The Office's 35 USC 112 Statutory Compliance metrics are based on reviews assessing patentability under 35 USC 112(a) written description, 35 USC 112(a) enablement, and 35 USC 112(b), where the reviews were conducted by OPQA on every Office action type from all technologies. An action that does not reject a claim under a given statute is considered to be compliant as long as the reviewer does not identify an omitted rejection. As such, the compliance metric for 35 USC 112 includes as a compliant action any action in which no rejection was made and no rejection was warranted. Also, the number of instances of non-compliance under the overall metric will not necessarily be the sum of the number of instances of non-compliance under each of the breakdowns because a single case that is non-compliant with respect to, say, both 35 USC 112(a) and 35 USC 112(b) will be counted only as a single instance of non-compliance in the overall 35 USC 112 metric.
