**Subject:** Revised Patent Subject Matter Eligibility

G'day, Gentlemen...

This is to let you know I fully support the 2019 Revised Patent Subject Matter Eligibility Guidance.

I speak not only for myself but the the entire body of the American Society of Inventors, where I was a Board of Directors for over 15 years, and the President for 5 more years.

I also speak for the Philadelphia Inventors Alliance, where I am the current President.

Other than large corporations and lawyers who don't like this guidance, there is no downside. It makes clear patent law and avoids costly litigation (yes, taking food from the lawyers tables - no wonder they are fighting so hard against it).

It helps the smaller independent inventors from fear of ungodly litigation costs, and creates a much more open environment for invention and innovation.

I won't go into the legislative part - that it doesn't expand on the Supreme Court holdings in Alice or recent lower court rulings - I suspect you know all that.

Please count this - and the thousands of small independent inventors who will benefit from this - as our many votes for full support of the 2019 Revised Patent Subject Matter Eligibility Guidance.

Thank you,

Jeffrey Dobkin  
President, Philadelphia Inventors Alliance  
Past President, American Society of Inventors (5 Years)  
Past Board of Directors, American Society of Inventors (15 Years)
