Subject: Stronger and "make sense" US patents

Dear Gentlepersons:

My name is Martin Nguyen. I'm the inventor and I'm writing to support the 2019 Revised Patent Subject Eligibility Guidance for the reason that I firmly believe the US will have a much stable and stronger economy with patents that can be fairly protected for every inventors. With the present US patent law, many "small" inventors like myself are discouraged and disappointed because we don't have much protections when we face with large and financial strong companies, particularly from foreign based companies who would be more likely to "win over" US companies.

Please take it into consideration that the US economy depends on small businesses, and small businesses are mainly owned and operated by small operators. So, please consider the 2019 patent revision because we do need helps in protecting our own investments; starting out with our own ideas.

Sincerely,
Martin Nguyen
