Phone: 4084647431

Submitter's Representative: Jeffrey Yeung

Organization: Aleeva Medical Inc.

General Comment

Inventions are key to economic prosperity of America.

Patents of small companies and individual inventors should be protected against predatory approaches of large corporations.

Large corporations often infringe patents of small companies and individual inventors by using their financial power and legal teams to prolong the legal battles, which small companies and individual inventors cannot afford.

Please prevent and stop the predatory behavior to protect the invention spirit of small companies and individual inventors for the well-being of our economy.

Thank you.

Jeff Yeung
