Request for Comments on Discretion to Institute Trials Before the Patent Trial and Appeal Board

Comment On: PTO-C-2020-0055-0001

Discretion to Institute Trials Before the Patent Trial and Appeal Board

Document: PTO-C-2020-0055-0225

Comment from Inventing with Adrian, LLC.

Submitter Information

Name: Adrian Pelkus

Address:

107 Woodland Dr,
Lexington, SC, 29072

Email: adrian@inventingwithadrian.com

Phone: 7604732696

Submitter's Representative: Adrian Pelkus

Organization: Inventing with Adrian, LLC

General Comment

As Founder, CEO, COO and CTO I have helped startup several technology companies including my own - California Product Developers. I am named inventor on seventeen issued U.S. Patents including the "Baby Think it Over" infant simulator, a Thin Film Flexible Solar Cell, the FDA cleared "Jaw Elevation Device" and O2Misly™ Wound Treatment System.

In 2005 I reorganized the San Diego Inventors Forum to help startup entrepreneurs.

A past Entrepreneur in Residence at CONNECT and member of the national IGA (Inventors Groups of America).

I have served on the BOD's of both United Inventors Association of America and US Inventor, organizations dedicated to assisting and educating inventors about their rights.

This year I launched the South Carolina Inventors Forum as a 501c3 to assist inventors.

My fervent wish is to stop all PTABs. We paid the USPTO to be sure our IP was valid and was issued a patent to prove the USPTO did its job investigating my claims were not obvious. Now

having a division of the USPTO dedicated to invalidating issued patents is telling my investors and the whole world the USPTOs work is not guaranteed and the patents can be called worthless and invalidated without question, rebuttal or fair trial.

If this wish cannot be met, I request the following:

I urge adoption of regulations to govern the discretion to institute PTAB trials consistent with the following principles.

I: PREDICTABILITY

Regulations must provide predictability. Stakeholders must be able to know in advance whether a petition is to be permitted or denied for policy reasons. To this end regulations should favor objective analysis and eschew subjectivity, balancing, weighing, holistic viewing, and individual discretion. The decision-making should be procedural based on clear rules. Presence or absence of discrete factors should be determinative, at least in ordinary circumstances. If compounded or weighted factors are absolutely necessary, the number of possible combinations must be minimized and the rubric must be published in the Code of Federal Regulations.

II: MULTIPLE PETITIONS

- a) A petitioner, real party in interest, and privy of the petitioner should be jointly limited to one petition per patent.
- b) Each patent should be subject to no more than one instituted AIA trial.
- c) A petitioner seeking to challenge a patent under the AIA should be required to file their petition within 90 days of an earlier petition against that patent (i.e., prior to a preliminary response). Petitions filed more than 90 days after an earlier petition should be denied.
- d) Petitioners filing within 90 days of a first petition against the same patent should be permitted to join an instituted trial.
- e) These provisions should govern all petitions absent a showing of extraordinary circumstances approved by the Director, Commissioner, and Chief Judge.

III: PROCEEDINGS IN OTHER TRIBUNALS

- a) The PTAB should not institute duplicative proceedings.
- b) A petition should be denied when the challenged patent is concurrently asserted in a district court against the petitioner, real party in interest, or privy of the petitioner and the court has neither stayed the case nor issued any order that is contingent on institution of review.
- c) A petition should be denied when the challenged patent is concurrently asserted in a district court against the petitioner, real party in interest, or privy of the petitioner with a trial is scheduled to occur within 18 months of the filing date of the petition.
- d) A petition should be denied when the challenged patent has been held not invalid in a final determination of the ITC involving the petitioner, real party in interest, or privy of the petitioner.

IV: PRIVY

- a) An entity who benefits from invalidation of a patent and pays money to a petitioner challenging that patent should be considered a privy subject to the estoppel provisions of the AIA.
- b) Privy should be interpreted to include a party to an agreement with the petitioner or real party of interest related to the validity or infringement of the patent where at least one of the parties to the agreement would benefit from a finding of unpatentability.

V: ECONOMIC IMPACT

Regulations should account for the proportionally greater harm to independent inventors and small businesses posed by institution of an AIA trial, to the extent it harms the economy and integrity of the patent system, including their financial resources and access to effective legal representation.
