

Best Practices to Avoid Common DOCX Warnings and Errors

Warnings or Errors

Recommendations or Suggestions

The attached document contains fonts that are not recognized by the system. Please correct the fonts in the document before proceeding.

To prevent this error, please use the recommended fonts listed on our [DOCX information page](#).

Word count in abstract section is over 150 words.

To prevent this warning please use a word count tool if available and ensure the number of words in the abstract is 150 words or less.

The margins of the attached document do not meet USPTO rules. This may cause processing errors or delays.

To prevent this error, please make sure your margins meet the USPTO requirements. [See Patent Rules 1.52](#).

Non-numerical claim numbers were detected. Please correct the document and reattach. You can view the location of the warnings/errors in docx here.

This warning is usually caused when the claim numbers are included brackets and/or are not followed by a period. Having steps starting with brackets/parentheses or letters within the claims may also generate this warning. Please see the sample templates on our [DOCX information page](#) for an example of properly formatted claim numbers.

This document contains user information fields and cannot be processed.

This error is usually caused by an automated field that is not allowed. Please review your document for any automated fields and remove before proceeding with filing.

Only one specification document is allowed.

This error is usually caused when filing a preliminary amendment with your initial filing. Please only file the initial specification during the initial filing and then file the amended specification or English translation as a follow-on.

This document contains fields that reference bookmarks and cannot be processed because bookmarks are not allowed.

This error is caused by a reference bookmark that is not allowed. Please review your document and remove any fields that reference bookmarks.

Best Practices to Avoid Common DOCX Warnings and Errors

Warnings or Errors

Recommendations or Suggestions

The orientation of the document is not portrait which may not be rendered correctly by the USPTO. Please correct by changing the orientation to portrait.

Landscape orientation documents are not allowed. Please remove the uploaded document and change it to portrait orientation and then re-upload to avoid this error.

The document contains OLE objects that are currently not supported. These objects may not be visible in your application documents.

Please review/remove your embedded object or image and re-upload a supported OLE object to avoid this error. Supported OLE Objects include Visio.Drawing.11, Equation.DSMT4, ACD.ChemSketch.20, ChemDraw.Document.6.0, Equation.3. A complete listing is located in the [DOCX user guide](#).

This document contains content controls and cannot be processed.

This error is caused by a content control that is not allowed. Please review your document and remove all content controls.

Bookmarks were found and have been removed.

Text decorations were found and have been removed.

Hidden items were found and have been removed.

Comments were found and have been removed.

Dynamic dates have been converted to static dates.

Bookmarks, text decorations, hidden items, and comments are not allowed and dynamic dates are converted to static dates. These elements are also automatically removed. To prevent these warnings please do not include these elements in your DOCX document.
