

Patent Center – eCertificate of Correction (eCofC)

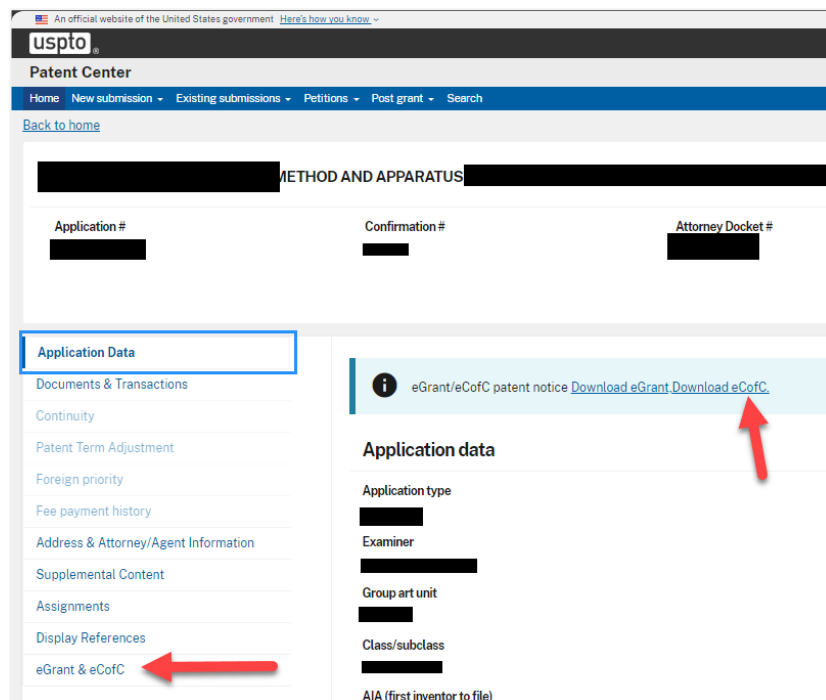

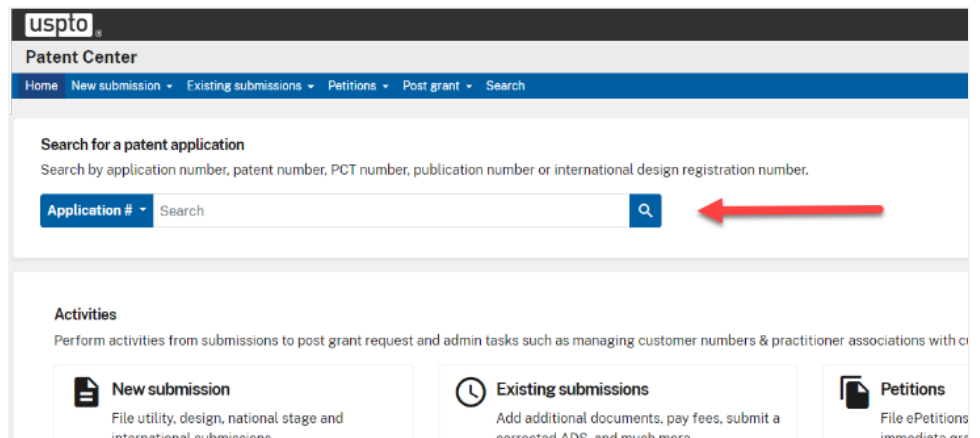

Quick Reference Guide | January 2024

All certificates of correction issued on or after January 30, 2024, will be issued electronically, regardless of whether the patent was issued on paper or electronically. Electronic certificates of correction (eCofC) will be available through Patent Center on the issue date. Patent Center unregistered and registered users will be able to download a PDF of the official certificate of correction and print an unlimited number of copies at any time.

Step 1: Retrieve the application

To retrieve an application file, Patent Center users may select and enter the patent number, application number, publication number, or international design registration number in the search box.

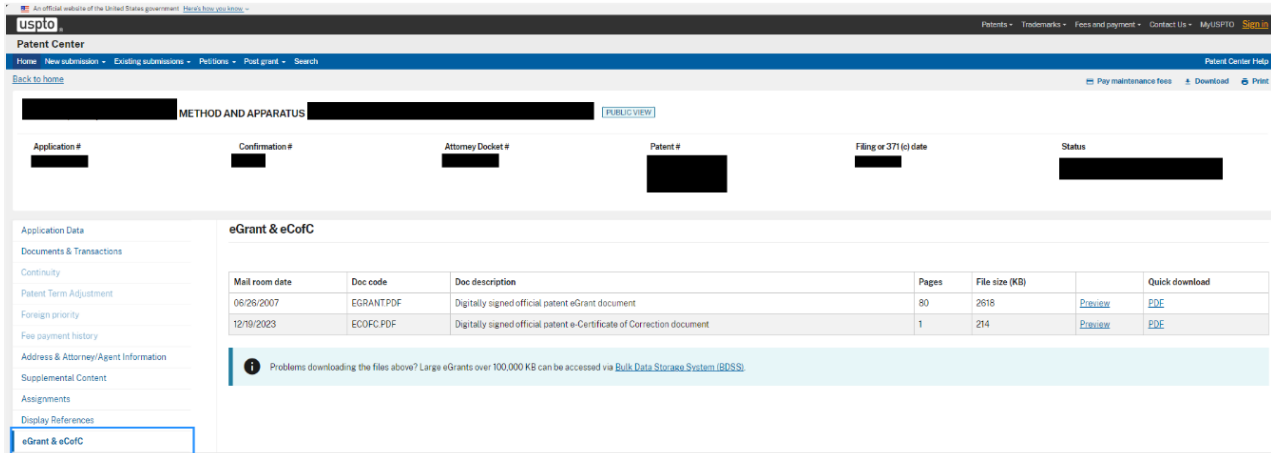

Step 2: Determine if an eCofC is available

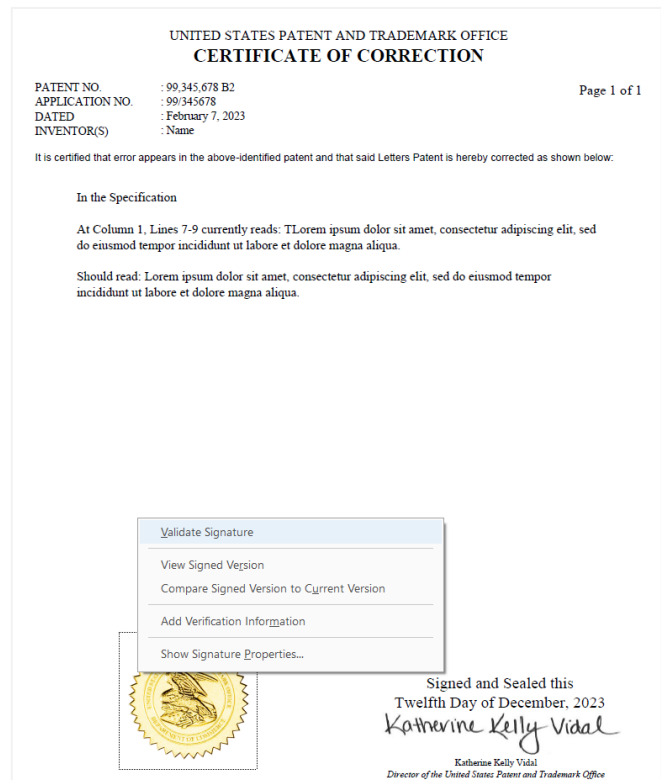

Users will be able to determine if an eCofC is available, by observing one of two visual indicators: (1) an active link in the left-hand panel of tabs labeled eCofC; (2) a banner with an informational icon noting the availability of the eCofC with a direct link to download the eCofC immediately.

Step 3: Preview or download the eCofC

Additional information about the eCofC can be accessed by selecting the active link in the left-hand panel. Information about the eCofC, including mail room date and the number of pages, is displayed. The eCofC may be accessed as a preview or as a quick download. The quick download PDF link will download the eCofC to the user's Downloads Folder and also open a copy within the browser. eCofCs can be printed from the downloaded copy or within the browser (preview and quick download).

The downloaded eCofC will be in PDF format. The USPTO seal on an electronic certificate of correction represents the digital signature. This signature ensures the authenticity of the eCofC by digitally signing the file, which informs the user that the eCofC was created by the USPTO and has not been altered. To fully view and see the digital signature properties and additional details, please download the eCofC file to your computer and open with a PDF-viewing application.

For more information:

For technical issues or troubleshooting with accessing eCofCs, please contact the Patent Electronic Business Center at ebc@uspto.gov or phone at 866-217-9197, Monday - Friday, 6 a.m. - midnight ET.
