Name: James Moore

General Comment

Unfortunately, I am not a lawyer and I did not understand a lot of the content of this request for comments. However, I have a strong opinion I would like to voice regarding America's patent system. America's greatest inventions are seeded in the individual inventor. Once they reap the rewards of their inventions, they must not be allowed to stifle inventions by other inventors, Our big corporations were often started from small beginnings and grew, which is great for America. That provides jobs, commerce, tax revenue, etc. However patent trolls, whether they be legal departments of those large corporations or someone who purchased rights to a poorly-concocted idea or put no effort into developing it, must not be allowed to snatch up the labor-invested ideas of true American (or other) inventors just because the former has deeper pockets. Americans still invent stuff and innovation must be encouraged in order to hold on to our world leadership in innovation.
