---

Director Iancu:

As an inventor with my name on 3 patents and an investor in several innovative companies severely hurt by the deterioration of intellectual property protection, I strongly support, and urge adoption of, the proposed rule that is the subject of your May 3, 2018 notice regarding PTAB's use of the Phillips claims construction standard and of prior claim constructions.

The proposed rule change should be adopted as soon as possible for many of reasons, including beginning the restoration of our patent system to it's #1 position and global preeminence, encouraging innovation, and fulfillment of the spirit and original purpose underlying the AIA.

Of critical importance, the new rule should be implemented so as to apply to any USPTO post grant proceeding that is at any stage, including those that are the subject of a final order and that are now, or sufficiently recent that they could be, in the appellate process. More specifically, USPTO should, sua sponte, vacate all PTAB orders that have been issued for all post grant proceedings in which any claims construction standard other than Phillips was used, in which the result was adverse to the patent-holder, and where the order has been appealed (and remains in any stage thereof) or remains subject to appeal. This implementation step, also, is necessary in order to achieve the goals of the AIA, basic fairness, conservation of litigation expense, and for purposes of judicial economy.

Finally, I urge also that the rule change be expanded to be made applicable to all post grant reviews/reexaminations/IPRs(regardless of their statutory basis), so that whenever a claims construction is at issue in any USPTO post grant proceeding, under any statute, only one standard, Phillips, is used, and with due consideration being given to prior claims constructions.

Thank you.
