Subject: Mr Iancu You have my surport

Good Day Mr Iancu;

Im like many out there that have been robbed by monsters like Apple and Amazon in my IP, they own the game, a small patent holder does not have the money to fight them. Please help and give small inventors their powers back, please help and remove eBay and the Alice rulings. Its been 10+yrs of misery, we could of been light years ahead if we had a patent protection and a system that worked for small patent holders. Small Inventors and IP holders need to get paid and we must penalize and deter companies like Apple and Google from ignoring in paying licensing fees for an IP they did not create.

I thank you for all that you have done for small inventors and IP holders and hope you continue this fight.

Its time IP holders get paid.

Sincerely;

John Milkovic
IP investor
