

**DOC52PAPT1200013 QUESTIONS & ANSWERS
(QUESTIONS RECEIVED THROUGH 12:00, NOON, LOCAL TIME OF THE
CONTRACTING OFFICER, NOVEMBER 3, 2011)**

1. What is the address(s) to the locations for the Broadband Internet?

Ans: See Attachment A for a listing of connections by city, state, zip code for a recent month. Employees may be added or removed from Telework programs at any time, so the list is always subject to changes.

2. My company is a large purchaser of services from DSL, cable, and fiber companies and will compliment your very remote users with VSAT connection to the LEC. As a result we can provide a very competitive and fully managed solution to PTO while also providing the tools and reports that you need. Have a look at the white paper and consider making this a full and open.

Ans: You have not asked a question, however, this is a small business set aside. As a large business you are encouraged to team with a small business - remembering that the small business as prime is responsible for at least 51% of the total work.
