General Comment

I am writing you as an inventor, patent owner, and business owner.

END the PTAB -- it's just another court that thieves use to try to get away with stealing ideas because ONLY THE INVENTOR CAN LOSE IN THE PTAB.

If the thief's attack fails, they just go make the same attacks in Federal Court.

The result is that litigation costs have skyrocketed so much that very few inventors can afford to defend their rights, and contingency attorneys almost never take patent cases.

The entire AIA should be repealed, but absent that at least end the PTAB.
