texas Instruments).
