Quick Start Guide

EFS-Web

Updated August 17, 2008

Introduction

Welcome to EFS-Web, the United States Patent and Trademark Office's safe, simple, and secure means of electronically submitting patent applications and documents. This Quick Start Guide will provide you with the information you need in order to rapidly understand how to file patent applications electronically, including a brief overview of the process and screen shots that identify critical components of the product.

Before you file electronically there are a few important items you should know:

- EFS-Web is a web-based tool that can be accessed from any web-enabled computer anywhere in the world.
- EFS-Web is a patent application and document submission solution that utilizes standard web-based screens and prompts to enable you to submit a portable document format (PDF) file directly to the USPTO.
- EFS-Web is not a patent application authoring tool. It allows you to use the same tools and workflow processes used to produce paper-based patent application documents.
- EFS-Web is legally equivalent to paper-based patent application and document submission methods and provides filers with the same protections as traditional methods. EFS-Web provides you with a receipt that serves as legally binding proof of the date and time of your submission. (You still will receive a paper filing receipt mailed from the Office of Patent Application Processing).
- EFS-Web has been designed to be simple to use. In a matter of minutes, you can complete a submission and receive electronic confirmation that it has been received by USPTO. It incorporates important new safeguards that alert you to possible problems with your patent application before it is submitted, providing a flexible and forgiving platform that can ease the submission process.
- EFS-Web allows you to submit industry-standard PDF (portable document format) files. Although PDF is an open standard, not all PDF files are the same. There are important distinctions you must know about PDF files before you start the submission process. Information about compatible PDF files is detailed in the Quick Start Guide and in other documentation, and we strongly recommend that you read this information in its entirety.
- EFS-Web incorporates e-commerce capabilities that give you multiple options for paying for your patent application or document submission.

EFS-Web Sign On

EFS-Web allows both the Registered and Unregistered user to file patent applications electronically.

Web Access

A computer, an Internet browser and an Internet connection are your tickets to electronic filing. Users can access EFS-Web by navigating to the www.USPTO.gov website and clicking on "File online in EFS-Web" under "Patents".

Filing Types Accepted

EFS-Web accepts new Accelerated Exam, Design, Design Reissue, International Application for filing in the US receiving office, Provisional, Reexam (*Ex Parte and Inter Partes*), Utility, Utility Reissue and National Stage applications under 35 USC 371. Both Registered and Unregistered eFilers may file a Petition under 37 CFR 1.378(c) and a Petition to Make Special based on Age.

[Review](#)

Please Upload & Validate before Review

Click 'Upload & Validate' to automatically check for compliance and to be notified of errors and warnings before submission.

WARNING! EFS-Web can validate a maximum of 20 files uploaded at one time. Up to 60 documents can be uploaded per submission.

WARNING! EFS-Web can upload one sequence listing (txt) file up to 100 MB per submission. The sequence listing file must be uploaded separately from other types of files. If the sequence listing does not conform to the ST.24 or ST.25 format, a warning will display.

WARNING! You must click Upload and Validate prior to 'Review' or the attached files will be deleted.

TIP! If your document could not be validated, an error message will appear informing you of the reason for the validation failure. Attaching a document that is not a PDF, TXT or PCT ZIP will cause a failure to validate, as will not choosing a document description. This field is equipped with a drop down list of choices. If you cannot see the drop down, please scroll right and make your selection.

REMEMBER! You can correct any errors by clicking the 'Attach Files' button.

MULTI-DOC PDF

PDF files that contain multiple documents must be separately indexed to be labeled properly in the USPTO Image File Wrapper. For example, a patent application PDF file may contain a specification, claims, abstract, and drawings that should be listed as separate documents in the IFW. Enter the page ranges for each section so that the documents are properly displayed in the IFW. Amendments should be separated as well.

At this point you can either, add additional sections of documents by clicking ‘Add Document, additional documents by clicking ‘Add File or ‘Upload & Validate’ these documents.

REMEMBER! For new submissions, there must be at least one attachment other than the EFS-Web generated fee sheet.

TIP! You are limited to 60 documents per submission at 25MB per file. (or 60 lines if multi-doc included)_

WARNING! If you file a new submission and do not include a PDF file with a document description of “specification”, it could result in a delay in processing of your submission.

CALCULATE FEES

Fees are dynamically generated based on the values entered by the user.

- Indicate the business size (large or small entity)
- Select all applicable fees

NOTE! You may submit your application without generating fees at this time by clicking the ‘Confirm/Submit’ link or the ‘Continue’ button, remembering that extra fees may be incurred.

Click 'Calculate' to see fees and 'Continue' to proceed to the next section.

WARNING! If you click 'Cancel' on any screen during this process a message will inform you that you are about to delete your entered information, and ask if you really want to cancel. Upon clicking OK, you will be returned to the login screen.

SUBMIT APPLICATION

Confirm and Submit marks the last time before submission that the user will be able to:

- Review and confirm or edit application data
- Edit fees associated with the application and
- Remove or edit the documents associated with the application
