

Search PTAB

11. Searching in PTAB

PTAB E2E system currently handles the following types of AIA Review Cases:

- Inter Partes Review (IPR)
- Post Grant Review (PGR)
- Covered Business Method Patents (CBM)
- Derivation AIA Review (DER)

The PTAB E2E Search Tool allows searching the metadata of all files and documents stored in the PTAB document repository without having to log into PTAB E2E. See Figure 1 below.

11.1.1 Initiating a Search using the PTAB E2E Search Tool

1. Fill in any of the first four fields with search terms (AIA Review Number, Patent Number, Application Number and/or Party name). **NOTE: At least one of these four fields must be filled in to perform a search.**
2. Click on “I’m not a robot” box. Follow the instructions from the CAPTCHA prompt.
3. Click on “Search”

The screenshot shows the "Search PTAB" interface. It features several input fields: "AIA Review Number", "Patent Number", "Application Number", and "Party Name". These four fields are grouped together and highlighted with a red box. A callout bubble points to this group, stating: "One of these four fields must be filled in to perform a search". Below these fields are checkboxes for "AIA Review/Case Type" (IPR, PGR, CBM, DER), a "Tech Center" dropdown, and checkboxes for "Filing Party" (Petitioner, Patent Owner, Board). At the bottom, there is an "I'm not a robot" CAPTCHA box, a "Clear All" button, and a "Search" button.

11.1.2 Alternate Search Option

Searches can also be conducted by clicking the “Search” option on the top menu bar. See Figure 2 below.

Figure 2: Search option on PTAB Home screen

11.2 Reviewing the Search Results

The search results can be viewed in either AIA Review view (listing each of the cases found in the search) or Documents view (listing each of the documents in a separate row for each of the cases found in the search) with AIA Review being the default view when returning search results. Use the slider to toggle between “**AIA Review**” and “**Documents**” to switch between the two views.

The returned search results view (displayed in AIA Review view by default) shows cases with the metadata matching the specified search terms, as shown in Figure 3 below.

Figure 3: Search results – AIA Review view

Select the “records per page” field to change the number of records per page displayed. The default is 10 records per page

Click on any column heading to change the sort order of the search results based on that column’s data.

11.2.1 Search Results in AIA Review view

Click the “View Documents” button (Figure 3: Search results view) located in the last column to the right to view the documents associated with that particular case.

11.2.2 Search Results in Documents view

Click on “Download All” (see Figure 4) to download all metadata associated with that particular search result OR

Click on the hyperlinked Document Title value (see Figure 4) in any case row to view that particular document attached to a case.

You are seeing the first 2000 results for **AIA Review Number: IPR2012** sorted by AIA Review Number and Patent Number.

Please use the "Primary" and "Filter by" buttons to refine your search.

11.3 Modifying and/or Filtering the Search Results

On the left side of the search results window, under the “**Search PTAB**” section, there are expandable menu options called “**Primary**” and “**Filter by**” as shown in Figure 5 below.

Figure 5: Additional Search Filters

Expand the “**Primary**” option in order to modify the current search. See Figure 6 below.

Expand the “**Filter by**” option in order to enter additional criteria to narrow the search results further. See Figure 6 below.
