

New Release of ESTTA 4/23/16

In response to stakeholder comments during last year's ESTTA Users Forum, the TTAB is pleased to announce an upgrade to ESTTA, the Board's electronic filing system. The upgrade includes the following new features:

- Increased number of grounds listed on the ESTTA filing forms for Notices of Opposition and Petitions for Cancellation.
- An option to view an attachment once it has been uploaded and before it has been submitted through ESTTA.
- Additional tips regarding attachment size and format, as well as a pre-filing checklist, on the "Attachment screen" in ESTTA.
- A modified general filing form for inter partes matters to be used for motions not listed among the selections available.
- Automatic transmission of an ESTTA receipt, not only to the filer, but also to all parties whose email addresses are of record in the proceeding.
- A "Save" feature to allow users to circulate a form for review and editing before submission through ESTTA.
- The required declaration is now part of the ESTTA form for a motion to amend a registration.
