Dear Mr Iancu,

It is refreshing to know that there is someone in the USPTO finally working on behalf of the independent inventor. Especially since you are at the top of the ladder. This country's economy is dependent upon the little guy that makes a product from his own idea, hires workers, invest in manufacturing, pays taxes, etc.etc.

For some large corporation to come along and steal someones idea and in most cases, livelihood, is disgusting to say the least. Let alone criminal. This is a country of laws and correct laws should be upheld and bad laws should be abolished. Your fight with congress proves that these laws are corrupt. There should not be any argument as to what you are trying to do. I applaud you.

I was in Washington in April with the Inventors Groups of America led by Stephen Key. I heard your speech and thought it was right on the mark. I and my association are behind you 100 percent.

Thank you on our behalf.

Keith Waters
President: Tennessee Inventors Association
