

# Percent Reporting “Good” or ‘Excellent” Quality of Prior Art by Technology Field

These results show that in FY16-Q3 the proportion of customers in the Chemical, Electrical, and Mechanical technology fields were more likely to report that the quality of prior art was “good” or “excellent” than “poor” or “very poor”. Customers in the Electrical field (44%) are less likely to report “good” or “excellent” than customers in the Chemical (59%)\* or Mechanical (56%)\*\* fields.
