

Dear : Commisioner or Under Secretary,

It is imperative that the Patent Delivery system be accelerated but not lack Quality so therefore a Quality Assessment Board should be established to randomly assess Examiner quality procedures based MPEP as

well as Quality of Office Actions in there procedures to prosecute first office procedures or actions. When other examiners review examiners prosecutorial actions it could increase the quality of delivery.

Assessing in the Office actions to potential patentee's procedures for Corrections as well as outlining guidelines to where they can find help in the steps and procedures using MPEP etc.

Sincerely,

Roderick Whitfield
