Overview

- What subject matter is protected by a design patent
- Statutory requirements for patentability
- Scope of protection: what is a design?
- Design patent drawings
  - Requirements for drawings
  - Content of drawings
  - Multiple embodiments in drawings
- Multiple patents for segregable parts
- Parts of a design patent application

Design vs. Utility

• Design Patent – protects the way an article looks (35 U.S.C. § 171)
  • Protects appearance
• Utility Patent – protects the way an article is used and works (35 U.S.C. § 101)
  • Protects functional characteristics

35 U.S.C. § 171

*Patents for Designs*

Whoever invents any new, original and ornamental design for an article of manufacture may obtain a patent therefor, subject to the conditions and requirements of this title.
Requirements for Patentability

Designs must be:

- new,
- original,
- ornamental, and
- for an article of manufacture

Email questions to: inventorinfochat@uspto.gov
Design “for an article”

Disembodied Design

Not Acceptable

Embodied Design

Scope of Protection: 35 U.S.C. § 171

A Design May be Directed to Less than an Entire Article

Email questions to: inventorinfochat@uspto.gov
Scope of Protection

- Only one claim is permitted
  - Protects the overall visual appearance of the design “described” in the drawings
- 15 year term from date of issue
- 6 month period for foreign priority benefit
- No provisional Design applications

Variants of a Design

Variants of a design may be included in the same patent when the differences are “obvious” in view of case law or the prior art of record.

Exact proportioning involves only ordinary skill.

In re Stevens, 81 USPQ 362 (CCPA 1949)
Multiple Design Patents

Separate patents can be used to receive protection for separate portions

US D580,387S

US D581,922S

Email questions to: inventorinfochat@uspto.gov
Multiple Design Patents

Separate patents covering variants of a design provides thorough protection. Each design is considered “patentably distinct.”

When Applying for a Design Patent...

What Do I Submit?

A design patent application has essentially the elements required of an application for a utility patent. The arrangement of the elements of a design patent application and the sections of the specification are as specified in 37 CFR 1.154.
Parts of a Design Application

**Drawings:**
- Show all parts of the design you claim
- Perspective is helpful
- Show parts not claimed with broken lines

Parts of a Design Application

Specification:

• Describe each figure

• Describe broken lines

• Include claim

SPECIFICATION

Be it known that I, Carlos E. Puerto, citizen of the United States of America, have invented a new original and ornamental design for a HELMET BAR B QUE of which the following is a specification, reference being had to the accompanying drawing, forming a part thereof, wherein:

Figure 1 is a top plan view of a helmet bar b que;

Figure 2 is a right elevational view thereof;

Figure 3 is a bottom elevational view thereof;

Figure 4 is a front elevational view thereof;

Figure 5 a left elevational view thereof;

Figure 6 a rear elevational view thereof; and

Figure 7 is an isometric view thereof, showing my design.

The broken lines are for environmental purposes only and form no part of the claimed design. The design shown is not to be limited to any particular size and may be scaled larger or smaller.

I Claim:

The ornamental design for a helmet bar b que as shown and described.
