Subject: Satellite office

Hello there, I am an active inventor with a strong appetite for the progression of patent awareness in children, and struggling adults whom have the greatest of intentions.

- 1st. To better serve the "common man" with the process's of filling for a patent.
- 2nd. to create jobs for a better future in America, and it's people.

I am suggesting to have a satellite office in Rhode Island. Newport RI in particular. The smallest State in the country.  
My long term goal with my patent endeavors is to create a community setting, or space for under privileged children, and young adults to come free of charge, and work on building their invention ideas.  
Having a staff of volunteers to assist in every step of the process.

From beginning to end, filling for a trademark ,or patent. We will do so as a non profit, and potentially partake in a percentage of any royalties that may come about.

Please consider this fervently, and concisely as I am a struggling single father going through the daunting phases of figuring out how to bring my invention's to the market.

I have a trademark thus far for my products name and logo, yet still swimming through the massive amounts of information to achieve maximum potential in the marketplace

My Trademarks name is The Wishbone.

Thank you for your time, and efforts.

Kind regards,  
Gregory Emanuel Daffron Jr
