Subject: Virnetx

Virnetx has won 3x by jury proving there patents are being used by Apple. The patents were developed by the CIA and then sold to Virnetx. These patents were proven at the time the CIA developed them. This is a system that Apple have stolen from Virnetx and used without payment for years. Apple keeps choosing to fight even though they know they are stealing someone else patent. This shows the system is broken, when large corporation with large legal teams and massive amounts of money are buying and manipulating the patent system. Thank you
