Subject: Patent laws

Gentlemen,

Owning my patents is like owning a house along with the property it sits on. It is my property.

New laws seem to say that my property is up to the judgement of someone else and this is not Constitutionally correct.

Our great country was built on individual innovation and patent laws that encouraged that innovation. My patented idea was mine to to invest and grow.

Please consider our nation and my personal property as you reset the patent laws.

God bless, Pete Lefferson
