	Not Compliant	13	.3%	12	.4%	1	.6%	0	.0%
	All Reviews	3988		3099		162		727	

The Office's 35 USC 101 Statutory Compliance metrics are based on reviews assessing patent eligibility as well as utility, where the reviews were conducted by OPQA on every Office action type from all technologies. An action that does not reject a claim under a given statute is considered to be compliant as long as the reviewer does not identify an omitted rejection. For example, the overall compliance metric for 35 USC 101 includes as a compliant action many actions from technologies that are clearly patent eligible under current law, such as mechanical devices, because no 35 USC 101 rejection was made and no rejection was warranted. Also, the number of instances of non-compliance under the overall metric will not necessarily be the sum of the number of instances of non-compliance under each of the breakdowns because a single case that is non-compliant with respect to both 35 USC 101's eligibility and utility requirements will be counted only as a single instance of non-compliance in the overall metric.
