U.S. Department of Commerce Privacy Impact Assessment USPTO Patent Cooperation Treaty Search Recordation System (PCTSRS)

Unique Project Identifier: PTOC-018-00

Introduction: System Description

*Provide a description of the system that addresses the following elements:
The response must be written in plain language and be as comprehensive as necessary to describe the system.*

(a) a general description of the information in the system

The Cardinal IP (CIP) Patent Cooperation Treaty Search Recordation System (PCTSRS) is a system that performs Patent Cooperation Treaty (PCT) searches and written opinions on behalf of the United States Patent and Trademark Office (USPTO). PCTSRS provides authenticated employees access to Patent Cooperation Treaty (PCT) applications. The purpose of this system is to support the USPTO's international application or PCT application process. The PCT provides a unified procedure for filing patent applications to protect inventions in each of its Contracting States. PCTSRS facilitates PCT searches and enables CIP employees to submit an accompanying written opinion regarding the patentability of the invention in question.

PCTSRS production servers are located at a remote Tier III data center. The CIP data center facility includes physical security implementations including proximity card access controls, hand-geometry biometric locks, video surveillance, and building security. The PCTSRS system consists of several servers for web, email, database, backup, and directory services, as well as local workstations located at CIP's corporate offices, that store, process, and/or transmit USPTO data in the form of Patent Cooperation Treaty applications. PCT application documents are transferred to CIP directly from USPTO via a secure connection.

PCTSRS is only accessible by authenticated employees from within the CIP network. There is no public access to the PCTSRS system. PCT opinions are submitted from CIP directly to the USPTO via a secure connection.

(b) a description of a typical transaction conducted on the system

PCT application documents are transferred to CIP directly from USPTO via a secure connection. A CIP employee is assigned a PCT application to search based on their area of expertise. The CIP employee performs the PCT search and submits an accompanying written opinion regarding the patentability of the invention in question. The PCT opinions are submitted from CIP directly to the USPTO via a secure connection.

(c) any information sharing conducted by the system

All PCT applications and PCT opinions are shared only between CIP and USPTO via a secure connection.

(d) a citation of the legal authority to collect PII and/or BII

35 U.S.C. 1, 2, 6, 41, 115, and 261; E.O. 9424; 5 U.S.C. 301; 15 U.S.C. 1113

(e) the Federal Information Processing Standard (FIPS) 199 security impact category for the system

Per Federal Information Processing Standards (FIPS) 199, PCTSRS is categorized as a Moderate security impact system.
